The John A. Salzer Seed Co's. Plant and Cliffwood Farms

**PRODUCERS
OF
QUALITY
SEEDS**

**DISTINCTLY
A
HOUSE
OF
SERVICE**

GREETINGS TO OUR FRIENDS AND PATRONS:

In presenting this, our 56th catalogue, it is our earnest desire to emphasize Salzer's as a Producer of Quality Seeds, and Salzer's as a House of Service.

QUALITY

Although our constant aim is, and has been always, to improve the quality and trueness to type of our seeds, their hardness and their virility, yet every single purchaser of Salzer's Seeds has the added comfortable assurance, that the State Laws of Wisconsin require that all seeds sold in this state and shipped from this state, meet a certain definite germination test. *You are protected*, Mr. Farmer, Mr. Gardener, when you send your order to the House of Salzer, for you know that the seeds sent to you must be virile and must grow. We are happy to add, that not only do we meet every required state test, but in every single instance our seed tests EXCEED the state germination requirements, and thus further insure you as to quality.

Every farmer and gardener knows the value of *selected seed*, therefore, if you want the best, the very best in seeds and plants, we solicit your order, knowing Salzer's Seeds will bring you a successful crop.

SERVICE

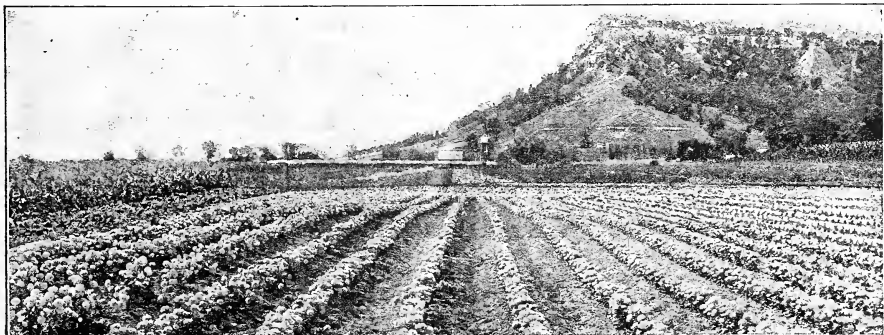

Only too often, when a package, ounce, pound, or more of seed is purchased, little thought is given to the service behind the transaction. With us it is not enough to merely *produce* seeds of quality, but we maintain at our Cliffwood Farms over thirty acres devoted exclusively to the testing of every variety of seeds we offer, and similar varieties from competitive seed houses. From these tests we determine their vigor, adaptability, hardness, productiveness, purity, and trueness to type and the best strains to list in our catalogue.

SPECIAL NOTICE

We have just finished a four months' survey and analysis of our business, in which every department has undergone a thorough reorganization. We have but one ultimate idea in view, viz.: The prompt and accurate shipment of every order with the best seeds that grow. We have so improved our facilities in every possible way that we are prepared to render the most efficient service to our customers.

PRICES

The farmer and the seedsmen are so closely linked together in their similar occupations that the troubles of one are the problems of the other. We fully appreciate this when establishing values and prices. "Maintaining Quality" is our slogan, but we have priced everything as low as values will permit.

SALZER'S DOLLAR VEGETABLE COLLECTION

25 PACKAGES, POSTPAID, \$1.00

COLLECTIONS ARE PUT UP IN ADVANCE OF THE SEASON AND CANNOT BE ALTERED
No. 1565

The quality of the seeds in these collections are of the same high standard that we sell separately in packages, ounces and pounds. We are able to sell at these much reduced prices because we can pack and assemble by machinery in large quantities; because we can put them up during November and December before the busy season begins; because it enables us to give employment to our help during the dull season. The same liberal guarantee applies to our collections as applies in the guarantee above to all of our garden seeds.

SHOP BY MAIL

POSTPAID PRICES APPLY TO EVERY POINT IN THE UNITED STATES

TERMS: Cash with order. Remit in manner that suits your convenience. If seeds are to go by mail always add postage when ordering quantities not listed at postpaid prices. If your nearest Freight or Express Office is a prepaid station, enclose sufficient money to prepay charges or give name of nearest open station. All seeds are sold "sacks weighed in."

PRICES: All prices in this catalog subject to change without notice. Prices quoted "By Express" or "By Freight" means transportation "At Purchaser's Expense."

CONDITIONS OF SALE: In common with all seedsmen we, The John A. Salzer Seed Co., do not give, and our employees are forbidden to give, any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they must at once be returned and money will be refunded.

PARCEL POST RATES

From the 4th to 8th Zone Seeds or Plants Weighing 10 Lbs. or More Usually Go About as Cheap by Express. (Poisons cannot be sent by mail.)

1st Zone: 5c for the first lb., 1c for each additional lb.
2nd Zone: 5c for the first lb., 1c for each additional lb.
3rd Zone: 6c for the first lb., 2c for each additional lb.
4th Zone: 7c for the first lb., 4c for each additional lb.
5th Zone: 8c for the first lb., 6c for each additional lb.
6th Zone: 9c for the first lb., 8c for each additional lb.
7th Zone: 11c for the first lb., 10c for each additional lb.
8th Zone: 12c for each pound or fraction thereof.

Parcel Post packages must not exceed 70 pounds in weight for the first three zones, and 50 pounds for the other zones. Parcels of seeds, bulbs, and plants weighing 8 ounces or less are available at the rate of 1c for every two ounces, regardless of distance; if weight is more than 8 ounces the pound rate applies.

PARCEL POST ZONE OF EACH STATE

Below we have arranged each zone according to states. This enables our customers to tell at a glance in which zone they live and how far they are from La Crosse, Wisconsin, according to zones.

A WORD TO MARKET GARDENERS

We publish a Market Gardener's Catalog, which is ready for mailing at the same time as this catalog. It gives special prices to Gardeners who order in large bulk quantities. Many thousands of the largest and leading Gardeners of the country come to us for their seeds, for they know from experience that Salzer's Seeds are reliable, dependable, of stronger vitality, true to name and of unexcelled quality.

VEGETABLES

To prospective buyers we hold out the same safeguards our old patrons enjoy—that we guarantee Salzer's Garden Seeds to be of high germination, high purity, true to type and the best that money can buy, satisfaction guaranteed, or purchase price refunded. Try Salzer's Seeds in 1924.

ASPARAGUS

See color illustration, page 33.

Asparagus is rapidly becoming one of the most popular garden delicacies grown. Where but an odd individual or two grew asparagus a few years ago, there will be found hundreds cultivating it today.

RUST-PROOF WASHINGTON

This is the new Rust Proof Asparagus, all the garden and farm magazines are writing about. It is the result of fifteen years plant breeding by the U. S. Bureau of Plant Industry to produce a high yielding rust resistant strain of Asparagus. This is a very tender, large growing variety and the finest flavored and best asparagus so far introduced.

RUST PROOF WASHINGTON. 6—Pkg., 15c; oz., 50c; ¼ lb., \$1.50; lb., \$4.50, postpaid.

CONOVER'S COLOSSAL. Very rich flavor. Vigorous and tender. Crown does not divide like most types.

3—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.25, postpaid.

SALZER'S EARLIEST ARTICHOKE

A delicious vegetable. The blossom is cooked and prepared like asparagus. Plants set in any good soil with slight covering in winter will remain in bearing several years. **11—Pkg., 10c; oz., 75c, postpaid.**

CHIVES (Schnittlauch)

Every vegetable grower should become acquainted with this plant. It is extremely hardy, being a perennial; will grow for years, for this reason it is exceptionally useful as a border or hedge plant. Has a clover shaped violet colored blossom that is very attractive. The green leaves are highly prized for seasoning soups, salads and stews. The provident housewife always has a few clumps in the garden. The flavor resembles very much that of an onion. We recommend the setting out of clumps, rather than the planting of seed. All our chive plants are grown by ourselves on Cliffwood Farm.

362—Pkg., 10c, postpaid.
4105—CHIVE PLANTS (Cliffwood Grown), each, 20c; dozen, \$2.25, postpaid; large clumps, 50c, postpaid.

CRESS

UPLAND CRESS—Is ahead of all other early greens in the spring by fully three weeks. Has a crisp, tart taste, and is relished as a salad.

435—Pkg., 10c; oz., 30c, postpaid.

FULL CULTURAL INSTRUCTIONS ON EVERY PACKAGE

Beans *(Phaseolus Vulgaris)*

GREEN-PODDED BUSH VARIETIES

SALZER'S COLOSSAL STRINGLESS

This famous strain of the Green Podded varieties still remains in a class of its own, and has yet to be equaled. It is the finest in existence. It is the most productive, is finely flavored, is very meaty, very tender and very brittle, is entirely stringless and has a rich dark green color. Pods are slightly curved and run very uniform in size and shape. Matures in about 50 days. This variety has a delicious flavor and is exceptionally good for canning, retaining its color very well when cooked. It is unusually hardy and vigorous. Free from rust and mildew.

Salzer's Colossal Stringless is our favorite for our own table use. We believe it unequalled both for house use and for the market, and the heavy demand for this variety indicates that it is giving the utmost satisfaction. (See illustration.)

20—Pkg., 10c; ½ lb., 25c; lb., 40c, postpaid. Not prepaid: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$3.90; 30 lbs. (½ bu.), \$7.00.

SALZER'S BOUNTIFUL STRINGLESS

For Color Illustration See Page 33

A very hardy grower and a heavy producer. It is free from rust and mildew, stringless, and bears for a long time. Ranks almost as high as Salzer's Colossal Stringless, and like it, is very good for the market, being very tender, brittle, stringless, and finely flavored. It is a trifle earlier, maturing in about 45 days.

Pods are about seven inches long, but are straight and flat, and light green in color. (See illustration below.)

18—Pkg., 10c; ½ lb., 20c; lb., 35c, postpaid. Not prepaid: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 30 lbs. (½ bu.), \$6.00.

SALZER'S EXTRA EARLY TENDER VALENTINE

A green podded variety of strong, compact bush growth, extra early, matures for the table in about five weeks after sowing. Pods are about four inches long, creased in back, tender, crisp, fleshy, and of excellent flavor. Very productive and will thrive in almost any soil. Is one of the best extra early sorts for the market gardener and for home use. A favorite variety for canning.

21—Pkg., 10c; ½ lb., 20c; lb., 35c, postpaid. Not prepaid: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.75; 30 lbs. (½ bu.), \$6.50.

BURPEE'S STRINGLESS

A fine stringless green pod bean. Strong, branching growth, hardy, prolific, with dark green foliage and always of strictly bush form. The tender, brittle pods average five or more inches in length. Also perfectly stringless, and recommended for the market gardener, canner, and home garden. For disease resistant qualities it is unequalled. Pods meaty and succulent, of unsurpassed flavor. Matures in about 45 days.

19—Pkg., 10c; ½ lb., 25c; lb., 40c, postpaid. Not prepaid: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00; 30 lbs. (½ bu.), \$7.50.

SOW SALZER'S SEEDS

We have used Salzer's Colossal Green Pod Beans for at least 25 years and think we cannot get along without them.

Mrs. N. O. Talmadge,
Hopkinton, Iowa.

My friends liked my green bush beans so well last summer they now want some of my seed, so I must order some more. They surely yielded good, that's why everybody heard about it.

Mrs. M. H. Priestersbach,
St. Paul, Minn.

HAVE THE EARLIEST BEANS IN YOUR NEIGHBORHOOD—PLANT SALZER'S

Beans (*Phaseolus Vulgaris*)

CLIFFWOOD NEW EARLY WONDER WAX

See Color Illustration on Back Cover

We have watched this Wonder Bean develop and improve for the last six years. We knew it was the earliest of any wax variety. We knew it was the most productive. We were aware of its superb quality. Yet we wanted to be absolutely positive of its merits. In offering it this year we know it is all we claim and much more. It will produce a large crop regardless of dry or wet weather. It is one of the most tender, most brittle and most finely textured of the wax beans. Grows 18 inches high. Is five to seven inches long; flat, plump, handsome and meaty. Matrices in five weeks.

74—Pkg., 15c; ½ lb., 30c; lb., 55c, postpaid. Prices Not Prepaid: Lb., 50c.

Increase your yield by inoculating beans

WARDWELL'S DELICIOUS WAX

Although this is not the earliest, we consider it almost equal to the Cliffwood Wonder Wax bean above in deliciousness and lusciousness. It is practically as tender, almost as brittle and it is entirely stringless. It likewise ranks close to it in productiveness.

The color is a clear golden yellow, of strong upright bush growth, fourteen to eighteen inches high, pods about seven inches long, broad, flat and unusually meaty.

Gardeners find this a good type for market purposes. Its fine appearance makes it a ready seller, and its fine keeping qualities make it a good shipper. Seed white, spotted red. Matrices in about 45 days. (See illustration above also color illustration, page 33.) 73—Pkg., 10c; ½ lb., 25c; lb., 40c, postpaid. Not prepaid: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$3.75; 30 lbs., \$7.00.

SALZER'S STRINGLESS KIDNEY WAX

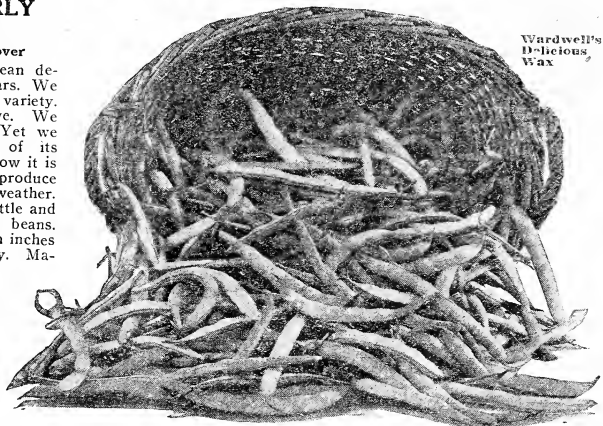

We notice on the orders as we receive them that this variety usually appears even though a number of other kinds of beans are ordered, which shows that stringlessness is a big consideration with our customers. Stringlessness in a bean is also a good sign that it is tender and brittle. This bean is positively stringless.

It is very meaty, luscious and finely flavored and a favorite with everyone.

Plants are of erect, bushy, robust growth, eighteen to twenty inches high and very prolific. Blight and rust resistant even in wet seasons. Pods are six to seven inches long, oval, tender and stringless, of excellent quality in every way. Light lemon yellow color. Matrices in about 45 days. (See illustration.)

64—Pkg., 10c; ½ lb., 25c; lb., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.00; 30 lbs., \$7.75.

Salzer's Stringless Kidney Wax

Wardwell's Delicious Wax

SALZER'S SELECT GOLDEN WAX

Everyone knows the Golden Wax. It is certainly a good bean in every way. It is a reliable cropper. It is exceptionally meaty. Very brittle and tender. This select strain is almost devoid of stringiness. Has a great reputation for hardness and vigor.

Salzer's Select is the result of long years of selective growing of pedigree stock seed. Its extreme hardness alone makes it a superior strain for extremes of soil and climate.

Plants are vigorous, of dwarf growth with thick stems. Oval pods, stringless, very brittle, luscious and of fine flavor. About five inches long, deep rich yellow color. Matrices in about 40 days. Popular with gardeners for early and late shipping.

58—Pkg., 5c; ½ lb., 20c; lb., 35c, postpaid. Price, not prepaid: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.25; 30 lbs., \$6.00.

PROLIFIC BLACK WAX

Very popular with many market gardeners and home growers because of its fine quality, early maturity and productiveness.

Medium erect, hardy and vigorous growth, with small foliage. Longer bearing period than most others and pods remain a long time in fine condition for snaps. Clear golden yellow color. Brittle and stringless. Seed oblong and jet black. Matrices in about 40 days.

66—Pkg., 5c; ½ lb., 20c; lb., 35c, postpaid. Price, not prepaid: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 30 lbs., \$6.00.

SALZER'S GIANT STRINGLESS PENCIL POD

Its exceptional stringlessness appeals to all. Medium early and prolific. One of the best for home use and near markets. Pods are six to seven inches long. Golden yellow color, straight, brittle, tender and meaty. Fine flavor and entirely stringless. Successive plantings should be made from May to August. Matrices in about 45 days.

57—Pkg., 10c; ½ lb., 20c; lb., 35c, postpaid. Not prepaid: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 30 lbs., \$6.00.

ROUND PODED KIDNEY WAX. The pods measure from five and one-half to six inches, are entirely stringless, round, of light yellow color, very brittle, very handsome, and of the finest quality. It is one of the earliest wax beans grown and very productive. Matrices in about 40 days.

63—Pkg., 10c; ½ lb., 25c; lb., 40c, postpaid. Not prepaid: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00; 30 lbs., \$7.50.

DAVIS KIDNEY WAX. The handsomest of all early Wax Beans. Pods seven inches long, straight, very uniform in shape and of clear waxy white color. Extremely prolific. Matrices in about 45 days.

64—Pkg., 10c; ½ lb., 20c; lb., 35c, postpaid. Not prepaid: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 30 lbs., \$6.00.

—SOW SALZER'S SEEDS—

I have used your Wardwell's Delicious Wax for years and cannot recommend it too highly. Mrs. James Scott, Frankfort, Ky.

Of all the Beans, Golden Wax for minc—it is a fine bean. Mrs. Nellie Blake, Portland, Maine.

BE SURE AND TRY OUR CLIFFWOOD WONDER WAX BEANS

Pole Beans *Wax Podded*

KENTUCKY WONDER WAX

The Kentucky Wonder is the very best variety and most widely known of the wax pole varieties. It is a heavy producer of the finest quality; bears meaty, tender, brittle, delicious beans. Similar in many ways to the famous Kentucky Wonder Green Pod. Has broad fleshy, stringless pods. Matures in 70 days.

If our customers will cut a few willows or other poles, which at the most is a few minutes' job, to support the vines of this variety they sure will be well paid in the large crop of beans received from this productive variety. (See illustration.)

103—Pkg., 10c; ¼ lb., 25c; 1b., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.75.

GOLDEN CLUSTER

The length of the pods, its cluster growing habit, makes this a very dependable variety to grow, either for the home garden or market garden, or as a main crop pole bean.

It is medium early, of excellent quality and used either as snap, green or dried shell bean. The vines are of large growth and produce in abundance, clusters of three to six yellow pods, averaging about 8 to 9 inches. Very attractive and much used for show and exhibition purposes. The pods are flat, straight, very broad, thick and fleshy. The dry seed is pure white. Matures in about 72 days.

101—Pkg., 10c; ¼ lb., 25c; 1b., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.75.

GREEN PODDED VARIETIES

KENTUCKY WONDER

The best known, most popular, most dependable and finest quality green podded pole bean in the world. The only fault we find with it is the name should have been called "American Wonder."

The eating quality is superb, the flavor leaving a lasting impression. Although very solid, they are tender and brittle, with almost complete absence of stringiness.

It is extra early, producing pods about nine to ten inches in length, which are round and somewhat curved. Matures in about 70 days.

141—Pkg., 10c; ¼ lb., 25c; 1b., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.75.

LAZY WIFE. Bears all summer. Pods measure about 6 inches, are flat, light green, brittle, of smooth surface, entirely stringless, mild sweet flavor. Seed is pure white. Matures in about 75 days.

142—Pkg., 10c; ¼ lb., 25c; 1b., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.75.

CUT SHORT OR CORN HILL. Very much planted in corn. Medium early and very productive. Pods are 4 inches long. Matures in about 70 days.

138—Pkg., 10c; ¼ lb., 25c; 1b., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.75; 30 lbs., \$9.25.

FIELD BEAN SALZER'S WHITE WONDER

This superior variety introduced by us is a distinct improvement over the common navy bean, so much so that during the War Garden Campaign it was especially recommended. For baked beans or cooking it has no equal.

The pods are large, well filled with pure white pea beans. Matures early and comes in at a time when other beans are scarce and high priced. Is of dwarf, bushy habit, always well filled with pods. Matures in about 70 days, the earliest maturing of its class.

117—Pkg., 10c; 1b., 35c, postpaid. Not prepaid: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 60 lbs., \$19.50.

WHITE NAVY. This is the variety so extensively used and grown for baked beans. Matures in about 75 days.

120—Pkg., 5c; 1b., 30c, postpaid. Not prepaid: Lb., 25c; 5 lbs., 95c; 15 lbs., \$2.25; 60 lbs., \$6.90.

SOW SALZER'S SEEDS

Mr. W. F. Fechner, the Champion War Garden Director of America, has this to say of it: "The White Wonder Bean has been truly named, and those of us who have eaten it will never eat navies again."

CHICORY

WITLOOF-CHICORY OR FRENCH ENDIVE. A very popular winter salad; easily grown. The seed is sown in spring and the parsnip-like roots stored until wanted for growing in winter.

359—Pkg., 10c; oz., 25c; ¼ lb., 70c; 1b., \$9.25, postpaid.

LARGE ROOTED OR COFFEE CHICORY. A root grown like carrot; when dried and roasted, if added to coffee, lends to it strength, richness and flavor.

358—Pkg., 10c; oz., 25c; ¼ lb., 70c; 1b., \$2.25, postpaid.

GEORGIA COLLARDS

A form of cabbage planted in the South for table and stock. A loose cluster of leaves with a long stem.

364—Pkg., 10c; oz., 25c, postpaid.

CORN SALAD OR FETTICUS

Used as a substitute for lettuce in winter and early spring. It is quick growing, fit for use in about six weeks from sowing.

431—Pkg., 10c; oz., 20c; ¼ lb., 55c; 1b., \$1.75, postpaid.

Mushroom

Lima Beans (*Phaseolus Lunatus*)

SALZER'S GIANT BUSH

It is truly a giant lima bean. It has a reputation for productiveness that exceeds any of the others. It has a delicious buttery flavor that is unusually pleasing. It is immensely vigorous in growth, with heavy foliage. Reaches a height of twenty-four to twenty-eight inches. Usually bears in clusters from four to eight pods with five to eight beans in a pod. Pods average six inches or more (unusually large for limas) in length by one and one-quarter inches wide. Matures in 70 days. If you want the largest, earliest and best bush lima try this. (See illustration.)

116—Pkg., 10c; ½ lb., 25c; lb., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.00.

FORDHOOK BUSH

This lima always will be very popular on account of its habit of maturing early and continuing to bear until frost, which is one reason market gardeners prefer it to some others. Its long period of growth makes it an unusually heavy yielder and a profitable variety to grow.

The pods reach a large size; they are long, wide and thick and the vines bear heavily. It is not an unusual sight to see upwards of fifty pods on one single plant.

Plants are about two and one-half feet high and two feet across. Bear in clusters of four to eight pods, which are generally about five inches or more long, containing four to five beans.

Matures in about 75 days. This variety has a fine flavor and is sweet, delicious, juicy and tender. A very popular type for the amateur to use.

113—Pkg., 10c; ½ lb., 30c; lb., 50c, postpaid. Not prepaid: Lb., 45c; 5 lbs., \$2.00; 15 lbs., \$5.75.

SMALL BUSH OR SIEVA

This lima is probably as widely known under the name "Butter Bean" as any other. It is a small flat seeded type that receives unstinted praise from users everywhere, who are familiar with its superb qualities and habits.

It is of very rapid growth and maturity. Is highly esteemed on account of its long period of bearing.

Pods average three to four inches in length and contain from three to four seeds. Quality exceptionally fine. Matures in about 65 days.

116—Pkg., 10c; ½ lb., 25c; lb., 40c, postpaid. Not prepaid: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00.

SALZER'S IDEAL GIANT POLE

Ever since this bean was introduced we have considered it as a Lima of merit and have been improving and enriching it until today it so greatly excels the original type that it would be hard to recognize it as the same Lima. We wish our customers would try it alongside of the same variety purchased elsewhere.

Vines are vigorous and remarkably productive until frost. Bearing large clusters of broad pods from seven to eight inches in length and containing four to six beans. Because of the fine flavor and large size this bean should have a place in every home garden. It is a medium late variety, maturing in about 80 days. (See illustration below.)

129—Pkg., 10c; ½ lb., 25c; lb., 40c, postpaid. Not prepaid: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.25.

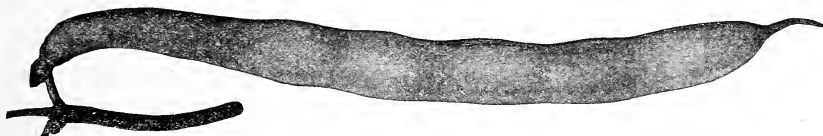

EARLY LEVIATHAN POLE

Conceded one of the earliest maturing lima beans. It has a remarkably hardy constitution, consequently is exceptionally productive.

As its name indicates, it is an early large podded variety. Its size does not seem to mar in any way its excellent flavor or tenderness. As to maturity, it is generally acknowledged the very earliest of the Pole Limas. The long, well-proportioned pods contain four to five flat beans. Pods stick well out from the foliage in large clusters, frequently from five to ten together. It is a robust and prolific grower, producing throughout the season. The seed is white and shells out easily. A very prominent variety in the Northwest on account of its ability to always ripen before frost. Equally as popular throughout the rest of the country. Matures in about 65 to 70 days. (See color illustration on Page 33.)

125—Pkg., 10c; ½ lb., 25c; lb., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.00.

Salzer's Ideal Giant Pole

YOUR GIANT BUSH LIMAS ARE SURE FINE. THE BEST EVER TO OUR NOTION. SALZER'S FOR OURS EVERY TIME.

MRS. H. A. THOMPSON, LISMORE, MINN.

Beet (*Beta Vulgaris*)

SALZER'S RED BEAUTY

SALZER'S FIRE BALL

For Color Illustration see inside rear cover

The fine even grain of Salzer's Red Beauty Beet, the full, rich, red color, the uniformity of shape, the delicious flavor, the early maturity—all of these combine to make this the most widely known and the best liked of any variety of beets. This beet is heavily in demand, both for table use and for the market garden. It is exceptionally popular for canning and for pickling, because of its beautiful color and delicate flavor. It is a heavy producer.

Constant testing and retesting at Cliffwood Farms for trueness to type, painstaking endeavor to improve the fine grain and sweet flavor and to still maintain the attractive color and early maturity, has resulted in this variety of beet displacing all others in popularity. Numerous testimonials on file in our office give evidence of the great demand for Salzer's Red Beauty, especially from truck gardeners, who always find a ready sale for it. Truly a wonderful beet, and one which will give great satisfaction.

The turnip shaped root is smooth and has a small tap-root. Is of medium size, about three inches in diameter. The flesh is fine grained, free from all woody fibre, of exceptionally fine quality and sweet flavor. The color of the skin and flesh is a deep red, almost as dark as Fireball, which is retained when cooked, making the beets attractive for both canning and pickling. The leaves are dark green shaded with red, very small and upright growing, allowing close planting. Matures in about 40 days.

166—Pkg., 15c; oz., 25c; ¼ lb., 75c; lb., \$2.00, postpaid.

LONG SMOOTH BLOOD RED—Deep red color, rich flavor, fine keeper, grows about 10 inches long, 2 inches in diameter. Matures in about 60 days.

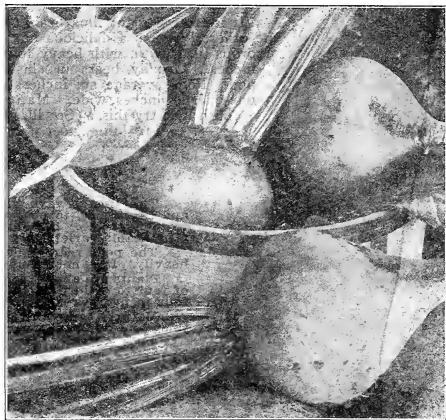

171—Pkg., 5c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

CRIMSON GLOBE—A splendid, handsome, extra early variety, producing roots which are almost globe-shaped, of quite large size with dark flesh of the finest quality. Matures in about 55 days.

157—Pkg., 5c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

EDMAN'S EARLY—Turnip-shaped. Sweet and tender. Matures in about 45 days.

164—Pkg., 5c; oz., 15c; ¼ lb., 30c; lb., 85c, postpaid.

SALZER'S FIREBALL

For color illustration see page 33

This variety ranks a close second to Red Beauty. Like it, it has a fine grain and a sweet flavor, but has a somewhat deeper red blood color and matures a few days later. It has a beautiful deep-red color, and is very attractive for market gardening, finding a ready sale. For canning and pickling it is in great demand. Is also a heavy producer. We receive numerous unsolicited testimonials as to this beet each year, indicating that many people like this variety as well as the Red Beauty.

Among market gardeners it is the most popular beet, on account of midsummer and late summer use, as it can be sown later to best advantage. Aside from this its round shape and beautiful color give it a striking appearance.

The leaves are small, upright, of rich purple color, and borne on slender stems, occupying but a small portion of the bulb. The roots are uniformly medium size. The surface is smooth. It has a very small tap-root. The color of the skin and flesh is a dark fiery red, the richest, darkest red of any beet. This intensity of color is retained when cooked. Matures in about 45 days. (See illustration above.)

167—Pkg., 15c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

CROSBY'S EGYPTIAN

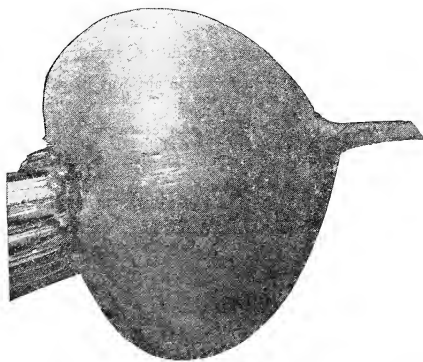

Used by market gardeners for bunching more than any other variety. It is conceded one of the earliest beets grown, maturing in about 40 days. It is a decided improvement over the well-known Extra Early Egyptian, being equally as early, but larger and more round in form. The roots run uniform in size and shape, have small tops, just right for early bunching. The flesh is deep red, sweet, tender, and of excellent quality. It develops its fine turnip shape already in the early stages of its growth and on that account is also preferred to most other kinds. (See illustration opposite.)

158—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

SALZER'S EARLY BLOOD TURNIP

It is distinctly a beet that will please you. A beet that has the approval of the most discriminating gardeners everywhere. The roots are medium sized, round, of dark red color and fine flavor. Matures in about 45 days.

162—Pkg., 5c; oz., 10c; ¼ lb., 30c; lb., 85c, postpaid.

CROSBY'S EGYPTIAN

THE BEST VARIETY FOR PICKLING AND CANNING PURPOSES IS SALZER'S RED BEAUTY

Beet (Beta Vulgaris)

DETROIT DARK RED

This popular beet is highly esteemed by our customers. It is a fine strain, and has been carefully developed along with the other varieties on our Cliffwood Farms. Its fine flavor and dark red color always keeps it in demand.

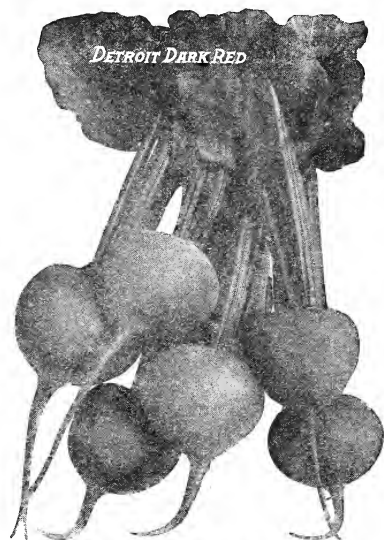

A rather early variety, but ripening later than Salzer's Fireball or Red Beauty, the Detroit is a good variety of the dark red turnip beets for main crop. The roots are of perfect turnip shape, always smooth, with a small tap-root. The color of the skin is dark blood red and the flesh deep vermilion red, zoned with a lighter shade. The quality is the very best, sweet and tender. Has a handsome and rich dark color and its delicious taste makes it an ideal table Beet. It is also a very desirable sort for the market gardener, as it is fine for bunching, and its small, upright growing tops, allowing close planting, make possible the biggest yield per acre of any turnip-shaped variety. Splendid for either summer or fall use, and good for storing over winter. Matures in about 45 days. (See illustration.)

159—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

SALZER'S RE-SELECTED STRAIN OF DETROIT DARK RED

176—Pkg., 15c; oz., 25c; ¼ lb., 75c; lb., \$2.00, postpaid.

Mammoth Long Red

Mangels and Sugar Beets

SALZER'S EIFFEL TOWER

See Page 33 for Color Illustration

If we were Stockmen, Dairyemen, or Farmers, we would no more think of omitting mangels from the ration crops than we would grain. Just like humans, stock thrive better and are more contented on a varied diet; for this reason mangels should be grown. As a quantity and quality crop Eiffel Tower has no equal. It will produce fat rapidly, increase the milk flow and leave stock and milch cows sleek, fat and contented. This is by far the largest mangel and unquestionably the most productive, standing very high in sugar content.

Salzer's Eiffel Tower stands way ahead of every Mangel we have yet tried. It is mammoth in size, has dark red skin, white flesh tinged with rose, and is enormously prolific. Matures in about 82 days.

1489—Pkg., 10c; oz., 20c; ¼ lb., 35c; lb., \$1.00, postpaid. Not prepaid: Lb., 95c; 5 lbs., \$4.25; 10 lbs., \$8.00; 25 lbs., \$19.00.

MAMMOTH LONG RED

The ability of this variety to produce big yields regardless of conditions of soil or climate gives it a value hard to over-rate.

This variety has a remarkable reputation as a large yielder. It produces mangels of immense size, thrives under the most trying conditions and is a good, safe, dependable type. It is a strain that will do well in most any tillable soil, withstands much abuse and neglect.

To the farmer undecided as to which variety to plant, next to Salzer's Eiffel Tower we recommend Mammoth Long Red, knowing he will not be disappointed with the results.

It grows right along, regardless of adverse weather, varied soils and other conditions that would run other varieties. Ranks very high in nutritive qualities; in fact, possesses saccharine matter to a remarkable degree. The roots reach an almost unbelievably large size, are uniformly straight and well formed. Deep red color. (See illustration opposite.)

1496—Oz., 10c; ¼ lb., 30c; lb., 60c, postpaid. Not prepaid: Lb., 65c; 5 lbs. and over at 50c a lb.

GOLDEN TANKARD MANGEL

Contains more elements of saccharine than most other sorts. Many leading dairymen prefer to sacrifice yield to secure nutriment, as it increases the flow of milk.

The roots are handsome, of an ideal cylindrical form, with small neck, clean, generally with only one tap-root, and can easily be harvested, and are excellent keepers. The skin is light gray and deep orange below; the ground; the flesh is a bright yellow.

1495—Oz., 10c; ¼ lb., 30c; lb., 60c, postpaid. By express: Lb., 65c; 5 lbs., \$3.00; 10 lbs., \$5.75; 25 lbs., \$13.75.

COLOSSAL SUGAR BEET OR HALF SUGAR MANGEL

A very desirable variety for stock feeding, of high nutritive value; twice as productive as Sugar Beets; richer in sugar and more valuable than Mangels, and almost as productive; it grows half out of the ground, and is therefore easily harvested. The roots are of ovoid shape; the flesh is white.

1481—Oz., 10c; ¼ lb., 30c; lb., 25c; lb., 60c, postpaid. Not prepaid: Lb., 70c; 5 lbs. and over at 50c a lb.

KLEIN WANZLEBEN SUGAR BEET

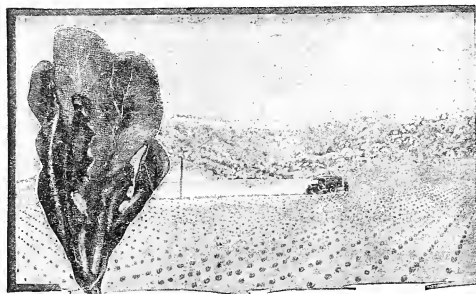

More extensively grown than any other variety for making sugar; used almost exclusively by all sugar factories. The average yield is from 15 to 20 tons per acre with about 18 per cent of sugar. Our seed is pedigreed stock, producing roots testing highest in sugar content.

1482—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 85c, postpaid. Not prepaid: Lb., 80c; 5 lbs., \$3.75; 10 lbs., \$7.25; 25 lbs., \$17.50.

Frost Proof Cabbage Plants

Cabbage Plants in Two Inches of Snow.

**PRODUCES CABBAGES TWO TO FIVE WEEKS AHEAD OF HOME GROWN PLANTS.
CAN BE PLANTED ANYWHERE JUST AS SOON AS GROUND IS SOFT ENOUGH.**

SPECIAL NOTICE

The plants when received will be somewhat wilted and have a stunted appearance, which will be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce results superior to common or home grown plants.

Frost Proof—That is exactly what we mean; in fact, we claim more than that. If the plants do not withstand twelve degrees below freezing (20 degrees above zero) we will either replace them or refund your money. Nor is that all, you can plant Salzer's Frost Proof Plants out in the open just as soon as you can get them in the soil no matter if you do expect one or more killing frosts afterwards, even if it is four to six weeks earlier than you usually set out home grown plants. Once in the soil, the land freezing, or the plants being covered with ice, sleet or snow will do no injury, unless the temperature gets below 20 degrees above zero (frequently not then).

The top of the plant does not grow until regular Spring weather opens up, but the roots grow from the time they are planted, and just as soon as Spring weather starts, the established root growth assimilates the fertilizer in the soil, the plants grow very fast, maturing headed cabbage two to five weeks earlier than you can mature them from hot bed and cold frame plants. You know what the difference in profit will be, if your crop is matured and marketed before the general crop from home grown plants.

They also eliminate the worry about freezing and do away with the nightly task of covering the plants with paper, cans, boxes, etc., which must be done with home grown plants even when planted a month later.

**GUARANTEED
FROST PROOF
or
Money Refunded**

SALZER'S LIGHTNING CABBAGE PLANTS

Grown from the same true to type seed as described on the opposite page, and bear the same fine extra early cabbages, except that you order the plants instead of the seed. If you want the very earliest cabbages, you will make no mistake in ordering Salzer's Lightning Cabbage Plants.

Per 100 plants, 75c; 500 plants, \$3.25; 1,000 plants or more, \$6.00 per 1,000, postpaid.

EARLY JERSEY WAKEFIELD—LARGE CHARLESTON WAKEFIELD COPENHAGEN MARKET—SUCCESION—EARLY DWARF FLAT DUTCH

Early Jersey and Large Charleston Wakefield are early and second early cabbages, respectively; Copenhagen Market is an early round-head cabbage; Succession is an early flat-head cabbage, and Early Dwarf Flat Dutch is second early flat-head cabbage. Grown from true to type seed.

In lots of 100, 200, 300 or 400 plants, 55c per 100; 500 plants of any variety, \$1.85; 1,000 plants of any one variety, \$3.50, postpaid.

PLEASE NOTE. No other varieties supplied except as listed. We cannot sell any one variety of onion plants or frost proof cabbage plants in less than lots of 100 or except in multiples of 100 no matter how large the order. This means we cannot accept any order for 25 or 50 of one variety and the balance of the 100 in another. Shipment is made when we consider planting conditions best suited to your district or at any time you may specify on your order. Because of delay in transit, with consequent damage to the plants, due to State quarantine laws, we do not ship plants to Canada.

Extra-Hardy Onion Plants

Our Onion Plants are grown under the same conditions as our cabbage plants. Growing them under low, cool temperatures tends to develop big root clusters and makes the plants extremely hardy. Just as soon as they're planted in good soil, the bunches of roots take hold and grow at a really marvelous rate.

You can put these specially grown plants in the ground just as soon as you'd ordinarily plant seed or sets. This early planting means that you'll get earlier crops of fully developed Onions, and it likewise means that the Onions will be larger, since the cool growing season is so much prolonged.

Salzer's Prizetaker—Our famous Prizetaker Onions. (See Page 35 for description.)

White Bermuda—Straw colored Bermuda Onions. (See Page 36 for description.)

Louisiana Creole—Brown skinned, white fleshed, compact onion. Rather strong flavor, but exceptional keeper. In the hot, damp climate of the Gulf States, this onion keeps perfectly from the time it is harvested in the spring, until following spring. Because of its very strong flavor, will not do so well for slicing and eating raw. Recommended for its fine keeping qualities.

Onion Plants: In lots of 100, 200, 300, or 400 plants, 55c per 100; 500 plants of any one variety, \$1.85; 1,000 plants of any one variety, \$3.50, postpaid.

NOTE: Cabbage and Onion plants are shipped between December 1st and May 1st. They are shipped direct from our growing station and are therefore not sent with seed orders. No orders accepted after May 1.

MARKET GARDENERS, WRITE FOR PRICES ON LARGE QUANTITIES

Cabbage (*Brassica oleracea* Var. *Capitata*)

SALZER'S BEST EXTRA EARLY AND LATE VARIETIES

SALZER'S LIGHTNING

One look at almost any cabbage patch will reveal variations in the size, shape and types of the heads. Is it not logical to presume, when such difference prevails in the field or garden that the trouble is in the seed? It is against this wide range in seed qualities we have for many years cautioned our customers. It is impossible for low prices to represent High Seed Standards. For this reason we are continually improving by selective growing our stock seed and believe in Salzer's Lightning we have a superior strain of this well known variety. For thirty-four years Lightning has been a specialty with us and no pains have been spared in trying to make it a perfect type. We particularly commend it for comparative trials alongside of other early varieties. What can be accomplished in increasing the production, the uniformity in size and shape and extreme earliness is abundantly demonstrated in this pedigree type.

Salzer's Lightning is a carefully selected Northern Grown strain of strong, vigorous seed that matures a solid, full grown head of remarkable uniformity in size and shape in about 85 days. Being exceedingly hardy, the plants not only resist cold, but other unfavorable conditions.

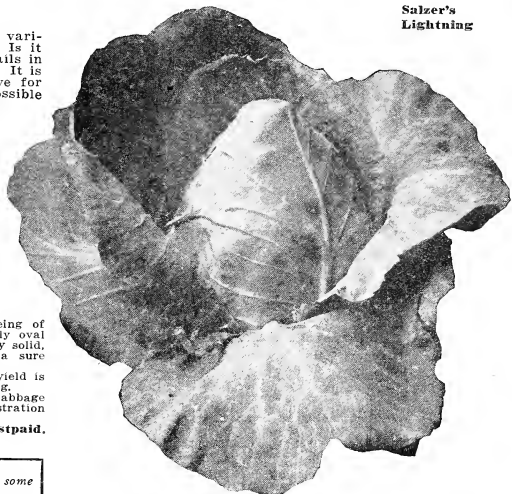

It has a very pleasing and attractive appearance, being of compact, erect growth, few but thick outer leaves, nearly oval and of deep green color. Heads are medium in size, very solid, of conical shape, uniformly pointed, short stem and a sure head.

Its quality is excellent, tender, crisp and mild. The yield is large, as the close forming habit permits of close planting.

Lightning has all the qualifications of the best early cabbage with the added advantage of extra earliness. (See illustration opposite. For Frost Proof Lightning plants see page 10.)

218—Pkg., 15c; oz., 70c; ¼ lb., \$1.75; lb., \$5.00, postpaid.

Lightning

SOW SALZER'S SEEDS

The 88 lbs. of Cabbage Seed arrived all right and sowed some and it looks as though the germination is 100 per cent.

Ernest Poesch, Corpus Christi, Texas.

SALZER'S GIANT FLAT DUTCH

Personally we think this variety is the finest late cabbage possible to grow. It is a specially selected strain. Has the widest range of adaptability to soil and climate. It is the surest header and has the largest head. Uniform in size and shape, averaging 12 to 14 inches in diameter. Unsurpassed for sauerkraut. Has no superior for flavor. Unexcelled for slicing, and very good for salads. Very attractive creamy white color, is exceptionally crisp, is very fine grained, and is unusually mild and sweet. It stands ungrained as a keeper or shipper.

For sureness in heading and regularity in growth, it stands at the head of the list. It invariably forms very large and at the same time, very hard, solid heads, uniform in shape, color and appearance. It has a very short stem, is a compact grower, forms few loose leaves. Reports of perfect stands are of frequent occurrence. It keeps well until late in Spring, and is good for shipping. (See illustration.)

250—Pkg., 15c; oz., 70c; ¼ lb., \$1.75; lb., \$5.00, postpaid.

EARLY DWARF FLAT DUTCH

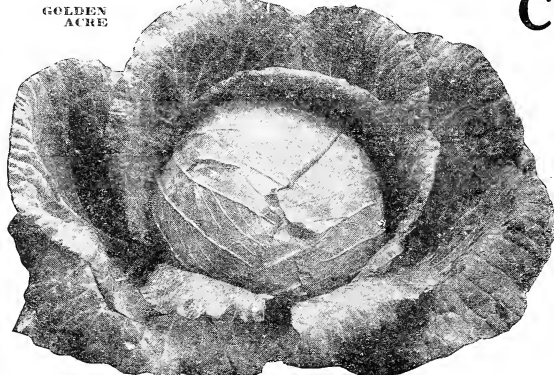

It is a large cropper and a dependable header. A short stemmed variety. Belongs to the second earlies. Matures in about 110 days. Grows compact and upright. Leaves few and short. Flat round, solid heads, which are very large for size of plant. Large yielder. Good keeper. Crisp, tender and of fine flavor. (See page 10 for plants of this variety.)

228—Pkg., 10c; oz., 30c; ¼ lb., 90c; lb., \$3.00, postpaid.

Salzer's Giant
Flat Dutch

DO YOU LIKE SAUERKRAUT? GIANT FLAT DUTCH IS THE BEST EVER

GOLDEN
ACRE

COPENHAGEN MARKET

There is one outstanding feature about Copenhagen Market Cabbage, and that is its habit of ripening its heads all at the same time, thus permitting harvesting the entire crop at once, which is desirable for shippers, kraut makers and growers. Copenhagen, being a large heading variety, is a heavy cropper. Aside from its heavy cropping and even-ripening qualities, it is an exceedingly hard-heading type. Its round head is another good point in its favor.

About 5 days later than Jersey Wakefield, but produces much larger heads than any other Cabbage equally as early. The heads are heavy in weight, ball shaped, solid and firm with a small core and of fine texture and splendid quality. The leaves are of light green color, tightly folded together in a remarkably solid and compact form; it has few outer leaves of upright growth, permitting close planting, and has a short stem, growing close to the ground. (See illustration of Golden Acre, as they are similar in appearance.)

Our seed is a pedigreed type of selected Danish grown stock. Matures in about 95 days.

244—Pkg., 10c; oz., 45c; ¼ lb., \$1.25; lb., \$2.50, postpaid.

SALZER'S

EXTRA EARLY JERSEY WAKEFIELD

We do not expect our customers to grow or try every cabbage listed in this catalog, nevertheless, this variety is so well known, so popular, so dependable that we cannot resist urging a place for it in every garden regardless of any or all others they may expect to use. We have an established quality that can be relied upon to produce abundantly, true to type and uniformity.

It is of pointed head or conical shape, uniform in size, hard and solid. Plants are unusually hardy and resist to a considerable extent extremes of temperature and weather. There are few outer leaves, which are smooth, thick and deep green in color. A fine variety for storing either in the North or South. Matures in about 90 days. The stems are short. Heads of medium size.

It is crisp, tender and of finest eating quality. Attractive. Excellent for salads. (See illustration below.) For Cabbage plants of this variety see page 10.

214—Pkg., 10c; oz., 40c; ¼ lb., \$1.00; lb., \$3.00, postpaid.

DANISH ROUNDHEAD

Desirable for cool districts. It is of more vigorous growth than Ballhead and better able to resist blight and extremes of temperature. The heads are a trifle larger, and matures from one to two weeks earlier. It is a fine, round head, very immune from diseases, bugs and worms.

The heads are set on shorter stalks than Ballhead with few outer leaves. They are extremely hard and solid, and of sweet flavor, crisp and tender texture; the interior leaves blanch to pure white. The heads have great weight. Our seed is Danish grown.

246—Pkg., 10c; oz., 25c; ¼ lb., 85c; lb., \$2.75, postpaid.

PREMIUM LATE FLAT DUTCH

A short stem variety. Heads are large, flat, but deep solid, crisp, tender and of mild flavor. Matures in about 120 days.

253—Pkg., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.50, postpaid.

Cabbage

Early and Late
Varieties

GOLDEN ACRE

A new introduction

I guess we were right last season when we said our customers were in need of and wanted an extra early, round, hard heading forcing cabbage, for, although we offered this in packets and ounces only, we could have sold out twice over.

We wish to apologize to those of our customers we disappointed, but we had no idea the demand would reach such large proportions. However, we have larger stocks this year of this fine forcing cabbage, and while we cannot offer it in large quantities we expect to fill every order received.

This is a remarkable cabbage. It is a wonderful extra early forcing, round, hard-head cabbage of the Copenhagen Market type, but very much earlier (fully eight days earlier).

Mr. Geo. W. Myers of Ceylon, Minnesota, the expert market cabbage grower, says it is the greatest cabbage for the Truck Farmer that he ever grew.

It has been named "Golden Acre," a name that best emphasizes its value, profit, and general development for earliness, roundness, uniformity and trueness of type, all of which has been accomplished beyond our fondest expectation.

Conforming with our policy for over half a century we are offering this to our customers, instead of to the seed trade. We fully believe this variety will become the most popular round head forcing cabbage in the country.

As every one knows a few days' advance in earliness means a great deal in the market value of cabbage. It means much to the private user to get it on the table as soon as possible.

This variety is the earliest round head forcing cabbage grown. It is crowding our celebrated Lightning for honor in earliness. Matures in about 87 days. Although the head is a trifle smaller than the Copenhagen Market, it is a large heading variety. The heads are extremely hard and heavy, full ball shaped, solid and firm. The texture is exceedingly fine and the quality wonderful.

Leaves are somewhat light in color, folded tight in compact form. There are very few outer leaves, which permits close planting. Stem is short, the head growing close to the ground. The heads ripen with an almost unbelievable uniformity. (See illustration above.)

220—Pkg., 35c; oz., \$3.50, postpaid.

LARGE CHARLESTON WAKEFIELD

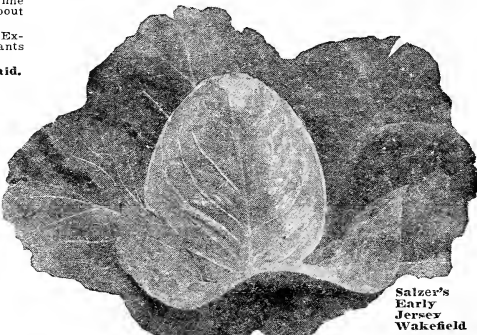

Of exceeding hardness. Vigorous grower, slightly spreading leaves. Heads hard and solid. Mild, pleasing flavor. Crisp and tender. Good keeper and shipper. Matures in about 95 days. Charleston Wakefield plants on page 10.

212—Pkg., 10c; oz., 30c; ¼ lb., 90c; lb., \$2.50, postpaid.

SALZER'S GENUINE SUREHEAD

Compact and very solid. Finest quality, tender, crisp and nice flavor. Matures in about 115 days.

249—Pkg., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.00, postpaid.

GOLDEN ACRE IS THE EARLIEST FORCING CABBAGE. IT IS UNEXCELLED.

Late Varieties

Cabbage

Disease-Resistant Varieties

SALZER'S DISEASE-RESISTANT WISCONSIN HOLLANDER

In many of the cabbage growing districts of the United States where "Yellows" or "Yellow Rot" has caused fluids to be abandoned, this disease-resisting strain has enabled growers of this crop to again grow large areas of sound, hard heading, free from rot cabbage.

This strain was first introduced by the University of Wisconsin and only after many years of experimenting on cabbage sick soil of the worst type.

Its other characteristics are similar in every way to the Ballhead Cabbage described below on this page. Matures in about 120 days.

Our customers who have trouble with Yellow Rot should use this disease-resistant strain.

On account of the incessant, painstaking breeding necessary to secure disease free plants for the seed, its production is necessarily very expensive. (See illustration opposite.)

259—Pkg., 15c; ½ oz., 50c; oz., 90c; ¼ lb., \$3.00; lb., \$10.00, postpaid.

SALZER'S DISEASE-RESISTANT ALL SEASON

Developed under the same disease-resistant conditions as the Wisconsin Hollander described above. It is disease resistant to such an extent that it will grow and flourish without apparent injury on Cabbage-sick soils. This variety is perhaps the best for the amateur to grow as it seems to be more hardy.

It is an all season cabbage in every sense of the word; has a reputation for heading uniformity. Its exceptional vigoriveness will produce a head under the most adverse conditions. Considered one of the best sorts for kraut. The heads are very large, nearly round, extremely hard and solid. They are small ribbed and even if planted very late will keep well and are much to be preferred to the big ribbed winter sorts. (See illustration below.)

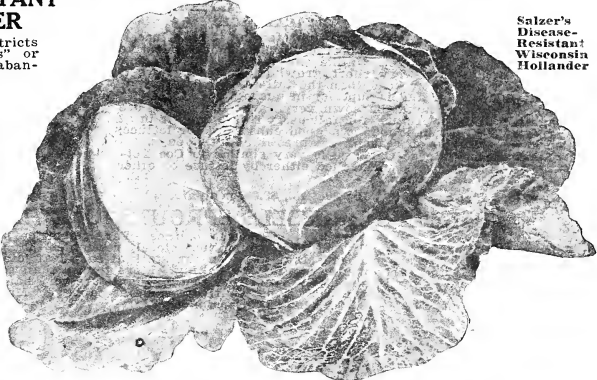

258—Price: Pkg., 15c; ½ oz., 50c; oz., 90c; ¼ lb., \$3.00; lb., \$10.00, postpaid.

SALZER'S ALL SEASON

Not disease resistant, otherwise the same as above variety.

227—Pkg., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.50, postpaid.

Salzer's
Disease-
Resistant
Wisconsin
Hollander

DANISH BALLHEAD OR HOLLANDER

Used almost exclusively by canners, shippers and produce men on account of the solidity, uniformity of size and exceptional winter keeping and long distant shipping qualities. Very hardy. Resists cold. Withstands dry weather.

Plants are compact and vigorous. The bluish green leaves are distinctly upright in growth, few, long, narrow and thick. Heads are round, hard as a bullet and of medium size. Stem medium long. Matures in 120 days. Does not rot easily during wet season. Quality excellent, firm, crisp and tender. Pure Danish grown seed.

245—Pkg., 10c; oz., 25c; ¼ lb., 80c; lb., \$3.00, postpaid.

SUCCESSION

Matures in about 110 days. Heads are ready for use long before it has fully matured. Withstands extremes of weather. For early and late sowing. Heads round, slightly flattened. See page 10 for plants of this variety.

233—Pkg., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.50, postpaid.

IMPROVED AMERICAN SAVOY

Has a decidedly pleasant, delightful flavor. The leaves are more tender, milder, sweeter flavor than the smooth-leaved varieties. Most delicious after being frosted. Very sure heading and producing large, solid heads of densely crumpled leaves, the interior beautifully blanched. Short stemmed, vigorous plants with few outer leaves; keeps well. Ripens in about 110 days.

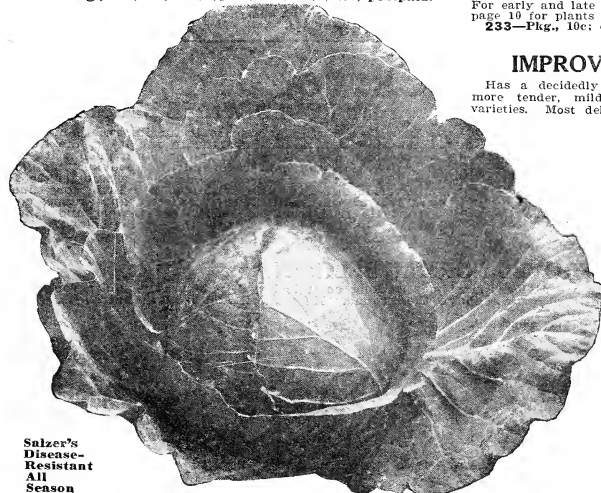

234—Pkg., 10c; oz., 25c; ¼ lb., 80c; lb., \$3.00, postpaid.

SALZER'S DANISH RED Stonehead Cabbage

The best red cabbage.

Salzer's Stonehead produces ball-shaped heads of great solidity and unusually dark purplish color, which extends to the center of the head, showing only a small portion of white when cutting across the veins and tissue. Of strong, compact growth, producing heads uniform in size and shape, from six to eight inches in diameter. Matures in about 120 days. The best keeper of any of the Red Cabbages. Most desirable for slicing for slaws, salads, etc. Ripens in about 110 days.

273—Pkg., 10c; oz., 50c; ¼ lb., \$1.50; lb., \$5.00, postpaid.

Season

OUR DISEASE RESISTANT VARIETIES WILL PRODUCE CABBAGES IN YOUR GARDEN

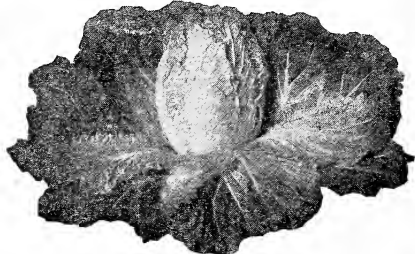

Cabbage

SALZER'S CHINESE OR CELERY CABBAGE

(WONG BOG) (CELERY CABBAGE)

A good substitute for lettuce, many preferring it to lettuce. We have what we believe to be the finest and most selective strain of Chinese Cabbage. Unlike the various tall growing sorts, our strain is a very short growing type; it grows a firmer, larger and fuller head than the tall variety, has a pronounced whiter color and is superior in quality. Chinese Cabbage should be sown very early for spring use and again in July or August for fall use. This brings it in at the time of year when it makes a good substitute for lettuce, which is then usually of season. Matures in about 75 days. In appearance, Chinese Cabbage is very similar to Cos Lettuce, and for table use is unexcelled either by lettuce or other cabbage. (See illustration.)

260—Pkg., 10c; oz., 25c; ¼ lb., 80c; lb., \$3.00, postpaid.

SALZER'S CHINESE CABBAGE

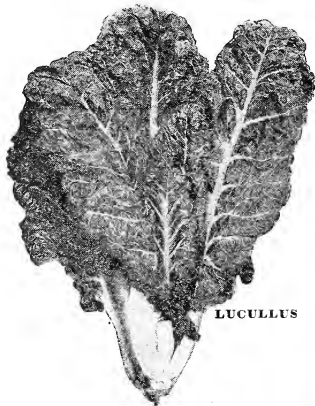

SALZER'S BRUSSELS SPROUTS, ONE HALF DWARF PARIS

(Brassica oleracea Var. gemmifera)

Belongs to the cabbage family and when young very closely resembles that plant. It is grown for the tender, luscious buds or small cabbage shaped heads that grow on the stalk at each leaf joint.

Used in the fall and early winter months for boiling. More tender than cabbage. The small heads are one to two inches in diameter. Grow in abundance from root to tip. Plants are very hardy, grow closely and in many districts will live through the winter without protection. Cultivate same as cabbage. Matures in about 110 days.

207—Pkg., 10c; oz., 30c; ¼ lb., 90c; lb., \$5.00, postpaid.

LUCULLUS

Swiss Chard (Beta Cicla L) LUCULLUS

Every vegetable has a mission to perform in the building up of body tissues and Swiss Chard stands especially high in body building tissue essentials. For this reason every person should grow it.

Belongs to the beet family, popularly known as Spinach Beet. Only the leaves are edible and it is used as a boiling green. Similar to Spinach in flavor and by many considered superior. The white stalks or midribs are cooked like asparagus.

Leaves are heavily crumpled, tender and of fine flavor. From 2 to 2½ feet high. Grows well in hot weather. If you once grow and use Swiss Chard you will never be without a generous patch in your garden. It yields a constant crop from June to winter. Ready for use in about 60 days. (See illustration.)

172—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid.

LARGE RIBBED WHITE

This variety is largely grown for the broad white leaf stalks, which when bunched are cooked in a similar manner as asparagus. Make a delightful and delicious dish. Ready for use in about 60 days.

169—Pkg., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

SOW SALZER'S SEEDS

Have been receiving your seeds now for two years; and can truly say they are the best I have ever planted. They grow fine. Have beautiful gardens. We think your Swiss Chard excels anything we ever had.

Mrs. Ellis B. Eby, Wakarusa, Ind.

Field Carrot

SALZER'S MASTODON

So noticeable in outstanding qualities, its merits are self-evident to the grower. It is highly relished by stock. It is, perhaps, the largest cropping carrot grown. It is exceptionally juicy and sweet. Growing well above the ground and being broad at the shoulders, tapering fairly abrupt to the end, it is one of the earliest carrots to harvest. Averages 8 to 10 inches in length. Very thick. The creamy white flesh is crisp, solid and sweet. Unexcelled as a winter keeper. Matures in about 90 days. (See color illustration page 33.)

1468—Pkg., 5c; oz., 15c; ¼ lb., 25c; lb., 70c, postpaid.

IMPROVED WHITE BELGIAN

Dairymen particularly prize it for its great amount of saccharine; the flavor imparted to the milk; the avidity with which cows devour it; its immense yields; its ease of cultivation and harvesting and its good keeping quality. This carrot is generally conceded a fine length for cultivation. It has a thick crown, very little core, finely grained, creamy white flesh, attractive appearance, comparatively free from side roots, very sweet and tender. Matures in about 88 days. (See illustration below.)

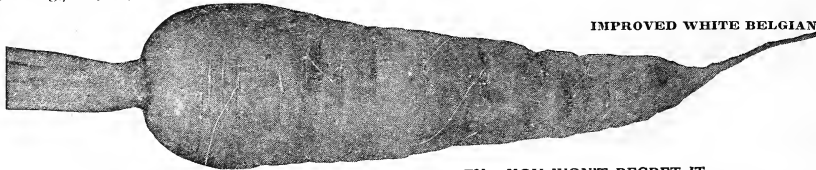

1471—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 70c, postpaid.

IMPROVED NORMAN BELGIAN

Very hardy and productive. The roots are at least six times as long as it is broad, pale orange underground, and green above. About one-fourth to one-third grows above the ground. Keeps well and is very nutritious. Needs about 90 days to mature.

1467—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 70c, postpaid.

IMPROVED WHITE BELGIAN

HAVE SOME SWISS CHARD IN YOUR GARDEN. YOU WON'T REGRET IT.

Carrot (Daucus Carota)

SALZER'S EARLIEST CORELESS

See Color Illustration on Rear Cover

This is our earliest variety of carrot, and is superior to any strain grown, being the only one we know of that is entirely devoid of core. Being continually bred for true type and for elimination of core, this variety has caused us considerable expense, but we know that our customers will agree with us that this strain comprises our finest value in carrots. Has been exceptionally popular with all those who have used it, being greatly in demand by market gardeners. Remarkably sweet and tender.

It is of a most delicious quality fine tender texture of flesh and delicate flavor. Matures about two weeks ahead of all other half-long sorts, and is equally as productive. Measures six to seven inches in length.

It is ideal in shape and handsome in color. The roots are of cylindrical form, blunt at the end, very symmetrical, smooth skin, fine neck, small tops and tap root. Orange red color, brighter and deeper than that of any other carrot. Excellent to store for winter.

295—Pkg., 15c; oz., 35c; ¼ lb., 95c; lb., \$2.50, postpaid.

SALZER'S SELECT OXHEART

A popular variety, especially where carrots are wanted for stock-feeding. Reaches an immense size when permitted to finish its growth, but retains its tenderness to a surprising degree. Much used for stock-feeding, but also very good for table use.

Is unquestionably the best for shallow soils and exceptionally fine for all soils. Eating quality is very good, it is tender, crisp and sweet.

It is very thick through, about 3½ inches long, stumpy-rooted, often attaining a weight of 2 lbs. The color is deep orange. The flesh is tender and sweet. The tops are somewhat small in comparison with other varieties. (See illustration above.)

302—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

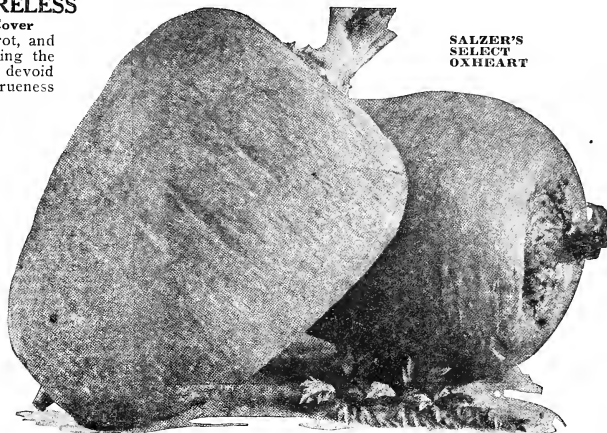

IMPROVED LONG ORANGE

Very handsome, straight, smooth roots of bright red color, frequently 12 inches long, and 3 inches in diameter at the neck. Does best in light, well prepared soil. A splendid Carrot for table use and field culture, combining great productiveness with fine, regular shape and has tender sweet flesh. Can be used in about 40 days from sowing.

300—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

Salzer's Danver's Half Long

SALZER'S
SELECT
OXHEART

SALZER'S DANVER'S HALF LONG

This splendid variety ranks next to Earliest Coreless Carrot in popularity with our customers. Like it, it is planted on a large scale by market growers, finding always a ready sale as the roots present an attractive appearance. Has a fine texture of flesh, is very tender, and has a delicate, sweet flavor. Greatly in demand for table use and for the home garden, flesh being a rich orange color and free from any woody core. It is fine for winter storing.

Medium tops, with roots six to eight inches long. One and one-half to two inches thick, gradually tapering to a blunt point. Very productive. Adapted to all soils. Flesh fine grained. Flavor excellent. Matures in about 80 days. The color is a rich, deep orange. (See illustration below.)

293—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

SOW SALZER'S SEEDS

Used your seed last year and certainly had splendid results, and my carrots everybody that saw them said they never saw such dandy carrots. Had good luck with everything.

Mrs. Meinrad Zueger, New Plymouth, Idaho.
I am sending you another order for seeds. Last year I did the same, also the year before that shows that your seeds must be satisfactory. We wouldn't have any other carrot but your Coreless.

E. E. Reynolds, French River, Minn.
We have been using Salzer's Coreless Carrot for the last 20 years and when asked where we get such fine carrots just say, "Salzer's."

Mrs. Carl Mannel, Mishawaka, Ind.
We used to buy seed from you as far back as 1907 and have always been delighted with the results. Never yet have we found a carrot to equal your Coreless.

Mrs. H. A. Woolf, Myrtlewood, Ala.
Used your seed in Oregon very successfully. Would like to try them here as we cannot get a carrot anywhere near as good as your Coreless. Mrs. Geo. W. Wesse, Prosser, Wash.

SALZER'S CHANTENAY

Conceded one of the best bunching sorts. It is nearly two weeks earlier than Danver's Half-Long. Slightly shorter and more stump rooted. Its productiveness also makes it a very desirable field type. Quality is a fine, tender, crisp and free from hard core. Flesh is a deep golden orange. Surface smooth and handsome in appearance. Matures in about 65 days. A good keeper for winter use.

292—Pkg., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

SALZER'S EARLIEST CORELESS IS AN ALL-HEART CARROT, TENDER AND SWEET

Cauliflower

(*Brassica Oleracea L. Var. Botrytis, D. C.*)

SALZER'S EARLIEST SNOWBALL

Our earliest and best strain of cauliflower for the market, and equally desirable for the home garden. Very popular as an extra early variety, of compact growth, and adapted for forcing (hotbed, culture) and wintering over for an early crop. Cauliflower is highly esteemed for its mild, delicate flavor and for the extreme tenderness of the heads. Salzer's Early Snowball produces a head with a compact curd of the finest quality, which places it first.

Cauliflower grown from Salzer's seed, produced in the north, is considerably earlier than other seed. Has a stronger vitality and a very, very much finer flavor. Is of finer grain, less tendency to discolor, firmer flesh and much more whitish color, each in itself enough to merit the use of Salzer's Northern Grown seed.

Plants are of close growth with heads averaging from medium to large size. (Nine to ten inches in diameter.) Solid, well formed and shapely, pure white of delicious flavor, tender and luscious. Should be sown in hot-beds for early use, transplanting when weather permits. For fall use, sow outdoors about May 20th. Matures in about 95 days. (See illustration opposite.)

319—Pkg., 15c; ¼ oz., 95c; oz., \$2.50; ¼ lb., \$7.50, postpaid.

SALZER'S EARLIEST SUREHEAD

Another very popular variety, maturing practically as early as Early Snowball. In the Northwest it has a record for early, sure cropping that we are proud of. For the East,

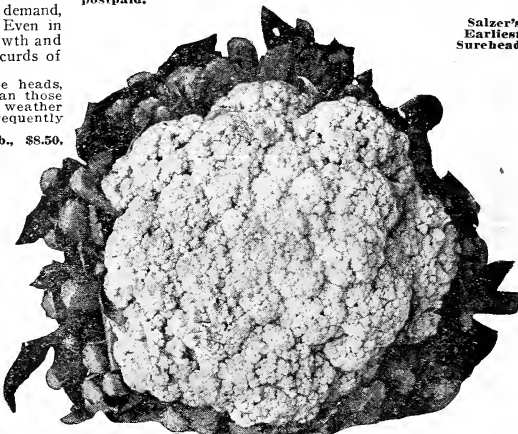

West and South its Northern Grown vitality has asserted itself so noticeably in earliness that market growers find it also very profitable. Home growers who have hesitated about growing cauliflower now grow it with ease and success.

It has overcome most obstacles of cauliflower culture, as well as removing practically all the elements of failure. It is early in maturing. Produces a solid, attractive head of large size, running ten inches or more in diameter.

It is of fine flavor, tender and luscious. Matures in about 95 days. Its earliness combined with its easy culture has made it one of the most generally grown varieties among our customers. (See illustration below.)

317—Pkg., 20c; ¼ oz., \$1.25; oz., \$3.35; ¼ lb., \$10.00, postpaid.

Salzer's
Earliest
Surehead

Salzer's Earliest Snowball

SALZER'S FIRST CROP

This variety is both reliable and dependable. It is a heavy cropper, early maturing and of fine flavor.

Being of dwarf, compact growth, with but a small number of leaves, it is an ideal Cauliflower for forcing during winter and spring. Certain to head when conditions are ordinarily favorable, and also most uniform in growth, type and maturity. One characteristic of this variety is the close sitting together of the leaves, enfolding the head tightly and causing the inner leaves almost to cover the flower and thereby avoiding the necessity of early tying up.

The heads are beautiful, snow white, solid and of medium size. Matures in about 95 days.

321—Pkg., 15c; ¼ oz., \$1.00; oz., \$3.00; ¼ lb., \$8.00, postpaid.

DRY WEATHER OR DANISH GIANT

This strain is the most popular, and the most in demand, in those sections subjected to long, dry seasons. Even in the driest weather, this variety is of a vigorous growth and produces hard and very large heads with compact curds of excellent quality.

The foliage is very heavy, fully protecting the heads, which are less liable to blight in hot weather than those of the earlier sorts. It is a leading type for dry weather districts, being a sure header when other sorts frequently fail. Matures in about 110 days.

316—Pkg., 15c; ¼ oz., 85c; oz., \$2.50; ¼ lb., \$8.50, postpaid.

EARLY PARIS

Extremely early and dwarf. The heads are white, compact and of the finest quality, but are not as large nor as solid as those of the Erfurt Type. Matures in about 100 days.

318—Pkg., 10c; ¼ oz., 35c; oz., \$1.00; ¼ lb., \$3.00, postpaid.

SOW SALZER'S SEEDS

Your Cauliflower seed is worth its weight in gold. It is the only seed we can get good cauliflower from.

Fred Strache, Horicon, Wis.

LARGE WHITE BROCCOLI

The most useful variety, easily grown. The plants are quite hardy, if set outdoors early in spring the crop will be ready the latter part of September; successional sowings could be made for later cuttings. The heads are very large, firm, pure white, and unsurpassed in quality. Requires about 100 days to mature.

200—Pkg., 10c; oz., 45c, postpaid.

GET LARGE, SNOW WHITE, TENDER HEADS OF CAULIFLOWER BY USING OUR STRAINS.

Celery (Apium Graveolens)

SALZER'S SELF-BLANCHER

See color illustration, page 33.

This variety has made the growing of Celery in every home garden as easy as is the growing of any other vegetable. Its culture is so easy that it would be a mistake for anyone that loves Celery to omit it from the garden. It does away with the old-fashioned method of continuous hilling throughout the season in order to bleach it. Those who never grew Celery before may now do so with splendid results.

It will keep in perfect condition for winter use.

This variety requires no hilling, only ordinary care, and will mature in 115 days. It is the foremost celery in the country today. It is a highly developed strain for earliness, beauty, quality, tenderness, flavor and brittleness. Decidedly a variety for both amateur and professional. It blanches with unusual ease.

For fall and early winter trade, this beautiful, tender and brittle celery with its delightfully rich flavor, has proven highly profitable for the gardener.

334—Price: Pkg., 15c; oz., 50c; ¼ lb., \$1.25; lb., \$4.50, postpaid.

SALZER'S GOLDEN SELF-BLANCHING

If you are using some other strain of this variety and will plant ours alongside of it and if Salzer's is not by far the best we will refund your money. We grow this seed in the north of France. In popularity, it ranks next to Salzer's Self-Blancher and is giving fine satisfaction. It is a highly improved selection that has been greatly improved in quality and ease of blanching.

It requires practically no hilling and no special attention or effort.

It comes into the market in about 120 days in time for the early fall trade.

The plants are compact and stocky, of medium size with greenish yellow foliage. Entirely self-blanching. The stems and leaves blanch to a golden yellow as it matures. It is a vigorous dwarf grower, easy to cultivate, with large ribs closely set. Plants are large, stocky and of good keeping quality.

We grow our seed in France and it is true genuine stock. (See illustration opposite.)

333—Price: Pkg., 15c; oz., 50c; ¼ lb., \$2.75; lb., \$10.00, postpaid.

GIANT PASCAL

A green leaved variety of fine nutty flavor. Height about 2 feet; stalks are large, thick, solid, tender and crisp. Blanchers very readily to a beautiful yellowish white color, if tied and earthed up. Splendid for fall and early winter use. Matures in about 145 days.

342—Pkg., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.50, postpaid.

SALZER'S SELECT WHITE PLUME

This is an early and easy blanching celery of fine flavor. Matures quickly (in about 80 days). Plants grow rapidly and blanch easily during the summer months if slightly earthed up. Of good size and fine appearance. Does not last as long as Golden Self-Blancher. (See illustration.)

335—Pkg., 10c; oz., 30c; ¼ lb., 90c; lb., \$2.75, postpaid.

WINTER QUEEN

A late, compact growing variety, very stout, thick and heavy, with an enormous heart twice as large as that of any other variety. The green color of this variety is not as deep and as firmly fixed as on older sorts, and blanches more readily; when ready for use the color is a creamy-white. Unsurpassed in quality: crisp, tender, free from pith and string, and with a delicious, nutty flavor. Matures in 150 days. 343—Pkg., 10c; oz., 30c; ¼ lb., 90c; lb., \$2.75, postpaid.

TURNIP ROOTED CELERY OR CELERIAC

Differs from other celery in that the roots are cultivated for use instead of the tops. Used for soups, stews and salads.

GIANT PRAGUE

A Turnip-Rooted Variety

Makes a root nearly globular in shape averaging two and one-half inches in diameter. It is smooth, of very fine quality and flavor. Seed is started and plants set in same manner as celery. Matures in about 140 days.

352—Pkg., 10c; oz., 30c; ¼ lb., 90c; lb., \$2.75, postpaid.

LARGE EARLY ERFURT

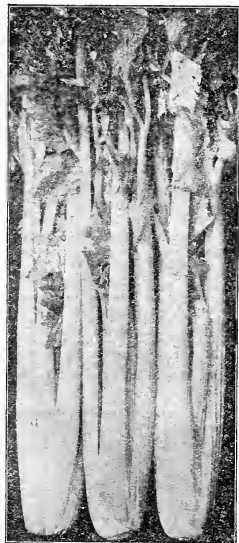

This turnip rooted celery is ready for use in June, if planted early. Considered the earliest of this variety of celery. The flesh pure white, very tender, not woody, of finest quality. Can be planted for succession as late as July. Roots about two inches in diameter, having fine smooth skin.

351—Pkg., 10c; oz., 50c; ¼ lb., \$1.50; lb., \$4.50, postpaid.

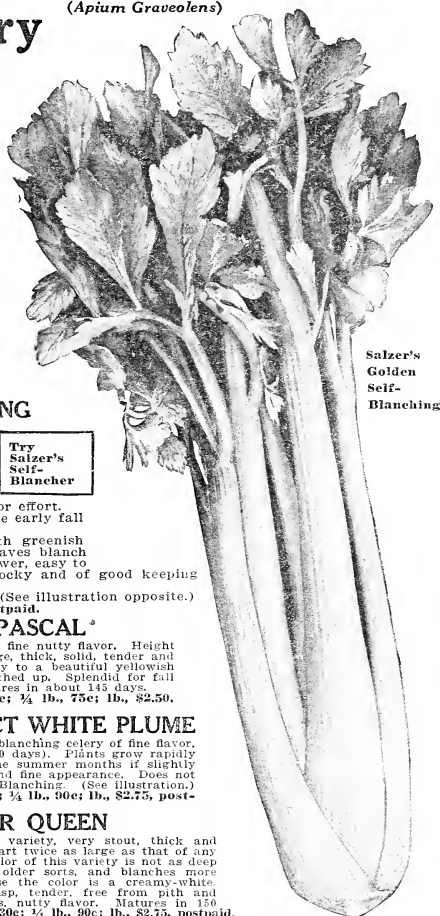

SOW SALZER'S SEEDS

You no doubt will be pleased to know that I received first as well as special prize at the Alpena County Fair with your Self-Blancher Celery, which was the best celery at the Fair.

H. Alex, Alpena, Mich.
Have used your Self-Blancher Celery seed for years with greatest success.
Mrs. H. E. Henry, Newark, S. D.

Golden
Self-
Blanching

Sweet Corn (Zea Mays saccharata)

IT'S SWEETNESS ITSELF

AS GOOD AS IT LOOKS

SALZER'S HONEY BOY SWEET CORN

PLANT THE FOUR VARIETIES BELOW AT THE SAME TIME FOR SWEET CORN ALL SUMMER

SALZER'S HONEY BOY

Nice, luscious, extra early sweet corn, is one of the most anticipated table treats of all vegetables. Early sweet corn, (especially on the cob) is always looked forward to with the keenest pleasure and Honey Boy is unquestionably the earliest of them all. Fully two weeks ahead of the famous Early Bantam and fully as sweet as Mammoth White Cory. Our finest strain of sweet corn, and the earliest. Is in great demand, both by the home gardener and truck gardener. (See color illustration page 33.)

Developed for a short season, it is the best early corn for any district and especially for the entire Northwest.

Like all extra early varieties, the foliage is not heavy and the stalks are slender. Usually produces two ears to the stalk. Being a free stooler, it shoots up many stalks, hence a heavy yielder. Ears set about 20 to 24 inches above the ground; stalks grow $3\frac{1}{2}$ to 4 ft. in height.

It is of creamish color, with fat, plump, sweet, juicy kernels. Ears are trifle larger than Bantam.

Our own introduction, a distinct type from other sweet corns, and much earlier. Matures in about 50 days.

366—Pkg., 15c; 1b., 45c, postpaid. Price, by Express: 1b., 40c; 5 lbs., \$1.75; 15 lbs., \$4.00; 25 lbs., \$6.00; 50 lbs., \$11.00.

EARLE'S EARLY EVERGREEN

This corn is also one of the early, very large eared varieties of sweet corn. Ears measure 10 to 12 inches. It matures in about 65 days. In color the ears are pure white, exceptionally sweet, very luscious, tender and palatable. No matter what other varieties you plant—be sure and give this variety a trial.

Earle's Early Evergreen is a prolific strain, the large ears are well filled, attractive and of nice shape. We received such unstinted praise for this variety when we listed it before, we have rather inclined toward it ourselves as much for the satisfaction it was giving our customers, as we did for its real merits.

393—Pkg., 10c; 1b., 40c, postpaid. Price, by Express: 1b., 35c; 5 lbs., \$1.50; 15 lbs., \$3.75; 25 lbs., \$5.50; 50 lbs., \$10.00.

SALZER'S 4TH OF JULY

This variety ranks second in popularity among our white sweet corns. The kernels are of exceptional sweetness, the ear is large, and it is very early, altho not as early as Honey Boy. Because of the large ears, combined with the tender quality and sweet flavor, it is in good demand with gardeners who want a white corn, where earliness is not the first consideration. Along with the other sweet corn, 4th of July has been given careful, regular tests, and like them, is true to type and a pedigree strain of fine quality. We recommend it as a white corn where earliness is not essential.

One of the most productive of the sweet corns. Produces a symmetrical, attractive ear, about ten inches long, with eight to ten rows to the ear. Stalks grow about five feet high. Matures in about sixty days. Has proven very popular everywhere for home use and market purpose. No vegetable comes in at a more opportune time than Salzer's 4th of July. Although a white Mexican strain, it can be successfully grown where any other variety of sweet corn can be.

373—Pkg., 10c; 1b., 40c, postpaid. Price, by Express: 1b., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00; 25 lbs., \$5.75; 50 lbs., \$10.50.

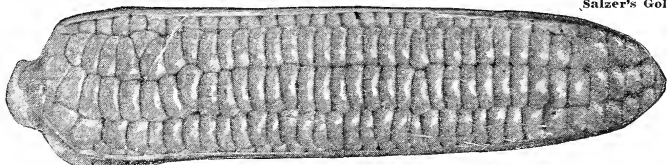

SALZER'S GOLDEN BANTAM

The most popular of all sweet corns. This is a great favorite with our customers who want a yellow sweet corn. Its flavor is extremely sweet and delicious, its kernels tender and juicy. (See illustration below.)

Its hardness permits planting earlier and in colder and damper soil than other varieties. It is about two weeks later than Salzer's Honey Boy. Plant it at regular intervals to obtain a continuous supply during the season. In our latitude it can be planted as late as the middle of July. The stalks grow from 4 to 5 feet in height and generally produce two ears, which are 5 to 7 inches long and of a bright golden yellow color when ready for the table. It is one of the sweetest, most luscious and toothsome of the sweet corns. Matures in about 70 days.

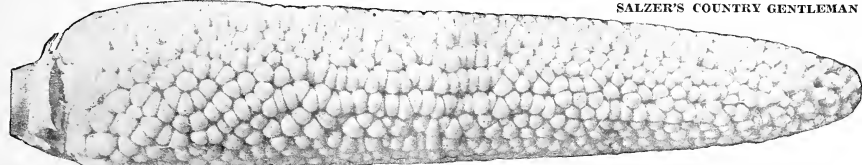

372—Pkg., 10c; 1b., 35c, postpaid. Price, by Express: 1b., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 25 lbs., \$5.25; 50 lbs., \$9.75.

Salzer's Golden Bantam

FOR A SUCCESSION CROP PLANT THE ABOVE FOUR VARIETIES

Sweet Corn (*Zea Mays saccharata*)

SALZER'S COUNTRY GENTLEMAN

The superb quality of this late variety of sweet corn causes it to be in great demand for fancy trade and it always commands top prices. If you have never planted this, we strongly recommend that it be given a trial. Its irregular rows make it attractive. Many consider it practically as sweet as White Cory.

Considered by many one of the best main crop or late season varieties. It is a very fine canning sort, becoming more popular each year with canners.

Cobs are small, ears are 7 to 9 inches long, densely covered with irregular rows. Kernels are white, deep, long and slender and esteemed for their luscious, juicy sweetness. Matures in from 35 to 90 days.

Stalks grow 6 to 7 feet high, producing two and three ears each. Matures immediately following the early varieties. (See illustration above.)

392—Pkg., 10c; lb., 35c, postpaid. Price, by Express: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 25 lbs., \$5.25; 50 lbs., \$9.75.

STOWELL'S EVERGREEN

Best known of the late varieties. More Stowell's is grown for canning purposes than any other single variety, and is acknowledged as the standard late sweet corn. Stowell's is the most popular late home garden sort.

A dependable type for every section of the country. Lasts a long time for table use. Very productive. Hardy and robust. Ears are seven to eight inches long, fourteen to twenty rows of kernels per ear. Matures in approximately 90 days.

Kernels longish, white in color. Very tender and sugary. 402—Pkg., 10c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.00.

PEEP O'DAY

Planted quite extensively throughout the Northwest. A first class medium early corn. Matures in about 80 days.

375—Pkg., 10c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.00.

WHITE EVERGREEN

It is of vigorous growth, produces large ears with deep kernels of fine quality and matures in about 95 days.

400—Pkg., 10c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.00.

POPCORN (*Zea Mays, Everta*)

TOM THUMB

This is the dwarf variety of popcorn used so extensively by popcorn vendors all over the United States. The kernels are similar in color and shape to the older types of white rice, except they are more slender and longer. Is of dwarf growing habit. Ear about two to three inches long. The kernels on an average cob, however, will produce nearly twice as much popped corn as the average larger sized white rice cob, with practically no wastage. Matures in about 65 days.

422—Pkg., 10c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.65; 25 lbs., \$3.75; 50 lbs., \$6.75.

WHITE RICE

One of the finest, most prolific Popcorns grown; largely planted. Matures in about 80 days.

423—Pkg., 5c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.25; 25 lbs., \$3.25; 50 lbs., \$6.00.

SALZER'S SILVER BALL

Very productive, tender and crisp; pops readily and very large. A package will be sufficient for family use. Takes about 80 days to mature.

420—Pkg., 10c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.25.

POPCORN FOR POPPING PURPOSES

425—TOM THUMB—Price, lb., 25c, postpaid. By Express: Lb., 20c; 5 lbs., 75c; 10 lbs., \$1.25; 100 lbs., \$11.00.

424—WHITE RICE—Price, lb., 25c, postpaid. By Express: Lb., 20c; 5 lbs., 60c; 10 lbs., \$1.00; 100 lbs., \$9.00.

OUR SURE-POP POPCORN IS THE BEST THE MARKET AFFORDS

SALZER'S MAMMOTH WHITE CORY

An early strain, well liked, which has always had a reputation for its remarkable sweetness. We have found it to be one of the popular early varieties.

It is a time-tried, reliable sort that seldom disappoints. Largely planted by market gardeners to follow the extra early sorts. Equally well thought of by private growers.

A finely bred, early sweet corn, with nice appearing, large, twelve-rowed ears, which are about six to seven inches in length and of fine shape. The kernel is large, broad, luscious, very white, tender and sweet. Generally ripens a few days ahead of Golden Bantam.

Stalks grow about 4 to 5 ft. high, each producing usually two ears. Plants are vigorous growers and productive.

374—Pkg., 10c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.25.

EARLY MINNESOTA

An old favorite variety, and one of the most productive early sorts. The stalks grow six feet high, produce eight-inch long ears, which are covered with 8 to 10 rows of broad kernels of tender and sweet flavor.

369—Pkg., 5c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.00.

EARLY CHAMPION

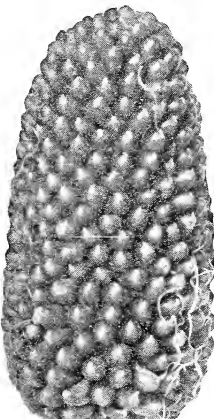

Matures in about 70 days. Ears 8 to 10 inches in length. Kernels pure white. Very sweet, tender and juicy. Medium early.

394—Pkg., 5c; lb., 25c, postpaid. Price, by Express: Lb., 20c; 5 lbs., \$1.00; 15 lbs., \$2.25; 25 lbs., \$4.00; 50 lbs., \$7.50.

EARLY EVERGREEN

Slightly smaller ears than those of the Stowell's but fit for the table from a week to 10 days earlier. Ears seven to eight inches long, with 16 to 20 rows of deep grains of the very best quality. Matures in about 80 days.

395—Pkg., 10c; lb., 30c, postpaid. Price, by Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.00.

TOM THUMB

Cucumber (*Cucumis Sativus*)

THE
IDEAL
CUCUMBER

A
SELECT
STRAIN

SALZER'S EARLIEST OR 40-DAY CUCUMBER

See Color Illustration On Inside Rear Cover

It will be of interest to our customers to know that cucumbers are one of the first vegetables in known cultivation, having probably been in use about ten thousand years. They were first used in the East Indies, and rapidly came into world-wide use.

Salzer's Earliest, is our very earliest cucumber, enjoying a wide popularity. This strain has been developed and bred at our Cliffwood Farms with painstaking care, at heavy expense, until we believe that now we have the earliest cucumber in existence. It is unusually crisp and tender, making an exceptionally fine slicer, and constitutes our finest value in cucumbers. Being so early, one has good, fair sized fruit ready for use before hot weather overtakes it, and it is a money-maker for the market gardener.

It is a pedigreed strain of the highest type. Like most all extra early strains it is devoid of that tough, hard, green, unpalatable condition, at all stages.

Extremely early, ready for table use in about 40 days. The fruits, about 7 inches long, are straight, nearly cylindrical, blunt at the ends and of very dark green color; with distinct pale green lines at the blossom end. Uniform in shape and size. An ideal cucumber for slicing, excellent for pickling, the flesh firm and crisp, and of delightful flavor. The vines are vigorous in growth, very healthy, holding the fruit for a long period. (See illustration above.)

447—Pkg., 10c; oz., 25c; ¼ lb., 60c; lb., \$1.75, postpaid. Price, by Express: Lb., \$1.70; 5 lbs., \$8.25.

SALZER'S IMPROVED LONG GREEN

An exceptionally well liked cucumber of the medium late, slicing varieties, also good for pickling. On account of its large size, attractive appearance, fine shape, and excellent quality, this is very popular with the market gardeners.

It is very hardy, has a perfected uniformity in size, a full, rich color, is crisp and tender and has a fine flavor. Salzer's Improved Long Green is our best value among the medium late, slicing cucumbers. Widely grown for market and equally good for home use, enjoying about twice the wide use than any other. It is extremely prolific and is the best variety for hardness and disease resistance.

Fruits are from ten to fifteen inches in length when fully matured, of somewhat slender girth, and of attractive dark green color, with spines or warts uniformly distributed on the surface. It produces early a fine quality of small cucumbers, excellent for pickling. While in the slicing stage the fruits are very attractive. Crisp, tender and of good flavor. Being a hardy type it is very productive. The vines are strong, vigorous and of rapid growth. Matures in about 70 days. (See illustration opposite.)

448—Pkg., 10c; oz., 25c; ¼ lb., 50c; lb., \$1.50, postpaid. Price, by Express: Lb., \$1.45; 5 lbs., \$7.00.

SALZER'S IMPROVED WHITE SPINE

One of the most prolific and earliest of the older types of White Spine cucumbers, and considered one of the most dependable varieties to grow and very popular for table use. Vines are of vigorous growth. A prolific and early fruiter. Dark green color well covered with white spines and uniformly straight. About nine inches long. Inclined to be pointed at the end. Matures in about 65 days.

The flesh is crisp, tender and of fine quality. A desirable variety for salads, slicing and pickling.

438—Pkg., 5c; oz., 25c; ¼ lb., 45c; lb., \$1.25, postpaid. Price, by Express: Lb., \$1.20; 5 lbs., \$5.75.

DAVIS' PERFECT

Every cucumber we list has a peculiar use of its own. Some are early, some late, some extremely hardy, etc. This one is prized by the housewife because it has very few seeds and therefore highly valuable for table use.

The vines are hardy and vigorous. Bears fruit for a prolonged period. Fruits somewhat long and slender, averaging about ten to eleven inches in length. Color deep dark green. White spined. Tapers at both ends. Uniform in shape. Quite prolific. An excellent shipper. Retains its color for a long time. Matures in approximately 60 days. Flesh is cool, crisp, tender and of fine flavor.

441—Pkg., 10c; oz., 25c; ¼ lb., 50c; lb., \$1.50, postpaid. Price, by Express: Lb., \$1.45; 5 lbs., \$7.00.

WEST INDIA GHERKINS

The smallest of the pickle varieties, maturing in approximately 50 days. Fruits average from two to two and one-half inches. Should be pickled when young and tender. Oval shape, prickly surface.

483—Pkg., 10c; oz., 25c, postpaid.

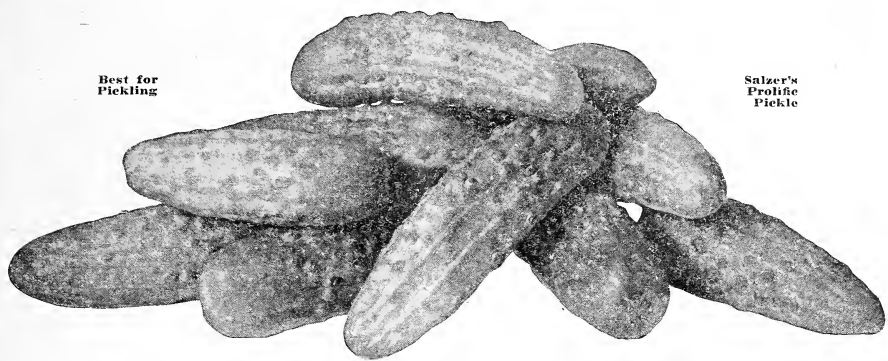

Salzer's Improved Long
Green

FOR A SLICING CUCUMBER SALZER'S EARLIEST IS INCOMPARABLE

Cucumber (*Cucumis Sativus*)

Best for
Pickling

Salzer's
Prolific
Pickle

SALZER'S PROLIFIC PICKLE

This variety is our best pickling cucumber, and is most in demand by the housewives, who always have pickles in mind when they think of cucumbers. Salzer's Prolific is enormously productive and is highly recommended for its uniform, early pickles. Cannot be beat for pickling purposes, and as such, ranks foremost. Exceptionally fine for both the market gardener and the home garden, the square ends making it very attractive. Size about $5\frac{1}{2} \times 2\frac{1}{4}$ inches.

Slender, cylindrical, square ended, with large prominent spines, color dark green. The flesh is solid and thick in texture, excellent in quality. The vines set fruit when young and usually continue to bear longer than any other variety. A select strain of the old reliable Snow Pickling variety. Matures in about 55 days. (See illustration above.)

469—Pkg., 10c; oz., 25c; $\frac{1}{4}$ lb., 50c; lb., \$1.50, postpaid. Price, by Express: lb., \$1.45; 5 lbs., \$7.00.

SALZER'S CHICAGO PICKLING

Also a popular strain of the small, early pickle varieties. It has square ends, smooth skin, is very productive and very disease-resistant. Measures about $6 \times 2\frac{1}{2}$ inches, and has a rich, deep green color.

Has a national reputation for shipping qualities. Matures in about 60 days. Flesh crisp, cool and of pleasing flavor.

462—Pkg., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; lb., \$1.00, postpaid. Price, by Express: lb., 95c; 5 lbs., \$4.50; 10 lbs., \$8.00.

USE
VARIETY
NUMBER
WHEN
ORDERING

SALZER'S EVERBEARING

Ranks next to Salzer's Prolific in popularity for pickling purposes. It is just a fraction smaller than the Prolific, is very productive, and of special value in districts where the late maturing kinds will not ripen.

Is a continuous bearer throughout the season, hence its name "Everbearing." If the fruits are gathered continuously, the vines will fruit freely the entire summer.

A very early and extremely productive variety. Matures in about 60 days. The fruits average four to five inches in length. Diameter about one to one and a half inches. Rich dark green color. One of the best sorts for pickling, salads and slicing. Flesh white, crisp, cool and of pleasing flavor.

466—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 45c; lb., \$1.25, postpaid. Price, by Express: lb., \$1.20; 5 lbs., \$5.75.

I just want to say "Hurrah" for Salzer's Cucumbers. Three years ago we planted 23 hills and put up all we needed ourselves and kept our neighbors supplied. The ground was anything but good they were planted in. So I must have some more of those cucumbers.

Mrs. J. L. Miller, St. Matthews, Ky.

LEMON CUCUMBER

As its name indicates, it is somewhat similar in shape to a lemon, and it is used for pickling and in salads. The seeds may be taken out and it may be stuffed with relishes. A comparatively new variety, but it is increasing in use each year. The Lemon Cucumber should not be confounded with the Garden Lemon, which is entirely distinct.

When ready to use it has the color of a ripe lemon. The skin is smooth. The fruits are very attractive in appearance, and grow from two and one-half to three inches in diameter. The flesh is tender, crisp and possesses a delicate sweetness and flavor. They are fine for pickling, either green or ripe. For slicing they should be used just as the fruits are, turning yellow.

480—Pkg., 10c; oz., 45c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00, postpaid.

SALZER'S KLONDIKE

In many districts the extremes of weather and soil make cucumber growing difficult, hence a type like Klondike with its super-vigor and ability to thrive and produce during protracted cool spells, hot scorching suns, long dry and wet periods, is absolutely necessary. Its hardiness is vastly superior to any other cucumber grown. It is especially recommended for light soils and dry districts.

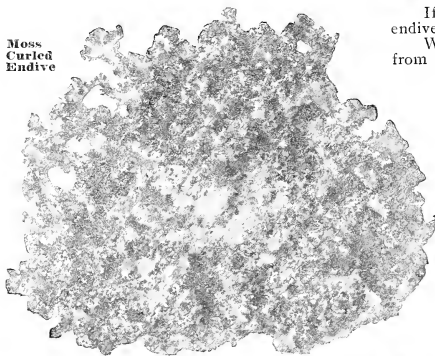

A very productive variety. Medium early, matures in about 60 days. A white spine sort of attractive appearance. Very dark green in color, faintly striped at the ends. Retains its deep green color longer than any of the other varieties and for this reason used principally for long distance shipping. Tapers at the blossom end, somewhat blunt at stem end. Fruits about seven to eight inches long. Uniform in size and shape.

The quality is excellent for slicing, salads and pickling. The flesh is white, crisp and of fine flavor.

449—Pkg., 10c; oz., 25c; $\frac{1}{4}$ lb., 45c; lb., \$1.25, postpaid. Price, by Express: lb., \$1.20; 5 lbs., \$5.75.

COMPLETE CULTURAL DIRECTIONS ON EVERY PACKAGE

(Cichorium Endivia)

Moss
Curled
Endive

Endive

MOSS CURLED

If you love greens, then you miss a real treat if you do not grow endive, as it has a much finer flavor.

With its slightly pungent taste it is decidedly distinct in flavor from other salad vegetables. Much more ornamental than either lettuce or parsley, hence very valuable for garnishing. Moss Curled is a dense cluster of finely cut-in green leaves which are very crisp and tender. Resembles a tuft of moss 10 to 12 inches in diameter. (See illustration opposite.) Ready for use in about 55 days. A delicious salad.

502—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25, postpaid.

EVER WHITE CURLED

Very light colored leaves, which are crisp and tender; the most attractive sort; 14 to 16 inches in diameter. Does not require tying up, as it assumes a delightful pungent taste and attractive appearance. Matures in 50 days.

501—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 35c; lb., \$1.00, postpaid.

BROADLEAVED BATAVIAN (Escarolle)

Large broad leaved, forming a fairly firm head, 16 inches in diameter; blanches nearly white, and is of fine flavor, unsurpassed for salads; also much used for greens; cooked like spinach. Largely grown. Ready for use in about 55 days.

500—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25, postpaid.

Egg Plant

(Solanum Melongena)

SALZER'S NEW YORK PURPLE

Egg Plant has become about as generally grown as other vegetables, because people have awakened to the fact that it requires no special care and is one of the finest vegetables for table use.

Salzer's strain is highly developed for flavor and hardness, so much so in fact that we have a special list of customers who depend upon us entirely for their supply.

It is early, prolific and entirely spineless. Extra large fruits, weighing several pounds each, with a circumference of twelve to fifteen inches, have often been grown of this strain, and as much as thirty pounds of fruit from one plant. The fruits are of deep purple color, quite smooth, and have white delicious flesh. Ready for table in about 95 days.

494—Pkg., 10c; oz., 55c; $\frac{1}{4}$ lb., \$1.65, postpaid.

SALZER'S BLACK BEAUTY

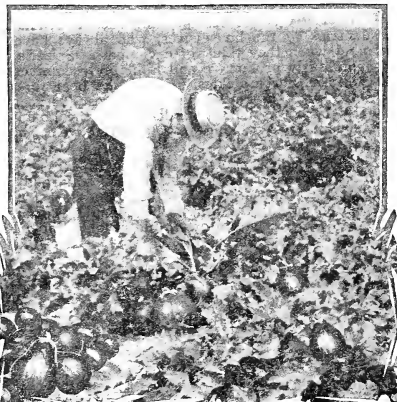

A most desirable variety for the home garden and truckers, especially in the North, as it is quite early, maturing ten to twelve days ahead of the New York Purple. The fruits are

Salzer's American Flag Leek

broad, thick, symmetrical in shape, of a rich, lustrous, purplish black color, and of splendid flavor. Not quite so productive, nor as large as those of the New York Purple. (See illustration opposite.)

492—Pkg., 10c; oz., 60c; $\frac{1}{4}$ lb., \$1.75, postpaid.

Black Beauty Egg Plant

Kale

(Brassica oleracea Var. Acephala)

SALZER'S MOSS CURLED

The best and hardiest variety. Robust, very compact in growth, with dense moss curled leaves of deep green color. The stems produce curly sprouts which are tender and of a fine flavor. Grows about 30 inches high; stands cold which improves its deliciousness. Ready for use in about 55 days.

512—Pkg., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.50, postpaid.

TALL SCOTCH GREEN

A hardy ornamental plant, 3 to 4 feet high, with long deeply cut and curled light green leaves of fine quality. Ready for use in about 55 days.

514—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.50, postpaid.

Am so well pleased with the results that I received from your New York Purple Egg Plant that I am never going to use any other.

Chas. F. Tuck, Florida, Ill.

SALZER'S LARGE AMERICAN FLAG LEEK

A splendid vegetable for flavoring soups, etc. Treat same as onions; both leaves and bulbs are used. Leeks are very hardy and the flavor is much improved by freezing. In fall, plant a few in sand in the cellar for winter use. Produces large, thick stems of mild flavor. Matures in about 90 days. (See illustration.)

531—Pkg., 10c; oz., 25c; $\frac{1}{4}$ lb., 75c; lb., \$2.25, postpaid.

EVERY VARIETY TESTED THREE TIMES FOR GERMINATION. SALZER'S SEEDS GROW.

Kohlrabi

(*Brassica Oleracea*
Var. *CaULO-Rapa*)

SALZER'S EARLY WHITE VIENNA

If you are fond of turnips and of cabbage, then we urge you by all means to plant at least some Kohlrabi. When cooked before it is fully grown (that is, when about two inches in diameter), it is tender and excellent, combining both the flavors of cabbage and turnip. Should be cooked the same as you would cook turnips. It is hardy and thrives everywhere. Our Early White Vienna is grown from the best selected seed and tested thoroughly for true type. This variety will give you great satisfaction.

A select early strain. White bulbs, tinged with green. Small leaves. Tops are about eight to ten inches long. Ready for the table in 50 days after setting out plant. Being an extremely early variety it is a desirable sort for forcing. Quality very fine. Flesh is white and delicate. (See illustration opposite.)

523—Pkg. 10c; oz., 25c; ¼ lb., 70c; 1b., \$2.25, postpaid.

SALZER'S EARLY PURPLE VIENNA

Also excellent for soups, or cooked like turnips, and enjoys almost as much popularity as the Early White Vienna, and similar to it in many ways, but not quite so early. The leaves, stems, and outside of the bulbs are purple, but the flesh is tender and white.

Planted at intervals, tender bulbs can be produced throughout the season. Ready to use in about 50 days after setting out plants. Best time to use is when the roots are about two and one-half inches in diameter.

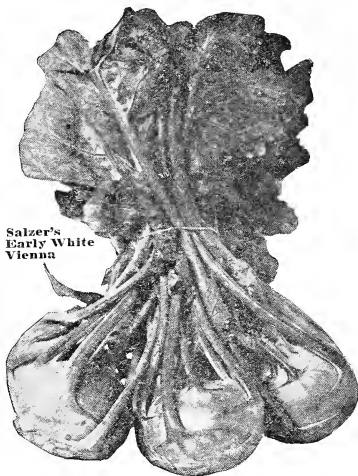

522—Pkg. 10c; oz., 25c; ¼ lb., 70c; 1b., \$2.25, postpaid.

SOW SALZER'S SEEDS

Your seeds have always given satisfaction and are acclimated to this part of the country. Your Kohlrabi are exceedingly delicious.

Mrs. Henry Olson, Medford, Minn.

Salzer's
Early White
Vienna

SOUTHERN GIANT MUSTARD (CHINESE)

Mustard is planted extensively in the South for boiling greens during the fall and winter months. When freshly picked, the leaves are cooked and eaten like spinach. They do not lose much in substance by cooking and have a very agreeable flavor. Highly esteemed in warm countries for use as green vegetables.

Are easily cultivated and ready for use in six weeks from sowing. To those of our customers who have never planted Mustard, we recommend that they give it a trial. Makes a deliciously pungent salad. Plants yield until frost.

725—Pkg., 10c; oz., 15c; ¼ lb., 25c; 1b., 75c, postpaid.

SALZER'S FRENCH GIANT DANDELION

This should not be confused with the wild Dandelion, having leaves much thicker and almost double the size.

Good for the blood; largely grown in France. It is delicious and on account of its extreme earliness is in great demand as a salad; the leaves are also cooked like spinach. 490—Pkg., 15c.

SALZER'S CLIFFWOOD GROWN HORSE RADISH ROOTS

When we originally started growing horseradish roots at our Cliffwood Farm we had little idea it would reach its present large proportions. However, continuous selection and improvement has been its advertisement. Today we believe we produce the finest, cleanest, hardest, most vigorous high quality horseradish roots in the country.

This splendid appetizer cannot be over-estimated; 25 plants are sufficient for a family. The roots grow and increase rapidly in size with each succeeding year. Plant in a corner of the garden where you wish it to grow and you can begin digging the following year. (See illustration.)

4112—Cliffwood grown roots, doz., 45c; 25 for 75c; 50 for \$1.25; 100 for \$2.00, postpaid.

BOHEMIAN

This variety, while not radically different from our Cliffwood, is a fine type and is an old strain.

4111—Roots, doz., 35c; 25 for 60c; 50 for 85c; 100 for \$1.50, postpaid.

CLIFFWOOD GROWN RHUBARB ROOTS

Our rhubarb roots are also coming into greater demand each year. Continuous selection and improvement have likewise brought them into prominence. Set apart a small corner of your garden for rhubarb. Unexcelled for pies and sauce.

1 yr. old roots, 3 for 25c; 6 for 45c; 25 for \$1.60, postpaid. 2 yr. old roots, 2 for 25c; 12 for \$1.25; 25 for \$2.25, postpaid.

RHUBARB ROOTS by express at purchaser's expense: 100 1 yr. old roots for \$6.00; 100 2 yr. old roots for \$8.50. Extra large clumps, 40c each; 12 for \$4.50.

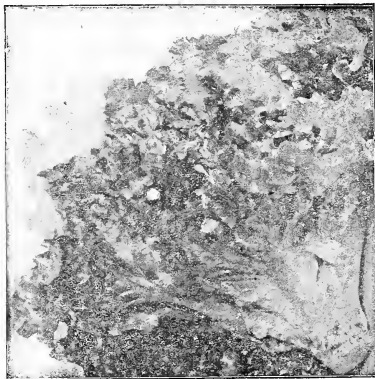

If large clumps are wanted by mail please add 10c extra for each.

RHUBARB AND HORSE RADISH ARE VERY HEALTHY. PLANT SOME ROOTS.

Salzer's
Cliffwood
Grown
Horseradish
Roots

Salzer's Earliest

GRAND RAPIDS

An old reliable type, very dependable, and one which still remains very popular. Is a fine shipper and very much in demand for winter markets. Easily raised from outdoor plantings in spring.

Long keeper. A loose leaf variety; used extensively for forcing in hotbeds. Used more than any other variety for hotbed and greenhouse.

541—Pkg., 10c; oz., 20c; ¼ lb., 35c; lb., \$1.00, postpaid.

BLACK SEEDED SIMPSON

Easily grown and very reliable, thriving splendidly during the hot summer months. Is also a good shipper. Thin, tender leaves. Very early, slow to go to seed, with broad, crumpled leaves of very light green color, tender and sweet.

554—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

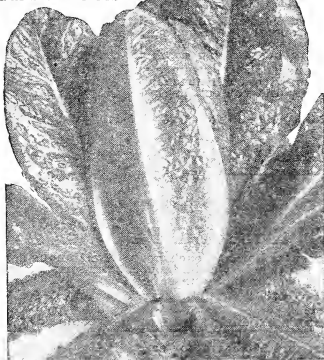

EARLY CURLED WHITE SEEDED SIMPSON

This is an early variety and is grown largely in cold frames and the open ground. Like our other seeds, it is true to type, purely bred, and highly developed.

Medium sized plants with very light green leaves of excellent quality and sweet flavor. Very reliable and sure to make good leaves, even under unfavorable conditions.

559—Pkg., 5c; oz., 20c; ¼ lb., 35c; lb., \$1.25, postpaid.

Paris White Cos

Lettuce (*Lactuca Sativa*)

SALZER'S EARLIEST

Without exception, this is our earliest loose-leaved or curled, cutting variety, and comprises our finest value in leaf lettuce. Finely bred at Cliffwood Farms under selected tests for truthness to type and for earliness, it has been developed into the best and most popular of leaf lettuces, and we recommend its use. After the long winter months, fresh green vegetables are in great demand for the table, and there is hardly anyone who does not want lettuce as soon as it appears in the garden or on the market. This variety is an exceptionally attractive value. Unusually early.

It is of finest quality, crisp and good flavor. As a cropper it is sure, uniform in size, shape and maturity.

It is of beautiful color and shape, and will prove profitable for the grower, whether he sows seeds in a hotbed or outdoors. A re-selected Grand Rapids strain.

Salzer's Earliest is an early bunching, or loose-leaved Lettuce, and it affords crisp, good-flavored leaves long before the heading sorts have commenced to close up.

The plants form a loose cluster of leaves which blanch nicely. The leaves are of light green color, excessively blistered and crumpled, crisp and of good quality. (See illustration opposite.)

540—Pkg., 15c; oz., 25c; ¼ lb., 75c; lb., \$2.00, postpaid.

SOW SALZER'S SEEDS

I am sending you a clipping from the Cincinnati Post, so you can see what they think of the wonderful lettuce I had from your seed.

Jos. Bourgeois, Mt. Healthy, Ohio.

SALZER'S PRIZEHEAD

Comes next in popularity to Salzer's Earliest among the leaf lettuces. It is not quite so early, but reaches a very large size without losing its tenderness or crispness. The leaves are very blistered and crumpled.

One of the best and most reliable varieties for all year round cultivation. Its immense size and tenderness make it a Prizehead. It is quite early and slow to shoot to seed. The plants form a loose cluster of leaves, the inner part of which is well blanched, though there is no heart; the leaves are much blistered and crumpled, of light brown color varying to bright green, and are of exquisite quality, tender and crisp in texture, and sweet in flavor. An excellent variety for home use. Our stock has been carefully built up by selection for years. (See illustration below.)

575—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid.

SOW SALZER'S SEEDS

Your Prizehead lettuce seed is positively the best I ever used, and I think I have tried them all. My lettuce is also the finest I have seen in this district.

Emil Krankosky, Boerne, Texas.

PARIS WHITE COS

The Cos Lettuces are distinguished from other lettuces in that their leaves are elongated and almost always somewhat spoon-shaped. Grown in exactly the same way as other lettuce. The White Cos is the most grown of all the Cos varieties and is very well adapted for temperate and warm climates.

When young, the leaves are pale green. When full grown, the leaves form a loose, conical head, outer leaves light green and rather crimped, inner leaves very pale green with the midrib white and very prominent. Very crisp and has a delicious flavor. We strongly urge you to try this variety, as we believe you will be well pleased with it.

Very well adapted for forcing and for early sowing.

Succeeds very well in summer, never wilts under the severest sun and can be grown to an immense size; plants weighing six pounds have been grown of this variety. (See illustration.)

598—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

PLANT AN ABUNDANCE OF LETTUCE IN YOUR GARDEN

Lettuce (*Lactuca Sativa*)

SALZER'S NEW YORK OR WONDERFUL

Salzer's New York Head Lettuce is the finest of the head lettuce varieties and because of its immense size, fine color, crisp tenderness, and delicate flavor, it is in very heavy demand in hotels throughout the country. The heads range from 16 to 18 inches in size, frequently reach 19 inches and weigh from three to three and one-half pounds, which readily explains why it is so popular and such a money-maker for market gardeners.

This is the variety which is widely grown in California and the heads shipped in carload lots by the thousand. Do not confuse this with the Iceberg as it is entirely distinct. We have directed our attention on this strain, making exhaustive tests and selective trials at Cliffwood Farm, causing us heavy expense, which in turn increases the price somewhat, but if you are a market gardener you will make no mistake in planting this strain.

The interior is beautifully blanched, creamy white, crisp tender, and free from any trace of bitterness. It is robust and is a standard hot weather variety anywhere. Although more expensive than other varieties, it is one of the most generally grown, because of the phenomenal crop it produces.

It is slow to go to seed, but an extremely vigorous grower. The outer color is a distinct apple-green. Roots deeply, resists hot and dry weather, is reliable and sure heading under the most trying conditions. (See illustration opposite.)

556—Pkg., 15c; oz., 45c; ¼ lb., \$1.25; lb., \$3.50, postpaid.

SOW SALZER'S SEEDS

I am sending you a photo of New York Head Lettuce weighing 3½ lbs. We had 300 heads, many weighing 3 lbs.

Mrs. Louis A. Diller, Mechanicsburg, Pa.

SALZER'S CRISP AS ICE

See Color Illustration, Page 34

A beautiful lettuce of medium size and medium early. Very compact plants, forming firm heads with rich, creamy hearts. Unsurpassed in delicate flavor, tender and brittle. Matures in approximately 85 days.

This head lettuce, when cut open, has such a rich, creamy heart, and is so tender and brittle, that it was immediately and rightly named Crisp as Ice. A splendid and distinct type, very well adapted for market or for home use, and ranks next in popularity to Salzer's New York. It is a very sparing seeder which causes it to be rather expensive.

The leaves are handsomely crimped and curled, thick and glossy, and the outside leaves variegated with green and dark bronze. It is our next best value in head lettuce, the yield and quality making up for the purchase price. Very attractive and a real table treat.

556—Pkg., 15c; oz., 45c; ¼ lb., \$1.00; lb., \$3.00, postpaid.

Salzer's
Cream
Butter

SALZER'S CREAM BUTTER

Salzer's Cream Butter Lettuce occupies third place in popularity with our customers. It has a decidedly agreeable and delicate taste and is a strain that is heavily in demand, and is rapidly gaining in esteem because its flavor is so pleasing. As its name indicates, it is a butter head type of rich, creamy flavor. The seeds have also all been exhaustively tested and tried for truthness to type, vitality and purity, and Cream Butter comprises a very fine value.

We consider this lettuce the easiest to grow and the surest and hardest header. Is very popular and very well liked for the home garden for this reason and also because of its taste, appearance, and its resistance to hot weather. It is an extremely solid heading variety, highly prized for table use. Is one of the best summer sorts.

Its large head is in quality one of the finest of all lettuce sorts; the leaves are very thick and of a buttery, sweet flavor. The outer leaves are of a dark, rich, glossy green color, spotted with deep brown, the inner head is never colored. Very hardy; a good shipper. Matures in about 75 days. (See illustration opposite.)

561—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.25, postpaid.

SOW SALZER'S SEEDS

I am sending you a picture of a patch of Salzer's Cream Butter Lettuce grown at an altitude of 7,800 feet. It is the best lettuce that has ever been grown in this country.

L. Meisker, Flagstaff, Ariz.

Last year I purchased your Dollar Collection and was very well satisfied with it. We also bought some Crisp-as-Ice Lettuce that was a real treat. Albert Fritz, Beaver Falls, Pa.

In my opinion your Crisp-as-Ice Lettuce is the most wonderful we ever had.

Ludwig Stivity, Lawrence, Mass.

NEW YORK LETTUCE IS THE BEST VARIETY OF HEAD LETTUCE

Lettuce (*Lactuca Sativa*)

**SALZER'S
MAY
KING**

SALZER'S MAY KING

This is a special strain sold only by Salzers. Its great hold upon so many of the American people is due to its earliness, being the earliest of the heading varieties, as it matures in about seventy days. For this reason gardeners generally include it in their garden operations. It holds undisputed supremacy in many sections of the country, where lettuce growing for early market purposes is pursued on a large scale. Combined with its earliness are firm heading and superb eating qualities; it is very hardy, hence stands cold damp weather to an unusual degree.

Compact and very firm heads of good size, often attaining a diameter of 7 to 8 inches. The outer leaves are light green tinged with reddish brown, and are handsomely savoyed, the inner leaves blanch to a rich golden yellow color, are very tender and of sweet, buttery flavor. It attains a size, suitable for use before any other large heading variety we know of. Matures in about 70 days. (See illustration.)

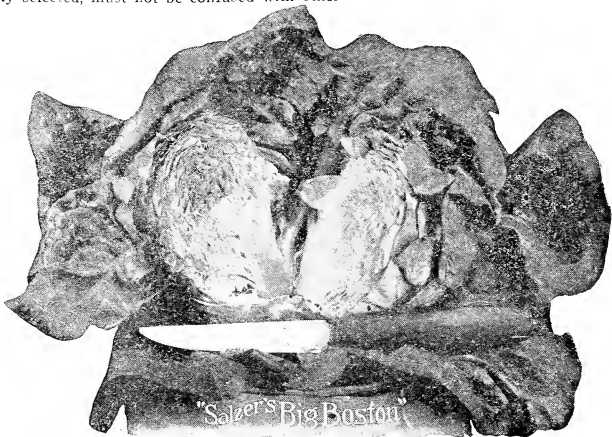

560—Pkg., 10c; oz., 20c; ¼ lb., 50c; 1b., \$1.50, postpaid.

SALZER'S BIG BOSTON

The demand for Salzer's Big Boston is very heavy. It is a finely selected strain, makes perfect heads, and it always brings a good crop. Develops very solid heads and is an excellent shipper; has a great range of adaptability and excellent table qualities. Salzer's Big Boston, specially selected, must not be confused with other Big Bostons as we have perfected a type that is safe for the amateur. It brings good crops in spring and early summer, and in the fall it is used in preference to other sorts because it is unharmed by the early light frosts. Also used a great deal by greenhouse gardeners for an indoor crop. This variety is very popular in the South especially.

A splendid market variety, largely grown everywhere. Succeeds especially well in cool weather, during spring and fall. It is also used more extensively than any other lettuce grown in southern states during winter, for shipping to northern markets. The heads are quite large, of very attractive appearance, light green color, with bronzed edges and are of fine quality, crisp, tender and sweet. Seed white. Matures in about 75 days. (See illustration.)

553—Pkg., 10c; oz., 20c; ¼ lb., 50c; 1b., \$1.50, postpaid.

LETTUCE IS A TONIC AND GOOD FOR THE BLOOD. PLANT SOME.

Muskmelon—Yellow and Green Fleshed Varieties

SALZER'S JUICY FRUIT

See Inside Rear Cover for Color Illustration

Muskmelons are natives of southern Asia and have been in use, as far as can be told, about ten thousand years. Containing a high percentage of sugar, they are one of the most delicious of vegetables and they are used the world over.

Salzer's Juicy Fruit, introduced by us last year, has sprung into instant popularity and due to its fine merits has outsold any other variety. It is a medium late variety, a very heavy yielder, reaches a very large size, and it is of exceptional quality. Continually bred and developed at Cliffwood Farms, our customers are assured of truthness to type and virility, and we know they will derive the utmost satisfaction from this strain. Our finest value in muskmelons and a money-maker for the garden. The finest variety for your own table use.

We consider it the sweetest, most luscious, sugary flavored muskmelon ever introduced. It is the result of years of constant effort to produce an extremely large melon of exceptional sugary flavor, and in offering it again this year we know our customers are going to be just as well pleased with it as before. Do not fail to try it out, see if it is not only all we claim, but even more. It is nearly as large as the Montreal Market in size.

The skin is a light green color. Is nearly round in shape, surface is slightly, with salmon color flesh. Entirely devoid of fibre or stringiness and of most extraordinary sugary, luscious flavor. Buy early, we sold out all of our seed last year.

605—Pkg., 15c; oz., 4c; ¼ lb., \$1.20; lb., \$4.00, postpaid.

SOW SALZER'S SEEDS

Ottertail, Minnesota, Sept. 7, 1923.

Last spring I purchased a package of your Juicy Fruit Muskmelon and planted the seed on May 17. On August 21st I picked the first ripe melon and at this date am still picking them. H. C. Reichelderfer, Prop. The Four-R Poultry Farm.

SALZER'S SELECTED ROCKYFORD

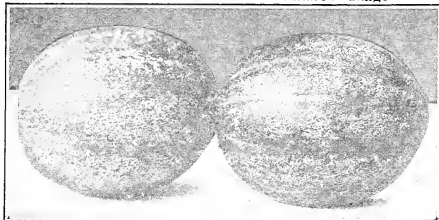

See Color Illustration on Page 34

This fine, green-flesh muskmelon is extremely popular because of its excellent shipping qualities, combined with its fine quality. It has a round shape, it is heavily netted and runs very uniform in size. Salzer's Selected Rockyford has been carefully selected and developed until this type is the finest strain in existence. The flesh is very thick, it is enormously productive, and we especially recommend it to the shipper. Thousands of acres of Rockyford melons are annually grown in California, for the markets and for long distance shipping. Has very firm flesh, and heavy netting, and a very sweet and delicious flavor.

The flesh of this melon is green, sweet and melting; it can be eaten close to the rind. The seed cavity is extremely small. The average weight of the melon is about one and one-half pounds, and the largest per cent of the crop is of such size as to pack 45 melons to the standard crate, 12x12x24 inches. The netting is extremely well developed, closely laced, of gray color, covering the entire fruit. Salzer's Rockyford is the best early strain of Rockyford Netted Gems. It is early, prolific and disease-resistant. Matures in about 85 days. (See illustration below.)

604—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

Salzer's Osage

SALZER'S OSAGE

This variety is an oval or egg-shaped melon, has salmon colored flesh, and is one of the most widely used of the salmon-meated large muskmelons. It is peculiarly adapted to the cooler climates and a correspondingly greater producer in the warmer climates. Requires about 90 days to mature.

The ribs are very indistinct, the netting is very slight and the melon may be called almost smooth. The skin is green when immature, turning to a mottled light and dark green as it ripens, with a trace of yellow. While it will not ship great distances, it is used as a shipping melon where the distances are not great. A very luscious, meaty melon, and we recommend this as one of the finest all-purpose muskmelons of any.

The flesh is deep salmon-colored, very thick, leaving but a small seed cavity in the center. (See illustration above.)

642—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

EMERALD GEM

A small, smooth-skinned variety, slightly ribbed. The flesh is pink and very luscious. It should be picked when the skin is still green, when it parts readily from the vine. When it is fully colored the fruit is over-ripe. Has no keeping qualities for shipping, but for the home garden or early market, it cannot be excelled in pink-meated melons.

Pink color flesh, exceedingly sweet and delicious. Ripens in about 90 days.

639—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid.

SALZER'S YELLOW MEATED JAPAN

A large, pink-meated muskmelon, very sweet and delicious, and popular for both market and home gardens, but it is not adapted for shipping. A medium late variety.

It is large, nearly round, slightly ribbed, and covered with a thin gray netting. The skin turns yellowish white when ripe. The thick salmon-colored flesh is lusciously sweet, melting, and of a rich, spicy flavor.

It is quite early, the vines are healthy, strong growers, and exceedingly productive.

646—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$1.75, postpaid.

POLLOCK NO. 25

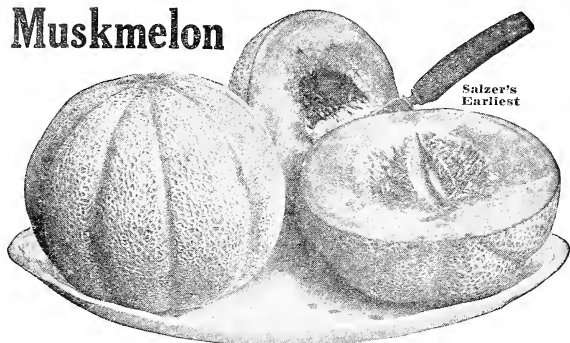

A very fine strain of the Rockyford melons. Like the Rockyford, it has firm flesh, and heavy netting which makes it very desirable for shipping. Has pink flesh, very meaty, and is of excellent quality a n d flavor.

614 — Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid.

SOW SALZER'S SEEDS AND ELIMINATE WORRY AND RISK

Muskmelon

GREEN FLESHED VARIETIES

SALZER'S EARLIEST RIPE

In earliness, Salzer's Earliest Ripe heads the list, being earlier than any other variety, and it is without doubt the finest flavored and most luscious of the extra earlies. It is easy to cultivate, sweet, delicious, and a splendid shipper. Our seeds have been carefully developed from specially selected stock, and where a high grade, extra early melon is wanted, we unhesitatingly recommend Salzer's Earliest Ripe.

Develops to a uniform size. Fine round shape. Attractive appearance. Flesh is green, thick and very sweet. A productive variety that bears for a long time. Matures in about seventy-five days. Vines rather small but vigorous. Fruits medium in size, somewhat flattened, moderately ribbed and netted. A splendid home garden variety; an improved strain of the famous extra early Jenny Lind. (See illustration opposite.)

606—Pkg., 10c; oz., 25c; ¼ lb., 75c; 1b., \$2.00, postpaid.

SALZER'S MONTREAL MARKET

The name alone of this melon bespeaks its merits, for any melon that will reach such huge proportions way up in Canada must be exceptional. The flavor is deliciously sweet. The best variety for fairs and exhibition purposes. It is the largest of all green fleshed varieties. It is a very attractive melon. Throughout the Eastern cities it is one of the most prominent market varieties. The fruit is nearly round, slightly flattened at the ends, with broad, regular deep ribs, skin dark green, densely netted. Matures in about 100 days.

The flesh is thick, light green, melting and of delicious flavor. Owing to its immense size it is a popular home garden variety, as the limited space of most gardens is made up in yield through the size of the melons. (See illustration opposite.)

612—Pkg., 10c; oz., 20c; ¼ lb., 50c; 1b., \$1.50, postpaid.

SALZER'S NEW BUSH

This wonderful melon has vines of a bushy type which permits close planting, and because of the space it saves, it is the best for small gardens. You know, when you or we plant our own gardens and use the vegetables from them for our own tables, somehow or other they seem to taste better than those we buy. If you have been unable to grow melons because of lack of space, then by all means plant some of our New Bush melons. They are also excellent for planting on a large scale. Are of exceptional quality and are similar in size, shape, and appearance to our "Salzer's Earliest Ripe." Salzer's New Bush is obtainable only from us.

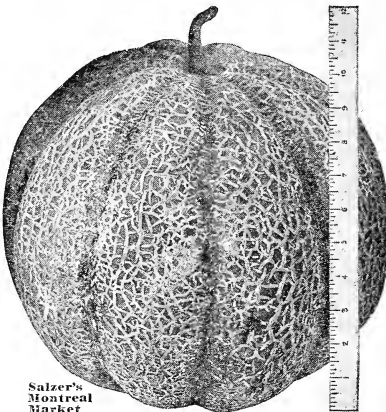

The plants grow 15 to 18 inches wide and usually yield about twice as much as vine sorts. The fruits are deeply netted with shallow ribs. The flesh is light green and of exquisite quality. Matures in about 100 days. (See illustration below.)

613—Pkg., 15c; oz., 50c; ¼ lb., \$1.50, postpaid.

GREEN FLESHED HONEY DEW

Has tasted to fame in less time than any other melon. Looks like a grape fruit, tastes as sweet as honey, has the mingling of many flavors—pineapple, banana and vanilla predominating. Flesh is deep, unusually juicy, of a rich, whitish-green color when ripe. Matures in about 110 days. Rind very tough and finely grained; it remains in good condition many weeks. Splendid shipper.

635—Pkg., 10c; oz., 20c; ¼ lb., 60c; 1b., \$1.75, postpaid.

Salzer's
Montreal
Market

Please Order by
Variety Number

EXTRA EARLY HACKENSACK

One of the most popular of the extra early green fleshed melons. Somewhat smaller size, heavily ribbed and netted, flesh thick and of fine flavor. Not adapted for shipping, but fine for early home market. Is a very heavy yielder.

609—Pkg., 10c; oz., 20c; ¼ lb., 45c; 1b., \$1.25, postpaid.

GOLDEN FLESHED HONEY DEW

In every respect the same as the green fleshed Honey Dew, except the flesh is a rich golden color.

634—Pkg., 10c; oz., 30c; ¼ lb., 85c; 1b., \$2.50, postpaid.

VINE PEACH

Similar to Muskmelons, same cultivation, the size of a large peach, oval shaped, bright orange color.

618—Pkg., 10c; oz., 50c; ¼ lb., \$1.50, postpaid.

Mexican Banana

SALZER'S MEXICAN BANANA

An extremely long melon, tapering at both ends, lemon colored skin when mature, pink flesh, and really having delicious eating qualities. Very vigorous, hardy, rather late in maturing.

It resembles the banana in many respects, only that it is very much larger, growing from 18 to 30 inches long and from 4 to 6 inches in diameter. (See illustration opposite.)

641—Pkg., 10c; oz., 20c; ¼ lb., 60c; 1b., \$1.75, postpaid.

SOW SALZER'S SEEDS. THEY HAVE STOOD THE TEST FOR 56 YEARS

Watermelon (Citrullus Vulgaris)

SALZER'S EARLIEST

Watermelons, natives of Africa and in use about four thousand years, have attained enormous proportions as a commercial article. Some of the southern states shipping several thousand carloads annually.

Earliness in a watermelon is essential, and in Salzer's Earliest we have developed a strain of seed that cannot be beat for earliness. Even in sections too cool to grow ordinarily a crop of watermelons, Salzer's Earliest will ripen and produce fine, large melons. It has been especially bred and developed for those sections which have a short growing season, and it produces correspondingly earlier in warmer districts. Salzer's Earliest is the first in the market, being ready for use in 30 days.

It is of large size, weighing from 15 to 40 pounds, rather round shaped, light green color, striped irregularly with darker green. Very prolific, vigorous and hardy, especially suited to the northerly districts and a leading variety on the markets in the northwest. The bright red flesh is of a fine texture and has a delicious and exceptionally sweet flavor.

The fruits are exceptionally large for so early a variety. Unquestionably the very best extra early melon. Develops uniformity in shape and size. The seed is black. (See illustration.)

667—Pkg., 15c; oz., 25c; ¼ lb., 70c; lb., \$2.00, postpaid. By Express: Lb., \$1.95; 5 lbs., \$7.50.

IMPROVED TOM WATSON

This variety of watermelon cannot be excelled as a shipper. Salzer's Improved Tom Watson is the most popular of any variety in the South, as its very tough, thin, elastic rind gives it superior shipping qualities; and in other sections where it is grown for the home market and home garden, its fine eating qualities create a great demand.

Where melons are grown for shipping great distances, it is essential that the seed be of the finest and truest type. Salzer's Tom Watson, like Salzer's Earliest and our other strains, have been continually tested, developed and carefully selected so that our customers are assured of the very best seed obtainable.

The seeds are brown with a sprinkling of white, the rind is deep green indistinctly veined, the shape is long and cylindrical and the melons often attain a weight of 40 pounds and more. The length averages 20 to 30 inches by 10 to 12 inches in diameter, and the deep red, firm flesh extends to within three-quarters of an inch of the rind. Is rather late in maturing.

It is a superior, tough, thick rind, shipping melon, adapted for long distance markets.

The quality is excellent. Very productive. A profitable type to grow. Its large size is especially desirable.

The vines are very vigorous and most productive. The flesh is rich red, crisp and of luscious flavor. (See illustration below.)

683—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid. By Express: Lb., 95c; 5 lbs., \$4.00.

SWEETHEART

A rather late variety, producing extremely large melons of excellent quality, the tough elastic rind making it an excellent shipper. The seeds are black and the flesh very fine.

It has an extremely "sweet heart," which of course is the all desirable essential in a melon. It is also perhaps one of the best varieties for the amateur to grow, as it is peculiarly suited for the home garden.

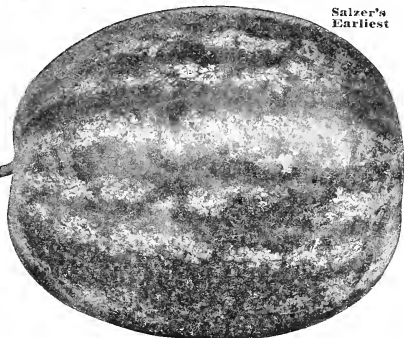

Vigorous and productive vines. Large oval heavy fruits that ripen evenly. The rind is firm, light green, veined or mottled with darker shade.

Bright red flesh, solid, sweet and free from core (hence its name). Keeps well and improves after ripening.

688—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., 95c, postpaid. By Express: Lb., 90c; 5 lbs., \$3.75.

IMPROVED TOM WATSON

SALZER'S FOURTH OF JULY

This has been a favorite strain with many of our customers. We were obliged to drop it from the catalog for several years because of a shortage of seed, but we are glad to state that we can now furnish Salzer's Fourth of July again.

Its melting sweetness has delighted the public everywhere. It is a delicious, exquisitely flavored extra early Melon, ripening in about 35 days. Average about 15 to 25 pounds in weight; very luscious quality of the deep, red flesh varieties. It has no superior. It is a Melon for the family garden and for local markets, as it will grow where many others fail. Seems to flourish under absolute neglect.

Salzer's Fourth of July is a sure yielder, very prolific, and one of the most satisfactory grown. We are sure when once planted gardeners will not do without it.

671—Pkg., 10c; oz., 25c; ¼ lb., 60c; lb., \$1.75, postpaid. By Express: Lb., \$1.70; 5 lbs., \$7.50.

GOLDEN HEART

An early, heavy yielding, golden hearted melon of rich luscious sugary flavor. It is nearly round in shape with a dark green rind with still darker green mottled stripes. Matures in about 30 days.

692—Pkg., 10c; oz., 25c; ¼ lb., 50c; lb., \$1.50, postpaid.

GEORGIA RATTLESNAKE

A long, fairly large melon with light green color irregularly mottled with dark green stripes. An excellent shipping melon with unexcelled eating qualities, the rattlesnake is a standard variety. The seed is white with dark tips and the weight about 25 pounds.

Equally well known as Gypsy Melon. This home and market melon has been a favorite for thirty years. Thin rind, solid, dark red flesh, sweet and tender. Matures in about 90 days.

672—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid. By Express: Lb., 70c; 5 lbs., \$2.50.

HUNGARIAN HONEY

An extremely early variety, round in shape and flesh of excellent edible quality. The rind is dark green with irregular stripes of darker green. The seeds are quite small and dark brown color. An excellent early small variety.

Almost round and a good producer.

676—Pkg., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.00, postpaid.

COLE'S EARLY

Almost round, dark green, thin rind, black seeded, very sweet and an excellent shipper.

664—Pkg., 5c; oz., 15c; ¼ lb., 35c; lb., 95c, postpaid.

ICE CREAM OR PEELESS

A white seeded early variety of exceptional merit. Has oblong shape and a very thin rind of a light green color. A very prolific variety, not adapted for shipping, but fine for home or nearby markets.

The vines are vigorous, hardy and productive. Flesh is bright scarlet, crisp and exceedingly sweet.

677—Pkg., 5c; oz., 15c; ¼ lb., 35c; lb., 95c, postpaid. By Express: Lb., 90c; 5 lbs., \$4.00.

Watermelon (Citrullus Vulgaris)

Kleckley Sweet

SALZER'S IRISH GREY

Salzer's Irish Grey is a long melon, rather large in size and ranks high with leading shippers. The rind is yellowish light green in color, the seed is white and its average weight is 25 pounds. Eating qualities exceptionally good. We especially recommend Salzer's Irish Grey, because its ability to stand shipping is fully equal to the Tom Watson. Remember, our seed is all tested and highly selected, and is the best obtainable and of the finest quality.

The red flesh is unusually sweet, free from hard centers or stringiness, very firm and compact and does not break when sliced. It ripens in about 90 days and stays in good condition for a long period; withstands long shipping.

699—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

SALZER'S WATERMELON MIXTURE

Comprises all varieties we list, Early, Medium Early, Medium Late and Late. For a small garden it makes an ideal planting arrangement for a continuous succession or summer's supply. Only seed of the highest type taken from stocks of our named varieties are used.

694—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

RED SEEDED CITRON

The fruits are perfectly round, striped alternately dark and light green. It is not edible, but is used entirely for preserves and pickles. The flesh is white, hard, and the vines are enormously productive. Makes delicious rich preserves.

The seed is red. Matures late in the fall, requiring about 95 days. Will keep for long periods.

663—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

Have you any questions you would like to ask about your garden, or are there any problems confronting you, that have to do with seeds, plants, soils, weeds, etc.? Write our Service Department. Their services are without charge, whether you order from us or not.

Okra (Hibiscus Esculentus)

Okra is sometimes known as Gumbo. It is used largely in the South, but is also becoming popular in the North, being eaten either as a separate dish, or in soups, stews, etc. It is easy to grow and succeeds just as well in the North as in the South. Very prolific. Should be gathered and eaten while still young and tender.

To keep for winter use, slice the pods into narrow rings when young and tender, string them and hang in the shade to dry.

PERKINS MAMMOTH LONG POD

This variety is a valuable okra, about three feet high; pods often eight to nine inches long when ready for use, of dark green color, produced in great quantities and quite early, being fit for use in about 30 days after sowing. (See illustration.)

731—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

WHITE VELVET

It is very distinct in appearance, and unlike other varieties the pod is not ridged, but is perfectly smooth and round. Is of attractive appearance and superior flavor and tenderness. The plants are comparatively dwarf and of compact branching growth; the pods are of extra large size and produced in great abundance.

732—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

Rhubarb (Rheum Rhapsanticum)

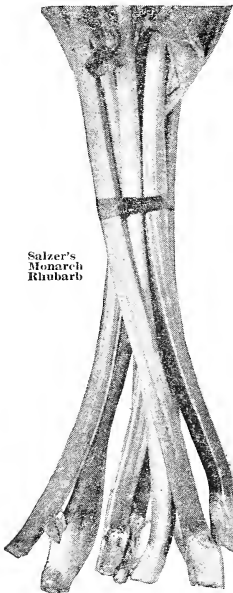

SALZER'S MONARCH

Rhubarb is used extensively for making tarts, pies, sauces and preserves. It is very palatable and delicious. No plant is more easily increased and multiplied than rhubarb. Every family should have some Salzer's Monarch Rhubarb in their garden. No other Rhubarb excels Monarch in richness, tenderness, juiciness, earliness, or freedom from stringiness. Rich, attractive crimson color—vastly superior to the old sweet Strawberry Rhubarb. Stalks grow to large size without loss to its quality. Cliftonwood grown. (See illustration.) For Rhubarb roots, see page 23.

1053—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid.

RHUBARB IS VERY HEALTHY AND A SPLENDID TONIC

Salzer's Monarch Rhubarb

SELECT SOUTHPORT STRAINS

For many years we have specialized in onion seed and our stocks and strains are admittedly the best and the most reliable obtainable. Under heavy expense, Salzer's Select Southport Onion seed has been bred and developed, until today we can proudly and truthfully state that our strains produce the heaviest, largest, and most solid onions—onions that are delicious in flavor, that are perfectly globe-shaped, and that are exceptional keepers.

Salzer's Select Southport strains reign supreme in the most severe test of an onion, which is its keeping quality. There are none better for keeping. The young plants provide a very delicious salad in spring, and may be used boiled or raw before maturity, or cured and kept through the winter. Our Southport strains have been bred to produce the same uniform shape, and to leave the onions practically devoid of neck when the tops have been dried off. This feature is extremely important, as the necks are a menace to the keeping quality of the onions. We are ideally situated to supply our customers with the finest stocks, no matter how large the order, and are certain that our strains will give the utmost satisfaction.

SALZER'S SELECT SOUTHPORT YELLOW GLOBE

See Color Illustration on Inside Rear Cover

Our selection of Southport Yellow Globe is an especially fine Onion. It is of quite large size, averaging from 3 to 3½ inches in diameter, of beautiful globe shape, with a very attractive light yellow colored skin. Matures in approximately 110 days. The bulbs ripen down to a solid ball, thus insuring the best keeping qualities. The flesh is a creamy white, fine grained, exceedingly mild, crisp, tender and sweet. Very popular on account of its cooking qualities. Immense yields have been reported by private and market growers. (See illustration.)

752—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid. By Express: Lb., \$1.45; 5 lbs., \$6.50.

SALZER'S SELECT SOUTHPORT RED GLOBE

See Color Illustration on Inside Rear Cover

Our Southport Red Globe onions are a most attractive variety, with outer skin of rich, purplish-red. Like our Yellow Globe, they have been bred to uniformity, as little neck as possible, and a size of about 3 to 3½ inches. The Red Globe has a very attractive appearance, with the flesh faintly tinged a purplish-red. It has a trifle stronger flavor than the yellow and white varieties, and has the same excellent keeping quality as the yellow. Heavy yielder.

This is a very fine strain and will give you excellent satisfaction, on account of its beauty, shape, and uniformity of ripening. The tops die down uniformly and there is hardly any neck.

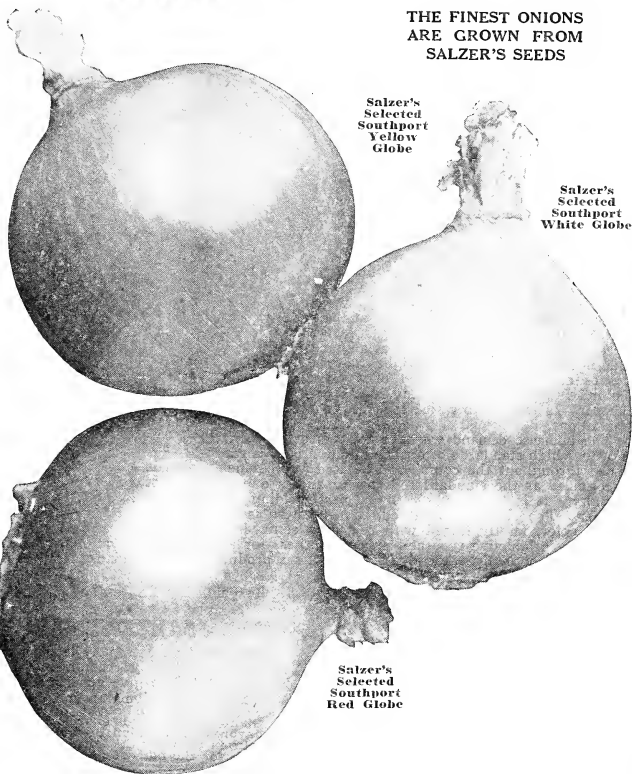

Takes about 110 days to mature. (See illustration.)

753—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.75, postpaid.

By Express: Lb., \$1.70; 5 lbs., \$8.00.

Onion (*Allium Cepa*)

THE FINEST ONIONS
ARE GROWN FROM
SALZER'S SEEDS

SALZER'S SELECT SOUTHPORT WHITE GLOBE

See Color Illustration on Inside Rear Cover

The White Globe is similar in many ways to the other Southport varieties, and presents a very attractive appearance. When cooked, the flesh is of a rich, creamy color, tender and of delicious flavor, and is the mildest of the three when eaten raw. It resembles a ball of silver, with its thin, delicate, pure white skin. Averages from 2 to 2½ inches in diameter and is a heavy yielder. Flesh is fine grained, crisp, mild and fine flavor, and snow white in color. Our Southport White Globe has also been bred and developed with painstaking care and is of the finest quality. However, they have not quite the keeping quality and care should be taken in harvesting and storing these onions so as to always have them of the finest appearance. Matures in about 120 days. As soon as harvested they are best stored away in a cool, dark shed to keep from discoloring. (See illustration.)

SALZER'S SELECTED GREAT RED WETHERSFIELD

(See Rear Cover for Color Illustration)

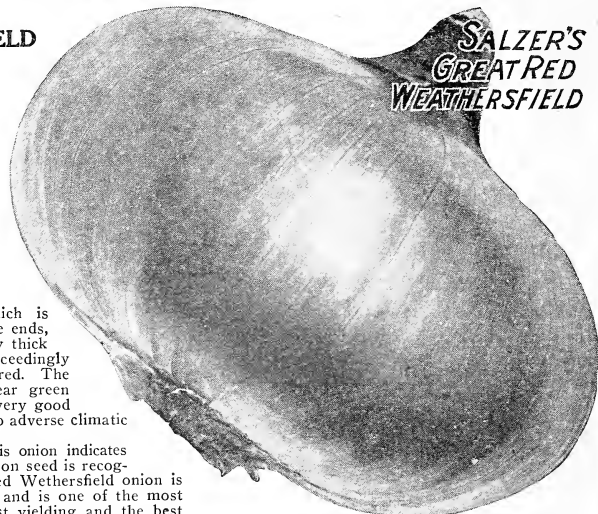

To those who want onions with an abundance of flavor, a flavor which is stronger than the extremely mild varieties, we unhesitatingly recommend Salzer's Great Red Wethersfield. Our seed stock, grown and developed from the finest bulbs, is the finest obtainable, and we know will give the utmost satisfaction to those who want onions with a little more strength, and which are at the same time, excellent keepers.

This variety is a general favorite everywhere and is in very great demand both for market and for home use. It is an American variety, has a very smooth, clean-skinned bulb, which is almost round, somewhat flattened at the ends, and on account of its large size, is very thick through from top to bottom. Has an exceedingly fine neck and in color is a bright, rich red. The leaves are slender, long, and of a clear green color. Is a medium early kind, and a very good keeper. Is adapted to varied soils and to adverse climatic conditions.

The immense demand we have for this onion indicates that our high standards of quality in onion seed is recognized throughout the country. The Red Wethersfield onion is recognized as the standard red variety and is one of the most popular. It is the largest, and heaviest yielding and the best keeper. The skin is a rich red, and the flesh is fine grained, white color, faintly tinged with red, of a somewhat strong but pleasing flavor.

A very productive type and one of the best for all around cultivation. Is a medium early main cropper. A good variety for poor, light and dry soil, but more productive on rich land. Matures in approximately 100 days. (See illustration opposite.)

791—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.50, postpaid. By Express: Lb., \$1.45; 5 lbs., \$6.50.

SALZER'S GIANT SILVER KING

If you want an extremely large, handsome onion of very mild flavor for slicing, we particularly recommend this magnificent strain. If you enjoy onions do not fail to give generous garden space to this sort.

It is a large, almost round, silvery skinned onion, very tender and with very thin skin and about the size of an orange or a little larger. Salzer's Giant Silver King is enormously productive and if you want the sweetest flavored white onion, as well as size in an onion, you will make no mistake in planting this strain. It is very popular and is in great demand, both for the market gardener and for the home garden.

At Cliffwood Farms it has been carefully developed for smallness of neck, uniformity in size and shape, large yield, mild, sweet flavor, and attractive appearance. It is easily grown by the amateur as well as the professional and invariably produces heavily under almost every condition of soil and weather.

Its immense size, its maturing period, its mild flavor, place it in the foreranks of the onion markets everywhere.

Attractive shape, flattened, but thick, as shown in illustration. Average diameter of onions about 4 to 5 inches; they often attain a weight of 2 pounds each. No other white variety grows larger. Skin a beautiful silvery white and flesh of particularly mild, pleasant flavor. This onion grows and matures in about 110 days. (See illustration opposite.)

742—Pkg., 10c; oz., 25c; $\frac{1}{4}$ lb., 70c; lb., \$2.00, postpaid. By Express: Lb., \$1.95; 5 lbs., \$9.25.

SOW SALZER'S SEEDS

Your Silver King Onion seems especially suited for this district. They are immense in size and delightful flavor.

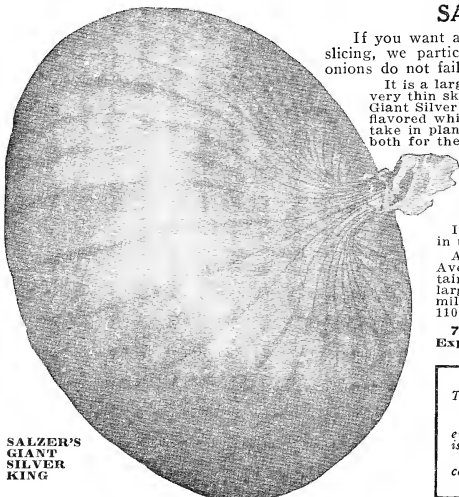

Mrs. Byron Bowles, Ringwood, Okla.

We always have such good results from your seed we are going to enter for prize this year at the County Fair. Your Silver King Onion is a dandy for exhibition.

E. C. Rosell, Wynnewood, Okla.

Gus Smith and myself are strong for Salzer's seeds. Wish you could see the great large Silver King Onions we have.

Chas. Putman, Mora, Minn.

SALZER'S PRIZETAKER

(See illustration opposite)

Salzer's Prizetaker onion is famous throughout the country for being the largest and the most handsome of all American onions. Prizetaker grows to a splendid size, and it is very attractive. It is easily grown, succeeding in all parts of the United States, is a wonderful keeper, and it has an unusually mild and delightful flavor. In immensity of size, it has yet to be equaled, being the largest of any strain grown, and it is not at all unusual to have the Prizetaker reach 5 inches in diameter.

In addition to its enormous size, another outstanding feature is its delicious mildness. It holds front place for its delicate, mild flavor, and this combined with its largeness, attractive appearance, and fine keeping qualities, make it in heavy demand on the markets. It is a money-maker for the truck gardener, and it gives unusual satisfaction to the home gardener.

Specializing, as we do, in onion seed, and breeding and developing our seed with painstaking care, our customers are assured of extra fine quality and trueness to type. Salzer's seeds eliminate all risk, as much as it is possible to do so, and you are bound to obtain the best results from our seed.

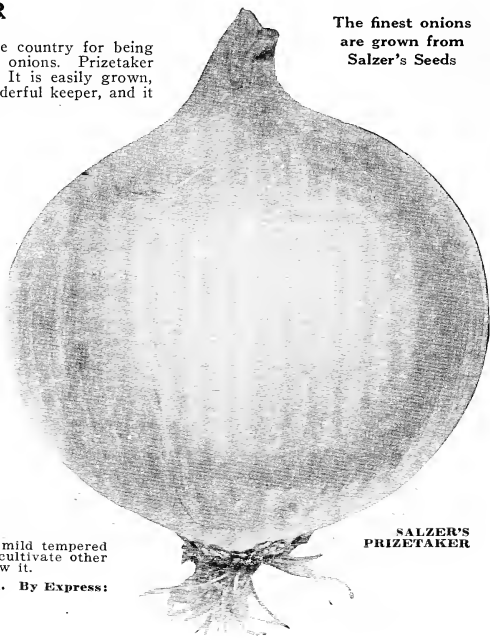

There has never been a yellow onion in America that could equal Salzer's Prizetaker. Of clear, bright straw color, grows to a uniform globe shape. It has a very small neck, and always ripens up hard and fine. The flesh is pure white, and its tenderness and mild flavor are unequaled even by the Spanish Onions. In markets it attracts a decided attention, selected at higher prices than any other sort on sale, either red, white or yellow. Keeping qualities are excellent; in spring the bulbs being apparently as firm and solid as when put away in the fall.

We are listing this year, Prizetaker Onion Plants, for which see Page 10. By using plants our customers may obtain higher prices because of having earlier onions for the market.

As it attains its phenomenal size and exceptionally mild tempered flavor under exactly the same conditions necessary to cultivate other ordinary sorts, every one of our customers should grow it.

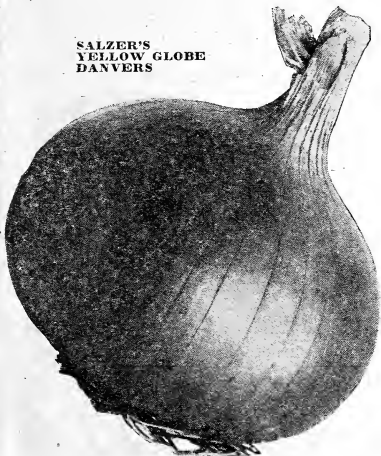

748—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid. By Express: Lb., \$1.45; 5 lbs., \$6.75.

SALZER'S
PRIZETAKER

SALZER'S
YELLOW GLOBE
DANVERS

SALZER'S YELLOW GLOBE DANVERS

This variety is an old American stand-by, an old dependable strain which has always been very popular and very much in demand. It is an excellent early variety, quick to mature, and is a remarkably good keeper. Because of its quickness in maturing it is an ideal onion to plant in the North. Yellow Globe Danvers is very productive, is an excellent keeper, is mild and full flavored, and has a uniform rounded shape, which is almost spherical. It is perhaps the best all around onion, and is very highly esteemed and very well liked by all those who grow only one variety. Of a rich, coppery yellow, it reaches 2½ to 3 inches in size, with coats numerous and closely set.

Extensively used for general cultivation for home and market. A main crop and standard yellow onion everywhere. Produces medium to large sized bulbs of a uniform globe shape that ripen very evenly. Necks ripen down small. It is a good, reliable shipper. Attractive, rich, yellow skin.

The flesh is creamy white, crisp, tender, mild and of fine flavor. For general table and cooking use this variety is unexcelled. Grows well anywhere in the States. A splendid type for the beginner, equally desirable for the professional. (See illustration opposite.)

755—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid. By Express: Lb., \$1.45; 5 lbs., \$6.75.

THE LARGEST GROWERS OF ONIONS USE OUR STRAINS. WHY?

5 lbs. sow one acre

Onion

AUSTRALIAN BROWN

Is a very desirable onion of medium size and is a very long keeper, keeping exceptionally well in the warm climates. It is an early variety and a very heavy yielder, with skin of an attractive amber brown. The winter supply of a great many people consists chiefly of this variety.

Matures in about 105 days. Grown extensively for Onion Sets. The white flesh is very mild and sweet in flavor. (See illustration.)

737—Pkg., 10c; oz., 20; ¼ lb., 50c; lb., \$1.50, postpaid. By Express: Lb., \$1.45; 5 lbs., \$6.75.

WHITE BERMUDA

Salzer's White Bermuda onion seed is grown by us at Teneriffe, Canary Islands (which lie in the Atlantic Ocean southwest of Spain), and is of the finest quality obtainable. Can be grown in the North as well as in the South, with fine results, as they are a quick maturing variety, and heavy yielders.

The Bermuda Onions are planted extensively in the fall in Texas and other southern states and also in the Island of Bermuda and shipped north for early spring use. A good many carloads of them are produced in Texas, which are grown during the winter, and arrive in the northern states some time in May; they are the earliest, large, new onions that can be had in spring, and these large, beautiful, mild flavored bulbs always find a ready market at very good prices and have proven a source of great profit to the growers.

It is a large yielder, consequently a highly profitable type to grow. The name is somewhat misleading, as the skin is a pale yellow or straw color; the flesh, however, is a clear, sparkling white. It is extremely mild, deliciously tender, and of a pleasing flavor. Teneriffe grown seed. (See illustration below.) See page 10 for onion plants.

756—Pkg., 10c; oz., 30c; ¼ lb., 85c; lb., \$2.50, postpaid. By Express: Lb., \$2.45; 5 lbs., \$11.25; 10 lbs., \$22.00.

RED BERMUDA

The old original variety and as popular as ever. Very flat, grows about 3 to 3½ inches in diameter. Has a skin of light pink color. The flesh is pinkish white. Teneriffe grown seed.

749—Pkg., 10c; oz., 30c; ¼ lb., 85c; lb., \$2.50, postpaid. By Express: Lb., \$2.45; 5 lbs., \$11.25; 10 lbs., \$22.00.

SALZER'S WHITE QUEEN

Our finest pickling onion, also known as White Pearl. It is of exceptional quality and the best of all the white picklers, growing to a size about 1 inch by ½ inch thick, with a fine neck, and is an exceedingly early strain. Onions remain hard and solid and more than one crop may be gathered for pickling in one season from successive sowings. Although used more for pickling, they are of value for early green bunch onions for early use. They have a mild, sweet flavor. It is not quite as good a keeper as the Paris Silver Skin below, but it is a smaller onion and hence more used for pickling.

Will furnish extremely early green onions. (See illustration.)

787—Pkg., 10c; oz., 35c; ¼ lb., 95c; lb., \$2.75, postpaid.

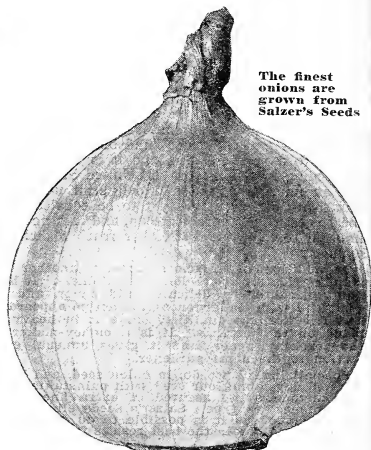

PARIS SILVER SKIN

Silvery white, flattened bulbs. It is one of the best early sorts, very good for pickling and is of mild, pleasant flavor. Also much used for early green bunching onions. Trifle larger than the White Queen.

781—Pkg., 10c; oz., 30c; ¼ lb., 85c; lb., \$2.50, postpaid.

FULL CULTURAL INSTRUCTIONS ON EVERY PACKAGE

The finest
onions are

Salzer's Seeds

Australian Brown WHITE PORTUGAL OR SILVERSKIN

They are of handsome appearance with a clear white skin. The flesh is of mild, delicious flavor. For keeping this is the best of all white varieties. Produces fine bunching Green Onions, and are also grown for the market as Large White Onions. It is also used more than any other white variety for growing Onion Sets. Matures in about 95 days.

757—Pkg., 10c; oz., 30c; ¼ lb., 85c; lb., \$2.50, postpaid. By Express: Lb., \$2.45; 5 lbs., \$11.25.

ONION SEED IN MIXTURE

Contains various sorts of onions, all colors, shapes and sizes, so that all kinds of onions may be found in your garden throughout the summer. If you wish a mild, white onion for salads, if you wish one with a stronger flavor, or a red, yellow, or brown color—you can pick whatever you want, whenever you want it, if you plant our onion seed mixture. For years we listed this as "Grandpa's Concomelation," and it has always been in demand.

758—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

WHITE WELSH

Planted for green onions only; this variety does not form bulbs, but only a small enlargement at the base of each shoot; it is extremely early. It is a perennial and stays in the ground for years.

788—Pkg., 10c; oz., 40c; ¼ lb., \$1.20, postpaid.

SALZER'S WHITE QUEEN

Onion Sets

SALZER'S HARDY NORTHERN GROWN BOTTOM SETS

Thousands of our customers plant onions only for green onions in early spring, and for this purpose use our Hardy Northern Grown Sets, because they may be planted extremely early—just as soon as one is able to get them in the ground. They are hardy and vigorous, of exceptionally delicious flavor, and if you want the finest and earliest green onions we urge you to plant our onion sets, grown and selected from the best stock. A pound or two is sufficient for a small family and about 10 bushels plant an acre. (See illustration opposite.)

Mixed Bottom Sets are the red, white, and yellow colors mixed, and are very popular with the small gardener.

We sell sets by weight only; one bushel equals 32 lbs. and one quart one pound.

When one variety is exhausted, unless otherwise ordered, we ship another. Thus, if yellow are all gone, we fill an order with white or red, etc.

	Postpaid Lb.	Lb.	Express 8 lbs.	Price 32 lbs. (Bu.)

SALZER'S WHITE MULTIPLIER SETS

We have grown a large supply of these sets this year, at our Cliffwood Farms, which are of the best quality. White Multipliers have always been very popular. They are a pure silver white color, enormously productive, always rather large, and of excellent quality and size for bunching green. Keeping qualities are remarkable, but their most distinctive feature is their extreme earliness. Have very good sweet and mild flavor.

Yellow Multipliers do not grow quite as large in size as the white, but are also productive and fine flavored.

Green Onions from Bottom Sets

Sulzer's Jumbo Sunflower

Sunflower (Helianthus)

SALZER'S JUMBO

Sunflowers are now generally included in every garden and farm, running from a few hills to many acres. They are attractive, shady, make economical poultry and bird feed. Now recognized as one of the best farm crops for silage and forage feeds for cattle, sheep, swine and horses.

Heard's Dairyman, Ft. Atkinson, Wis., says: "Twenty to thirty tons of palatable silage from an acre can be harvested in a country where corn does not make a good crop. They find in Montana that the entire sunflower plant when used alone makes a good quality of silage and can be successfully grown where the spring is late and frosts are early." Reports from all parts of the country indicate that sunflower for feeding stock, especially silage feed is becoming a common practice. (See illustration opposite.)

SOW SALZER'S SEEDS

Wish you could see my neighbor's poor, sickly sunflowers and my big jumbo heads growing alongside each other. He says he will buy from you next year. H. R. Wheeler, Deer Park, Wis.

SALZER'S WHITE MULTIPLIER SETS ARE UNUSUALLY FINE. CLIFFWOOD GROWN.

Pumpkin (*Cucurbita Pepo*)

SALZER'S YANKEE PIE

For tasty, delicious pumpkin pies, we recommend Salzer's Yankee Pie. This variety has been giving the finest satisfaction. Pumpkins for table use are grown mostly for pies and our Yankee Pie has been exhaustively tested and has undergone selective development for sugar content, until we think we have a strain that cannot be excelled for pie purposes. And, ranking so high in sugar content, it is exceptionally fine for general table use. Our very best pumpkins, especially for the home garden.

Somewhat small in size, averaging eight to ten inches in diameter. Round, but slightly flattened with shallow ribs. The color is a deep orange. The flesh is a rich yellow, thick, tender and sweet, of finest flavor and quality. Matures in approximately 70 days. A very hardy and productive variety. (See illustration below.)

955—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

Salzer's
Yankee
Pie

Salzer's Connecticut Field

CONNECTICUT FIELD

Pumpkins are very easily grown in among sweet corn or field corn, or wherever there is room for the vines to spread. Connecticut Field is a standard variety and is widely grown for stock-feeding, as well as table use. Our strain of field pumpkin produces strong, vigorous vines, which are wonderfully prolific. The fruit grows to about 20 inches in diameter, has well marked ribs, fine skin of salmon-yellow color, flesh yellow, thick, fine flavored, sweet, and keeping good for a long time. It is very well liked and very good for table use, and is a standard variety with canners. We recommend this strain as we are sure you will be very well pleased with it.

Matures in about 90 days. (See illustration above.)

943—Pkg., 5c; oz., 10c; ¼ lb., 20c; lb., 50c, postpaid. By Express: 5 lbs., \$2.25; 10 lbs., \$4.00.

SALZER'S MAMMOTH

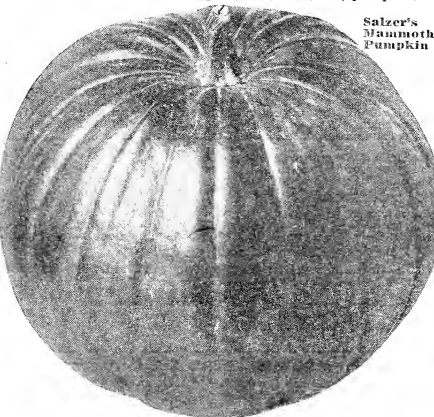

Love for a large pumpkin seems to be the inborn desire of everybody. When size, quality and big profits are all combined in one, then the grower is particularly proud of the strain. Salzer's Mammoth exceeds the average idea of "large." It really is immense in size.

As would be expected, it is unusually productive; in fact, it is the largest yielding of the pumpkins and of exceptionally fine quality and flavor.

Very extensively grown. A favorite variety with canners. A popular type with the home grower, considered the best for exhibition purposes and a dependable sort in every way. Deep creamy red color. Nearly round, slightly flattened at top and bottom.

Flesh is deep orange red and fine grained. A good variety to plant with corn. One of the best for winter storage. Matures fully in about 90 days. (See illustration below.)

951—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$1.75, postpaid.

Salzer's
Mammoth
Pumpkin

LARGE SWEET CHEESE

Gets its name from its peculiar cheese shape, being flattened on both ends and large in circumference. Matures in about 90 days.

As a cropper it is a heavy yielder and good main crop variety. In quality it ranks as a keeper, it is unsurpassed. The flavor is pleasing and appetizing.

Its skin is mottled light green and yellow, changing to rich cream color as it matures, flesh tender and of excellent quality.

950—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

SMALL SUGAR

Much smaller than the field varieties, rich in sugar, finely grained and sweet. Exceptionally fine pumpkin for pies. It is a very prolific type, producing nice, uniform size and shape pumpkins in abundance.

Considered one of the hardiest and easiest to grow. Matures in about 70 days.

953—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.25, postpaid.

SALZER'S MIXED PUMPKIN

Very many people want a mixture of pumpkin seed which will produce pumpkins of all sizes and shapes. Our mixed seed will furnish you with large, sweet pumpkins, pie pumpkins, different size pumpkins for the children on Halloween, etc., and will give you some of each variety without having to purchase a package of each strain. This mixture is made from only the best and finest seeds, includes the different varieties and is in very heavy demand. You will be able to obtain the different kinds of pumpkins from only one patch in your field or garden.

957—Pkg., 5c; oz., 10c; ¼ lb., 20c; lb., 50c, postpaid.

JAPANESE PIE

The flesh in appearance and taste very closely resembles the sweet potato and is considered a treat by all who have ever eaten it. Fine grained, dry and sweet. They ripen early, keep well, and are fine for home use. It is one of the easiest pumpkins to grow. A large crook-neck sort with dark green skin mottled with yellow stripes. Matures in about 80 days.

945—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

FOR PUMPKIN PIES OUR YANKEE PIE CANNOT BE SURPASSED

Peas—Extra Early Varieties (*Pisum Sativum*)

SALZER'S RECORD BREAKER SIX WEEKS PEA

See Color Illustration on Back Cover

We listed this extremely early wrinkled pea for the first time last year, and within a year's short time it has leaped into fame and prominence. The demand for this fine strain was exceptionally heavy, it received instantaneous recognition, and hundreds of unsolicited testimonials bespeak its fine merits and indicate the unbounded satisfaction it has given to those who planted it last year.

It is positively ready for the table in six weeks' time. It does not seem possible that a pea could grow so rapidly, nevertheless it is true and the most wonderful part of it is its exceptional eating quality. It is a pea "that melts in the mouth" as it were, when it comes to sweetness, tenderness and lusciousness.

We predict that in a year or two it will be the leading extra early variety grown in America. Do not hesitate about its earliness or quality as it has been under development for several years and we present you the facts from carefully tabulated comparative tests.

Aside from our own Cliffwood Farm tests, we have the reports of the leading pea growers of America, who unhesitatingly say, "It is the Earliest Dwarf Pea in the world."

Pods are rich dark green color, about 3 inches long, borne singly containing 7 to 9 peas. Pods are narrow and nearly round when filled. Grows to a height of about 16 inches. Is an extremely hardy, vigorous grower of the American Wonder type. As an early border type it will be a great boon to Market Gardeners who have a large trade in extremely early peas. The seed is slightly dented. Produces pods in great profusion, which in turn are literally jammed with delicious sugary peas. Leaves are small but numerous.

We wish every customer would accept a timely suggestion from us and try this pea this year. It really is a "hummer" and will please you far beyond your fondest expectation. (See illustration.)

849—Pkg., 15c; lb., 60c, postpaid. By Express: Lb., 55c; 5 lbs., \$2.25; 15 lbs., \$6.00.

**Salzer's
Earliest and
Best**

SOW SALZER'S SEEDS

I tried out your sample of Six Weeks Peas and we served peas on the table exactly six weeks and one day from planting time.

D. W. Stewart, Clarion, Ia.

SALZER'S EARLIEST AND BEST

This splendid wrinkled pea was formerly our very earliest variety, but it has now had to concede a point, as far as extreme earliness is concerned, to the Record Breaker Six Weeks, listed above. However, it is a standard variety and it has been steadily and critically tested and selected for earliness. It runs a very close second to the Record Breaker in extra earliness, and we have thousands upon thousands of customers who steadfastly insist upon Salzer's Earliest and Best. It is of very fine quality, extra early in maturing, and is very dependable in all sections of the country, regardless of soil or climatic conditions.

It is a splendid pea for the home garden or truck gardener desiring a meltingly sweet, extremely early variety.

It will stand the test in any garden anywhere. It will create and maintain for itself the lasting appreciation of every user. Its rigid selection shows in extreme earliness, ability to mature uniformly, even and heavy yielding habits. On account of its extra earliness, much time, money and effort has been devoted to its improvement in size and quality.

As this variety matures with unusual uniformity, succession sowings of a few days apart are recommended. The vines are vigorous, hardy, average thirty inches in height, each bearing upwards of seven pods about two and three-quarter inches long. Pods contain five to seven peas, which are medium size, smooth and of a fine quality. Flavor excellent and sweet. The peas when dry are small, smooth and yellowish white. (See illustration opposite.)

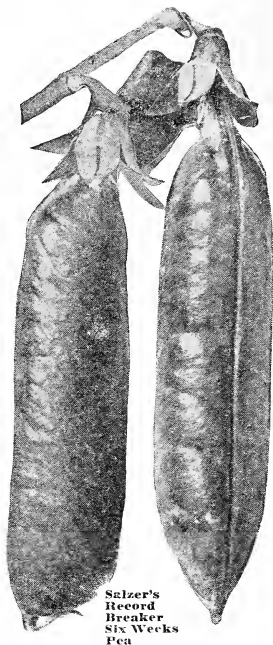

846—Pkg., 10c; lb., 25c, postpaid. By Express: Lb., 20c; 5 lbs., 90c; 15 lbs., \$2.50; 60 lbs., (bu.), \$9.00.

SALZER'S ALL-SUMMER COLLECTION OF PEAS

This collection of peas comprises Salzer's Record Breaker Six Weeks, Giant Laxtonian, Gradus, and Dwarf Telephone, and enables our customers to have a continuous, fresh supply of green peas throughout the summer by planting the entire collection at once. Matures in the order given. In great demand. Is put up in packages and in pounds.

850—Package Collection, 1 package each of above 4 sorts, 35c postpaid.

851—Pound Collection, 1 pound each of above 4 sorts, \$1.60 postpaid.

THE EARLIEST AND SWEETEST PEA KNOWN IS CLIFFWOOD RECORD BREAKER

Peas—EXTRA EARLY VARIETIES (*Pisum Sativum*)

SALZER'S SCORCHER

An extra early smooth strain, very productive, of medium height, and a standard and dependable variety. It never loses in popularity and its merits are recognized everywhere. Carefully selected and developed, Salzer's Scorchers is noted for being the earliest of the smooth peas, and its deep blue green color, and uniformity in ripening, make it very desirable for the market and for home table use. The peas are small, smooth, and of melting quality.

This pea is a pedigree strain of the Early June type, of outstanding quality, selected and reselected for years for extreme earliness, increased yield and improved quality. It is one of the safest, most dependable and reliable varieties possible to grow, as it produces a crop under unusual and trying conditions.

It has table quality. Is immensely productive. Extremely early. As a home canning variety it is positively the best variety and we unhesitatingly recommend it for that purpose in preference to any other. Matures in about 50 days.

Has a medium size pod about 2½ inches long, filled with luscious green peas, very sweet and sugary. Grows 2 to 3 feet high. Each pod contains 5 to 6 peas. Strong, robust and vigorous grower. (See illustration opposite.)

848—Pkg., 10c; lb., 40c, postpaid. By Express: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$3.75; 60 lbs. (bu.), \$13.00.

SOW SALZER'S SEEDS

Your Scorchers Pea is wonderful and we prefer it to any other variety.

J. P. Maschmeyer, Lemon Cove, Calif.

Your peas (Scorchers) are more reliable than any other variety we ever had from other seedmen.

F. O. Gibbs, Fargo, N. Dak.

We have tried your Scorchers Peas alongside other varieties and we know they cannot be beat.

Ira D. Kershner, Carlisle, Wyo.

SALZER'S IMPROVED AMERICAN WONDER

A highly satisfactory, extra early wrinkled variety, of fine quality and well suited for the home garden, being a dwarf-wrinkled pea. Early fresh green peas are a table treat, and when they make their appearance, they are a delight to both the eye and the palate. Salzer's Improved American Wonder is especially desirable for the home garden in that it is a dwarf variety,

one foot or a little more in height, and because it will provide you with the earliest, finest quality, wrinkled peas. It is also in heavy demand for truck gardening. Our seed stock is of the finest quality that can be grown.

It is a very productive variety, the pods being full to the end with peas, which are similar in size to the Scorchers, each containing five to eight large peas, of a flattened appearance due to crowding in the pods. Pods are wrinkled, pale green color, exceedingly sweet, tender and fine flavored.

Vines are of very dwarf habit, usually about fifteen inches long, hardy, vigorous and quick growing; it responds quickly to cultivation. Produces rich, luscious peas for use in about sixty-five days. (See illustration.)

878—Pkg., 10c; lb., 35c, postpaid. By Express: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 56 lbs. (bu.), \$11.20.

SALZER'S ALASKA

An extra early standard, smooth variety, which is grown a good deal by canners. Is especially developed for earliness, uniformity in ripening, smallness and sweet flavor. A dependable and well liked strain.

Salzer's Alaska is of strong, robust growth, a heavy yielder, vines about two feet in height, slender pods of a dark green color, about 2½ to 3 inches in length and blunt at the apex. They are well filled with smooth, small peas of a bluish green color. It requires about sixty days to mature, and is very popular with the market gardeners and the canners.

844—Pkg., 10c; lb., 35c, postpaid. Price by Express: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.25; 60 lbs. (bu.), \$10.00.

SOW SALZER'S SEEDS

We always order American Wonder Peas from you; they produce a bigger crop and finer peas.

J. M. Grace, Los Angeles, Calif.

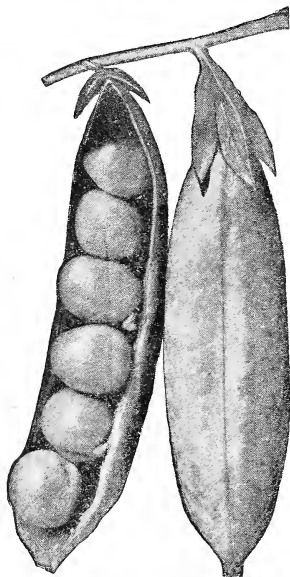

We wouldn't use any other American Wonder Seed but Salzer's.

W. W. Phelps, Fairfield, Nebr.

Seems like a long way to send for good peas but we cannot seem to get any as good as Salzer's.

Fred Nowak, Owings Mills, Md.

Peas — Early and Second Early

SALZER'S GIANT LAXTONIAN

It is extremely large, in fact the largest podded of all the early dwarf wrinkled varieties. It is delightfully sweet in flavor. It is one of the most luscious or melting peas possible to grow. Being large, it of course naturally follows that it is very productive.

In the Laxtonian we have a superlative quality dwarf type of the exquisitely flavored Gradus, with larger pods and growing only 16 to 18 inches high requiring no support, a few days earlier in season, and of a little darker green color. Laxtonian has made for itself a new class of wrinkled garden peas, the giant podded early dwarfs. Ripens about the same time as the first early and is ready to pick, green for table, in about 65 days from time seed is sown. The pods measure 4 inches or more in length, slightly curved with a sharp curve at the end and are as large as those of the Telephone and of a dark green color. Similar to Gradus in shape, filled with eight to ten large, delicious peas, almost double the size of any other early dwarf peas. (See illustration.)

830—Pkg., 10c; lb., 40c, postpaid. By Express: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00; 56 lbs. (bu.), \$12.00.

LITTLE MARVEL

A very fine early pea. A large yielder. Peas are crowded into the pods, hence have a flattened appearance. It is a dwarf wrinkled variety. Vines hardy and vigorous, about eighteen inches in height. Pods nearly three inches long, deep green color, straight, blunt at the bottom and of very attractive appearance. Peas remain a long period in condition for table use after picking.

The peas are extremely luscious and of rich, sugary flavor. We consider it a quality pea well named. The peas when dry are smaller than the Giant Laxtonian, but are a large size, green and wrinkled. Ready for use in about sixty-five days. It is highly recommended for both home and market use.

881—Pkg., 10c; lb., 40c, postpaid. By Express: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00; 56 lbs. (bu.), \$12.00.

THOMAS LAXTON

This is a tall, wrinkled, early variety of large-podded pea, is a strong grower, very hardy, and produces an abundance of peas. Our seed is all grown from sound, good stock, carefully selected, and we know you will receive the best values and the finest results by planting our seeds. The Thomas Laxton is a good variety for both the home garden and market garden.

Similar in growth to Gradus, darker in color, more prolific and ready to use about the same time, approximately seventy days. Vines are about thirty inches high, hardy, vigorous and very productive. Foliage light yellowish green.

The pods are of rich green color, straight, inclined towards roundness, square ends and well filled. Frequently four inches long. Uniform size. The green peas are very large of fine deep color and one of the very best in flavor and quality. Extremely luscious. (See illustration.)

858—Pkg., 10c; lb., 40c, postpaid. By Express: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00; 56 lbs. (bu.), \$12.00.

SALZER'S GRADUS

There is no reason why you may not plant our finely developed strains of peas, and have fresh, green peas for your table, from your very own garden, in early June. Salzer's Gradus is often called "Prosperity," on account of its size, productivity, attractive appearance, and fine quality.

Ready to use in about seventy days. It is an early wrinkled pea of medium height (about twenty-four inches), heavy foliage, vigorous, hardy and productive. Pods are almost as large as the Telephone, about four inches long, straight and slightly rounded at the point, uniformly shaped and of light green color.

855—Pkg., 10c; lb., 40c, postpaid. By Express: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$3.75; 56 lbs. (bu.), \$11.75.

SALZER'S IMPROVED STRATAGEM

A wrinkled variety and very prolific, very large pods filled with large dark green peas. Reaches a height of 18 to 20 inches. Very fine quality, rich, tender, and sweet flavor.

Pods often measure four inches in length, pointed, dark green and evenly filled with large dark green peas. Ready for use in about seventy-five days.

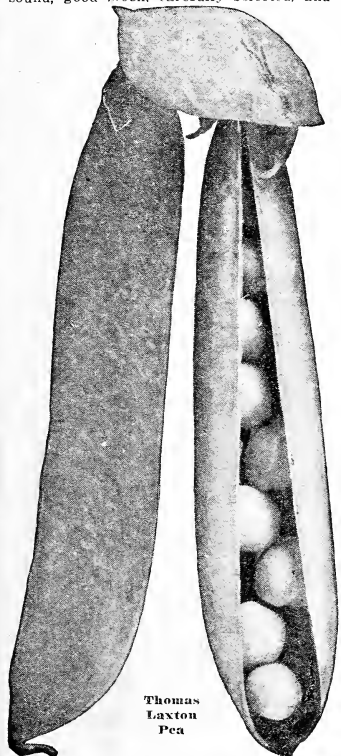

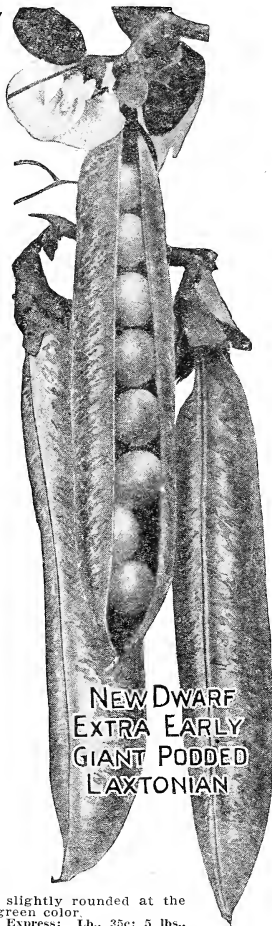

895—Pkg., 10c; lb., 40c, postpaid. By Express: Lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00; 56 lbs. (bu.), \$12.00.

Pea

Peas—Late Varieties

SALZER'S GIANT EXHIBITION

To those who wish huge podded peas, we suggest that they plant our Giant Exhibition. It is not an early variety, but is a late maturing kind. Is a wrinkled pea, very productive, the huge pods being well packed with peas, which, altho large, are of a fine quality, sweet, sugary flavor and not at all tough as one would expect. The pods frequently grow to seven and even eight inches in length, depending of course somewhat on the soil, and it is not unusual to find between ten and twelve peas to the pod. The lateness of Salzer's Giant Exhibition is fully offset by its productiveness and its vigor. It has numerous first prizes to its credit, from various fairs, which accounts for its being named Exhibition. If you have never grown this strain, we suggest you give it a trial. The pods are uniform in size, of a rich dark green color, and well packed with large size peas. One of the best main crop varieties.

Pods rather straight, with curve near end. Vines grow vigorously. Ready to use in about 85 days. (See color illustration page 34.)
To those of our customers who want immense size, a most delicious, heavy yielding pea—we recommend Salzer's Giant Exhibition. It will take first prize wherever exhibited. (See illustration.)
872—Pkg., 15c; lb., 60c, postpaid. By Express: Lb., 55c; 5 lbs., \$3.25; 15 lbs., \$6.00; 56 lbs. (bu.), \$29.00.

DWARF TELEPHONE OR DAISY

Developed and improved steadily at our Cliffwood Farms from carefully selected stock, we firmly believe our seeds are the very best obtainable. This fine, late, wrinkled variety has all of the qualities of the old well known Tall Telephone pea, but is of dwarf growing habit, attaining a height of 15 to 17 inches, and likewise very popular. Requires about 75 to 80 days to mature.

The vines are healthy and of vigorous growth, producing their large pods in great profusion and about a week earlier than the tall variety. The pods are of a rich, dark green color and contain eight to ten green, wrinkled peas of delicious flavor. (See illustration below.)
892—Pkg., 10c; lb., 45c, postpaid. Price, by Express: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50; 56 lbs. (bu.), \$14.00.

SALZER'S DWARF DEFIANCE

A late maturing, wrinkled pea, very much in demand by the home gardener because of its compact, bushy growth, permitting a good heavy yield in a limited space. Of fine sugary, melting quality, and one that will please you, as, indeed, it will please the market gardener who grows on a large scale. Vines reach a height of about 30 inches and are very productive. Pods are of a rich, dark green color, and the peas retain their tenderness quite long after they are picked. This variety remains in very good demand by many of our customers.

The vines are very vigorous, hardy, with coarse, dark green foliage. The pods are long, broad, pointed, dark green in color and equal in size and fullness to those of the Tall Telephone, often measuring six inches and more.
898—Pkg., 10c; lb., 45c, postpaid. By Express: Lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50; 56 lbs. (bu.), \$14.00.

SALZER'S ALDERMAN

A well developed strain of the Telephone varieties, which have for years been very popular with market gardeners and also for the home garden, where tall varieties are grown. This is a standard, dependable, late maturing, and tall growing strain and one of the best of the Telephone varieties. Of very fine flavor, tender, melting, and produces pods and peas which are uniform in size.

Vines are tall, growing about four and one-half to five feet long, vigorous, sturdy and quick growing. Dark green foliage. Exceedingly productive. Pods are large, dark green, average from five to five and one-half inches in length. Densely filled with large dark green peas of finest quality and flavor.

864—Pkg., 10c; lb., 35c, postpaid. Price, by Express: Lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50; 56 lbs. (bu.), \$12.00.

SALZER'S EDIBLE PODDED OR SUGAR PEAS

Edible Podded Peas may be eaten entirely, pods as well as peas. They have been developed to be devoid of the thin, tough lining on the inside of the pods, and consequently are always soft and tender, and do not open when ripe. They are used in the same way as snap or string beans, and are also liked for pickling. Because of their having no lining, they are not grown where peas are wanted for shelling.

DWARF GRAY SUGAR PEA. Height, about eighteen inches; purple blossoms. Pods are broad and flat.
912—Pkg., 10c; lb., 30c, postpaid. By Express: Lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.75; 60 lbs. (bu.), \$9.00.

MAMMOTH LUSCIOUS SUGAR PEA. Vines very tall, five to six feet; pods about six to seven inches long and one and one-half inches broad.
913—Pkg., 10c; lb., 40c, postpaid. By Express: Lb., 35c; 5 lbs., \$1.50.

HUMOGERM INOCULATING BACTERIA FOR GARDEN PEAS

We recommend the inoculation of peas before planting. Inoculated peas grow faster, mature earlier, and produce a larger crop. Nitrogen being deficient in almost all soils. Humogerm Inoculating Bacteria enables the plants to feed on the air through way of the bacteria nodules which will form on the roots, and thus obtain more nitrogen. Full instructions on each package.

Pepper (Capsicum)

SALZER'S IMPROVED RUBY KING

For table use, peppers may be prepared in many ways which are appetizing, healthful, and which will be liked by the average person. For instance, they may be filled with a stuffing and baked, making a dish that is really delicious. They are used more than formerly, and if you have never planted peppers, we suggest that you plant some this year, if only a package, and we believe you will be agreeably surprised, both with the kinds of peppers you will grow, and with the delicious dishes, pickles, and salads you can make. Peppers may also be pickled when green, and eaten like an apple or an onion. The plants, however, are tender and susceptible to frost.

Salzer's Improved Ruby King is the dependable, standard pepper that cannot be beaten. It is productive, has a mild flavor, thick flesh, and is very attractive. Our seed is of the best that can be obtained, and we know you will be well pleased with this strain. Exceptionally large, sweet flavored fruit, plants growing about 30 inches high.

Plants are vigorous, compact and very productive. Ripens its fruits early and with uniformity. Fruits frequently run four and one-half inches in length, having usually three lobes. Deep rich green color when young, ripening to a bright rich crimson at maturity. The flesh is thick and of mild flavor. An excellent variety for salads, mangoes and to stuff. Tender, meaty and of sweet spicy flavor. A good dependable variety for the amateur and a profitable market sort. Matures in about 140 days. (See illustration.)

929—Pkg., 10c; oz., 35c; ¼ lb., \$1.00; lb., \$3.00, postpaid.

SALZER'S CHINESE GIANT

For size, this variety is the largest pepper we grow, and is somewhat larger than our Improved Ruby King. It is also an early strain, very prolific, tender, and has a mild, sweet flavor. The plant grows about two feet high, of strong, vigorous growth, stocky and erect in habit, and bears very attractive fruit, which averages 12 and even more inches in circumference. Has an attractive, bright, glossy scarlet color when ripe. May also be picked green while young.

The flesh is usually thick and very mild, having none of the pungency of most of the older varieties. The large size of the fruit and its brilliant color render it very attractive and make it a ready seller.

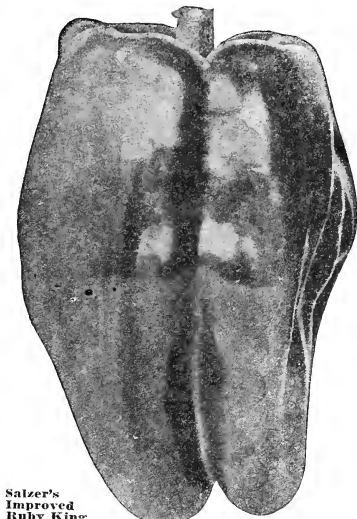

922—Pkg., 10c; oz., 60c; ¼ lb., \$1.70; lb., \$5.00, postpaid.

BELL OR BULL NOSE

This is a standard sweet flavored, scarlet pepper. The plants are very vigorous, strong and grow about two feet high. They are very productive and early; fruit is four inches long and two and one-half inches in diameter with thick flesh of fairly pungent flavor.

The fruit is deep green, becoming bright crimson when ripe. It is of excellent quality for salads, mangoes and stuffed peppers. Requires about 140 days to fully mature, but like most all peppers can be used green when large enough.

919—Pkg., 10c; oz., 45c; ¼ lb., \$1.35; lb., \$4.50, postpaid.

Salzer's Improved Ruby King

HARRIS' EARLIEST

See Page 34 for Color Illustration.

Introduced by us this year for the first time, Harris' Earliest is without exception the very earliest pepper we have been able to develop. Because of its early maturity this variety is peculiarly adapted to the far north, as it is mature before danger of frost. Will ripen correspondingly earlier in warmer sections. It is not as large as our Giant or Ruby King, but it is a finely formed variety, very productive, and of a good marketable size. Plants are of dwarf growth, reaching 12 to 13 inches in height, compact and bushy and extremely productive. The fruits are large for so early a pepper, measuring from 3 to 4 inches in length. Shape somewhat similar to Bull Nose, their thick flesh makes it ideal for stuffing peppers. So mild and sweet can be readily eaten from the hand. It is as nearly perfect as it is possible to be, and listed this year for the first time, we know it will give our customers the utmost satisfaction. We urge you to give it a trial.

Pkg., 20c; oz., 30c; ¼ lb., \$3.00; lb., \$10.00, postpaid.

SMALL RED CHILI

Our strongest flavored pepper. For those who want the "hottest" flavor, we recommend this strain.

Dwarf growing with slender, pointed fruits about one inch long, running up to one-half inch thick at the base, tapering to a sharp point. Fruits are bright rich red and very pungent when ripe. A good pepper for salads and pickles. Matures in about 145 days.

921—Pkg., 10c; oz., 45c; ¼ lb., \$1.35; lb., \$4.50, postpaid.

SALZER'S ANAHEIM CHILI

It is very largely used by canners. The fruit grows to a length of about ten inches by one and one-quarter to one and one-half inches in diameter; is bright crimson when ripe; has thick flesh of delicious mild flavor. The plants are strong, of vigorous, erect growth, and are enormously productive, ripening their fruits fully as early as Ruby King. Matures in about 140 days.

918—Pkg., 10c; oz., 50c; ¼ lb., \$1.50; lb., \$4.50, postpaid.

PIMIENTO

Pimiento is of a different type than the other well known peppers. It is used very much in salads to give them a tasty and attractive appearance, and because of its many uses and great popularity, it is grown very widely by canners. It is of the sweetest flavor, and does not contain a trace of fierceness. Are fine for stuffing as well as for salads.

It is a productive strain, exceptionally smooth, glossy and of mild, delicious flavor. Plants are vigorous and upright, growing about thirty inches high with short, broad, dark green leaves. Deep green fruits, becoming deep red as they mature. Ripens in about 130 days.

Used in salad, it is very delicious. Its thickness of flesh permits removing of skin, an essential of great value not easily accomplished with other sorts. (See illustration.)

927—Pkg., 10c; oz., 50c; ¼ lb., \$1.50; lb., \$4.50, postpaid.

IF YOU HAVE NEVER GROWN PEPPERS, TRY OUR NEW HARRIS EARLIEST THIS YEAR

Parsley (*Petroselinum Hortense*)

SALZER'S DOUBLE MOSS CURLED

This is one of the best known and most widely grown of all herbs. It is excellent for use in soups and is used very much for garnishing. Parsley is hardy and thrives well on almost any soil.

This variety grows to a height of about seven or eight inches and is of a rich dark green color.

Is a vigorous, compact growing variety. Fine for garnishing and flavoring. A handsome decorative type. Easy to sow, grow and cultivate. Sometimes used for borders around flower beds and walks. This variety is a standard sort, both for the home garden and for market purposes. Matures in about 65 days from sowing of seed. (See illustration opposite.)

822—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

DWARF TRIPLE CURLED

Introduced by us over twelve years ago, and still retains its popularity.

A quick growing, distinct dwarf and handsome variety of compact growth with finely cut and closely curled leaves of a deep emerald-green color; very attractive when used for garnishing, also excellent for flavoring, the leaves being very aromatic. A good variety for general cultivation. Ready for use in approximately 70 days from sowing of seed.

823—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

TURNIP ROOTED

This variety is in demand for its thick, fleshy, well-flavored roots, which are used for flavoring stews, soups, etc. Is in good demand and popular with very many of our customers.

Closely resembles a small parsnip in shape and color. The flesh is white and somewhat dry like Celeriac. It is an old well-known dependable variety in Europe. Used mostly for flavoring soups, stews, etc. The leaves are very similar to the plain parsley. A splendid keeper. Well adapted for winter storing. It takes this variety about 90 days to mature.

826—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

Salzer's Double
Moss Curled

ORDERING

Parsnip

SALZER'S DELMONICO

Parsnips are of very easy culture. Our Delmonico strain is our very earliest variety, stump-rooted, is of excellent flavor and thrives on almost any soil. The accompanying illustration is a splendid reproduction of this strain. A heavy yielder. Matures in approximately 115 days. The flesh is white, tender fine flavored and sweet. Improves with frost and may be left in the ground until spring.

It is very blunt compared with the crown varieties, therefore more desirable for general culture. It contains more saccharine, is more nutritious, sweeter and delicious than most other sorts. It has very smooth, large roots, not too long, usually about eight inches, the flesh is fine grained, while the flavor is excellent—all that can be wished for.

833—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$1.75, postpaid. By Express: Lb., \$1.70; 5 lbs., \$8.00.

SALZER'S HOLLOW CROWN

Grown from well selected stock, this is also a fine variety. Not as stocky as Delmonico, but has good thick shoulders and is of very good flavor.

The roots are about eight to ten inches long, with smooth white skins, uniform in shape, tender and of finest eating quality. Differs from other varieties by the depression at the top of the root where the leaves grow. Grown by many dairymen and stockmen for stock feeding as it contains a large amount of nutriment. Requires about 130 days to mature, but is ready for use soon after the root begins filling out. Improves with frost, and may be left in ground until spring.

It cooks in a splendid, appetizing manner. Roots, while long, are thick at the shoulder. It is a large yielder and recognized as a standard variety everywhere.

832—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid. By Express: Lb., \$1.20; 5 lbs., \$5.75.

Delmonico

PARTICULAR BUYERS DEMAND SALZER'S SEEDS.

Radish (*Raphanus Sativus*)

The Two Leading Extra Early Radishes SALZER'S EARLY BIRD

See Inside Rear Cover for Color Illustration

Radishes are perhaps one of the most widely sown of any of the vegetables, being found in practically every garden throughout the country. Not only are they tasty and spicy and liked by almost every one, but after the long winter months during which we have been deprived of fresh green foods, we doubly appreciate the very first vegetable which Mother Earth can produce. Year after year, after we have planted our own garden, we watch it closely, and as soon as we discern the first signs of growth, we inform the family that "the radishes are coming up." Extreme earliness is not only a delight to the home gardener, but it is an absolute necessity for the truck gardener. The very earliest, fresh, green vegetables are heaviest in demand in early spring.

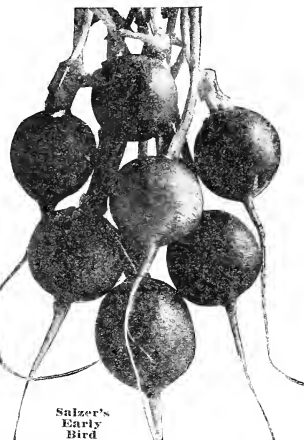

Salzer's Early Bird embodies our finest value in red radishes. It is without exception the earliest radish on the market and the true seed is seldom obtainable except from us. Few people have accurate knowledge of what constitutes the difference between pure bred seeds and seeds of inferior quality. When you buy Salzer's Early Bird Radish seed you know you are getting seed that is pure, that has been grown from carefully selected stock, that has been developed for earliness, for fine spicy flavor, that has been developed for short tops and to produce radishes of an attractive appearance. Salzer's Seeds will satisfy the particular buyer and in our Early Bird you will find a splendid value. It has been giving unbounded satisfaction for thirty years and it is in exceptionally heavy demand, indicating that people want the very earliest radish that can be grown. Under favorable conditions it has produced radishes in twelve days' time.

Conceded one of the most extensive grown. A universal kitchen garden variety. An extra early, small, forcing, as well as succession crop strain. A very popular market gardener's type.

The best paying radish crops are the extremely early strains. Early Bird is a forcing radish of unusual merit, maturing quicker and ahead of any radish known.

Of globe shape, bright scarlet color and very short tops. The flesh is pure white, extremely mild, crisp, cool, fine grained, tender and of finest flavor. Has no superior for either home garden, market garden, hotbed or greenhouse forcing. Average from one-half inch to inch in diameter, according to maturity. Does not become woody or pithy. It is of very attractive appearance. (See illustration.)

975-Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.00, postpaid.
By Express: Lb., \$1.95; 5 lbs., \$9.00; 10 lbs., \$17.50.

Salzer's
Early
Bird

SALZER'S EARLIEST WHITE

Our very earliest, finest, white radish. Salzer's Earliest White does not mature quite as early as our Early Bird, but it is a close second, and it, too, is a splendid forcing type for those who want early white radishes. We ourselves, as do many of our customers, plant both the white and the red radishes, in order to have a little variety in the very earliest radishes for the table. Truck gardeners find it profitable to market the early white as well as the early red. Of very fine flavor, crisp, and tender. A splendid value.

It is a highly developed strain of finest quality and unusually thin skin and is unquestionably the most popular home garden and market white radish.

Ranks next to Early Bird in earliness. It is a rapid growing, extra early radish, olive or roundish shape. Pure white in color. Thin skin. In size it is about one and one-quarter inches long by three-quarters inch in diameter. The tops are short. Grows well in all soils and unexcelled as a forcing radish.

The flesh is white, exceedingly tender, juicy, crisp, sweet and of finest quality. Matures in about 15 days. A splendid variety for outdoor and forcing under glass. It is one of the most generally grown of the white radishes. Keeps its fine quality long after maturing. (See illustration.)

1006—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

SOW SALZER'S SEEDS

I have been a customer of yours for years and know your early bird radish is the earliest of any radish.

Ray R. Jewett, Kadoka, S. D.

I notice other seedsmen list your early bird radish, but I prefer your Northern Grown Seed.

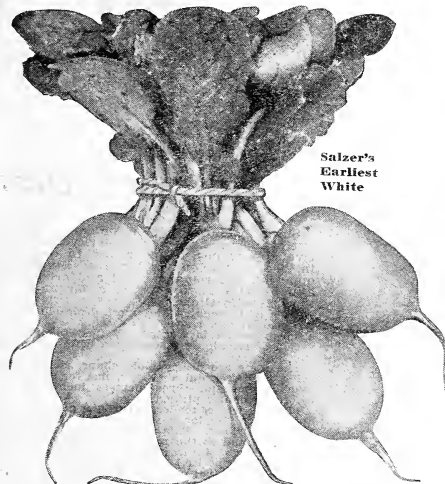

Anna Stamp, Cuba, Mo.

There is only one early bird radish and that is Salzer's. I have tried them all.

Simon Wagner, St. Cloud, Minn.

We find your early bird radish the best and earliest we ever raised.

Mrs. F. L. Harris, Humboldt, Nebr.

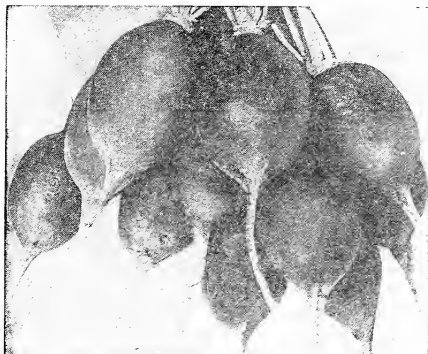

Salzer's
Earliest
White

SALZER'S NORTHERN GROWN RADISH SEED HAS NO EQUAL

Have radishes all summer

Radish

Sow very early and often

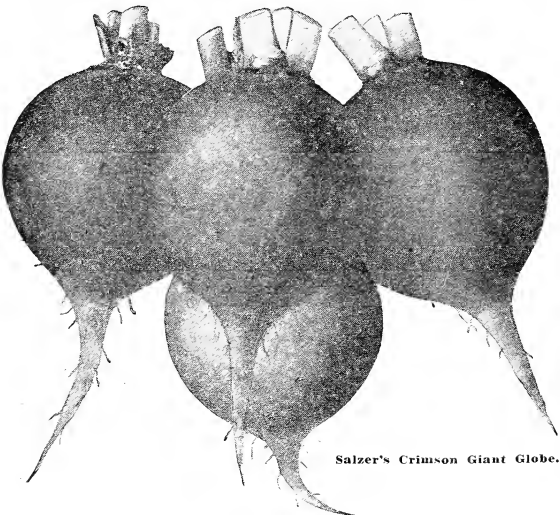

Blood Red Snow White Tipped

IMPROVED FRENCH BREAKFAST

Also a very early variety and quick growing, of olive shape. A small sized radish, of an attractive deep, rich, scarlet color with the lower portion a clear white. Because of its handsome appearance, mildness, tenderness and crispness, it is a splendid variety for the table and for the market. Our seed is of the finest obtainable, carefully selected and developed and is a much improved strain over the old French Breakfast.

A rapid growing, small, olive-shaped radish. Deep scarlet in color with a clear white tip at the base. In diameter it measures about three-fourths of an inch and one and one-half inches long. Has small tops and is early maturing, requiring about twenty-five days. Flesh is a pure, sparkling white exceedingly crisp, tender and sweet. (See illustration.)

1010—Pkg., 5c; oz., 15c; ¼ lb., 30c; lb., 90c, postpaid. By Express: Lb., 85c; 5 lbs., \$1.00.

Salzer's Crimson Giant Globe.

BLOOD RED SNOW WHITE TIPPED

See Color Illustration on Page 34

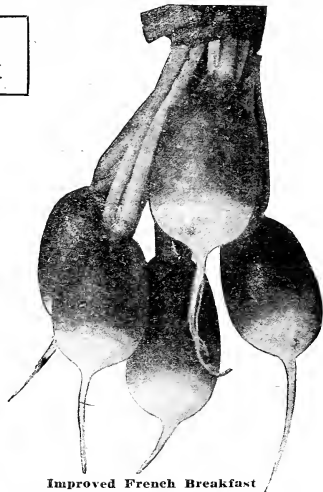

This variety is a forcing type which is in heavy demand, also fine to plant as a succession variety. Is an attractive radish and somewhat like Early Bird, but a trifle later, the white color extends up a trifle beyond the tail.

It is a rapid grower. Radishes run uniform in both shape and size, usually about three-quarters of an inch in diameter. The skin is thin and not so bitter as most radishes. The tops are short, which indicate a quick bulb root.

The flesh is a sparkling snow white, nice and crisp, tender, fine grained and sweet. Does not become pithy or cavity-stricken as quickly as the majority of radishes. For large, quick returns it ranks high. It is a highly developed quality radish from specially selected transplanted roots. We particularly urge our customers to try this out alongside of any other of their favorite varieties. (See illustration opposite.)

972—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid. By Express: Lb., \$1.20; 5 lbs., \$5.75; 10 lbs., \$10.00.

Improved French Breakfast

SALZER'S CRIMSON GIANT GLOBE

Suitable for forcing or for early planting out of doors. Mild and tender, very attractive appearance, shape round to oval, and in size, just about as large as illustration opposite, but remains solid and crisp, with a delightful flavor. It is a larger strain than Scarlet Globe.

It is a dependable and most desirable variety for general use, as well as forcing, especially if a large radish is wanted. Valued for its long period of remaining in condition before becoming woody.

The roots are nearly globe-shape, rich crimson color, thin skin, quick grower, fine for succession, reaches one and three-quarters inches in size before becoming woody.

Flesh is white, tender, crisp, fine grained, mild and sweet. Its large size permits of attractive table garnishing. This radish is comparatively a new type and is the result of selection for size and quality. Matures in about 28 days. (See illustration opposite.)

973—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.15, postpaid. By Express: Lb., \$1.10; 5 lbs., \$5.00.

 Sow very early and often

SALZER'S SPARKLER

A splendid variety, also known as American Half Red, Half White. Greatly prized for its handsome appearance and attractiveness, and decidedly popular. It received its name from its bright, sparkling, red color. Always accustomed to unusual values, our customers will find this as fine a value as we have ever offered, in that it will give great satisfaction for table use, being a rapid seller on the market and a good money maker. Salzer's Sparkler is very crisp, solid, and sweet flavored, and carefully bred for short tops.

In shape it is nearly round, of a deep scarlet color, with the lower one-third white, which is slightly flattened. In size it runs from one to one and one-quarter inches. Does not become pithy until it reaches its maximum size, holding its crispness longer than most varieties. A splendid home garden variety. Tops short, which is one reason for its extensive cultivation. The quality is very fine, flesh is solid, crisp, tender, fine grained and sweet. Matures in about 25 days. (See illustration.)

936—Pkg., 10c; oz., 20c; ¼ lb., 35c; lb., \$1.00, postpaid. By Express: Lb., 95c; 5 lbs., \$4.50.

Salzer's Sparkler

SCARLET GLOBE, VICK'S

Special Strain

This variety is one of the best all-around radishes grown. Is an old, dependable, standard strain, in great demand and valuable for the home garden and market gardener. Scarlet Globe has a comparatively small amount of foliage, making it a particularly attractive market sort. Fine oval shape, a rich scarlet color, crisp, tender flesh, juicy, mild, and a very early type, well adapted to forcing.

Was introduced back in 1884 and since it has retained its popularity up till now, it is self-evident that it is a dependable strain. This variety is sold by many seedsmen, but the particular buyer will insist upon "Salzer's Special Strain." Our seed are superior in vigorousness, quality, trueness to type, and our strain of Scarlet Globe is especially well adapted to varied soils and climates and will give you the finest satisfaction. Leaves are very short. We are told our special strain is the best in existence.

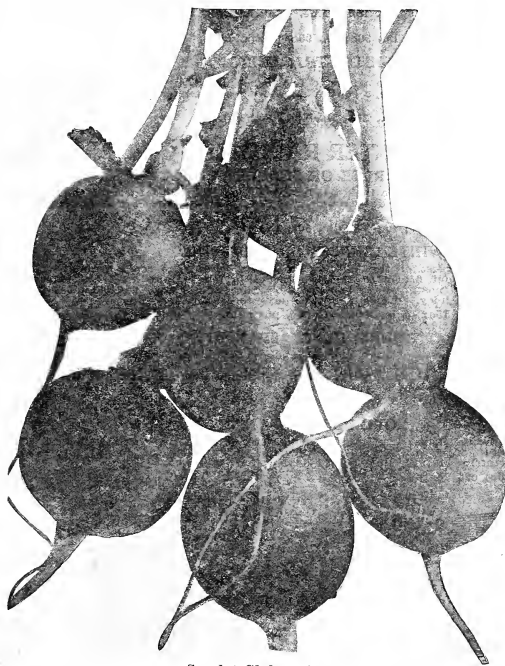

It is exceptionally early. The flesh is pure white, mild, crisp, juicy and tender. Measures about three-fourths of an inch in diameter to one and one-quarter in length. (See illustration.)

1014—Salzer's Special Strain: Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

1011—Standard Stock: Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid. By Express: Lb., 95c; 5 lbs., \$4.50.

Radish

Sow very early and often

SALZER'S ICICLE

We are proud of the distinction which Salzer's Icicle Radish has earned for itself. It is admittedly the earliest and the finest of the long white varieties. A beautiful, almost transparent, white radish about four inches long, with unusually small tops, remains in good condition a long time, does not get pithy, and is very crisp and brittle. This variety is highly esteemed and is so different from all other kinds that it has a place of its own in the radish family and as such our customers grow it, regardless of what other variety they may use.

The earliest and finest of the long white varieties. Ready for the table in about three weeks. They are fit for the table when quite small. The leaves are short, very few in number, permitting close planting. It is crisp, tender and mild in flavor. Frequently called the finest of all radishes. (See illustration.)

1021—Pkg., 10c; oz., 20c; ¼ lb., 30c; lb., 85c, postpaid.

LONG SCARLET SHORT TOP

Like the Icicle variety, home and market growers generally grow a red or scarlet radish of the long types. This is the popular favorite and crowds the Icicle very close for first place in popular esteem. It has proven itself a variety of exceptional merit for quality and dependability. Fact is, it can be relied upon to produce nice tender brittle radishes under the most trying conditions.

A long, bright red variety. Excellent for market and home use. It is medium, early, maturing in about 35 days. Averages six to eight inches long. The best variety for those who like a long red radish. Very popular everywhere. The crown grows about one inch above ground. It is straight, smooth, fine grained and sweet.

1023—Pkg., 5c; oz., 15c; ¼ lb., 30c; lb., 90c, postpaid.

SUMMER RADISHES

GIANT STUTTGART

The largest and latest of the white summer radishes. The roots grow to an immense size, often attaining four inches in diameter. The skin is white, the flesh white and crisp and keeps in good condition for a long time. Suitable for winter storing. Matures in approximately 42 days.

1033—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 90c, postpaid.

WHITE STRASSBURG

The roots grow to a length of from four to five inches, but they can be used when comparatively small. This variety keeps continuously crisp and tender for a very long time. Matures in about 40 days.

1034—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 90c, postpaid.

WINTER RADISHES

CHINESE ROSE OR SCARLET CHINA

The roots grow from four to five inches long, are cylindrical, the largest at the bottom, blunt at both ends. The skin is deep rose. The flesh is white, firm, crisp and pungent. Keeps well. Matures in about 50 days.

1043—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 90c, postpaid.

WHITE CHINESE OR CELESTIAL

The finest and the largest of the White Chinese Radishes. The roots grow to a very large size, averaging about fifteen to eighteen inches in length, and have a diameter of five inches. They grow mostly above the ground. The skin is pure white and the flesh always crisp, mild and juicy. Takes about 50 days to mature.

1045—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 90c, postpaid.

ROUND BLACK SPANISH

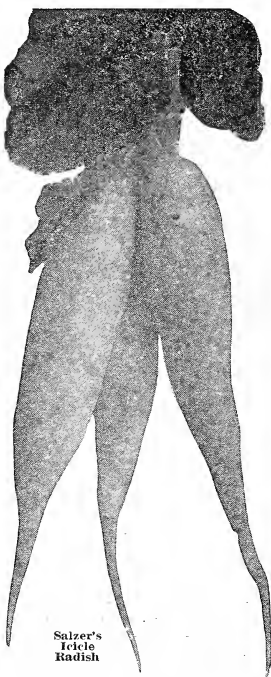

The roots are from three to four inches in diameter, almost round and very black skinned. The flesh is white, firm, pungent and well flavored. Keeps well all winter. Sow about the middle of June, as these varieties are apt to become hard and woody if sown in the spring. Matures in about 55 days.

1041—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid.

LONG BLACK SPANISH

Growing ten to twelve inches long, having a diameter of from two to three inches. The skin is black and the flesh white, firm and pungent. Like the round sort, it keeps well throughout the winter. Matures in about 55 days.

1044—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 90c, postpaid.

ICICLE IS THE BEST LONG WHITE RADISH. TRY IT

Squash (*Cucurbita Maxima*)

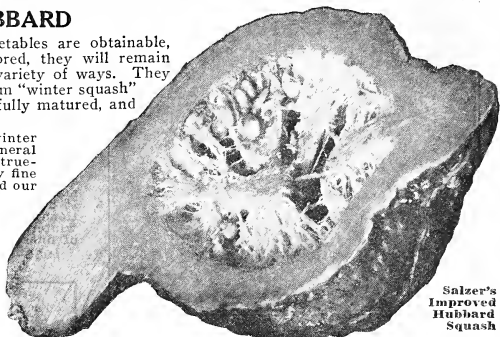

SALZER'S IMPROVED HUBBARD

Squash, during the winter months, when few vegetables are obtainable, proves a delectable dish. Properly matured and stored, they will remain edible for months, and are adapted for serving in a variety of ways. They also furnish a balanced ration for livestock. By the term "winter squash" is meant that the fruits are used only when they are fully matured, and also that they are good for storing for the winter.

Salzer's Improved Hubbard is the most popular winter squash in existence and it cannot be excelled for general purposes. Exhaustive tests, constant development for true-ness to type and purity, have produced an exceptionally fine strain of seed, and in this variety our customers will find our finest value in winter squashes. It is recognized as a standard for both the home and market growing. A heavy yielder and one that is sure to please you. Average weight about 10 pounds.

The vines are of a hardy, vigorous, trailing growth. The fruits are large and rich dark bronze green in color. Moderately warted and has a very hard shell, slightly curved at the stem end. The flesh is light orange-yellow, fine grained, thick, dry and richly flavored. (See illustration.)

1099—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., 1.50, postpaid.

Salzer's Improved Hubbard Squash

DELICIOUS

A winter squash, finely flavored, somewhat top shaped and has a rich, dark green skin. It is a standard strain and very popular. The seed are enameled and slightly smaller than other winter squash seed. The fruits weigh about 10 pounds and keep exceptionally well in storage.

The rind is deep dark green, mottled with lighter shadings, but not as thick skin as the Improved or Golden Hubbard. The thick flesh is very fine grained, and dark orange in color. Popular with professional gardeners on account of its exceptionally fine quality and ready sale to critical trade. It is a fine shipper. A good home garden variety and will keep until Spring without difficulty.

1094—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.75, postpaid.

SALZER'S GOLDEN HUBBARD

This winter squash is a little smaller than the Improved type of Hubbard, but it remains in heavy demand and many of our customers insist on this variety. The rind is a golden color and is somewhat warted. It is the earliest of the Hubbards and an extremely heavy producer. The average weight of the fruits is about 8 pounds; occasionally light cream colored stripes are seen at the blossom end. Has fine grained flesh, thick, and richly flavored, and is a favorite with canners; has excellent keeping qualities. The shell is hard and strong, making it a good shipper.

1097—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

MIXED SQUASH SEED

Many of our customers want a patch of ground which will produce a variety of squashes at different times. Our mixed squash seed will furnish you with winter and summer squashes, of different sizes and kinds, and contains only the highest grade seeds, of the best quality. Our squash mixture will surely please you.

1103—Pkg., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid.

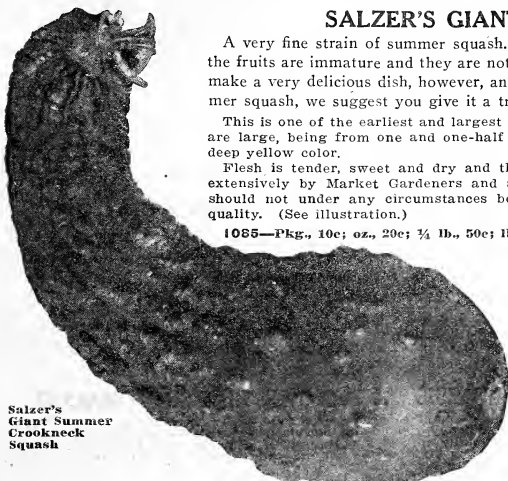

SALZER'S GIANT SUMMER CROOKNECK

A very fine strain of summer squash. The summer squashes are used a great deal when the fruits are immature and they are not adapted for storing any great length of time. They make a very delicious dish, however, and are very popular. If you have never planted summer squash, we suggest you give it a trial.

This is one of the earliest and largest of the summer crooknecks. When matured the fruits are large, being from one and one-half to two feet long with a thickly warted surface and deep yellow color.

Flesh is tender, sweet and dry and the best in flavor of all the summer squashes. Used extensively by Market Gardeners and a very popular home garden variety. This variety should not under any circumstances be omitted from the garden, on account of its high quality. (See illustration.)

1065—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

Salzer's Giant Summer Crookneck Squash

SOW SALZER'S SEEDS

I cannot say enough in praise of Salzer's Seeds. In all the years I have used them I have never known disappointment. Your Hubbard Squash excels anything in this neighborhood.

Mrs. Aaron Bundy, Bloomer, Wis.

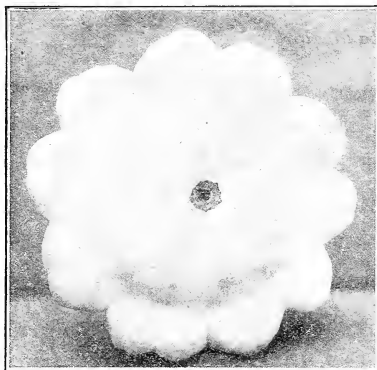

I have found that to buy right is half the success and Salzer's are the seeds to buy. Last winter we kept our friends in Hubbard Squash.

Julius Heusser, Clear Lake, Wis.

The Squash seed I received from you were the best I ever planted and the first ready for use.

K. E. Luedtke, Belvidere, Ill.

DON'T SPECULATE. SOW SALZER'S SEEDS.

MAMMOTH WHITE BUSH SCALLOP

Squash (*Cucurbita Maxima*)

MAMMOTH WHITE BUSH SCALLOP

An exceptionally popular variety of summer squash, and one that is in very high demand. It is an improved strain of the old favorite, Early White Bush, but is much larger in size, more attractive, contains about twice as much flesh, and is about equally as early in maturity. The accompanying illustration is a splendid reproduction of this fine scalloped summer squash.

It is quite flat, with ridged or scalloped edges, and the vines are extremely productive and disease resisting. Our seed has been carefully selected and bred for uniformity in maturing and in size and to produce handsome squashes that attract attention on the market. Is widely grown for home use as well as for the market. It makes an appetizing dish, and we believe you will be exceptionally well pleased with it. Differs radically in flavor from the winter types, and is of true bush habit. An early maturing variety of finest quality and very prolific. (See illustration.)

1086—Pkg., 5c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

SOW SALZER'S SEEDS

Your White Bush Scallop Squash is the finest we have ever raised.
Mrs. Irma Wenner, Plymouth, Ohio.

Peanut (*Arachis hypogaea*)

SALZER'S EARLY VIRGINIA

This variety is more generally grown throughout the United States than any other and is recognized as the main crop peanut everywhere. It is a very productive type, a vigorous and rapid grower, has erect stems, large pods and kernels. It is the kind that is used so much for commercial purposes. A good crop for the sandy soils of the Northwest. A good rotation variety. Shells should be removed before planting and the peanuts planted the same as corn.

As the peanut plant is closely related to Beans and Peas the tops make an excellent fertilizing and forage crop. Pods are borne beneath the ground. It is grown in the South as a field crop. A very interesting garden crop. Children especially take much pleasure in seeing it grow. Try out a small space this year. (See illustration.)

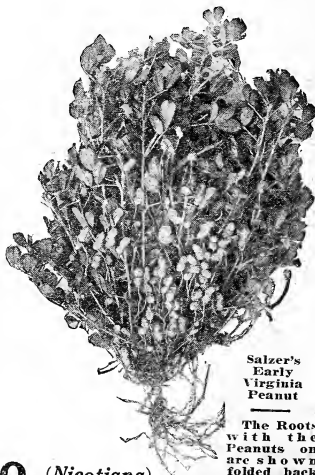

841—Pkg., 5c; lb., 30c, postpaid. By Express: Lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75.

EARLY SPANISH

The earliest variety and a splendid Peanut. Upright foliage, growing more compact than the Virginia, small pods, the yield per acre is very large.

Planted in May in the North they ripen before September 1. These nuts are smaller, but are sweeter and of finer flavor than the larger varieties.

840—Pkg., 5c; lb., 30c, postpaid. By Express: Lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75.

Tobacco (*Nicotiana*)

IMPROVED WHITE BURLEY

In the large southern tobacco districts, Improved White Burley is a leading variety. Produces large yields and is a dependable and profitable variety to grow. The leaves are large, wide, porous and make fine plug filler and wrappers. Very productive. (See illustration.)

1525—Pkg., 10c; oz., 60c; ¼ lb., \$1.70; lb., \$5.00, postpaid.

WISCONSIN COMSTOCK SPANISH

Located, as we are, right in the heart of the great Wisconsin tobacco district, we see millions of pounds annually grown and this variety is the leading type. It is unquestionably the best for the North. The leaf is of good size and is suitable for wrapper and filler.

1520—Pkg., 10c; oz., 60c; ¼ lb., \$1.70; lb., \$5.00, postpaid.

ROOT ROT RESISTANT CIGAR BINDER TOBACCO

This is the new Rot resistant tobacco seed developed by the Wisconsin Agricultural Experiment Station. A heavy yielder and especially valuable on root rot infected soil. The leaves are exceptionally spread, longer than the Havana, very broad as compared with length, running fairly blunt to the tip end. Recommended for old tobacco fields, which have been producing poor yields.

1533—Pkg., 15c; oz., 75c; ¼ lb., \$2.25; lb., \$6.50, postpaid.

SALZER'S EARLIEST OF ALL

See color illustration on page 34

The tomato is recognized by the medical profession as holding five points of merit which makes it actually indispensable in the vegetable garden. These points are that the tomato is the richest of all foods in vitamins; it is the most wonderful and effective blood cleanser of all foods; it is the best of all vegetables for keeping the stomach and intestines in condition; it is an extraordinary tonic for the kidneys, and it is used widely in curing diabetes and Bright's disease. In addition, it is extremely valuable for feeding the juice to infants, accomplishing wonders in cleansing and building up the tiny stomachs. For these reasons, which are being more and more recognized, the tomato is yearly gaining in prominence. Eaten raw or served raw on the table, they are delicious and refreshing, as well as healthful.

Earliness in tomatoes is essential for the market grower and highly desirable for the home garden. Salzer's Earliest of All is our very earliest strain, and is a "short season" tomato. Ripening as it does in about 110 days, in the North, it is especially well adapted to all sections of the country, which makes it so decidedly popular. Finely bred for uniformity in size, attractiveness, extra earliness, and trueness to type, Salzer Quality is nowhere better evidenced than in this fine, highly praised variety. If you want the very earliest tomatoes, combined with fine flavor, meatiness, productiveness, attractiveness, and tenderness, you should plant our Earliest of All. It is bound to please the most particular.

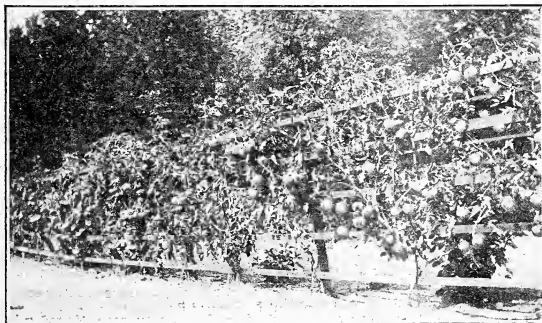

The fruits are of good size, brilliant scarlet color, nearly round, entirely smooth, and remarkably handsome. The flesh is solid, and of the finest flavor. The fruits are borne continuously in large numbers until killed by frost. They have a tough skin, firm flesh, making them good shippers and keepers. (See illustration.)

1118—Pkg., 10c; oz., 65c; ¼ lb., \$1.85; lb., \$5.50, postpaid.

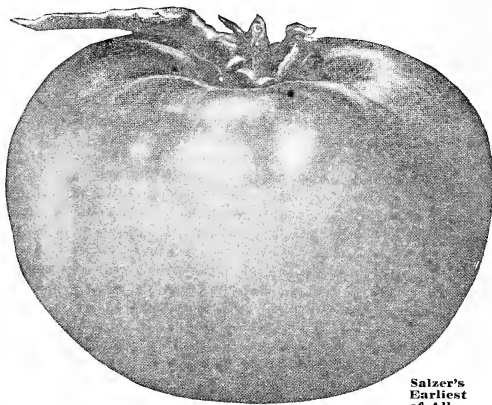

SOW SALZER'S SEEDS

I am a truck gardener, therefore require absolutely the best seed, which I know is Salzer's. I had some of your Earliest of All Tomatoes on the market three weeks ahead of my neighbors.

V. E. Weston, Waukesha, Wisconsin.

Salzer's Improved Ponderosa

Salzer's Earliest of All

SALZER'S IMPROVED PONDEROSA

This is an exceptionally large, purple-fruited tomato, and a widely grown variety, rightly named "Ponderosa" because of the large size it attains. Fruit is very solid, with few seeds. Our seed stock of this strain is the finest obtainable, and while very often large tomatoes, from their very size, are rough and have a tendency to split, we have developed and selected this seed so exhaustively that we have removed the roughness and splitting tendency as far as it is possible to do so. Note the large size and perfect condition of the tomatoes in the accompanying illustration.

Vines are vigorous and bear well. Fruits large, oblong, purplish red, with thin skin. Flesh is solid, with a very small seed cavity, making it a most desirable variety for slicing. To all who desire large size, solidity and flavor, we unhesitatingly recommend it. The vines are vigorous and very productive. Requires about 140 days to mature. (See illustration.)

1142—Pkg., 10c; oz., 65c; ¼ lb., \$1.85; lb., \$5.50, postpaid.

SOW SALZER'S SEEDS

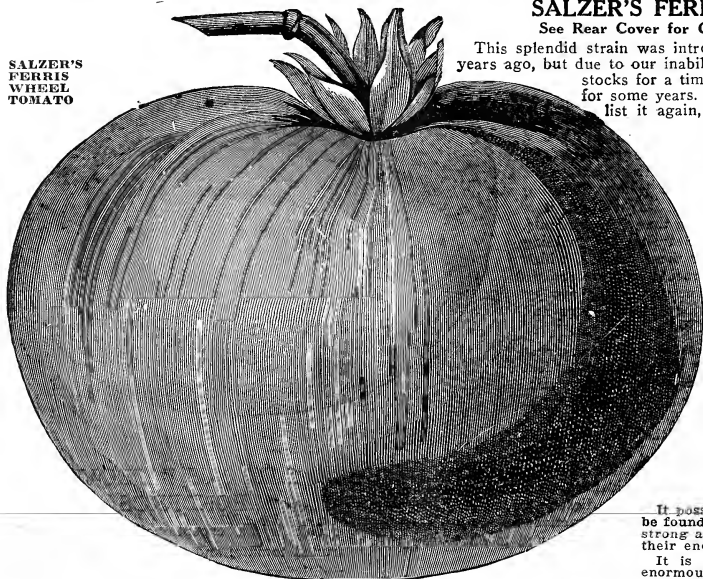

Salzer's Ponderosa Tomatoes get so large that we wonder if they will ever stop growing. Your Ponderosas have very few seeds in them.

SALZER'S
FERRIS
WHEEL
TOMATO

SALZER'S FERRIS WHEEL

See Rear Cover for Color Illustration

This splendid strain was introduced by us a number of years ago, but due to our inability to obtain the true seed stocks for a time, we had to discontinue it for some years. Last year we were able to list it again, and the deluge of orders

for Salzer's Ferris Wheel that we received proved decisively that the home gardener and the market grower had not forgotten this fine variety. We are glad to be able to offer it this year again, and know the demand will be even heavier than last year. We believe we are the only seedsmen in the country that can supply this wonderful tomato.

It is of the large Ponderosa type, frequently weighing three pounds each with thick, solid tender flesh of finest quality, delicious, sweet flavor and small seed cavity. This is one of the finest bred tomato strains possible to obtain. It is being continually developed for size, uniformity, flavor, earliness and productiveness. (See illustration.)

It possesses every good quality to be found in a tomato. The vines are strong and vigorous and easily bear their enormous weight of fruit.

It is of deep purplish color, an enormous yielder and a fine variety to grow for fairs, exhibitions, etc. It matures in about 135 days.

1139—Pkg., 15c; oz., 95c; ¼ lb., \$2.75; 1b., \$8.00, postpaid.

SALZER'S SELECT STONE

Our Select Stone is one of the leading varieties for main crop tomatoes; very widely grown and also well liked for the home garden. Grown extensively by canners for canning, catsup, tomato soup, etc. An excellent shipper.

Vines are large, strong and productive. It is a smooth tomato, nice and solid, free from core and cavity. Nearly round in shape.

The eating quality is exceptionally fine, has no superior for slicing or canning. Fruits are bright scarlet. Our strain of this variety is carefully grown, selected, rogued and cured. Matures in about 135 days.

1122—Pkg., 10c; oz., 35c; ¼ lb., \$1.00; 1b., \$3.00, postpaid.

CHALK'S EARLY JEWEL

Also known as Bonny Best. An early bright red tomato, large, smooth, and finely flavored, producing heavily and continuously throughout the season. Seed is all of our own growing, carefully and specially selected, and is the best obtainable. A good main crop variety.

The fruits are very big, handsome, very solid and deep through. Of bright scarlet color, ripen right up to the stem without any cracks or green core. Flesh thick, with comparatively few seeds and of sweet flavor. A good shipper. Ready for use in about 125 days.

1114—Pkg., 10c; oz., 40c; ¼ lb., \$1.20; 1b., \$3.50, postpaid.

SALZER'S COLOSSAL

A very large tomato, sometimes reaching almost the size and weight of Ponderosa and Ferris Wheel.

It is a magnificent crimson color, very attractive to look at, pleasing to the eye. Highly ornamental for slicing, solid as beefsteak, meaty and delicious. Very smooth and uniform in size. Vigorous vines require plenty of room and rich soil. Matures in about 140 days.

1127—Pkg., 15c; oz., 70c; ¼ lb., \$2.00; 1b., \$6.00, postpaid.

EARLIANA

A very early red tomato.

The plants are compact in growth and extremely prolific.

The fruits are uniform in size, averaging three inches in diameter, have solid, thick flesh of splendid quality, and are excellent shippers. Matures in approximately 120 days.

1117—Pkg., 10c; oz., 40c; ¼ lb., \$1.20; 1b., \$3.50, postpaid.

JUNE PINK

Very similar to the Earliana in growth of vine, shape and size of fruits and time of ripening. The fruits are large, nearly round, very smooth, solid.

Of great value for the gardener who grows for markets where pink tomatoes are esteemed. A good shipper and also good for growing under glass. Matures in about 120 days.

1141—Pkg., 10c; oz., 40c; ¼ lb., \$1.20; 1b., \$3.50, postpaid.

SALZER'S NEW GLOBE

Salzer's New Globe is quite early, and is excellent for the market. The fruits are a little longer than round, very smooth, and should be picked a little greener than ordinary sorts for shipping long distances.

They ripen evenly all over, are very solid, have few seeds, firm flesh, and have an attractive appearance.

The color of the skin is a fine glossy rose, tinged with purple. Matures in about 130 days.

1151—Pkg., 10c; oz., 40c; ¼ lb., \$1.20; 1b., \$4.00, postpaid.

A New Introduction.
Salzer's Red-Head
Tomato.

SALZER'S RED HEAD

Our old customers will remember that a great many years ago we introduced the Rotkappchen tomato, which was grown with such great success. One of the foreign experimental stations, in working with this seed, noticing that one plant was a trifle different, experimented with this single plant and finally produced a new tomato. We then developed this new seed further, carefully selecting and breeding it at Cliffwood Farms, and now today, we are able to furnish our customers with this fine new strain, Salzer's Red Head Tomato, satisfied that it will meet the critical demands which the particular buyer rightly expects to find in Salzer's Quality Seeds. We are so sure that you will be so greatly pleased with this splendid new tomato that we urge you to give it a trial this first year, if it is only one package. Determine for yourself the merits of this wonderful new tomato.

It is an exceptionally fine, large, bright red variety, and in earliness is second only to Salzer's Earliest of All. Reaches a good, large size, is extremely productive, bears continuously, fruits are nearly globe shaped and they are very meaty. Note the large amount of flesh in the cut tomato in the illustration above, with the narrow seed cavity next to the walls. Contains few seeds, and the luscious, thick, meaty flesh is very tender and melting. Carefully bred to resist any tendency to split and it seems practically resistant to blight. Ripens fully and uniformly to the stem, to a rich, red color, and bears heavily throughout the season. Vines are of medium growth and it is an excellent canning variety. This will prove a money-maker and we strongly recommend that it be given a trial. (See illustration above.)

1128—Pkg., 20c; oz., \$1.00; ¼ lb., \$3.00; lb., \$9.00, postpaid.

SALZER'S RED RIDINGHOOD

This magnificent tomato was introduced by us several years back and gained a reputation and popularity of which we are justly proud. It is an early variety, not quite as early as the Red Head, but earlier than Earliana, and reaches a good large size. We doubt if this seed can be obtained from any other seedsman. We have been continuously experimenting and improving this strain, and in purchasing Red Ridinghood, our customers can be assured of receiving true to type, highest quality seeds, commensurate with the high reputation Salzer's Seeds have established for 56 years. This strain is remarkably uniform in size, symmetrical, free from cracks, it ripens to the stem end, contains few seeds, and has a fine, smooth skin.

It is exceptionally juicy, sweet and of most pleasing flavor. It is reputed for its productiveness, being much better than the Earliana for yield and superior to it in quality.

It has a rich crimson color, is globe shaped and has solid flesh. The vines are vigorous and strong.

This variety is a reliable, dependable sort that is especially adapted for market growing and canners.

1123—Pkg., 15c; oz., 70c; ¼ lb., \$2.00; lb., \$6.00, postpaid.

SOW SALZER'S SEEDS

Enclosed find a picture of my tomatoes. They weighed two ounces less than three pounds. The average of all my tomatoes was one and one-half pounds each.

For big crops, large tomatoes and fine quality, your Ridinghood eclipses them all.

SALZER'S GIANT TREE

We have seen the Salzer's Giant Tree Tomato grown for exhibition purposes, 15 feet tall! Regular climbing trees. It is really a remarkable tomato, remarkable in size, remarkable for its excellent quality, and remarkable that it should grow like a tree. This makes a fine type of plant for exhibition purposes, as well as for the market or home garden; is very productive, and bears large tomatoes.

We have seen fruit on a plant eight feet tall, way out of reach of chickens, dogs, cats, wet, soft weather, etc. etc. of a most delightful quality, round, rich, luscious. Fruit of Salzer's Giant Tree Tomato are large in diameter, weighing often from one to two pounds. Ready for use in about 140 days. (See illustration.)

1159—Pkg., 20c; oz., 75c, postpaid.

YELLOW PONDEROSA

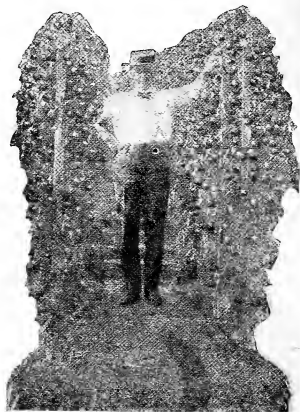

This variety is very popular with those who desire a yellow tomato. Its characteristics are identical to that of the Red Ponderosa, except that the color is a rich golden yellow; of very fine flavor, and it is very much in demand.

1179—Pkg., 10c; oz., 55c; ¼ lb., \$1.65; lb., \$5.00, postpaid.

SALZER'S DWARF GIANT

The fruits are the largest of all the dwarf varieties, almost as large as Ponderosa, solid, and of purplish-crimson color. The quality is unsurpassed. It is of rich, sweet, delicious flavor, and the fruits are almost seedless. The plants grow about two feet high, are very strong, easily carrying the heavy fruits. The Dwarf Giant matures its fruit in about 140 days.

1157—Pkg., 10c; oz., 45c; ¼ lb., \$1.35; lb., \$4.00, postpaid.

SMALL FRUITED TOMATOES

Prices on undernoted varieties: Pkg., 10c; oz., 35c, postpaid.

1189—**YELLOW HUSK OR GROUND CHERRY.** In great demand. The delight of the child, and of the healthy, luscious fruit with great relish. Prepared as preserves, they are unequal for delicacy of flavor.

1185—**RED CHERRY**—Small, round fruits, one-half inch in diameter, of bright scarlet color.

1186—**YELLOW CHERRY.** This variety differs from Red Cherry only in color.

1187—**RED PEAR.** Bright red fruits, distinctly pear shaped; it has a rich and distinct flavor, and is a favorite for preserves and to make "tomato figs."

1191—**YELLOW PEAR.** Rich, clear yellow, otherwise identical with Red Pear.

1186—**RED PEACH.** Blended deep rose and orange.

1190—**YELLOW PEACH.** Clear lemon yellow.

HERB SEEDS, SWEET, POT AND MEDICINAL

ANISE—An annual, cultivated principally for its seeds which have an aromatic taste; used for colic and nausea. The leaves are sometimes used for garnishing and flavoring. 1242—Pkg., 10c; oz., 35c.

BASIL, SWEET—A hardy annual. The leaves and stems have a strong flavor and are used in soups and highly seasoned dishes. 1244—Pkg., 10c; oz., 40c.

BORAGE—A hardy annual. The flowers furnish bee pasture. The leaves are used for flavoring. 1246—Pkg., 10c; oz., 35c.

CARAWAY—A hardy perennial. Cultivated for its seeds, which are used in confectionery, cakes, etc. The leaves are sometimes used in soups, for flavoring liquors and for colic. The plants never seed till the second year. 1249—Pkg., 10c; oz., 20c; ¼ lb., 60c.

CATNIP OR CATMINT—A hardy perennial. The leaves and young shoots are used for seasoning. Makes also excellent bee pasture. 1277—Pkg., 10c; oz., 60c.

CORIANDER—A hardy annual. Cultivated for its seed, which has an agreeable taste and is used in confectionery and in the manufacture of liquors. 1253—Pkg., 10c; oz., 15c.

DILL—An annual. The seeds have an aromatic odor and warm pungent taste. They are used for seasoning and possess medicinal properties, but their largest use is for making Dill pickles. 1254—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00.

FENOCCHIO, or FLORENCE FENNEL—A delicious vegetable which should be more largely grown in this country. It is extensively used in Europe as a salad, and also may be served boiled. When the enlargement of leaf stalk, at base of stem, is about the size of a hen's egg it should be earthed up, and in about ten days cutting may be commenced and continued as the plants increase in growth. The flavor is somewhat like celery, but it has a sweet, aromatic taste and delicate odor. Quite distinct from Sweet Fennel; height, 1 foot. 1256—Pkg., 10c; oz., 25c.

LAVENDER (Lavendula Spica)—A hardy perennial. It is used for the distillation of lavender water or dried and used to perfume linen. 1260—Pkg., 10c; oz., 60c.

MAJORAM, SWEET—Perennial, but not hardy in the north. An aromatic herb for seasoning. The young, tender tops and leaves are used green in summer to flavor broths, dressing, etc., and are also dried for winter use. 1261—Pkg., 10c; oz., 50c.

MINT, PEPPER—Hardy. Leaves and stems are used for flavoring, but chiefly for distillation of essence of peppermint. 1262—Pkg., 20c.

MINT, SPEAR—A hardy perennial. Leaves and ends of shoots are used for seasoning and for mint sauce and juleps. 1263—Pkg., 20c.

ROSEMARY—A hardy perennial, with fragrant odor and a warm, bitter taste. The leaves are used for flavoring meats and soups. Blossoms form the principal ingredient in the distillation of toilet waters. Plants do not reach a size suitable for use until the second season. 1265—Pkg., 10c; oz., 75c.

SAFFRON—A hardy annual. Cultivated for its flowers, which are used principally for coloring, sometimes for flavoring and to make the cosmetic powder called rouge. The flowers should be picked while in full bloom. 1267—Pkg., 10c; oz., 50c.

SAGE—A hardy perennial. One of the most extensively used herbs for seasoning. Cut the leaves and the tender shoots just as the plant is coming into flower and dry quickly in the shade. 1268—Pkg., 10c; oz., 75c; ¼ lb., \$2.00.

SAGE PLANTS, HOLT'S MAMMOTH—Hardy perennial plant of very strong growth, attaining the first season a height of 1 foot and a diameter of 3 feet. Each, 1½ doz., 85c; doz., \$1.50.

SAVORY, SUMMER (Bohnenkraut)—Aromatic annual, the dried stems, leaves and flowers of which are extensively used for seasoning, especially in dressings and soups and also with string beans. 1269—Pkg., 10c; oz., 35c.

SPEAR MINT PLANTS—For mint sauce and juleps. Hardy perennial. Each, 1½ doz., 85c; doz., \$1.50, postpaid. By Express, \$4.00 per 100.

THYME, BROAD LEAVED ENGLISH—An aromatic perennial herb, used principally for seasoning. Sometimes the leaves are used to make tea for the purpose of relieving nervous headache. 1272—Pkg., 10c; oz., 60c.

WORMWOOD—A perennial plant of fragrant and spicy odor, but with intensely bitter taste. The leaves are used as a tonic, vermifuge and a dressing for fresh bruises. It is also beneficial for poultry and should be planted in poultry yards. 1273—Pkg., 10c; oz., 25c.

1281—MIXED HERBS—A package usually will produce enough plants of any one variety desired for flavoring or medicinal purposes. Pkg., 10c; oz., 40c, postpaid.

DEVOTE A CORNER OF YOUR GARDEN TO HERBS. YOU WILL NOT REGRET IT

Spinach (*Spinacia Oleracea*)

KING OF DENMARK

(Antvorskov)

This new Spinach is going to eventually replace all other varieties for spring planting. It is slow to go to seed, and continues to grow and hold its fine quality weeks after other sorts have gone to seed. For a number of years we have been working and developing a strain that would withstand the hot sun, extreme dry spells and not go to seed easily, and in our King of Denmark, after painstaking efforts and trials at Cliffwood Farms, we have at last succeeded in combining these qualities in this wonderful strain.

In Denmark they would not presume to name anything after the King unless it was especially fine, which only emphasizes the merits of this fine Spinach. Our seed is grown in Denmark, hence extremely hardy, vigorous and productive. Our customers need have no hesitancy about growing this variety for it is a supremely good type and can be depended upon to produce exceptionally fine spinach in abundance. A fine strain for canning.

It forms large, low, compact tufts. The numerous leaves are large, broad and rounded. Exceedingly bushy, slightly crumpled and of a glossy dark green color. Ready for use as early as any spinach and retains its condition about two weeks longer. Matures in about 45 days. (See illustration.)

1065—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.25, postpaid.

SALZER'S SAVOY OR BLOOMSDALE

This is our very earliest Spinach, and where extreme earliness is wanted, we strongly recommend this strain. It grows quickly to a size suitable for use, and is rather slow to run to seed, but not as slow as King of Denmark. An old standard variety, and much used by canners.

Upright growing plants with thick, glossy, dark green leaves of medium size, broad and pointed, twisted and bloated. It is grown now by thousands of spinach growers. Ready to use in approximately 40 days.

1070—Pkg., 5c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid. By Express: 1 lb., 70c; 5 lbs., \$3.00.

WINTER PRICKLY

A splendid fall and winter variety, but is also well adapted for spring use. Produces hardy, large plants of vigorous growth with thick and dark green leaves.

1073—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 85c, postpaid.

Rutabaga (*Brassica Napo*)

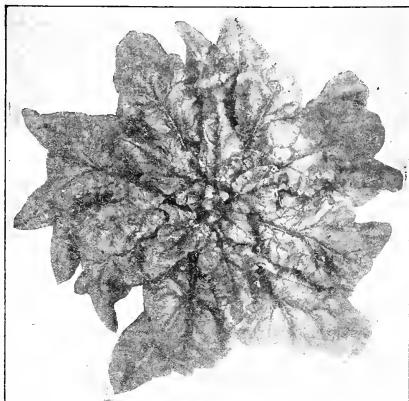

SALZER'S MAMMOTH RUSSIAN

Rutabagas are also known as Swedish Turnips, Swedes, or Russian Turnips. They have firmer flesh than turnips, however, are more solid, and hence keep later into spring. Like turnips, they are excellent for stock feeding and as a rotation crop. Stock thrive and increase in value rapidly when turnips and rutabagas are fed in liberal quantities and next to mangels are one of the cheapest feeds on the farm. It is also the finest and sweetest rutabaga for table use, and is devoid of woodiness. We consider it the heaviest yielding, the largest and the most uniform variety, that withstands most cold and will submit to most heat. It is the most attractive. It has the most protein. Has very short neck. Easily harvested. Sow about two pounds per acre.

A Crop of Salzer's Mammoth Russian

SALZER'S MAMMOTH RUSSIAN RUTABAGA COMMENDABLE FOR PRIVATE USE AND STOCK FEEDING

King of Denmark

SALZER'S TRIUMPH

Introduced by us over 15 years ago, and obtainable only from us, this strain still retains its popularity and remains in good demand. Our seed stock is exceptionally fine.

Plants are comparatively small, of very compact, but prostrate growth. They are composed of many short-stemmed leaves, which are of a thick, heavy texture. They are heavily crumpled and blistered, of dark green color, and do not wilt or run to seed quickly, but will remain in good marketable condition much longer than most other varieties (except King of Denmark) and retain their freshness during the hot summer months.

1071—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid. By Express: 1 lb., 70c; 5 lbs., \$3.00.

1510—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, postpaid. By Express: 1 lb., 95c; 5 lbs., \$4.00; 10 lbs., \$7.50.

AMERICAN PURPLE TOP

This variety is a favorite with stockmen, farmers and dairymen. It is unusually productive, giving big yields of the finest rutabagas; also equally a splendid variety for table use, ranking next to Mammoth Russian.

Roots of large size, globular, with flesh of deep yellow color, fine grained, and of finest quality. Skin yellow with purple top. Matures in about 85 days.

1503—Pkg., 5c; oz., 10c; ¼ lb., 25c; lb., 75c, postpaid. By Express: 1 lb., 70c; 5 lbs., \$3.25; 10 lbs., \$8.00.

SALZER'S WHITE SWEET RUSSIAN

Our White Sweet Russian has white flesh of a milder and sweeter flavor and contains more saccharine than the yellow-fleshed sorts. For stock feeding it is in great demand, as stock show a noticeable fondness for it. Matures in about 80 days and is an extremely productive variety.

Farmers everywhere have been so delighted with this type that it is now one of the most popular varieties we offer. It has tankard shaped roots, a small neck and upright leaves. Not so desirable for table use, but fine for stock.

1512—Pkg., 10c; oz., 15c; ¼ lb., 20c; lb., 50c, postpaid. By Express: 1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.50.

Salsify (Tragopogon)

SALZER'S SANDWICH ISLAND

Also called Oyster Plant. This delicious oyster flavored salsify has eclipsed all the other sorts by leaps and bounds. It is the real essence of goodness. It is large and vigorous growing with long, smooth, white, tapering roots. A good vegetable to grow for winter use. Roots are not injured by freezing and may be left in the ground all winter without injury. For winter use, store as you do other vegetables or in a pit. Matures in about 140 days. It is of fine quality and flavor. Very nutritious and wholesome.

1060—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, postpaid.

Turnip (Brassica Rapa)

SALZER'S SNOWBALL

In Salzer's Snowball we have a strain that embraces quality to an unusual degree, having won its great popularity through sheer merit. It is devoid of that sharpness so usual in turnips and has a pleasant, mild flavor.

One of the earliest, round, white turnips, producing medium large, round roots of perfect shape, with only a single tap root; they are of attractive appearance and showy; quite smooth, skin and flesh snowy white. The foliage is small and of light green color. The flesh is firm, mild and sweet; one of the finest turnips for private as well as for the market gardener. Matures in about 40 days. (See illustration opposite.)

1204—Pkg., 5c; oz., 10c; ¼ lb., 25c; lb., 75c, postpaid.

SALZER'S PURPLE TOP STRAP LEAF

An old standard variety, extensively grown. Is an early variety, reaches a good size, has a fine flavor, and is a good keeper. It is splendid for early spring and late fall sowing, producing in about six weeks' time a usable, tender, mild, sweet turnip. The leaves are short, the roots quite flat with upper half a purplish color and the lower half white. The flesh is pure white, crisp and finely grained. It grows rapidly from the very start.

1211—Pkg., 5c; oz., 10c; ¼ lb., 20c; lb., 60c; postpaid. By Express: Lb., 55c; 5 lbs., \$2.50; 10 lbs., \$4.50.

SALZER'S WHITE EGG

One of the best for the private garden and meets with a ready sale on all markets. Has oval roots about ¼ longer than broad, skin white and smooth, flesh firm, white, and of fine quality. Grows ½ out of the ground.

1217—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

GOLDEN BALL

Medium sized, round roots of deep golden-yellow skin and flesh, which is firm, crisp and of excellent quality for the table. The most delicately flavored and finest yellow turnip for table use. Very early.

Adapted to spring as well as fall planting and keeps very well. Matures in about five weeks.

1236—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

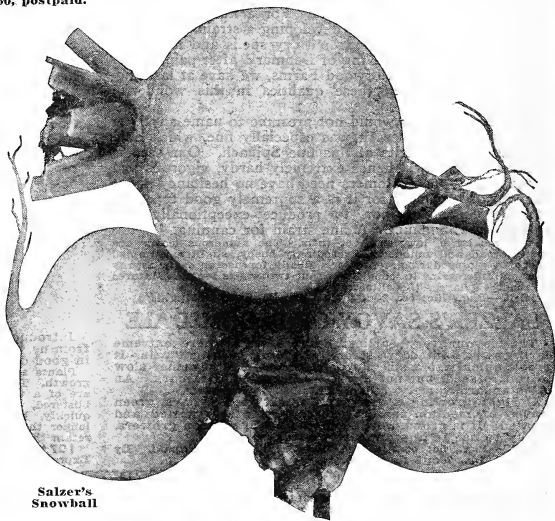

FALL TURNIPS

SALZER'S COWHORN

The long carrot-like shape of this turnip has made it immensely popular with farmers where more friable land is desired. Its penetrating growing habit loosens up the land and makes a better and richer growing soil for succeeding crops. Aside from this, it has all the other good qualities of a turnip and is splendid for the table. Excellent for stock; superb for plowing under as a green fertilizer. This turnip grows partly above ground. The skin is of a clear white color with a shade of green on the crown. Matures in about 60 days.

1202—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 85c, postpaid. By Express: Lb., 80c; 5 lbs., \$3.75; 10 lbs., \$7.00.

SALZER'S EARLY HARDY NORTHERN STRAINS HAVE A NATIONAL REPUTATION FOR THEIR MILDNESS

Salzer's
Snowball

SALZER'S PURPLE TOP WHITE GLOBE

Like our Snowball, we have been spending much time and expense developing this variety to the highest point of excellence. Our sales the last few years have increased to such proportions that it has shown that our customers not only appreciate quality, but recognize it when they see it.

It is of fairly symmetrical globe shape. One of the heaviest cropping garden turnips and an excellent keeper. It is ideal in size and attractive in appearance. The roots are large, and white with purple color above ground. The roots are best for eating when about three inches in diameter; they grow, however, much larger and are very suitable for stock feeding.

The flesh is white, tender, fine grained and mild in flavor. This variety is probably more generally planted than any other. Ready for use in 50 days.

1212—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

SALZER'S MILK WHITE GLOBE

Salzer's Milk White Globe is one of the best White Turnips for winter use grown. It is globe shaped, grows very large, of delicious flavor, and has sweet, juicy, white flesh, of solid texture. Just the turnip to grow for stock and to store for kitchen use. Ready in about 50 days.

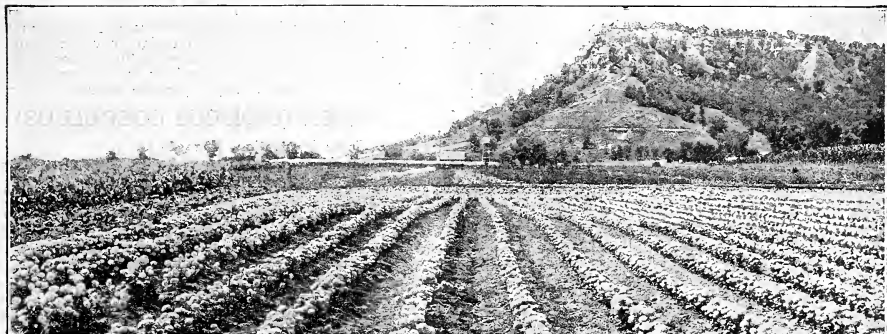

1208—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid. By Express: Lb., 70c; 5 lbs., \$2.75; 10 lbs., \$5.00.

SALZER'S YELLOW ABERDEEN PURPLE TOP

Farmers who have no storage for winter turnip feeding and grow turnips for fall use only—find Yellow Aberdeen immensely profitable. By using this variety it permits sowing until late in July and still harvest a big crop. Yellow Aberdeen will grow and mature almost twice as rapidly as Rutabagas. It is milder in flavor, a very heavy yielder and although a fair keeper, is not recommended for general winter storing, as the flesh is softer than the Rutabaga types. This strain has a remarkably vigorous constitution. Ready for use in about 60 days.

1237—Pkg., 5c; oz., 10c; ¼ lb., 20c; lb., 60c, postpaid. By Express: Lb., 55c; 5 lbs., \$2.50; 10 lbs., \$4.50.

SALZER'S SELECTED FLOWER SEEDS

GROWING ASTERS ON CLIFFWOOD FARM

We have grown and produced superior flower seed for over 55 years, and feel that in presenting the following flower seed pages, that we are qualified in saying that you cannot secure choicer pedigreed stocks in this country. Rather than list the poor sorts and varieties at five cents a package we have confined our efforts in producing only the very best or Super Strains.

We have expended a great deal of time, effort and money in securing for you only the finest strains that grow and present our Super Strains of flower seeds with the confidence that you will be highly pleased.

All of our varieties are tested at Cliffwood Farms and those who have experienced trouble in successfully growing flowers can rest assured that if Salzer's Super Strains are planted that your garden will produce a brilliant mass of blooms such as you have never had the pleasure of growing before. All flower seeds are POSTPAID.

The following letters after each variety designate the class to which each belong:

- A—For Annuals. They grow from seed and die the first year.
 B—For Biennials. Bloom and die the second year. Some varieties will bloom the first year if planted early.
 P—For Perennials. Usually bloom the second year and live indefinitely. Many varieties bloom the first year.
 H—For House Plants. Plants that are generally grown indoors.
 C—For Climbing. Vines and plants of climbing habit.

1571—SALZER'S CLIFFWOOD COLLECTION OF ANNUAL FLOWERS—\$1.00

1574—CHILDREN'S FLOWER GARDEN COLLECTION

This collection is composed of the popular, old fashioned flowers which everyone loves. They are so easy to grow and so reasonable a price that each garden should try this collection and let the children learn to love and appreciate nature. 10 packets for 25c.

I have tried the Cliffwood Superstrains you sent me and they are wonderful.—Mrs. S. Morris, Detroit, Mich.

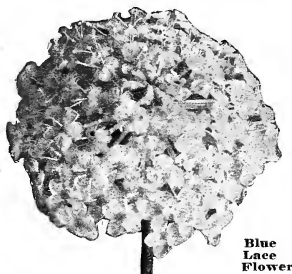

A Page of Worthy Novelties

The varieties offered on this page have all been thoroughly tried on our Cliffwood Farm and found to be worthy of introduction to our customers. We are positive that you will be unusually pleased with these splendid varieties. Your garden is always more keenly enjoyed by having varieties and types which your neighbors do not have. Try a package of each.

BLUE LACE FLOWER (DIDISCUS COERULEUS)

(See Color Illustration, Page 67)

1965—While inspecting novelties at Cliffwood Farm we were attracted by the unusual beauty of the Blue Lace Flower. As its name implies it bears a lace flower of clear bluish color. Grows upright about 2 feet high, branches freely, each end bearing a cluster of light blue flowers spreading umbrella-like. Each blossom is carried on a thin, long tube lending the flower-head a delicate and dainty touch. Foremost for cut flowers, lasting unusually long in water, also desirable for mass growing with other flowers. Of easy culture and blooms continuously from midsummer till frost. Just the variety for the vacant spot in your garden. (See illustration.) Pkt., 15c.

Blue
Lace
Flower

DOUBLE CRESTED COSMOS

(See Color Illustration, Page 68)

When we introduced the Cliffwood varieties of Cosmos we felt we had given our customers a strain of Cosmos which would outsell all of our previous Cosmos efforts. This was true, as our Cosmos sales increased to such proportions that we were sold out before the season was over. We predict a similar sale on our Double Crested Cosmos, as this unusual flower has given much pleasure on our Cliffwood Farms this summer. The large centers and the range of colors, pink, white and crimson, will create a striking effect. Pkt., 15c.

1921—Pink Beauty, 1922—White Queen, 1923—Crimson King, per pkt., 15c; 1913—Mixed, pkt., 15c.

DELPHINIUM, EXQUISITE

1950—A new race of delphinium or larkspur, a most beautiful, stately flower, pink in color. The seed is a perennial and will bloom the second year. As its name indicates, this introduction is of sterling merit and should be in every garden, it being used and in vogue by the most progressive florists. The clear shell pink of its flowers is not equaled for delicacy and beauty by any other variety. Order your seed before our limited supply is exhausted. (See color illustration, page 68.) Pkt., 25c.

BALL CALENDULA

1815—The old favorite, pot Marigold, is one of the best and showiest of the free flowering annuals used so much for borders and cutting. A Mr. Ball has, after years of work, developed a strain which we offer for the first time. The flowers produced are supreme in quality and size and unusual in coloring. You will indeed be pleased with this new variety. (See color illustration page 68.) Pkt., 20c; ¼ oz., \$1.00.

NEW DAHLIA FLOWERED ZINNIA

(See Color Illustration, Page 67)

2584—A number of years ago we listed this new type of Zinnia and our customers are so pleased with our superior strain that we annually sell thousands of packages of this beautiful flower. We do not know of a flower which delights one so, as the extent of colors in this popular variety range from the soft pastel tones to a rich strawberry red. The flowers themselves are giants, often five and six inches across, growing on strong, sturdy stems three feet high. At the time this is written, October twentieth, they are still in bloom at Cliffwood Farm, being one of the last flowers in the garden. (See page 77 for further description.) Mixture, pkt., 15c.

We are offering the most popular shades separately for the first time this season and predict a record-breaking sale on these easy to grow flowers. (See illustration.)

2585—Exquisite. Light rose, center deep rose.

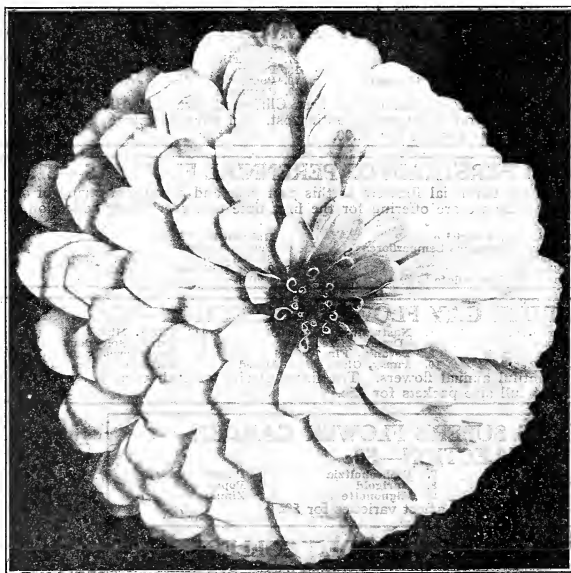

2586—Old Rose. A charming old rose shade.

2587—Golden State. Rich orange yellow.

2588—Crimson Monarch. Striking crimson.

2589—Dream. Deep lavender turning to purple.

2590—Polar Bear. Pure white. Separate colors, each, pkt., 20c. One pkt. each of above 6 sorts, \$1.00.

New Dahlia Flowered Zinnia

OVER HALF A CENTURY IN THE SEED BUSINESS MEANS DEPENDABLE SEED SERVICE

Asters-A

SALZER'S BEAUTY ASTERS

See color illustration on page 67

A new race of giant flowers borne on long and stout stems two feet long. The sensation of the Aster family, excellent for short seasons, of vigorous growth, bearing dense double flowers of beautiful shades. This is the finest Aster we have ever grown. You will be pleased. Try them. Plants three feet high.

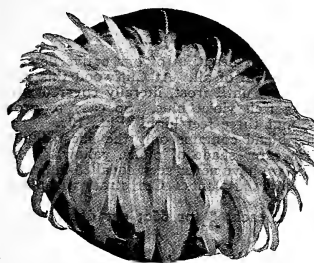

- 1711—Peach Blossom, pinkish orange.
 1712—Lavender Beauty, soft lavender.
 1713—Purple Beauty, deep rich purple.
 1714—September Beauty, delicate shell-pink.
 1715—Finest mixed. Each, 15c per Pkt.; 4 Pkts., 50c.; ¼ oz., \$1.00.

SOW SALZER'S SEEDS

I hope everyone who grows your asters has the same success that I had. Frank Baker, Cleveland, O.

PEONY-FLOWERED PERFECTION

Giant Crego Aster

AMERICAN ASTERS

1735—FIRE KING OR TRIUMPH. Plants eight inches high, covered with large, handsome, double flowers of faultless peony form; intensely brilliant scarlet. Pkt., 15c.

1736—SNOWBALL. An exclusive aster, growing about one foot in height and producing a profusion of handsome, pure white flowers. Fine for pot plants and an excellent variety for cutting. Pkt., 15c.

1754—SALZER'S CHOICE MIXED. This mixture is immensely popular and is doubtless one of the best ten cent mixtures offered today. We do not know of a ten cent package of aster seed that will give you more genuine pleasure, from August till frost. The colors are brilliant, varied and charming. Pkt., 10c.; ¼ oz., 25c.

1696—PEONY-FLOWERED PERFECTION, MIXED. A mid-season variety blooming in August. One of the most perfect flowers, very double, large and shell-shaped with in-curved petals. Height, eighteen inches. Pkt., 10c.; ¼ oz., 35c.

1755—SALZER'S GORGEOUS PRIZE MIXTURE. To those desiring a beautiful garden of asters, in almost endless types, varieties and exquisite colors, we particularly recommend our Gorgeous Prize Mixture. It contains a great many varieties of our elegant sorts and colors. Pkt., 15c.; ¼ oz., 45c.

1756—PERENNIAL ASTERS. Bright, beautiful flowers. Perfectly hardy, live for many years. Pkt., 10c.

SOW SALZER'S SEEDS

I have seen some of your beautiful Crego Asters at Greenville, Wis. They certainly are prize winners.

Mrs. F. W. Lanke, Superior, Wis.

My garden is greatly admired by the people of this town. It gives me much pleasure to grow your seed. I think your asters are the most beautiful I have ever seen so I am sending you a picture of them.

Mrs. John Loeb, Bowdler, S. D.

QUEEN OF THE MARKET

A popular early flowering aster, blooming two weeks earlier than the taller sorts and continuing until late in fall. Plants of spreading habit, growing one foot high.

The earliest of all Asters, blooming two weeks prior to other sorts, very large and double flowers of branching habit. A very popular Aster of excellent quality.

	Pkt.	¼ oz.		Pkt.	¼ oz.
1664—CRIMSON	10c	25c	1667—PINK	10c	25c

1575—One pkt. each of the above six, separate colors for 50c.

1670—QUEEN OF THE MARKET, MIXED. Pkt., 10c.; ¼ oz., 40c.

SALZER'S GIANT BRANCHING

Particularly desirable for cut flowers and interior decorations. The flowers are extra large, double, full centered and borne on strong stems, frequently sixteen inches in length. Bloom until late in summer.

This variety is American in its origin and is excellently adapted to our climatic conditions. Flowers are large and double, our excellent strain throwing no single flowers.

1678—LIGHT PINK	10c	50c	1681—WHITE	10c	50c

1577—One pkt. each of the above six, separate colors for 50c.

1682—BRANCHING, CHOICEST MIXED. All colors and shades. Pkt., 10c.; ¼ oz., 45c.

GIANT CREGO

The plants are vigorous and productive, sending up stems frequently two feet in length, each carrying immense flowers often measuring six inches across. The long petals curl across each other so fluently as to enhance the beauty of the flowers. Blooms from August to the end of September. (See illustration.)

	Pkt.	¼ oz.		Pkt.	¼ oz.
1718—GIANT CRIMSON	10c	50c	1722—GIANT PURPLE	10c	50c
1719—GIANT DARK BLUE	10c	50c	1723—GIANT ROSE	10c	50c
1720—GIANT LAVENDER	10c	50c	1724—GIANT WHITE	10c	50c
1721—GIANT PINK	10c	50c	1725—GIANT FINEST MIXED	10c	50c

1578—One pkt. each of the above seven, separate colors for 50c.

Children can hardly be seen in asters because of size of plants and flowers.

YOUR BEAUTY TYPE OF ASTERS ARE THE FINEST I HAVE EVER GROWN.—ALEX POLL, WINNETKA, ILL.

Bed of Ageratum bordered by White Leaved Cineraria

ABUTILON (Flowering Maple)—H

1602—FINEST MIXED. Ornamental, tender, shrub-like plant with large bell-shape flowers, blooming continually. (See illustration below.) Pkt., 10c.

ACHILLEA—P

1604—THE PEARL. A hardy perennial; covered from spring until frost with many very double, pure white flowers. Grows two feet high. Pkt., 10c.

PLANTS—Cliffwood grown, 20c each; 3 for 55c; per dozen, \$2.00, postpaid.

AGERATUM—A

1610—LITTLE BLUE STAR. This Ageratum is an everblooming type, flowering continuously until heavy frost. Each head will remain in bloom fully a month. Nothing excels it for borders and edgings. Ageratum is one of the best of bedding plants being constantly in bloom until frost. Very easy to raise from seed. Annual. Five inches high. (See color illustration page 67, also illustration opposite.) Pkt., 15c; $\frac{1}{8}$ oz., 50c.

1612—MEXICANUM BLUE PERFECTION. Lavender-blue flowers. Excellent as a pot plant during winter. Annual. Eighteen inches high. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

AQUILEGIA (Columbine)—P

1652—VULGARIS. One of the most beautiful of our native flowers. This variety is one of the most graceful of all. At Cliffwood this year Columbine was in evidence from June until frost, literally covered with its spiked blossoms. The color a rich violet blue. So easy to grow from seed. Hardy perennial. About three feet high. Pkt., 10c.

1651—ERFURT PRIZE. This blend contains only the finest double varieties and the flowers are of a rarer shade of pinks, yellow, golden henna and deep purple. A mixture we have never seen equalled in beauty of the colorings and the sturdiness of the plants. Our strain will please the most critical. Pkt., 15c.

PLANTS—Cliffwood grown, 20c, each; 3 for 55c; per dozen, \$2.00, postpaid.

SWEET ALYSSUM—A

1622—MARITIMUM. This old favorite with its exceptional fragrance and over-abundance of bloom make it almost an indispensable border plant. Unexcelled for edging, massing, basket, pot or rock work. A continuous bloomer and fills many places where other flowers of short blooming habit are not desired. Color snow white. Annual. Height, ten inches. Pkt., 5c; oz., 35c.

1623—OCEAN SPRAY. Of the many varieties of Alyssum, our introduction, "Ocean Spray," is unrivalled for beauty and fragrance. Used in many arboretums and finest rock gardens in the country. A variety which cannot be surpassed. Very large blossoms of delicious fragrance with many flowers on a single plant. Annual. Height, six inches. (See illustration below.) Pkt., 15c; $\frac{1}{8}$ oz., 40c, postpaid.

1625—SAXATILE COMPACTUM (Basket of Gold). Hardy perennial. Flowers brilliant golden yellow. Silvery gray foliage. Pkt., 10c; $\frac{1}{4}$ oz., 35c.

ARCTOTIS—"Blue-Eyed African Daisy"—A

1656—GRANDIS. The plants form much-branched bushes about two to three feet across with silvery-white, deeply-cut foliage. Daisy-like flowers often two and one-half inches in diameter, of silvery-white color on upper surface with a sky-blue eye, the reverse petals pale lilac-blue. A most attractive annual. Pkt., 10c; $\frac{1}{4}$ oz., 30c.

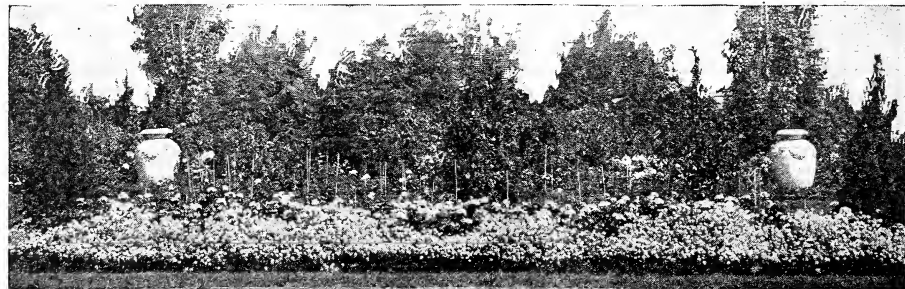

ASPARAGUS FERN—H

1658—PLUMOSUS NANUS (Lace Fern). Most delicately, graceful foliage. A dainty pot plant for indoor decoration. Pkt., 15c.

1659—SPRENGERI (Emerald Feather). Of drooping growth. Makes a pretty and graceful plant for hanging baskets. Pkt., 10c.

Abutilon

A BORDER OF OCEAN SPRAY SWEET ALYSSUM

I have never had such success as with your wonderful Ocean Spray Alyssum.—Mrs. B. F. Parish, Rochester, N. Y.

ANTIRRHINUM (Snapdragon)—A

Antirrhinum, Majus Nanum Semi-Dwarf

From the foremost grower of Snapdragon seed in England we are able to offer our customers an unrivaled strain of this ever-increasing popular flower. Snapdragons are found in almost every garden because they are so easy to grow and have such a glorious range of colors. However, our new giant varieties should not be confused with the older types, for they greatly surpass them in beauty of flower and color. They are of magnificent size and closely placed on the spike. A package of each prepaid for 60c of the following named varieties will give you a flower bed or border of brilliant hues:

1645—AMBER QUEEN—Canary yellow, overlaid chamois pink. (See illustration.)

1646—BLACK PRINCE—Rich dark crimson, dark foliage.

1647—DEFIANCE—Vivid orange or flame.

1648—NELROSE—Coral pink.

1649—ROSE QUEEN—Delicate rose.

Pkt., each 15c; one packet of each of above varieties, 60c.

1643—CLIFFWOOD HALF DWARF GIANT MIXED. This strain has proven immensely popular, especially in the last few years, since snapdragons have come into such prominence for bedding and masses. The La Crosse Parks are known far and wide for their beauty and snapdragons are perhaps the most prominent in their general use. Try this mixture this year.

It is especially commended for those who wish a showy flower that will remain in bloom throughout the summer. For cutting and house decoration it is unequalled. Height, twenty inches. Pkt., 15c; ¼ oz., 30c.

1642—DWARF GIANT MIXED. Height, ten inches. Pkt., 10c; ¼ oz., 25c.

1644—TALL LARGE FLOWERING MIXED. Height, thirty inches. Pkt., 10c; ¼ oz., 25c.

Your snapdragon seed is incomparable. Please send me \$1.00 worth, your selection.
Mrs. John Lee, Tampa, Fla.

Amber Queen Antirrhinum

GIANT DOUBLE BALSAM (Lady Slipper)—A

This is one of the most gorgeous old-fashioned flowers. The plants often have six to twelve branches, literally covered with large rose-like flowers. There is more bloom display to a Balsam than any plant of equal size. Easy to grow but will thrive best in a sunny location. Transplanting will give the plants a better shape and produce finer flowers. Salzer's Superior Mixed comprises the finest double sorts. Annual. Height, two feet. (See illustration.)

Giant Double Balsam

1762—APPLE BLOSSOM SHADE, pink and white. Pkt., 10c.

1763—CRIMSON KING, blood red. Pkt., 10c.

1764—PERFECTION, snow white. Pkt., 10c.

1772—THE KING, intense scarlet. Pkt., 10c.

1766—SOLFERINO, white, lilac and scarlet. Pkt., 15c.

1778—CLIFFWOOD LARGE DOUBLE MIXED. Pkt., 15c.

1774—FINEST MIXED. Pkt., 15c; ¼ oz., 50c.

1776—SALZER'S SUPERIOR MIXED. Pkt., 10c; ¼ oz., 45c.

BALLOON VINE—A-C

1760—A graceful and ornamental annual climber. The dainty white blossoms are followed by inflated seed-pods which resemble miniature balloons. Height, twelve feet. Pkt., 10c.

BEGONIAS—H

Everblooming Bedding Varieties

1784—ERFORDIA—Bright rosy carmine. Pkt., 25c.

1788—VERNON—Orange carmine, red foliage. Pkt., 15c.

Tuberous-Rooted Varieties

For summer decoration or window gardening. Bloom the first season from seed, if sown in February or March. ¼ oz. ¼.

1789—FRILLED—Beautifully frilled and wavy petals. Pkt., 25c.

1790—SINGLE—Finest mixture. Pkt., 15c.

1788—DOUBLE—Finest mixture. Pkt., 25c.

Your seeds always produce the results you say they will.
A. Manson,
Boston, Mass.

BLUE LACE FLOWER (Didiscus Coeruleus)—A

1965—A new introduction. (For description see page 58.) Pkt., 15c.

CALCEOLARIA—H

An ornamental house plant producing early in the spring a mass of flowers beautifully spotted and blotched.

1810—HYBRIDA, GRANDIFLORA—Large flowering, mixed colors. Pkt., 25c.

CALENDULA (Pot Marigold)—A

A free flowering dwarf, bushy annual. The bright colored flowers are borne on long stems and bloom continuously from early summer until late fall. An ideal pot plant for winter. Height, one foot.

1813—ORANGE KING. One of the most striking and most beautiful flowers possible to grow. Exceptionally free blooming and the flower retains a vivid orange color that is most fascinating and attractive. To those of our customers not familiar with it, we urge a trial. Is hardy, vigorous and a beautiful sight in the garden. The flowers attain an immense size. Pkt., 10c.

1815—BALL CALENDULA. A new variety. (See page 58; color illustration, page 68.) Pkt., 20c.

1814—ALL SORTS FINEST MIXED. Rich colors. Pkt., 10c; ¼ oz., 20c.

YOUR GARDEN IS INCOMPLETE WITHOUT SOME BRILLIANT SNAPDRAGONS. SEE ABOVE.

Finest
Mixture
Calliopsis

CALLIOPSIS—A

Half-hardy perennial of quick growth and bearing a profusion of bright-colored flowers. When cut with a part of the foliage, they make a very attractive bouquet. Sow the seed thinly where the plants are to bloom in a well prepared seed bed as early in spring as the soil can be dug.

1818—GOLDEN WAVE—Brilliant annuals, with large, bright flowers borne in great profusion. Pkt., 10c; ¼ oz., 20c.

1819—FINEST MIXTURE CALLIOPSIS—Magnificent, new dwarf, compact strain. (See illustration.) Pkt., 10c; ¼ oz., 15c.

CANDYTUFT—A

An annual flower that is always popular. It has no superior for profusion of bloom. Few flowers are better liked and give greater satisfaction. Has a wide reputation for its strong, healthy, vigorous nature. One of the most prominent for border use and cutting. Growing on spikes in cluster form they are one veritable mass or sheet of color. Easy to grow, very hardy. Height, one foot. (See illustration below.)

1835—FRAGRANT—White, sweet scented. Pkt., 10c; ¼ oz., 20c.

1837—NEW CRIMSON—Pkt., 10c; ¼ oz., 25c.

1838—ROSE CARDINAL—Enormous umbels of beautiful deep rosy red. Pkt., 10c; ¼ oz., 20c.

1840—SUMMER GLORY—A rare mixture of large flowering dwarf hybrids, the finest strain in cultivation. Pkt., 10c; ¼ oz., 25c.

1834—FINEST MIXED—Annual sorts. Pkt., 10c; ¼ oz., 20c.

1836—GIBRALTARICA, HYBRIDA MIXED—(Perennial). White flowers, shading to lilac. An excellent variety for the hardy border. Pkt., 10c.

1839—SEMPERVIRENS—(Perennial). Pure white, much used in cemeteries. One foot high. Pkt., 10c.

CAMPANULA (Bellflower)—P

Imposing, hardy plants, profusely covered with large bell-shaped flowers. Height about two feet. Often called Canterbury Bells.

1822—CUP AND SAUCER (Calycanthema)—Biennial. Plants form perfect pyramids of bloom, frequently bearing 100 to 200 exquisite blossoms for weeks in early summer. Finest mixed. Pkt., 10c; ¼ oz., 35c.

1823—MEDIUM DOUBLE MIXED (Canterbury Bells). Pkt., 10c; ¼ oz., 25c.

1824—MEDIUM SINGLE MIXED (Canterbury Bells). Pkt., 10c; ¼ oz., 25c.

1826—PERSICIFOLIA WHITE—Hardy perennial. Large, handsome white bell-shaped flowers. Pkt., 15c.

1825—PERSICIFOLIA BLUE—Hardy perennial. An excellent companion to the white variety. Pkt., 15c.

PLANTS—Cliffwood grown, 20c each; 3 for 55c; per dozen, \$2.00, postpaid.

CANARY BIRD VINE—A-C

1832—A rapid growing climber of the Nasturtium family, with handsome, finely cut foliage, producing an abundance of bright canary-yellow, bird-like blossoms from July until frost. An excellent winter window vine. Height, fifteen feet. Pkt., 10c; ½ oz., 30c.

Giant
Marguerite
Carnation

Candytuft

CANNAS—A

One of the most effective of showy foliage plants. The seed should be soaked in warm water until they swell. Plant indoors one-half inch deep in rich soil and keep moist until sprouted. Reselected seed only.

1850—DARK LEAVED VARIETIES, mixed. Pkt., 10c.

1852—SALZER'S FINEST MIXTURE—Contains many large flowering varieties. Pkt., 15c.

CARNATION—A-B

Free blooming and one of the most delightful summer flowers to grow in the open border. A great favorite.

1861—PERPETUAL EARLY-FLOWERING (Double Chabauds). A very fine, early and large-flowering strain. It contains a great variety of colors and shades; very fine for pot plants. Mixed colors. Pkt., 15c.

1859—GIANT MARGUERITE. These beautiful, double, fringed flowers often measure three inches across. They are quite hardy and with a little protection will live over winter outdoors. (See illustration.) Mixed colors. Pkt., 15c; ¼ oz., 55c.

1862—SALZER'S CLIFFWOOD MIXED—To the best of our knowledge we are the only seedsmen growing carnations for seed. Grown in the North the seed is exceptionally hardy and free blooming. A superb strain. Seeds taken from large show flowers only. For blooming indoors in winter or outdoors in summer. Pkt., 25c; ¼ oz., 85c.

PLANTS—Cliffwood grown, 20c each; 3 for 55c; per dozen, \$2.00, postpaid.

SALZER'S FLOWER SEEDS ARE ALL POSTPAID. ORDER TODAY.

CARDINAL CLIMBER—A-C

(Ipomea Quamoclit Hybrida)

1856—One of the finest annual climbers known today. Very graceful and beautiful, growing rapidly and in a warm, sunny location with good soil, it reaches often a height of twenty feet; densely clothed with lacerated, rich green leaves. The numerous clusters of fiery scarlet, tubular, spear-shaped flowers resemble the cypress vine, but are much larger, often measuring one and one-quarter inches across. (See illustration.) Pkt., 15c; $\frac{1}{4}$ oz., \$1.00.

CENTAUREA—A

1876—**CYANUS. SINGLE MIXED.** (Bachelor Button or Corn Flower.) All colors. Annual. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

1875—**CYANUS. DOUBLE MIXED.** Many beautiful colors. Annual. Pkt., 10c; $\frac{1}{2}$ oz., 25c.

1891—**MARGARITAE**—Satiny white. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

1890—**IMPERIALIS** (Sweet Sultan). This strikingly beautiful type is rapidly supplanting the old favorite cornflower. Undoubtedly one of the finest of Centaureas for cut flowers, and if placed in water, are lasting. Have artistic shaped, sweet-scented flowers. Annual. Height, three feet. All colors mixed: Pkt., 10c; $\frac{1}{4}$ oz., 25c.

CARDINAL CLIMBER

CHRYSANTHEMUM—A

1892—**ANNUAL.** No flower in cultivation more generously rewards the grower than this exquisite type. The plants grow very large and bushy, and are covered with numerous blossoms, each about one and one-half inches across. As a summer hedge, or background covering unsightly spots, this cannot be equaled. Single and double varieties mixed in many colors. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

1893—**JAPANESE HYBRIDS** (Perennial). This is the class that produces the large show flowers of late fall. Sown indoors in February or March, the plants bloom in fall. Rarest Mixture. Pkt., 25c.

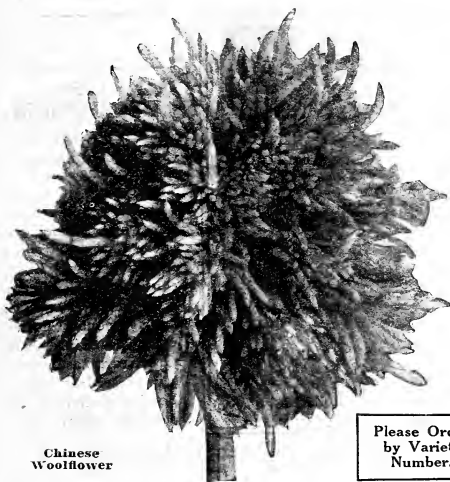

COLUMBINE—P

1652—See Aquilegia, page 60.

CINERARIA—G

A beautiful plant for spring decoration of the window or conservatory; may also be planted out in summer. They grow from twelve to eighteen inches high, and are completely covered with a mass of flowers, often two and three inches across, of the richest colors, in white, blue, violet and crimson shades. Seed may be sown indoors at any time, excepting the hot summer months. (See illustration below.)

1899—**SALZER'S FINEST MIXED.** A mixture of the finest, large flowering strains, and most brilliant colors. Pkt., 20c.

Chinese Woolflower

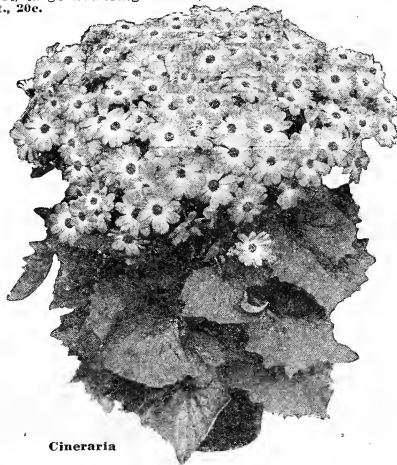

Please Order
by Variety
Number.

COXCOMB (Celosia)—A

1868—**CRISTATA.** The large flower-heads or combs are of a beautiful feathery appearance. Very showy in the flower bed and excellent as pot plants. Annual. Fine mixed. Pkt., 10c; $\frac{1}{8}$ oz., 25c.

1870—**PLUMOSA** (Thompsoni Magnifica). The finest mixture of the ostrich feathered sorts. Plants of branching habit and each stem tipped with graceful plumes, varying in color through all shades of yellow and red. Annual. Height, thirty inches. Pkt., 10c; $\frac{1}{8}$ oz., 25c.

2565—**CHILDSI CRIMSON** (Chinese Woolflower). See color illustration on page 68. Here we have a brilliant fire-like red, a bushy plant which grows two or three feet in height, and which will flourish in most any soil conditions. This variety is particularly effective in mass planting, as it may be planted in rows along the driveway or next to the house. It is of the feathered Coxcomb family and a very rapid grower. (See illustration above.) Pkt., 15c.

Cineraria

I never could grow Cinerarias until I used your seed.—Mrs. A. Gould, New Haven, Conn.

Cosmos, Early Blooming

CLEMATIS PANICULATA—P

1903—A hardy climber for permanent positions. Produces a mass of white star-like flowers and grows about thirty feet in a season. Flowers after first year. Pkt., 10c.

COBAEA SCANDENS (Cathedral Bells)—A-C

1904—A fine, rapidly growing, annual climber, with handsome foliage and large bell-shaped flowers of deep violet blue color. A well-established plant will often grow from twenty to fifty feet in a season. Pkt., 10c; ¼ oz., 25c.

COIX LACRYMA (Job's Tears)—A

1906—Ornamental grass, bearing clusters of large pointed seed which is much in demand. Fine for making beads. Height about 2 feet. Pkt., 10c; oz., 20c.

COLEUS

1908—FINEST MIXED. Richly colored foliage. Pkt., 15c.

COREOPSIS GRANDIFLORA—P

1912—One of the finest hardy perennial plants. Bright yellow flowers, which bloom from June until frost. Pkt., 10c; ¼ oz., 25c.

PLANTS—Cliffwood grown, each 20c; 3 for 55c; per doz., \$2.00, postpaid.

CYCLAMEN—G

1924—Popular free flowering, bulbous plants for house culture, producing graceful orchid-like flowers during the fall, winter and spring. Colors range from white to darkest crimson, with all intermediate shades. Salzer's Show Mixture, Pkt., 25c.

CYPRESS VINE—A-C

1926—Well-known annual climbers with fern-like foliage and bright blossoms. Height, ten feet. Mixed colors. Pkt., 10c.

Shasta Daisies

COSMOS—A

Many growers of flowers have found so much difficulty in securing a sure blooming type of Cosmos that we have spent a number of years developing a strain that would be safe and sure, and in offering you this Cliffwood-grown variety we assure you of the most dependable type possible to obtain. The Cosmos usually bought elsewhere requires such a long season to bloom in that the summer is practically over before they flower.

This seed matured here, where the summer season is short, is the best evidence necessary for its earliness. The plants grow vigorously, bloom profusely and are very hardy.

The best cosmos for northern latitudes. Blooms several weeks earlier than the taller growing sorts and the flowers are much larger than the ordinary Early Blooming variety.

1920—CLIFFWOOD MIXED. All colors, mixed. Pkt., 25c; ¼ oz., 40c; oz., \$1.25.

MAMMOTH EARLY FLOWERING COSMOS—A

One of the most charming and profuse blooming annuals. Height, four to six feet. Blooms from mid-summer until frost. The large flowers are similar to single dahlias, but more delicate.

1916—GIANT FLOWERED FRINGED. A beautiful strain; all colors, mixed. Pkt., 10c; ¼ oz., 25c.

1918—LADY LENOX. Pink. Flowers of enormous size, color shell pink. Pkt., 10c; ¼ oz., 25c.

1917—GIANT FLOWERING. Mixed. Pkt., 10c; ¼ oz., 25c; oz., 75c.

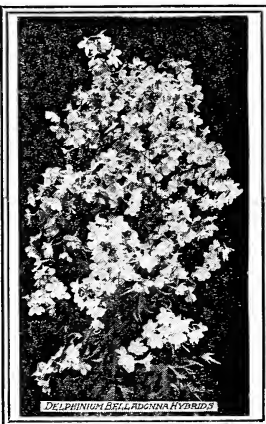

1914—EARLY BLOOMING. (See illustration.) Mixed. Pkt., 10c; ¼ oz., 25c; oz., 75c.

I like your seeds best of all.
R. L. Jones,
Macon, Ga.

**1950
DELPHINIUM
EXQUISITE**

(See colored illustration on page 68)

1950—A new race of soft, bluish pink delphinium which should be in every garden. A perennial which will bloom continuously after the first year, bearing stately double flowers of a beautiful shade. Order early, as our supply of seed is limited. Further description on page 58. Pkt., 25c.

**DELPHINIUM (Perennial Larkspur)—P**

Perfectly hardy, with splendid flowers and curious cut leaves; lives for many years.

1947—FORMOSUM—Beautiful spikes of rich blue flowers with a white center. Pkt., 10c; ¼ oz., 50c.

1946—BELLADONNA—Blooms from June to frost; lovely pale blue color. Pkt., 15c; ¼ oz., 75c.

1948—FINEST MIXTURE—Very fine. Pkt., 10c; ¼ oz., 25c.

PLANTS—Cliffwood grown, each 20c; 3 for 55c; per doz., \$2.00, postpaid.

DOUBLE DAISY (Bellis Perennis)—B-P

A low-growing spring-flowering plant, a companion to the pansy and forget-me-not. Loves a shady place and will reward the gardener with a mass of blossoms for succeeding years if left undisturbed.

1936—GIANT DAISY (Bellis Monstrosa). A new strain of very robust growth, each plant producing on long, stiff stems, numerous flowers measuring often three inches across, resembling finely shaped asters. Mixed colors. Pkt., 15c; ¼ oz., 75c.

1935—LONGFELLOW. Large, double, dark pink flowers. Pkt., 10c; ¼ oz., 50c.

1938—SNOWBALL. Large double white flowers. Pkt., 10c; ¼ oz., 50c.

1934—FINEST DOUBLE MIXED. Large flowering sorts. Pkt., 10c; ¼ oz., 50c.

1937—SHASTA DAISY. Large single flowers with white, cream and yellow-colored petals and small golden centers, long stems; hardy perennial. Height, two feet. (See illustration.) Pkt., 15c; ¼ oz., 75c.

PLANTS—Cliffwood grown, each, 20c; 3 for 55c; per doz., \$2.00, postpaid.

Exquisite Larkspur listed above is a new introduction of a soft rose color. Pkt., 25c.

DIANTHUS (Pinks)—A

See color illustration on page 68

The brilliant, contrasting colors and hardy, free blooming plants of these old favorites have kept Pinks in the fore ranks of public approval for generations. The tints, colors and formations are marvelous and striking. Those of our customers desiring an endless delight will surely find it in the growing of Annual Pinks. Sow outdoors when danger of frost is past, and in a short time they are a mass of bloom.

1952—CHINENSIS—China Pinks; large, double flowers of beautiful rich color. Pkt., 10c; ¼ oz., 60c.

1960—SNOW QUEEN—Double, large, pure white flowers. Pkt., 10c; ¼ oz., 50c.

1954—FIREBALL—Large, double, globular flowers of brilliant dark scarlet. Pkt., 10c; ¼ oz., 50c.

1956—LACINIATUS, MIRABILIS—Single fringed flowers in great variety of colors. Pkt., 10c.

1958—PLUMARIUS SEMPERFLOENS (Grass Pink, Scotch Pink)—Beautiful single hardy Pinks with fringe-edged flowers of a delightful spicy odor.

1957—PLUMARIUS NANUS FL. PL. (Double Dwarf Erturt Clover Pink)—Two weeks or more in advance of the older types. Possesses a much richer variety of coloring. Perennial. Pkt., 10c.

1959—SALZER'S FINEST MIXTURE—Composed of many single and double annual sorts. (See illustration.) Pkt., 10c; ¼ oz., 50c.

PLANTS—Cliffwood grown, each, 20c; 3 for 55c; per doz., \$2.00, postpaid.

Gaillardia

GAILLARDIA (Blanket Flower)

The flowers are dazzling and brilliant in colors, red and yellow predominating. Easy to grow from seed, and will produce in profusion a continuous supply of exquisite flowers on long stems. Blooms from early spring until late fall. Will thrive in poor soil and are not affected by extremes of weather. Plants of strong growth with grayish foliage. Height, eighteen inches. (See illustration above.)

2010—GRANDIFLORA (F.) Mixed colors. Pkt., 10c; ¼ oz., 15c.

2011—LORENZIANA PICTA (A). Double varieties mixed. Pkt., 10c; ¼ oz., 35c.

2012—PICTA (A). Single varieties mixed. Pkt., 10c; ¼ oz., 25c.

PLANTS—Cliffwood grown, each, 20c; 3 for 55c; per doz., \$2.00, postpaid.

ESCHSCHOLTZIA (California Poppy)—A

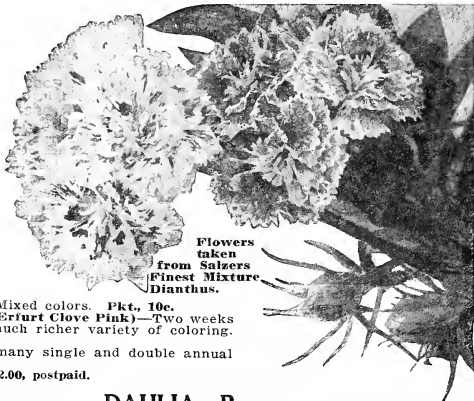

See color illustration on page 68

One of the most showy and free flowering annuals. The low spreading plants have finely cut foliage and produce a gorgeous display of bright colored flowers resembling poppies. Blooms from early spring until frost. Height, one foot. (See illustration.)

1966—CROCEA. Double orange. Pkt., 10c; ¼ oz., 25c.

1968—MANDARIN. Bright orange with a brilliant scarlet background. Pkt., 10c; ¼ oz., 30c.

1932—FINEST MIXED. Single and double flowers. Pkt., 15c; ¼ oz., 30c.

Flowers taken from Salzer's Finest Mixture Dianthus.

DAHLIA—P

The double sorts bloom the first season if sown at the beginning of April, the single sorts bloom from seed sown as late as June.

1930—Single Giant Finest Mixed. Pkt., 10c; ¼ oz., 40c.

1929—Double Giant Flowering Mixed. Pkt., 10c; ¼ oz., 85c.

1928—Double Cactus Flowered. All colors mixed. Pkt., 15c; ¼ oz., 85c.

DATURA (Angel's Trumpet)—A

1944—Showy annual, large trumpet-shaped flowers, measuring often seven to nine inches; inside coloring pure white, and outside marbled with purple. Pkt., 10c.

DIGITALIS (Foxglove)—P

1970—No matter what you plant, be sure to set aside a space for Foxgloves. Once planted they will continue to grow year after year. Accept a timely suggestion and start a patch this year, you never will be without them again. Easily grown perennial, attaining often a height of three to five feet, and producing long spikes of beautiful tubular shaped flowers, many being spotted or blotched. Finest mixed. Pkt., 10c; ¼ oz., 25c.

PLANTS—Cliffwood grown, each 20c; 3 for 55c; per doz., \$2.00, postpaid.

DIMORPHOTHECA (African Daisy)—A

1972—AURANTIFLORA. A rare, extremely showy and greatly improved annual which has become a general favorite. The bushy plants grow about fifteen inches high. The flowers are often three inches across, of unique, rich, glossy orange gold color. Blooms until late fall. Pkt., 10c; ¼ oz., 30c.

DOLICHOS (Hyacinth Bean)—A-C

1976—A rapid-growing annual climber. The sweet scented blossoms are produced on large spikes or upright clusters, which are followed by ornamental seed pods. Purple and white mixed. Height, ten feet. Pkt., 10c; oz., 25c.

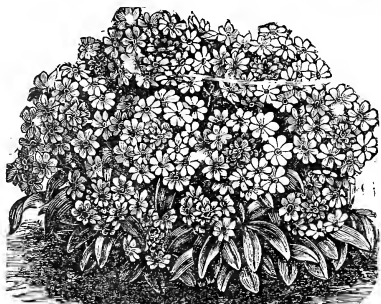

ECHEVERIA—P

1978—(Hen and Chickens). A very fascinating, interesting and curious looking flower. Gets its name from the peculiar manner in which the parent stem sets its rosette like bloom. We recommend a trial of this beautiful plant. These tender perennials are easily grown and will furnish a real surprise. The great variety of shapes and colorings are very interesting. Pkt., 10c.

Eschscholtzia (California Poppy)

The finest Dianthus (Pinks) I ever grew were from your seed.—Miss Estelle Cox, New York, N. Y.

Forget-Me-Not (Palustris Semperflorens), Pkt., 15c

FERNIS—G

1988—(For House Culture.) Our mixture comprises the rarest and most desirable varieties. Pkt., 25c.

FREESIA—G

Favorite house plants producing a profusion of flowers which are of delicious fragrance. Will bloom in about six months from sowing seed.

2004—NEW HYBRID. Shades of red, blue and orange mixed. Pkt., 15c.

GERANIUM

So general has become the propagation of geraniums from slips, that many of our customers do not really know that they can also be grown from seed, which will provide a choice of varieties and colors.

2016—APPLE SCENTED. This favorite with sweet-scented leaves can best be grown from seed. Pkt., 25c.

2017—FINEST MIXED PELARGONIUMS (Lady Washington). Choicest and rarest varieties. Pkt., 25c.

2018—ZONALE. Mixed, single and double. Seed from the largest flowering and finest varieties. (See illustration below.) Pkt., 10c.

GLOXINIA—G

Superb house plants, producing magnificent flowers of the richest colors. Sow in March.

2027—HYBRID GRANDIFLORA. An unsurpassed strain, containing the spotted hybrid as well as the finest colored sorts. Pkt., 20c.

2026—GIANT SORTS. Magnificent flowers, measure often five inches and more in diameter. Pkt., 20c.

GYPHOPHILA (Baby's Breath)—A

Elegant, pretty, free-flowering plants with mist-like sprays of tiny star-shaped white flowers. Used largely in bouquets.

2067—PANICULATA. A hardy perennial, about two feet high with gracefully branched panicles of white flowers. Pkt., 10c; ¼ oz., 35c.

2066—ELEGANS, GRANDIFLORA, Alba. An improved large-flowering strain of the annual white sort. (See illustration.) Pkt., 10c; oz., 30c.

PLANTS—Cliffwood grown, each, 20c; 3 for 55c; per dozen, \$2.00, postpaid.

Zonale Geranium

FORGET-ME-NOT (Myosotis)—B

The Forget-Me-Nots succeed best in a shady, moist situation; hardly if given a slight protection through the winter; bloom the first year from seed if sown early. Fine for edging or in beds with Pansies.

1992—ALPESTRIS COERULEA. Bright blue; about six inches high of trailing habit. Pkt., 10c; ½ oz., 20c.

1993—ALPESTRIS, MIXED. Pkt., 10c; ½ oz., 20c.

1994—DISTYCHLOA (Perennial). One of the earliest and best Forget-Me-Nots. It is of compact growth and produces an abundance of rich blue flowers. Pkt., 10c; ½ oz., 65c.

1997—ELIZA FORROBERT. Sky blue, white eye. Pkt., 10c; oz., \$2.00.

1995—PALUSTRIS SEMPERFLORENS (Perennial). A charming dwarf Forget-Me-Not, continuing in bloom from early spring until autumn; blue. Height about eight inches. (See illustration.) Pkt., 15c.

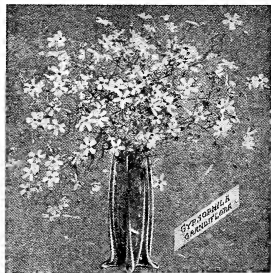

1996—RUTH FISCHER (Perennial). The latest, finest and largest flowered Forget-Me-Not, producing flowers up to one-half inch in diameter; plants of strong, vigorous growth, of exceptional value for pot culture and spring bedding. Pkt., 25c.

PLANTS—Cliffwood grown, 20c each; 3 for 55c; per dozen, \$2.00, postpaid.

FOUR O'CLOCK (Marvel of Peru)—A

Well known annual. The bushy plants bear an abundance of sweet scented flowers which open late in the afternoon. Sow the seed where plants are to remain, as they will not do so well if transplanted. Height, thirty inches.

2002—FINEST MIXED. All colors. Pkt., 10c; ½ oz., 25c.

**GOURDS—A**

Rapid growing annual vine with heavy foliage. The unique fruit of grotesque shapes are ornamental and useful. Height, twenty to thirty feet.

2032—MIXED VARIETIES. Large and small sorts. Pkt., 10c; oz., 20c.

HELICHRYSUM (Straw Flower)—A

Bright colored flowers extensively grown for Everlasting Bouquets. Cut the blooms when partially unfolded and dry in a cool place. Hang head downward to keep the stems straight. Height, three feet.

2070—DOUBLE LARGE FLOWERING. The best of the Everlasting Flowers. All colors mixed. Pkt., 10c; ½ oz., 25c.

HELIOTROPE—A

This dear old favorite of our grandmothers is more popular today than ever. For fifteen cents, the price of a package, you can get more pleasure and satisfaction from this plant than is possible to imagine. Try it this year.

2073—REGALE. A tender annual with sprays of fragrant flowers. Easily grown from seed and can be used either as a summer bedding or a pot-plant for winter blooming. Pkt., 15c.

HELIANTHUS (Sunflower)—A

These ornamental and stately annuals should have a place in every flower garden. Planted among the shrubbery, the large golden flowers are an imposing sight all through the summer and fall. Unexcelled as a screen or hedge for hiding back yard fences, chicken yards or any unsightly corners.

2495—NANUS PURPUREUS. Red and yellow shades. Single flowers with small disc, and long rays which are slightly curled. Height, about five feet. Pkt., 10c; oz., 50c.

2496—CALIFORNICUS FL. PL. Beautiful double flowers of a dark yellow color. Height, five feet. Pkt., 10c; oz., 50c.

2500—MIXED DECORATIVE. This mixture contains the most beautiful single and double flowering sorts. Pkt., 10c; oz., 25c.

I greatly enjoyed your Helichrysum (Straw Flower) during the long winter months.—Miss Alice Dexter, Denver, Colo.

HOLLYHOCK

The stateliest of all flowers growing to a height of six feet and taller and covered with large, brilliant colored flowers in various forms. We have improved this old garden favorite until the seed and plants which are grown at Cliffwood Farm are the highest and best type yet developed. Colors ranging from white and apricot, rose, cerise and crimson to the darker shades of wine, maroon and black. Our strains will surely please you. Every garden should have some of these majestic flowers.

Annual Varieties

Bloom the first year from seed.

- 2078—DOUBLE FRINGED. Pkt., 10c; ¼ oz., 40c.
 2079—FINEST DOUBLE MIXED. Pkt., 10c; ¼ oz., 35c.
 2080—FINEST SINGLE MIXED. Pkt., 10c; ¼ oz., 35c.

Perennial Varieties

- 2084—ALLEGHENY. Mammoth fringed flowers, double and semi-double. All colors and shades. Pkt., 10c; ¼ oz., 35c.
 2085—CHAPER'S MIXED. The finest strain of large double flowers. Pkt., 10c; ¼ oz., 50c.
 2086—CLIFFWOOD GROWN DOUBLE MIXED. Exceptional fine assortment of colors. Very hardy. Free blooming. Pkt., 15c; ¼ oz., 75c.

PLANTS—Cliffwood grown: Each, 20c; 3 for 55c; per doz., \$2.00. postpaid.

ICE PLANT—A

(*Mesembryanthemum Crystallinum*)

2094—A trailing plant suitable for hanging baskets and rockeries, also makes an ornamental pot plant. The leaves are covered with watery vesicles resembling ice crystals. Annual. Height, ten inches. Pkt., 10c; ¼ oz., 25c.

KOCHIA (SUMMER CYPRESS)—A

2098—An ornamental annual shrub, of unusually rapid growth, forming symmetrical-shaped bushes from two to three feet in height, of a cypress-like appearance. The leaves are slender and of a light pea-green until September, when they change to carmine and blood-red. Its bright autumn coloring has given it the name "Burning Bush." The flowers are minute, but numerous. (See illustration below.) Pkt., 10c; ¼ oz., 20c.

LANTANA HYBRIDA—P

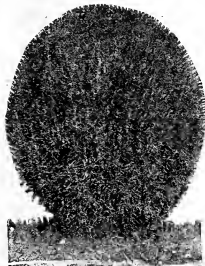

2100—A shrub-like, half-hardy, perennial, producing pink, yellow, orange and white flowers in great abundance, resembling the verbena. Suitable for outdoor use in summer and also house culture. Mixed colors. Pkt., 10c.

LARKSPUR—A

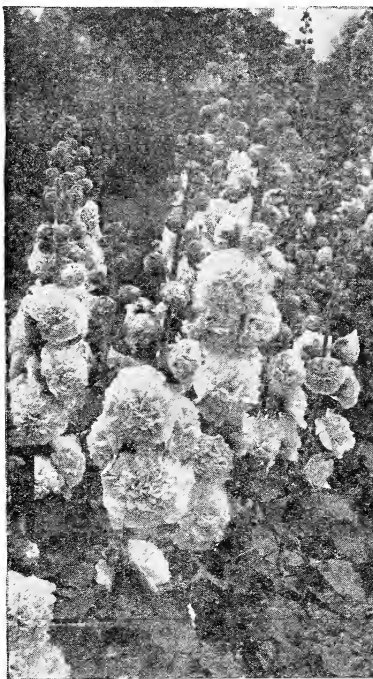

Rapid growing annual of great beauty. The flowers are borne on erect spikes and are noted for the richness of their colors, particularly in blue shades. A superb flower for interior decoration. These are quite distinct from the Delphinium.

- 2102—DOUBLE DWARF ROCKET. Finest mixed. Height, one foot. Pkt., 10c; ¼ oz., 25c.
 2103—TALL EMERALD. Light blue, very free flowering. Height, thirty inches. Pkt., 10c; ¼ oz., 25c.

Be sure and give variety number when ordering.

Kochia

Annual Hollyhock

SOW SALZER'S SEEDS

This is my third order for flower and vegetable seeds. Your seeds are just what you claim.

Mrs. W. M. Wright, Walsh, Ill.

I always recommend your seeds because I want everybody to have the same good luck I have.

Mrs. A. Hermans, Milwaukee, Wis., 411 21st Ave.

LATHYRUS LATIFOLIUS (Perennial Peas)

Hardy vines of robust growth resembling Sweet Peas, but the flowers are not fragrant. Blooms through a long season and are excellent as cut flowers. The plants die down in the fall and start growing from the roots early in spring. Height, six feet.

- 2106—FINEST MIXED. White pink and rose. Pkt., 10c; ¼ oz., 50c.

LUPINS—A

2123—POLYPHYLLUS FINEST MIXED. Hardy perennials. Some of the most brilliant plants in cultivation; about four feet high, stout and erect, with long racemes of pea-like flowers in many colors. Pkt., 10c; ¼ oz., 25c.

- 2122—CLIFFWOOD MIXED. The very finest annual varieties. Pkt., 10c; ¼ oz., 50c.

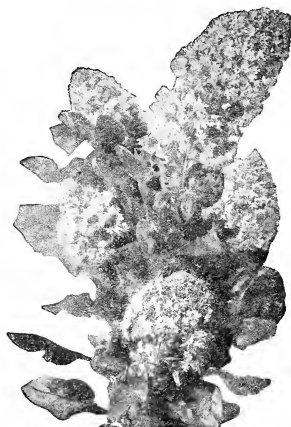

LOBELIA—A

A dainty and continuous blooming annual of compact growth, remarkable for its profusion of beautiful blue flowers. Unexcelled for edging, ribbon beds, hanging baskets or window boxes. Height, about six inches.

- 2111—SALZER'S FINEST. An unexcelled mixture, very effective for hanging baskets, window boxes, etc. Its intense blue lends a charm all its own. Pkt., 10c.
 2112—CRYSTAL PALACE COMPACTA. Dark blue flowers, dark foliage, compact growth; fine for borders. Pkt., 10c; ¼ oz., 25c.

2111—SALZER'S FINEST. An unexcelled mixture, contains compact growing sorts only in all colors. Try this variety this year for your borders; see how beautiful it is and how it sets off your flower beds. Pkt., 10c; ¼ oz., 35c.

Your glorious mixture of Hollyhocks have been coming up year after year and have afforded me more pleasure than any flower in my garden.—J. P. Watson, Seattle, Wash.

Glorata Mignonette

MIGNONETTE (Reseda)—A

This annual is an old-time favorite and with the introduction of new types it is one of the most generally known flowers for fragrant bouquets, bedding plants and pot culture. For a continuous supply of bloom sow seed early in spring and again in mid-summer.

2146—GOLIATH. Of vigorous, compact growth, with giant trusses about six to eight inches long, densely covered with large brilliant fire-red florets, of strong, rich fragrance. Pkt., 10c; ½ oz., 20c.

2147—MACHET. Bright red. Pkt., 10c; ¼ oz., 25c.

2148—ODORATA. The old-fashioned variety, but very sweet scented. (See illustration.) Pkt., 10c; ¼ oz., 20c.

2149—SNOW QUEEN. Flower spikes often ten inches long, pure white and very fragrant. Pkt., 10c; ¼ oz., 25c.

2145—GOLDEN QUEEN. A mass of gold. A very beautiful variety. Pkt., 10c; ¼ oz., 25c.

2144—FINEST MIXED. This Mignonette mixture contains all the best sorts and cannot be excelled. Pkt., 10c; ½ oz., 25c.

2160—A very popular, quick-growing annual vine, which will climb from thirty to forty feet in a single season: it has thick, glossy green foliage and produces thousands of large, white, silky blooms of rare fragrance, which open at dusk and on cloudy days. Pkt., 10c; ½ oz., 25c.

MOONFLOWER—A

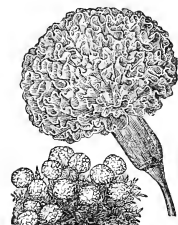

2163—JAPANESE. The flowers are of very large size and most distinct colorings, while the foliage is also varied and attractive. The colors range from deep rich purple to pure silvery white. (See illustration.) **Finest Mixed.** Pkt., 10c; 25c.

2164—TALL MORNING GLORIES. Indispensable for covering trellises, verandas, stumps, etc. **Finest Mixed.** Pkt., 5c; oz., 20c; ¼ lb., 75c.

2162—DWARF MORNING GLORY. Grows about one foot high. A beautiful bedding and border plant. A free bloomer. Gives a gorgeous display of color. **Finest Mixed.** Pkt., 10c; oz., 25c.

Japanese Morning Glory

Marigold, Tall African

MARIGOLD (Tagetes)—A

An annual of special merit for massing, affording a rich display of bloom in late summer when other bedding plants have lost their brilliancy. The African sorts are tall growing with large double, self-colored flowers. The French sorts produce small flowers of vivid colors and are well adapted for pot culture during the winter.

2128—DWARF AFRICAN. (Pride of the Garden.) Mixed colors. Compact bushes with immense double flowers. Height, fifteen inches. Pkt., 10c; ½ oz., 30c.

2129—DWARF FRENCH. Mixed colors. Very showy, small double flowers. Height, ten inches. Pkt., 5c; ½ oz., 25c.

2131—TALL AFRICAN. Mixed colors, large double flowers. Height, three feet. (See illustration.) Pkt., 10c; ½ oz., 25c.

2132—AFRICAN LEMON QUEEN. Gorgeous yellow. Height, three feet. Pkt., 5c; ¼ oz., 25c.

2133—AFRICAN PRINCE OF ORANGE. Beautiful golden-orange color. Height, three feet. Pkt., 10c; ¼ oz., 25c.

NICOTIANA (Sweet Scented Tobacco)—A

The tube-shaped flowers, grown in clusters, open towards evening and are very fragrant. Blooms until frost. Height, three feet.

2238—AFRICAN HYBRIDS. Blue, red and rose colored flowers. Pkt., 10c.

2234—SANDERAE HYBRIDS. A splendid type of branching habit, in many colors. Pkt., 10c.

I have used Salzer's Seeds for thirty-five years without a failure.—Tom Mason, St. Paul, Minn.

SOW SALZER'S SEEDS

We couldn't get along without Salzer's Flower seeds. The finest Mignonette we ever had was from your seeds. H. F. Schnalitz, Ft. Des Moines, Ia.

Salzer's Giant Flowering
Perpetual Blooming
Nasturtiums.

Have come back again to the old reliable and dependable Salzer's for my Nasturtium Seed. Couldn't secure anything anywhere as vigorous or beautiful as the Salzer Giant Flowering. Told my wife, if we wanted the best in all seeds, we were sure to get it from Salzer's.
Michael Stahl,
Johnsonburg, Pa.

NASTURTIIUMS—A SALZER'S GIANT

FLOWERING PERPETUAL BLOOMING

This race of Giant Flowering Perpetual Blooming Nasturtiums stands without a rival and is brilliantly colored, vigorous, rapidly growing and wondrously fine blooming. We control the seed of this wonderfully free-flowering Nasturtium. It blooms early and continually throughout the season. This mixture contains many brilliant and fashionable colors that are particularly adapted for dress bouquets.

The flowers are large, beautifully and exquisitely colored, borne on long stems. The many varieties contained in Salzer's Giant Flowering Perpetual Blooming Nasturtiums popularizes them as the most beautiful of all Nasturtiums. Every garden should have a bed or a border of these wonderful Nasturtiums. (See illustration.)

DWARF VARIETIES

Price of each separate color: Pkt., 10c; oz., 25c; ¼ lb., 75c

2198—Crimson, dark leaves.

2199—Golden Yellow, dark leaves.

2200—Chameleon, various colors on same plant.

2201—Scarlet, dark leaves.

2202—White, creamy white.

2203—Orange, scarlet spotted dark leaves.

2204—Maroon, dark leaves.

2205—Violet, purplish violet.

2207—Salmon, rose, dark leaves.

2208—SALZER'S DWARF PERPETUAL BLOOMING.
Finest Mixed. Big pkt., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.00.

1594—The collection of above nine dwarf sorts; one packet each for 75c, postpaid; one oz. each for \$1.65.

TALL VARIETIES

2188—CHAMELEON. Many colors on the same plant.

2189—LILAC BROWN.

2190—CHOCOLATE.

2191—STRAW, with rosy blotches.

Price of each separate color, pkt., 5c; oz., 15c; ¼ lb., 50c.

1595—Collection of above 8 Tall Sorts: One pkt., of each, 35c; one oz. of each, \$1.10.

2209—SALZER'S TALL PERPETUAL BLOOMING FINEST MIXED. Pkt., 5c; oz., 15c; lb., \$1.75.

OTHER MIXED SORTS

2213—TALL FINEST MIXED. All colors, pkt., 5c; oz., 15c; ¼ lb., 60c.

2214—DWARF FINEST MIXED. An elegant blend of colors. Pkt., 5c; oz., 15c; ¼ lb., 60c.

VARIEGATED AND IVY-LEAVED SORTS

2222—DWARF VARIEGATED LEAVED. Finest mixed. The light green foliage is variegated with yellow and white. Pkt., 10c; oz., 35c.

2221—DWARF IVY LEAVED. Finest mixed. Splendid for bedding. Pkt., 10c; oz., 35c.

2224—TALL IVY LEAVED. Finest mixed colors. Of vigorous growth and very attractive. Pkt., 10c; oz., 35c.

ORNAMENTAL GRASSES—A-P

Ornamental Grasses are used extensively for bouquets, decorative purposes, border plants and masses. Here in La Crosse, the City Parks, noted all over the state for their beauty, use Ornamental Grasses for mass beds and they make a striking, imposing and most beautiful sight.

2241—FINEST MIXED. Pkt., 10c; ½ oz., 25c.

PLATYCODON (Chinese Bell Flower)—P

Perennial plants with showy flowers. Blooms from spring until early fall. Height, one to two feet.

2372—FINEST MIXED. Blue and white flowers. Pkt., 10c.

THE COLORS OF YOUR NASTURTIIUMS ARE BRILLIANT.

OXALIS

2246—Small free-flowering plants, with clover-like leaves thickly starred with small bright flowers from June until frost. Choice mixed. Many bright colors. Price: Pkt., 10c.

PORTULACA (Moss Rose)—A

Thrives in hot sun and light, sandy soil. Excellent for beds, edging and rockwork. Height six inches.

2401—FINEST SINGLE, MIXED. Pkt., 10c; ½ oz., 25c.

2400—FINEST DOUBLE, MIXED. Pkt., 10c; ½ oz., 40c.

2402—PARANA. Immense, single blossoms averaging 3 inches across, of bright, ruby-red color; very free blooming. Pkt., 10c.

BEST EVER.—MISS DOROTHY DIXON, Baltimore, Md.

TRIUMPH OF THE GIANT PANSY

Pansies—A

2311—The flowers are of enormous size and round form. The petals have undulated curled borders, are very broad and cover each other, making the flower appear almost double. The colors are rich, brilliant and beautiful. **Pkt. 25c; 3 pkts. for 65c.**

MASTERPIECE

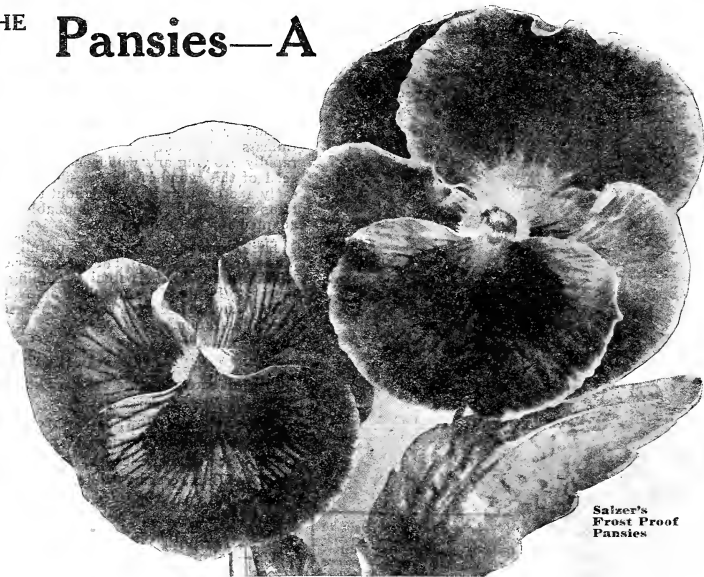

(Ruffled Giant Pansy)

2310—The truly giant-sized flowers are of the most striking character; the petals having a rich velvety substance, and being heavily ruffled give the effect of a double flower. The colors are mainly dark rich shades, bordered, blotched or veined in contrasting colors. **Pkt., 25c; 1/2 oz., \$1.00.**

SOW SALZER'S SEEDS

Your frost proof pansies bloomed all winter and under snow one foot deep at zero weather. We are 4,000 ft. up in the mountains.

*Mrs. R. H. Bentz,
Guatay, Calif.*

Salzer's
Frost Proof
Pansies

SALZER'S FROST PROOF PANSIES

For years we have been producing Northern Grown Seeds. Again we offer this strain of pansies, which has taken years of conscientious effort to produce, grown by us near the Canadian Border, where the snow is deep and the winter severe. Salzer's Frost Proof Pansies are what their name implies; they successfully winter through the severe climate of this north country and will bloom long after frost. For a number of years Frost Proof Pansies at our Cliffwood Farm have delightfully surprised us with the number of beautiful blossoms we pick during the cold months.

The flowers themselves are very large, often measuring 3 inches across and are produced in a beautiful variance of colors from deepest black to snow white. In our 56 years of experience we have never introduced a strain of flowers which we feel will give as much pleasure as our Frost Proof strain of Pansies. We want you to try at least one package this year, full cultural directions are sent with each order.

We are able to give you varieties in straight colors as listed, or our blended Cliffwood mixture in which all colors, bronze, blue, mahogany, yellow, mauve, black, etc., are represented. Have pansies after all other flowers are killed by frost. Because of the limited supply of seed we suggest that you order early. (See illustration above.)

2295—SNOWDRIFT. Snowy white.

2296—NORTHERN LIGHTS. A combination of all the pansy colors.

2297—ALASKA. Red, pink and wine.

2298—ICELAND. A rich dark blue.

2299—YUKON. Mahogany, bronze, red, blue, black and gold.

2312—CLIFFWOOD MIXED. All of above colors carefully mixed.

Each of above varieties: **Pkt., 35c; 3 pkts., \$1.00; 1/2 oz., \$2.50.**

SOW SALZER'S SEEDS

Although my frost proof pansies have bloomed all winter (frequently zero weather) in fact flowered for about the last twelve months, the plants are still full of buds. Today, I found one plant with sixteen buds ready to open. I have talked so much about your pansies blooming all winter that I got worried for fear people might doubt my word, so I sent some to the Tribune. They published it, now many persons who do not know you are writing for your address.

Mrs. Laura F. Tapp, Kearney, Mo.

SALZER'S MASTODON PANSIES

This is a highly developed strain of monster sized pansies seldom measuring less than three inches in diameter. From the undernoted array of colors you will perceive that it covers not only a wide range, but includes some of the most beautiful pansy colors grown. We consider these the finest pedigreed pansies in America.

2300—PRINCE HENRY. Dark blue. Beautiful.

2306—PARISIAN. Beautiful yellow.

2301—GRAND DUKE MICHEL. White as snow.

2302—MADAM PERRETT. Dark wine, pink and red.

2304—JUPITER. Red, bronze, mahogany, blue, black and gold.

2307—BRONZE. All the different shades from burnished brass to gold. Tinged with all the colors known to pansies.

Each of above varieties: **Pkt., 25c; 3 for 65c; 1/2 oz., \$1.50.**

2293—VOLCANO (Purple Bronze).—Pkt., 30c.

2276—FINEST MIXTURE. All of above colors mixed. **Pkt., 25c; 3 for 65c; 1/2 oz., \$1.50.**

AMERICAN BEDDING VARIETIES

On account of their very free blooming habit, compact growth, wide range of colors, exceptional hardness and vigorous growth, they are highly prized for mass and bedding purposes. We specialize in Pansy seed and are making a strenuous effort to increase our Pansy seed business, hence exercise every care to produce and send out seed of a known quality that will not fail to satisfy.

	Pkt.	1/8 oz.		Pkt.	1/8 oz.

1583—One pkt. each of the above eight separate colors for 75c.

2275—GOOD MIXED. Flowers are frequently three inches across. Perfect beauties of most exquisite colors. **Pkt., 5c; 1/2 oz., 40c.**

1 PKT. EACH (4 PKTS.) OF FROST PROOF, MASTODON, TRIUMPH AND MASTERPIECE FOR \$1.00 POSTPAID

PETUNIA—A

Few flowers excel the Petunia in brilliant and gorgeous display, especially for massing in solid beds and window boxes. It is an annual of the easiest culture and requires little attention. Very free flowering, producing all summer an abundance of beautiful flowers.

CLIFFWOOD BALCONY PETUNIAS

See Color Illustration on Front Cover

This type of single Petunias, although one of the best for general outdoor culture, is used most extensively for balconies, window boxes, hanging baskets, rockeries, etc. This Cliffwood strain begins blooming early in spring and continues long after the first frosts. Seems to be no limit to its ability to flower, as it is one continuous mass of bloom. The more it is cut the more it blooms.

2330—Balcony White. A rich, snow white.

2331—Balcony Rose. A very brilliant rose pink.

2332—Balcony Blue. Rich, velvety indigo blue.

2333—Balcony Purple. Royal purple striped with white.

2334—Balcony Mixed. All of above mixed.

Pkt., each, 15c; one each of above four separate colors, 50c.

2335—CLIFFWOOD BALCONY AND BEDDING PETUNIAS.

Mixed. (See front cover.) Pkt., 20c; 3 for 50c.

SINGLE FLOWERING BEDDING VARIETIES

2325—HOWARD'S STAR. Crimson maroon with a clearly defined five-pointed star of bluish white. Height, eighteen inches. Pkt., 10c.

2327—ROSY MORN. Dwarf compact. Carmine pink with white throat. Height, twelve inches. Pkt., 10c.

2323—DWARF MIXED. Compact plant, fine for edging. Pkt., 10c; ¼ oz., 50c.

2324—FINEST MIXED. An excellent mixture for brilliant flowers in all colors. Height, eighteen inches. Pkt., 10c; ¼ oz., 60c.

PETUNIA
GIANT OF CALIFORNIA

LARGE FLOWERING VARIETIES

2339—GIANTS OF CALIFORNIA. Flowers very large, single, in great variety of colors and markings, with deep yellow throats. (See illustration.) Pkt., 20c.

2340—RUFFLED GIANTS. Single, of extraordinary size and substance, in brilliant colors, beautifully ruffled, fluted and fringed. Pkt., 25c.

2338—SALZER'S DOUBLE FRINGED. Saved from our own unrivaled collection; will produce a large percentage of double flowers of the largest fringed varieties in bright colors and tints. Pkt., 25c.

SOW SALZER'S SEEDS

Your Hardy Petunia Seed is fine for this country.
W. J. Miller, Sturgeon Creek, Man.

I will be satisfied if my flower seeds this year prove as good as last.
Chas. D. Carey, Cheyenne, Wyo.

PRIMULA (Primrose)—G

Charming plants for garden and pot culture. The Chinese and Obconica are the best varieties for house plants. 2406—AURICULA. Blooms early in spring. Yellow, brown and red flowers. Perennial. Height, six inches. Pkt., 15c.

2407—CHINESE PRIMROSE. Charming winter flowering house plants. This mixture contains only the finest fringed, free flowering sorts. Pkt., 20c.

2409—JAPONICA. Japanese primrose; bright and showy flowers borne in whorls. Mixed colors. Pkt., 20c.

2411—OBCONICA GRANDIFLORA (Large Flowering). The flowers are of soft lilac, pink, rose, lavender and crimson colors. A most desirable sort for pot culture and also does well in the open border. Pkt., 20c.

2410—MALACOIDES (Baby Primrose). Lilac flowers, an improved primrose. Pkt., 15c.

2413—VULGARIS (English Primrose). Fragrant canary yellow flowers. Perennial. Pkt., 20c.

PHLOX DRUMMONDI (Large Flowering)—A

Annual Phlox has always been a flower of prominence. When sown in massed beds it is a dazzling display of color. One of the easiest and most satisfactory plants to grow from seed and will thrive in almost any kind of soil if given a sunny position. Height, one foot. (See illustration.)

Each separate color of the undernoted sorts. Pkt., 10c; ¼ oz., 80c.

2344—BRIGHT SCARLET 2346—SHELL PINK 2348—VIOLET
2345—ROSE 2347—SNOW WHITE 2349—YELLOW

2350—FINEST MIXED. All colors. Pkt., 10c; ¼ oz., 60c.

1585—One pkt. each of the above six separate colors for 60c.

2360—DOUBLE FLOWERING MIXED. Desirable for cut flowers, as they last longer than the single sorts. Pkt., 15c; ¼ oz., 40.

2363—STARRED AND FRINGED. Curiously pointed, fringed and toothed flowers in colors of every conceivable shade. Pkt., 15c; ¼ oz., 40c.

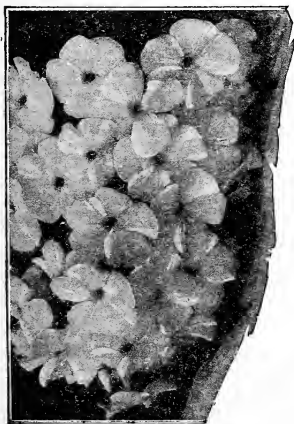

DWARF PHLOX—A

Excellent for ribbon beds, edging and pot culture. Compact growth, six to eight inches high.

2361—FIREBALL. This blood red beauty is most exquisite and effective. Pkt., 10c; ¼ oz., 65c.

2359—DWARF MIXED. A choice mixture of all colors. Pkt., 10c; ¼ oz., 40c.

2358—LARGE FLOWERING CECILY. The broad rounded heads of flowers are of large size, as well as the individual florets. The colors vary from light lilac through various shades of red and purple; nearly all have a large, distinct white eye. Pkt., 10c; ¼ oz., 50c.

PHLOX DRUMMONDI

Your Petunias are gorgeous and all of your seeds gave excellent satisfaction.—Earl Collins, St. Louis, Mo.

POPPIES—A

With little care these fascinating and brilliant flowers will grow in almost any soil. For a continuous supply of bloom sow seed at intervals of two or three weeks.

2379—FLANDERS (Salzer's). Lest we forget "In Flanders fields the poppies blow." This is the variety that our soldier boys knew so well in France. Every soldier mother should grow a few. The magnificent, large, single flowers are of a deep crimson color. For massing in solid beds, there is hardly a flower giving such stately yet dazzling display of gorgeous bloom. Height, eighteen inches. Pkt., 10c; ½ oz., 35c.

2383—SALZER'S IMPROVED MAMMOTH SHIRLEY. (See illustration.) The single flowers are of exquisite, satin texture, ranging in color from delicate rose, apricot, pink, to rich crimson, all with white centers. Height, eighteen inches. Pkt., 15c; oz., 50c.

2374—CARDINAL. Globular fringed cardinal red flowers. Height, two feet. Pkt., 10c; ½ oz., 40c.

2375—WHITE SWAN. Immense double fringed flowers. Height, two feet. Pkt., 10c; ½ oz., 25c.

2382—SALZER'S DOUBLE MIXED. A fine blend of colors. Pkt., 10c; ½ oz., 20c.

2384—FINEST MIXTURE. Single and double varieties of brilliant colors. Pkt., 10c; ½ oz., 35c.

PERENNIAL POPPIES

2394—ICELAND POPPY (Papaver Nudicaule). The graceful, brilliant and fragrant flowers are produced in profusion from June to October. Plants are perfectly hardy but bloom the first year from seed. All colors mixed. Height, one foot. Pkt., 10c; ½ oz., 50c.

2395—ORIENTAL POPPY (Papaver Orientale). One of the most beautiful of the hardy plants. The gorgeous flowers ranging in color from pink to deepest red are often six inches across. Height, three feet. Pkt., 10c; ½ oz., 20c.

PLANTS—Cliffwood grown, each, 20c; 3 for 55c; per doz., \$2.00, postpaid.

PASSIFLORA

2316—Passion Vine, sky-blue flowers and rich green foliage. Pkt., 10c.

RUDBECKIA (Golden Glow)—P

2426—Large double flowers of a sulphur yellow color. Perennial. Height, six feet. Pkt., 10c.

PLANTS—Cliffwood grown, each, 20c; 3 for 55c; per doz., \$2.00, postpaid.

RHODANTHE—A

2428—Used for everlasting bouquets. The colors are beautiful and varied. Annual. Height, one foot. Pkt., 10c.

RICINUS (Castor Oil Bean)—A

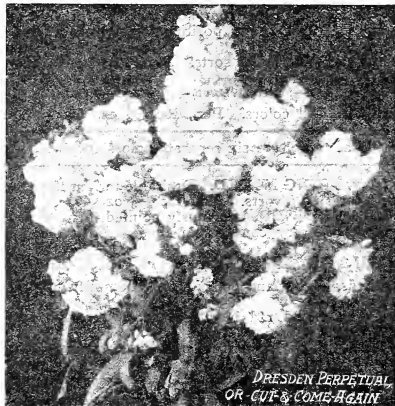

Stately, strong growing annuals with ornamental foliage. **2430—ZANZIBARIENSIS.** A distinct sort, surpasses in size and beauty all others. Height, twelve feet. Pkt., 10c; oz., 35c.

2431—MIXED. All sorts. Pkt., 10c; oz., 30c; ½ lb., 60c; lb., \$2.00.

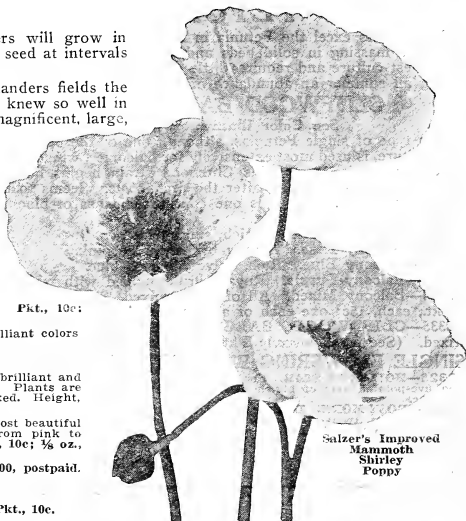

STRAW FLOWERS

Popular for winter bouquets when dried, as they retain their original shape and color.

2490—EVERLASTING MIXED. All sorts and colors. Pkt., 10c.

DRESDEN PERPETUAL
OR CUT & COME AGAIN

Salzer's Improved
Mammoth
Shirley
Poppy

SCABIOSA (Mourning Bride)—A

See Colored Illustration, Page 67

A beautiful annual blooming from July until frost. Flowers of exquisite shades borne on long stems; should be grown wherever cut flowers are wanted.

2452—LARGE FLOWERING MIXED. A wide range of colors. Height, thirty inches. Pkt., 15c; ½ oz., 25c.

SMILAX—G-C

2460—A graceful greenhouse climber, indispensable for table decoration, bouquets, etc. Pkt., 10c.

SALVIA (Flowering Sage)—A

2438—BONFIRE. The erect spikes of flowers are brilliant scarlet and stand above the dark green foliage. A very effective and gorgeous plant of compact growth. Annual. Height, two feet. Pkt., 10c; ½ oz., 75c.

2439—PIREBALL. Compact plant covered with long scarlet spikes. Fine for pot culture. Annual. Height, fifteen inches. Pkt., 15c; ½ oz., \$1.00.

2441—PATENS (Blue Sage). This is the celebrated blue sage that is so popular everywhere. Pkt., 20c.

2442—SPLENDENS (Scarlet Sage). Beautiful bright scarlet. Annual. Height, thirty inches. Pkt., 10c; ½ oz., 45c.

2443—ZURICH. The earliest sort, blooms ten days ahead of any salvia. Large brilliant scarlet flowers. Annual. Height, eighteen inches. Pkt., 10c; ½ oz., \$1.00.

STOCKS (Gilliflower) A-Cut-and-Come-Again DRESDEN PERPETUAL

The plants are of symmetrical habit and produce on numerous branches, strong spikes of large double sweet-scented flowers. An elegant sort for cutting or as a pot plant for winter blooming. Annual. Height, twenty inches. (See illustration.)

Price, each of the undernoted sorts, Pkt., 10c; ½ oz., 40c.

2482—Princess Alice. White. **2486—Mixed** (all colors).

2481—Crimson King. Velvety **2480—Beauty of Nice.** Flesh Pink.

2483—Queen Alexandria. Rose. **2484—Sapphire.** Blue.

1587—One pkt., each, 6 colors, 50c.

LARGE FLOWERING TEN WEEKS

Long spikes with enormous individual double flowers which are very fragrant. Annual. Height, one foot.

Price, each of the undernoted sorts: Pkt., each, 10c; ½ oz., 40c.

2466—Blood Red. **2470—Light Blue.**

2467—Canary Yellow. **2471—White.**

2468—Crimson. **2472—Mixed** (all colors), 10c.

2469—Dark Blue. **1588—One pkt. each, 6 colors, 50c.**

SALPIGLOSSIS (Velvet Flower)—A

The funnel-shaped flowers are of velvety texture with deeply sunken, prominent veins, penciled and shaded with the richest tracings. Very showy in the flower bed. Annual. Height, thirty inches.

2434—EMPEROR Yellow. Beautiful flowers richly veined with gold. All colors mixed. Pkt., 10c.

2435—IMPROVED LARGE FLOWERING. Mixed. Pkt., 10c; ½ oz., 35c.

Salzer's Giant Orchid Flowering Sweet Peas

For Color Illustration See Page 67

Many hundreds of varieties of sweet peas have been tried out and experimented with on our Cliffwood Farm. The best and worthiest varieties have been offered to our customers, the balance discarded.

But never until this year have we seen such an array of colors, such sweet peas in size and fragrance as our new strain of Giant Orchid Flowering Sweet Peas. They are without question the finest and largest variety so far introduced, and when our customers once grow these Giant Orchid Sweet Peas they will not be satisfied with any other variety. The colors are exquisite, they are two weeks earlier than other varieties and the flowers are borne four to a stem. They really are the giants of the Sweet Pea family. In all our years of experience in seed growing we have never seen such a wonderful type.

The varieties which we are listing are all only the choicest and have proven, in this northern climate, to be perfectly acclimated. We feel sure that if you plant our special offer of six packages, which are postpaid for \$1.25, that your delightful experiences with this new giant strain will be as pleasing as ours. If conditions are at all favorable flowers will be borne for four months. (See illustration.)

SOW SALZER'S SEEDS

I couldn't believe Sweet Peas could be so beautiful. Salzer's forever.

*Mrs. Alice Browning,
Memphis, Tenn.*

EARLY ORCHID FLOWERING SWEET PEAS

2631—EARLY HEATHER BELL. Rich mauve lavender.

2632—EARLY LIBERTY. Crimson. Very large flowers.

2633—EARLY MELODY. Deep rose pink.

2634—EARLY MORNING STAR. Deep orange scarlet.

2635—EARLY SNOWFLAKE. Pure white. The best early large white.

2636—EARLY SONG BIRD. Soft pale pink. A luscious shade.

2637—EARLY MEADOW LARK. Bright primrose yellow.

2638—EARLY WARBLER. Richest mauve purple.

2639—EARLY FIRE KING. Fiery-red or cerise-scarlet.

2640—EARLY SUNSET. Rich rose blotched golden.

2641—HARMONY. Clear lavender, finest of all the lavenders.

2642—AVIATOR. Dazzling crimson scarlet. Finest crimson scarlet yet introduced.

2643—HERCULES. Mammoth rosy pink, withstands heat and stays in bloom longer.

2644—ROSE QUEEN. Rose pink, most popular pink variety grown.

2645—BLUE BIRD. Violet blue. When bunched looks like a bunch of violets.

2646—COLUMBIA. Standard salmon rose, white wings. Vigorous grower, throwing many flowers.

2649—GIANT ORCHID FLOWERING SWEET PEA MIXTURES.

Each of above varieties, Pkt., 25c; oz., \$1.00; ¼ lb., \$3.00. Six packets, your selection, \$1.25. One packet each of the above 16 varieties, \$3.00. Other varieties of Sweet Peas are listed on page 76.

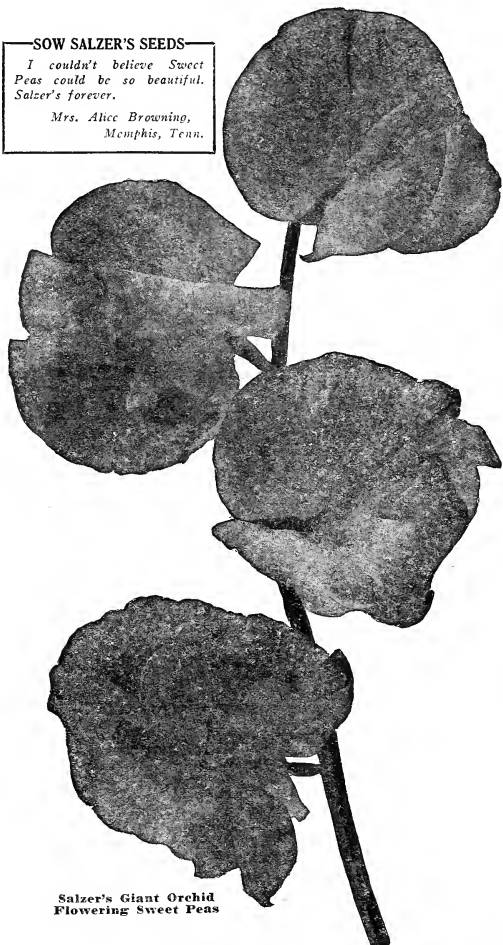

SOW SALZER'S SEEDS

I have never grown sweet peas of such size, color and fragrance as from your Giant Orchid strain. I had beautiful flowers all summer long.

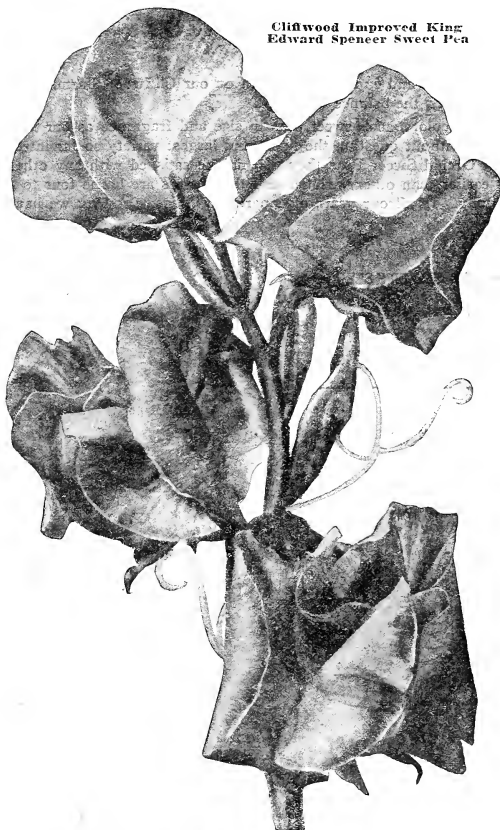

Miss Louise Harris, Brooklyn, N. Y.

Salzer's Giant Orchid Flowering Sweet Peas

Your Sweet Peas are the most beautiful in color and form that I have ever grown.—Carrie Thwaites, Santa Maria, Calif.

Cliffwood Improved King
Edward Spencer Sweet Pea

"CLIFFWOOD" IMPROVED KING EDWARD SPENCER

Of all the Spencer Sweet Pea Novelties we consider this enlarged and intense crimson beauty one of the grandest and most perfect of them all. The exquisitely waved flowers often measuring two inches across are of a deep crimson color with a glossy sheen. They are of good substance and invariably borne in fours on long, stout stems. Owing to the lasting quality of the flowers this crimson beauty is incomparable for bunching. The vigorous vines grow five to six feet in height, with rich green foliage and will produce a profusion of bloom throughout the season. (See illustration above.)

2606—Pkt., 15c; oz., 75c.

GRANDIFLORA SWEET PEAS LARGE FLOWERING TYPE

A strain so well known as to require no introduction. While not so large as the Spencer type, they are of good size with boldly expanded standard and wings and exquisitely sweet scented.

2507—SALZER'S FINEST MIXTURE. All large flowering sorts and a range of the best colors. Pkt., 5c; oz., 15c; lb., \$1.00.

SALZER'S SPECIALLY SELECTED SPENCER SWEET PEAS—A

No description can do justice to these wonderful Sweet Peas. The large flowers of exquisite shape, borne in threes and fours on long, stout stems are of incomparable magnificence. The vines are robust in growth and produce an abundance of bloom for a longer period than the old but popular Grandiflora type. Rather than confuse our customers we have discarded conflicting types and list here all the distinct colors.

	Pkt.	Oz.
2606—"CLIFFWOOD" IMPROVED KING EDWARD SPENCER. Described below	\$0.15	\$0.75
2600—AFTERGLOW. Violet blue, shading to rosy amethyst. Wings electric blue	.10	.50
2601—ASTA OHN. The best lavender	.10	.50
2604—DAZZLER. Rich orange standards, rosy salmon orange, tinted wings	.15	.75
2617—FIERY CROSS. Rich orange scarlet, a wonderful clear flame color	.15	.65
2603—FLORENCE MORSE SPENCER. Rich bluish pink	.10	.40
2593—GLADYS UNWIN. Light pink. Very dainty	.10	.40
2605—ILLUMINATOR. Salmon cerise, suffused with orange	.10	.35
2614—KING WHITE. Glistening pure white	.10	.75
2614—KING NANTREL. A deep chocolate maroon	.10	.50
2620—MASTODON CRIMSON. A majestic beauty of the most gorgeous bright scarlet	.15	.75
2613—ROYAL PURPLE. A rich deep royal purple	.15	.65
2612—THOMAS STEVENSON. Orange scarlet	.10	.40
2515—VERMILION BRILLIANT. Bright scarlet	.10	.65

2616—SPENCER MIXED. The above and other selected Spencer colors, carefully blended	.10	.50

1519—One pkt. each of the above fifteen separate colors for \$1.50.

SALZER'S RAINBOW MIXTURE GIANT SPENCER SWEET PEAS

The flowers of extraordinary size are of open form, with wavy standards and wide spreading wings, making them of exceptional value for cutting. The robust plants produce an abundance of bloom throughout the summer.

This wonderful blend is composed exclusively of Spencer varieties of immense size. All the above named sorts and many others are included.

2502—Pkt., 10c; oz., 35c; ¼ lb., \$1.25; lb., \$4.00.

SEPARATE SHADES

2623—Red Shades. 2624—Blue Shades.
2626—White Shades. 2622—Pink Shades.
2621—Orange Shades. 2625—Purple Shades.
Each of the above Mixtures of separate shades. Pkt., 10c; oz., 50c; ¼ lb., \$1.75.

SALZER'S LARGE FLOWERING GRANDIFLORA SWEET PEAS SEPARATE SHADES

The large demand for separate shades of the different varieties of Grandiflora Sweet Peas shows a strong love for sweet peas of distinct colors. It affords an excellent opportunity of growing in profusion into those colors as suit your fancy. For description see Grandiflora Sweet Peas.

2512—WHITE SHADES.
2513—YELLOW AND ORANGE SHADES. Primrose to orange.
2509—PINK SHADES. Light to deep pink.
2511—RED SHADES. Bright rose to dark scarlet.
2504—BLUE SHADES. Lavender to mauve and heliotrope.
2510—PURPLE AND MAROON SHADES. All the dark colors.
Each of the above mixtures of Separate Shades: Pkt., 10c; oz., 15c; ¼ lb., 50c; lb., \$1.85.

1536—Collection of above six shades: One pkt. each, 50c; one oz. each, 80c.

CUPID, THE DWARF SWEET PEA

2505—Low growing varieties, about six to eight inches high, for edging, low beds and pot culture. They are unique and pretty. Our mixture contains very known sort and color in Dwarf Sweet Peas. Pkt., 10c; oz., 25c.

TRY OUR SPECIAL OFFER NO. 1519—15 SEPARATE COLORS OF SPENCER SWEET PEAS. \$1.50

SWEET WILLIAM

(*Dianthus Barbatus*)

Popular free blooming plants producing clusters of brilliantly colored, sweet scented flowers on stout stems. The perennial sorts bloom the second year from seed and last for several years. Height, twenty inches.

2524—DOUBLE GIANT FLOWERED. P—Immense umbels of large double flowers measuring over one inch in diameter. Mixed colors. Perennial. Pkt., 10c; ½ oz., 25c.

2527—SINGLE GIANT FLOWERED. P—Large heads of single flowers in a great variety of colors and markings. Perennial. (See illustration.) Pkt., 10c; ½ oz., 25c.

2523—ANNUAL SWEET WILLIAM. Blooms early in summer from spring-sown seed and continues in flower for many weeks. All colors mixed. Pkt., 10c; ½ oz., 25c.

PLANTS—Cliffwood grown, each 20c; 3 for 55c; per doz., \$2.00, postpaid.

THUNBERGIA (Black Eyed Susan)—A-C

Rapid growing trailing plants, used extensively in hanging baskets, window boxes and for covering verandas. Annual. Height, five feet. **2533—**Buff, white and orange flowers with black eye. Pkg., 10c.

VIOLAS (Tufted Pansies)—P

The tufted pansies do not produce as large flowers as the regular type, yet they bloom more profusely and for a longer time. Excellent for edging and ribbon beds.

2559—CORNUTA. If sown in April the plants will flower in June and given protection during the winter they will bloom soon after the snow is off the ground. Annual. Height, four inches. Pkt., 10c.

VINCA—A

2557—House and bedding plants, 18 inches high, with glossy green leaves and circular flowers. Seed should be sown early. Red and white colors mixed. Pkt., 10c.

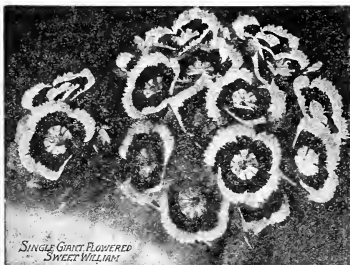

WALLFLOWER

2564—DOUBLE MIXED. P—Deliciously fragrant double-flowers, brown and orange-purple shades predominate. These are tender perennial plants and should be wintered over in cold frames. Pkt., 10c.

2563—EXTRA EARLY ANNUAL SORTS. A distinct type. From seed sown in the spring plants will be in full bloom by August 1st, continuing until checked by frost. Magnificent, deliciously fragrant flowers of golden yellow, blood-red, bright yellow and white colors. See color illustration, page 68. Mixed Colors: Pkt., 15c.

WISTARIA—P

2568—PURPLE. Pendant cluster of purple flowers. Does not bloom until second year. Grows about 40 feet high. A very hardy vine. Pkg., 10c.

VERBENA—A

Few flowers exceed the Verbena in richness of colors and freedom of bloom. Exceptionally fine for bedding, hanging baskets, and porch boxes. The plants of rather trailing habit produce clusters of showy flowers from June until frost. Annual.

2538—MAMMOTH FLOWERED BLUE. This large flowering verbena is of vigorous, hardy growth and of richest blue color. It excels in formation, beauty and form of any of the older types of verbenas. Greatly admired by visitors at our Cliffwood Farm. Pkt., 10c; ½ oz., 25c.

2544—MAMMOTH FLOWERING MIXED. (See Color Illustration, page 67.) This extraordinary strain surpasses all others in size, perfection of form and richness of colors. The individual florets measure from one and one-quarter to two inches in diameter, each having a large, bright, white eye, making the coloring more vivid. Red shades predominate in this mixture. (See illustration below.) Pkt., 15c; ½ oz., 40c.

2546—HYBRIDA MIXED. All colors of the older types. Pkt., 10c; ½ oz., 30c.

WILD FLOWER GARDEN MIXTURE

2566—In this mixture we have included everything that can be successfully grown, and which will, within several weeks after planting, show bright flowers. Pkt., 10c; oz., 20c; ¼ lb., 50c.

YUCCA FILAMENTOSA—P

2590—One of the grandest evergreen plants for the lawn. A single panicle often contains 300 or more florets. Creamy bell-shaped flowers. Grows about five to six feet high. It is extremely ornamental; often known as Adam's Needle. Perennial. Pkt., 10c. **PLANTS—**Cliffwood grown, each 20c; 3 for 55c; per doz., \$2.00, postpaid.

SALZER'S NEW DAHLIA FLOWERED ZINNIA—A

See Color Illustration Page 67

An entirely new strain of giant double flowered zinnias that came under our notice about two years ago and which we have, after careful investigation, found to be vastly superior to the other types of zinnias. The range of colors while including all the older shades of zinnias have many new ones, such as strawberry red, cerise, salmon and similar tints; are of strong, vigorous, hardy growth, fully three feet high, free blooming with flowers that will average six inches across. (Also see page 55.)

2584—Mixture. Pkt., 15c.

We are offering the most popular shades separately for the first time this season and predict a record-breaking sale on these easy to grow flowers. (See illustration.)

2585—EXQUISITE. Light rose.

2586—OLD ROSE. Old rose.

2587—GOLDEN STATE. Rich orange

yellow.

Separate colors, each packet, 20c.

One packet each of above 6 sorts, \$1.00.

2583—CRIMSON MONARCH. Striking crimson.

2589—DEEP LAVENDER. Deep lavender.

2590—POLAR BEAR. Pure white.

LARGE FLOWERING ZINNIA—A

2572—GIANT SHOW (Grandiflora Robusta Plenissima.) Huge flowers measuring often five to six inches across, semi-globular and very double. Grand and long-lasting effects can be produced in beds and borders with this new race. Mixed Colors. Pkt., 10c; ¼ oz., 50c.

LARGE-FLOWERING DWARF—Bushy, compact plants about two feet high, bearing large, double, perfect flowers.

Each of the undernoted colors: Pkt., 10c; ¼ oz., 35c.

2577—ORANGE

2579—ROSE

2578—PINK

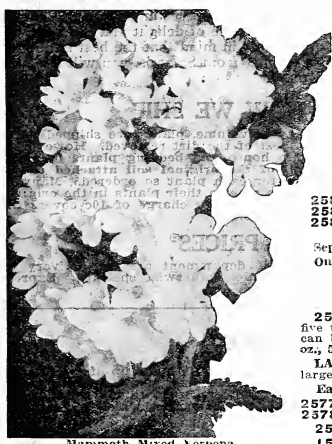

2580—SCARLET

2583—Mixed, all colors. Pkt., 10c; ¼ oz., 40c.

1539—One packet each of the above six separate colors, 50c.

2581—WHITE

2582—YELLOW

Mammoth Mixed Verbena

Your new Dahlia Flowered Zinnia is a sensation here in Buffalo. Please send me ten more packets for friends.

—Miss Kathrine Brookfield, Buffalo, N. Y.

PLANT AND BULB DEPARTMENT

NORTHERN GROWN PLANTS AND BULBS

Salzer's Premier Plant Collection

Sales of over one and one-half million plants and bulbs last year bespeak the genuine satisfaction and the unusual values one finds in Salzer Quality. Our plants and bulbs, grown at Cliffwood Farms, are the hardiest of any obtainable. They shoot up quickly, and bloom early and freely, bearing flowers for a much longer time than less robust stock. Window boxes tastefully planted, or flower beds artistically arranged, are a source of delight and pleasure, not only to the possessor, but also to the community at large. In placing your order, bear in mind that the best is not too good—it is actually the least expensive in the end—and that when purchasing anything from Salzer's, you will have the supreme satisfaction of knowing you have the best obtainable, regardless of price.

ORDER EARLY

We urge our friends to place their orders as early as possible. Last year we quickly sold out of different varieties, and although we have larger stocks on hand this spring, there is less likelihood of our having run out of some kinds, and your being disappointed, if your order is received early in the season.

TIME OF SHIPMENT

All plants are shipped when stock is ready and when the weather permits planting. For the south, orders are naturally filled much earlier than for the northern states. As orders are received, we book them and ship at planting time unless you instruct us otherwise.

HOW WE SHIP

To reduce weight and volume, plants are shipped without pots and with most of the dirt removed. However, if you wish us to ship house and bedding plants in paper flower-pots with all of the original soil attached to the roots, add 10c extra for each plant so ordered. Many of our customers want to receive their plants in the original soil and in pots, and this extra charge of 10c covers the additional labor and expense.

PRICES

All prices under this department are for delivery by mail, postage prepaid, unless otherwise specified. Express shipments are not prepaid.

SALZER'S PREMIER PLANT COLLECTION

Comprises a collection of choice house plants which will delight every lover of plants. It is made up of twelve fine plants, out of 3-inch pot, taken from our regular stock and includes such items as geraniums, begonias, calla lilies, ferns, and other blooming and decorating plants, and they are all shipped in paper flower-pots with the original soil attached to the roots. The illustration at the top of the page is a fine reproduction of this collection, which is comprised of fine, hardy, northern grown plants, of our selection.

Price, 12 plants in original soil and paper pots, \$3.25 prepaid.

NOTE: Because of regulations which delay plants in transit, causing them to deteriorate, we do not ship plants to Florida, Wyoming and Canada.

ABUTILON

Plants of continuous bloom for house culture, and for summer bedding, or in vases and baskets.

Golden Sunset—Imagine a plant with fully 100 massive, clear, golden-yellow bells pendant to every branch; that's a one-year-old Golden Sunset. (See illustration.) Each, 25c, postpaid.

Souvenir de Bonn—Bright green leaves, distinctly margined with white. Long yellow flowers. A magnificent foliage plant. Unrivalled. Each, 25c, postpaid.

AGERATUMS

Blooms continuously. Fine for edging flower beds. Grows about 8 inches high. **Imperial White** and **Blue Perfection**. Price, each variety, 25c; 3 for 65c, postpaid.

ANEMONE

Also known as Wind Flowers. They are hardy perennials and are the first flowers to bloom each year. Are valuable for edging or massing and are profuse bloomers of beautiful colors. Grow 2 to 3 feet high, the cut flowers making beautiful bouquets.

St. Brigid—Royal Crown strain, extra choice mixed, enormous blooms with an endless variety of striking colors from maroon to purple. Semi-double and double flowers.

De Caen. Fine mixed French strain, extra choice mixed. Semi-double and double flowers of beautiful shades of colors. Price of above 2 sorts: Each, 20c; 3 for 50c; per doz., \$1.75, postpaid.

SALZER'S RARE BLOOMING BEGONIAS

(See illustration below.)

No. 1 **Alba Picta**. A splendid Begonia; leaves spotted, flowers white. Price: Each, 20c, postpaid.

No. 2 **Alba Picta Rosea**. A fine Begonia; leaves spotted, flowers pink. Price: Each, 25c, postpaid.

No. 3 **Argenta Guttata**. Large reddish brown leaves; flowers cream white. Price: Each, 20c, postpaid.

No. 4 **Shmidtii**. A dark and small leaved variety; pure white flowers. Price: Each, 25c, postpaid.

No. 5 **Incarnat**. Dark leaves with silver dots, pink flowers. Price: Each, 25c, postpaid.

5 Above Begonias for \$1.00, postpaid.

TUBEROUS BEGONIAS

The tubers rest in the winter, but start again early in spring. They thrive magnificently either treated as a pot or garden plant, when the massive, brilliantly colored blossoms will both please and astonish you. We supply dormant bulbs only and not plants.

Single, white, yellow, red, pink Tuberous Begonias.

Double, white, yellow, red, pink Tuberous Begonias.

Each, 35c; 3 for \$1.00, postpaid.

VIOLETS

Cliffwood Grown

"Sweeter than Roses." Of easy culture, but take up in the Fall.

MARIE LOUISE. One of the finest Violets grown, very double and large; color, dark lavender blue. Price: Each, 20c; 3 for 55c; 12 for \$2.00, postpaid.

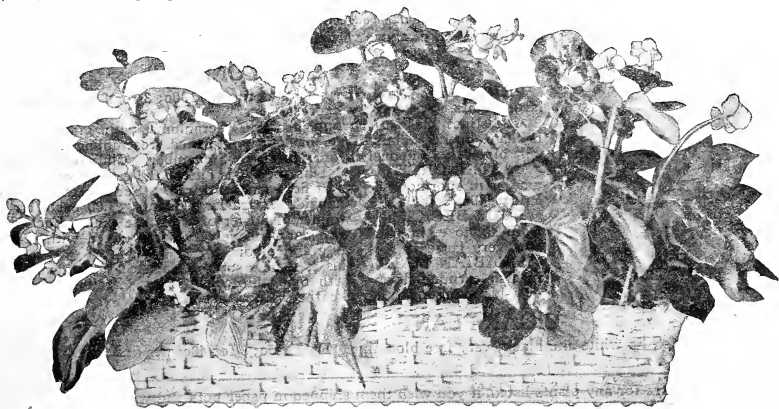

GOVERNOR HERRICK. A wonderful large, dark blue single violet with dark glossy leaves. Each: 20c; 3 for 55c; 12 for \$2.00, postpaid.

WHITE SWAN. A pure white variety; flowers are double and of immense size; deliciously fragrant. Each: 25c; 3 for 70c; 12 for \$2.50, postpaid.

ROYAL COLEUS

One of the finest bedding plants grown. The plants are broad-leaved, with bushy foliage of brilliant colors. In wide use for large bedding schemes and invaluable for borders. Some of the fancier sorts come in designs of indescribable intricacy and brilliancy of color.

They will grow almost anywhere and will reward you with the most wonderful hues imaginable. About 12 distinct varieties. Each: 25c; 3 for 65c; per doz., \$2.25, postpaid.

SALZER'S RARE BLOOMING BEGONIAS

ADD 10c EXTRA FOR EACH PLANT TO BE SHIPPED IN PAPER POT AND ORIGINAL SOIL

GERANIUMS

For the Three Finest Geraniums, See Color Illustration on Page 85.

Of all the Geraniums known, there are none better, finer, more floriferous and of stronger contrast in colorings and forms than the following, and we are sure everyone ordering these geraniums will be more than delighted with the strong, robust, vigorous Cliffwood-grown plants we supply.

MRS. E. G. HILL. An exquisite shade of soft light salmon, each petal bordered with rosy salmon. A continual bloomer. Single variety.

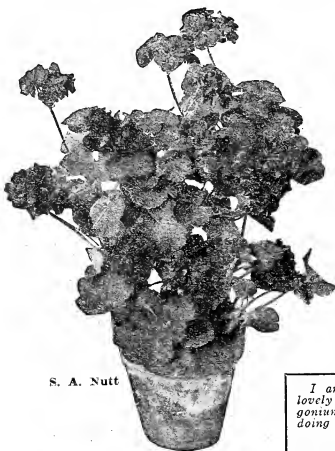

NUIT POITEVINE (Crimson). Famed everywhere as the most handsome, intense dark crimson, rosy purple, giant flowering single Geranium.

S. A. NUTT (Red). (See illustration.) It is safe to say that there are ten times more Nutt Geraniums planted each year than of any other variety. It is the best of the dark double crimson scarlet bedders, and always in great demand. Blooms in great profusion. (See Page 85 for color illustration.)

MADAME BÜCHNER (White). One of the finest double white, pure in color; flowers of an enormous size; continuous bloomer. Unsurpassed as a white bedder. (See illustration below.)

BEAUTY OF POITEVINE. Double salmon pink, shading to clear salmon in center.

I am much pleased with the lovely geraniums and pelargoniums you sent. They are doing just splendidly.
Miss Ann Sima,
Prairie du Chien, Wis.

S. A. Nutt

SCARLET BEDDER. A fine double brilliant scarlet bedding Geranium, bearing giant clusters of flowers with great freedom.

JEAN VIAUD. (Pink.) Semi-double, with single florets, often measuring 3 inches in diameter. Trusses frequently 15 inches in circumference. The color is a clear, rosy pink, with a distinct, striking white blotch at the center. (See page 85 for color illustration.)

JEAN OBERLE. One of the finest double peach pink varieties known. An exquisite shade of Hydrangea pink, shading to an almost pure white at outer edge of petals. Immense trusses. A strong and vigorous grower and a very free bloomer. (See page 85 for color illustration.)

MME. SALLEROL. (A tri-color variety.) It is one of the greatest acquisitions in silver variegated Geraniums for bedding and pot purposes that has ever been introduced.

MRS. J. G. DAY. (Ivy-leaf variety.) Intense shade of rosy crimson, rich and glowing.

COLONEL POWELL. (Ivy-leaf variety.) Flowers of enormous size, giant among Ivy Geraniums. Color, white, soft blush.

ROSE. (A scented leaf variety.) The standard rose scented Geranium. A favorite among lovers of flowers.

SKELETON. (A scented leaf variety.) A narrow-leaved, sweet-scented rose variety, indispensable in making bouquets.

Prices on all of above varieties: Each, 25c; 3 for 65c; per doz., \$2.25, postpaid.

PELARGONIUMS

PRICE: Each (except where undernoted), 30c; 3 for 85c, postpaid. Extra large plants, 75c each, by express.

A distinct class of strong growing Geraniums with giant blossoms of brilliant hues. Petals large, brilliantly blotched, resembling Pansies. They will bloom continuously from March to September. Cliffwood grown.

EASTER GREETING. This species is one of the earliest of all Pelargoniums, with enormous florets of fiery amaranth red. (See illustration opposite.) Price: 40c, 3 for \$1.10, postpaid. Extra large plants, \$1.00 each, by express.

LUCY BECKER. A wonderful flower of wild rose pink. Each floret has from six to eight petals with dark red velvety spots edged with scarlet lake. Has very large trusses. A grand bloomer.

SWABIAN MAID. This is a new sort of Easter Greeting and has large reddish carmine flowers with black blotches. Very effective. Coloring and ever-blooming qualities like the Easter Greeting.

CIGAR PLANT

Tube of flowers scarlet, lip white and black; very free blooming. Each, 15c; 3 for 40c; per doz., \$1.25, postpaid.

NOTE—Add 10c extra for any plants listed, if you wish them shipped in paper pots and with the original soil attached to roots.

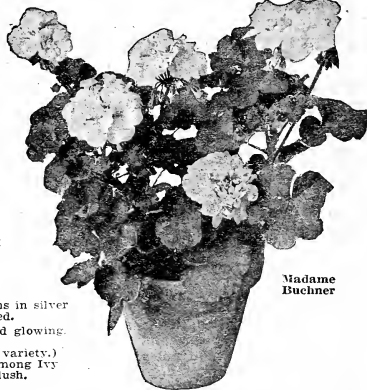

Cigar Plant

STOCK PLANTS OF SALZER'S GERANIUMS ARE GROWN AT CLIFFWOOD FARM.

Easter Greeting

Madame Buchner

MAMMOTH CHRYSANTHEMUMS

The undisputed "Queen" of fall blooming flowers. Their immense size, beautiful long stems, exquisite colors are fascinating beyond words. One flower is a grand display in itself, arresting attention and causing endless expressions of joy and delight.

Yellow Blooming

GOLDEN GLOW—Earliest yellow.

MAJOR BONNAFFON—The finest yellow for all purposes. Grown more than any other variety.

CHRYSOLOREA—Grand, large yellow. Early. (See color illustration on Page 85.)

TIGER—This is the variety named by President Wilson.

Pink Blooming

CHIEFTAIN—A beautiful, incurved pink.

E. A. SEIDWITZ—A finely formed late, pink variety. (See color illustration on Page 85.)

White Blooming

OCONTO—Creamy white. Early.

WHITE CHIEFTAIN—Pure white sport of the Chieftain.

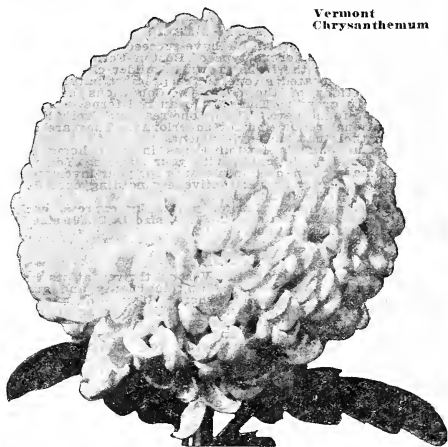

JOSEPHINE FOLEY—An exceptionally fine white, medium early.

CHAS. RAGER—Pure white incurved.

Red Blooming

HARVARD—The best of the crimson colors.

Prices on above varieties: Each, 20c; 4 for 75c; doz., \$2.00, postpaid.

FOUR RARE CHRYSANTHEMUMS

MRS. G. G. MASON—Blood red color with a gold reverse. A marvelously gorgeous flower.

VERMONT—Flowers of perfect, enormous size. A magnificent pink of lovely bright shade. (See illustration.)

ROSE DELIGHT—A very pleasing deep rose-pink color. Finest incurved form, maturing about October 20.

TITANIC—Large white flowers, unsurpassed in beauty. Of the easiest culture.

Price: Each, 35c; above four varieties, \$1.25, postpaid.

POMPON CHRYSANTHEMUMS

These flowers run from 1/4 inch to above 2 inches in diameter, are small petaled, very compact, and are usually in rather close clusters so that one spray when cut is a bouquet in itself. Make fine pot plants.

FLORA—Bright crimson with scarlet shading. Mid-season.

FRANK WILCOX—The very best Thanksgiving bronze, shading to fine red.

CHRISTMAS GOLD—Name describes it perfectly. A trifle larger than the Baby type.

VARSITY—Also blooms around Xmas. Gold color. Bunches finely.

GOLDEN CLIMAX—A bright yellow.

BABY—Smallest white pompon grown. Small as a button.

Price: Each, 20c; one each of above six varieties, 95c, postpaid.

LARGE FLOWERING CARNATIONS

Without question there are more Carnation flowers cut and sold throughout the United States than any other cut flowers, including roses, lilies, etc. Thousands of greenhouses are devoted exclusively to the growing of these popular carnations for cut flower purposes and the varieties here enumerated are the very best for pot and house culture. One of the finest flowers that blooms is the Carnation—perfect in form, fragrance and growth.

ENCHANTRESS—Giant blossom, superb, rosy blush pink.

MATCHLESS—Colossal pure white blossoms, very sweet.

HERALD—Greatest novelty of recent introduction, creating a furore as the most magnificent red.

Price of above: Each, 20c; 3 for 50c, postpaid.

BETTY JANE—A new Carnation. Silvery pink, a very large flower, free blooming and one of the finest Carnations introduced in recent years.

Price, each, 40c; 3 for \$1.10, postpaid.

HIBISCUS

GLORY OF THE INDIES—One of the best of all Hibiscus, free blooming, sure to please, and strong in growth. Fiery red. A very large single kind. Each, 25c; 3 for 70c, postpaid.

SINGLE RED—The best brilliant red. Each, 25c; 3 for 70c, postpaid.

HELIOTROPE

WHITE CORAL—Its great clusters of light, deliciously scented blossoms, often 20 inches in circumference, are borne in great abundance. Each, 25c; 3 for 80c, postpaid.

QUEEN—Enormous masses of deep purple giant blossoms, very sweet; one of the very finest. Each, 25c; 3 for 70c, postpaid.

RARE FUCHSIAS

1—**STORM CLOUD**—Glorious blossoms, splendid to behold. It is one of the largest, finest double white Fuchsias, and its great snow-white balls, borne in such prodigious profusion, almost completely hide the foliage of the plant. Each, 30c; 3 for 80c, postpaid.

2—**MIDNIGHT**—Color, dark blue, double. Grows somewhat taller than its companion, the Storm Cloud, but for genuine beauty its deep colored, big blossoms of giant size are unexcelled. Each, 30c; 3 for 80c, postpaid.

3—**RED DRAGON**—Blossoms of beautiful bright red, elongated shape. One of the best single Fuchsias of later introduction, very free blooming and of a peculiar vermilion, velvety crimson color. (See illustration.) Each, 30c; 3 for 80c, postpaid.

PLEASE NOTE: Add 10c extra for each plant if you wish them shipped in paper pots with the original soil attached to the roots.

BE SURE TO INCLUDE A BOSTON FERN WITH YOUR ORDER

Red Dragon Fuchsia

BOSTON FERN

We specialize in Ferns. We have succeeded in producing a rapid growing vigorous type of Boston Fern. A strain vastly superior to the ferns grown in milder climates.

La Crosse is located in one of the greatest natural fern growing sections of the country. Conditions here are ideal for fern growth. The most beautiful ferns in America are to be found here. This is one reason Salzer's Ferns have a national reputation for superiority. They are cultivated in their natural environment.

Place some Salzer's Boston Ferns in your home this year. You will be delighted with your success. You will be repaid many times over in pleasure for your investment.

For grace, beauty and attractiveness nothing exceeds a Boston Fern. (See illustration.)

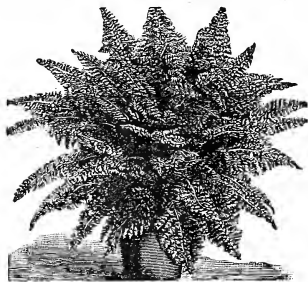

Each, 25c, postpaid. Larger plants by express, each: Size A, 50c; size B, 75c; size C, \$1.00; size D, \$1.50; size E, \$2.50; exhibition size, \$4.00.

VERONA

Like our Boston Ferns, the Verona thrives at its best in this northern latitude, excelling in beauty and grace the same variety grown elsewhere. If you once try a Salzer Northern Grown Fern you will never again have any other fern in your home or garden.

A beautiful crested fern and one of the most popular. Rather dwarf in growth, graceful, very compact, dense and feathery. It is a healthy, vigorous grower, constantly unfolding fresh fronds of light green that contrast exquisitely with the deep green of the older fronds. Is very fluffy, delicate and beautiful. (See illustration below.) Also very suitable for pans and dishes for table decorations.

Each, 25c, postpaid: Size A, 50c; size B, \$1.25, by express.

New Crested Fern (Verona)

FERNS FOR TABLE, JARDINIERS, PANS, ETC.

ADIANTUM—The well known Maiden Hair Fern.

ASPIDIUM TSUSSIMENSE—A dwarf and compact fern for a dish, with short leaves of darkest green.

PTERIS CRETICA ALBO-LINEATA—Dwarf growing fern, deep green, striped white.

PTERIS GILBERTI—Fine dish fern.

PTERIS WILSONI—One of the finest dish ferns. Very popular.

PTERIS HASTATA—Dwarf growing. For dishes.

Each variety, 25c; the set of 6 for \$1.25, postpaid.

DRACAENAS

DRACAENA INDIVISA—This is considered as being among the best of the decorative plants and are largely used for the house and conservatory. Have long and narrow, green foliage, of upright and arching growth.

Used largely as center of vases, etc.

Each, 25c; 3 for 70c, postpaid. Seed, 10 kernels for 25c, postpaid.

KENTIA BALMOREANA

Has strong stems, some upright and others arching, each crowned with fan-like foliage of a rich green color. It is a very interesting sight to follow the opening of each new leaf and to watch its development.

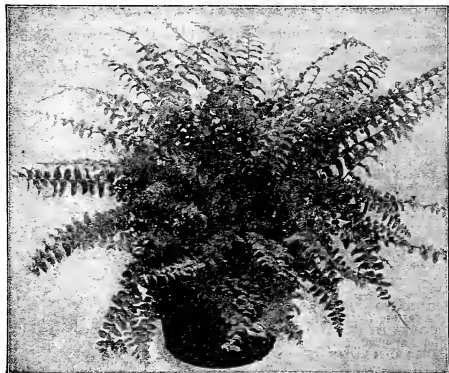

One of the very best Palms for house culture, being graceful and handsome. Few plants give more satisfaction all the year round. (See illustration.) Each, 75c; 3 for \$2.00, postpaid.

LATANIA BORBONICA

FAN PALM—A beautiful Palm, with large deeply divided, fan-shaped leaves. It is of easy cultivation, and should be in every collection. Each, 75c, postpaid; 2d size, \$2.00, by express. Seed, 10 kernels for 25c, postpaid.

PALM SEED

Palms are of easy growth from seeds, and the delight of all who undertake to grow them. 2257—Palm Seed, mixed, 10 kernels for 25c. 2255—Pandanus Utilis Seed, 4 kernels for 15c. 2256—Phoenix Palm Seed, 10 kernels for 25c. 2250—Banana Palm Seed, 8 kernels for 25c. 2254—Lantania Borbonica, 8 kernels for 25c. 2251—Dracaena Indivisa, 10 kernels for 25c. All Palm Seed postpaid.

Boston Fern

WHITMANII

Grown by ourselves here at La Crosse where ferns in their wild state grow by the millions throughout the countryside, and where the most beautiful ferns in America are to be found. Also known as the "Green Lace Boston Fern." A very popular variety.

Fine young plants, 25c, postpaid. Larger plants: Each, 50c, by express.

—SOW SALZER'S SEEDS—

Received the house plants yesterday and all were in fine shape—thank you for sending us such wonderful plants. You may be sure I will always speak a good word for the Salzer Seed Company.

Mrs. G. B. Flickinger, Nashville, Ark.

FERN COLLECTION

While this collection is a selection of our own, we have always had a pleasure and delight in making it an assortment that would please and satisfy our customers in every way. The Beautiful Boston Fern is included. Our selection of 6 sorts, \$1.25, postpaid.

Kentia
Balmoreaana

ADD 10c EXTRA FOR EACH PLANT TO BE SHIPPED IN PAPER POTS AND IN ORIGINAL SOIL

ASPARAGUS PLUMOSUS

We have yet to discover a plant for table decoration that is better adapted for the purpose, or that makes a lovelier centerpiece, than this fern. The foliage is of the finest, most delicate texture, of a brilliant dark green color, and is lace-like in its fineness. One of these ferns with six or eight stalks is a dainty mass of green, among which one may thrust the stems of a few flowers and make one of the prettiest centerpieces imaginable. It is a very popular fern and we believe you will enjoy one very much.

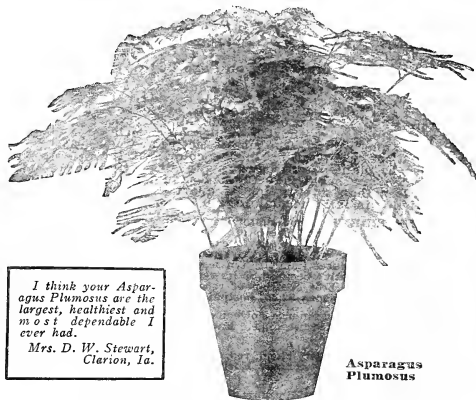

The foliage is so fine, so graceful, so much like a soft, vapory fern, that as a decorative plant it cannot be compared with anything we know of. (See illustration.) Each, 25c, 3 for 65c, postpaid.

ASPARAGUS SPRENGERI

This fern is widely used for hanging baskets, for bracket use and also for cutting. It is one of the best of all plants for use around the outer edges of a large potted plant or for planting in an outside window box so it can drop over the edge of the box. Has a fine, filmy texture, of a beautiful green color. Cannot be excelled for daintiness as a hanging fern, either in the house or on the porch. Each, 20c, 3 for 50c, postpaid.

I think your Asparagus Plumosus are the largest, healthiest and most dependable I ever had.

Mrs. D. W. Stewart,
Clarion, Pa.

Asparagus Plumosus

THE BANANA PLANT

A stately, noble, gorgeous and rapidly growing plant, with large, colossal, magnificently shaped leaves. No other plant is more interesting to children than the Banana, as all children love Bananas and desire to see the kind of plant on which they grow. Each, 50c, postpaid. Banana Seed, 8 kernels for 25c.

JASMINE GRANDIFLORA

Has angular, drooping branches, grows nearly erect and is also known as the Spanish Jasmine. Is a profuse star-shaped bloomer, beautiful flowers, very fragrant, and is widely used as a winter house plant. Also popular for summer use in the garden. Is very hardy. Each, 25c; 3 for 70c, postpaid.

RUBBER PLANT OR FICUS ELASTICA

A variety from which India rubber is obtained. It has large, handsome, glossy green leaves which make the plant a very desirable one to use where a tropical effect is desired. Stands changes of temperature and atmosphere, which makes it most valuable for home growth. (See illustration.) Each, 75c; large, \$1.00 to \$2.00, postpaid.

Baby Ficus—Smaller leaves. Each, 50c; large plants, \$1.00, postpaid.

Rubber Plant

SALZER'S OUTDOOR FERN COLLECTION

These splendid, outdoor ferns are not house plants, but are the big, hardy ferns that grow in the woods. They are beauties and will succeed in any shady or half-shady corner or on the north side of your house. This collection consists of large plants of the following three varieties:

8 Ostreich Plume Ferns, 8 Lady Ferns, 4 Osmunds Claytoniana (or Flowering Fern). The above 20 Ferns for \$5.00, postage extra. Shipping weight, 18 lbs. Ten Ferns (half of above quantities), \$3.00, postage extra. Shipping weight, 10 lbs. Single plants of these varieties, each, 50c, postpaid.

See Page 3 for parcel post rates. Cultural directions with each order.

When ordering, please state whether ferns are wanted for "general border and foundation planting" or for "moist, shady places."

LANTANA

A very desirable bedding and basket plant. It is immensely popular because of its showiness and its extremely fine blooming habit. It has verbena-like heads of orange, white, rose, and other colored flowers, which are in bright, catchy bloom from spring until frost, and which have an agreeable, pungent fragrance.

THOMAS MEEHAN—Its color is of orange, changing to a deep vermilion. Each, 20c, 3 for 50c, postpaid.

BIENCOURT—A beautiful shade of bright, rosy pink. Flowers are very large and showy. Each, 20c, 3 for 50c, postpaid.

WEeping LANTANA—A great beauty. Fine for winter flowering in small hanging baskets or in pots. Color is a delicate shade of rosy lilac, changing to a violet purple, and flowers are borne freely all over the plant from the base of each leaf stalk. Has a drooping, weeping habit. Each, 25c, 3 for 65c, postpaid.

UMBRELLA PLANT

Grows very rapidly and for house use adds in appearance greatly to the attractiveness and home atmosphere. We frequently tell our customers when visiting our establishment to always have a plant or two of these in the house as they give a satisfaction hard to get from most house plants.

One of the easiest to grow. Very decorative and showy. Under fair care and treatment will grow up to 4 feet in height. It is a plant that gives much pleasure and satisfaction as a house plant.

Splendid for vases or in the aquarium where a magnificent effect is desired. (See illustration.) Each, 30c, 3 for 90c, postpaid.

I ordered a rubber plant last year and wish you could see how beautiful it is today. I am more than pleased with it.

Mrs. J. Gwintowsky,
Kewanee, Wis.

Umbrella Plant

NO MATTER WHAT YOU ORDER BE SURE AND INCLUDE A BOSTON FERN

HARDY NORTHERN CANNAS CLIFFWOOD GROWN

(See Color Illustration on Page 86)

Cannas are the tallest and the bulkiest of the summer bedding plants and furnish a wide range of colors. They do well in all sections of the country and their noble proportioned foliage is extremely attractive, with rich shades of chocolate, red, green, and bronze. The most effective arrangement is a massed planting in one color, but they may also be planted to produce many striking effects which are beautiful. Cannas should not be planted less than twenty inches apart each way. Dig up bulbs in fall and plant again in spring.

NEW PRESIDENT. This magnificent canna has immense flowers, firm, and round, of finest quality, borne in great profusion. Frequently measure seven inches across and are pure, glowing, scarlet red color with rich green foliage. Produces immense trusses 4 to 5 feet high. Named the "President" because of its regal-like splendor. It is the finest and best creation of recent years. Each, 25c; 6 for \$1.30; per doz., \$2.40, postpaid.

ALLEMANIA. An immense flower; orange with bright yellow border spotted with orange. Each, 25c; 6 for \$1.30; per doz., \$2.40, postpaid.

BRANDYWINE. Deep blood red, edged with golden border. Foliage deep bronze. Each, 20c; 6 for \$1.10; per doz., \$2.00, postpaid.

BURBANK. Large solid yellow flowers. Each, 25c; 6 for \$1.30; per doz., \$2.40, postpaid.

WINTZER'S COLOSSAL. Bright scarlet. Orchid-flowering, very striking.

GAJETTY. Reddish orange, mottled with carmine and edged with yellow. The tongue is yellow and densely spotted with carmine.

KING HUMBERT. One of the most popular cannas. Great orange-scarlet flowers surmount the vigorous dark bronze foliage. The number of good bronze-leaved varieties is limited, and this magnificent strain is the finest obtainable. Grows about five feet high and has gigantic trusses of flowers. A truly regal canna.

Price of Wintzer's Colossal, Gaiety, King Humbert: Each, 30c; 6 for \$1.55; per doz., \$2.75, postpaid.

LOUISIANA. Vivid scarlet. Each, 25c; 6 for \$1.30; per doz., \$2.40, postpaid.

UNCLE SAM. Very large, compact panicles of intense deep scarlet color. Each, 30c; 6 for \$1.45; per doz., \$2.50, postpaid.

WYOMING. Bright orange flowers, on massive purplish bronze foliage. Six feet high. Each, 30c; 6 for \$1.45; per doz., \$2.50, postpaid.

SUNSET CANNA COLLECTION

In this excellent collection we have a striking array of marvelous colorings which will surely please you. The brilliant hues are of exquisite rose, and pink, crimson, scarlet, purple and orange. **CLIFFWOOD GROWN.** Consists of 1 each of the following: **LOUISIANA**, scarlet red; **NEW PRESIDENT**, red; **BURBANK**, yellow; **WYOMING**, rich orange, and **BRANDYWINE**, deep blood red. Price, postpaid, only 95c.

HARDY NORTHERN IRIS CLIFFWOOD GROWN

(See Color Illustration on Page 86)

This old-fashioned, well-beloved, favorite flower is known as the "Fleur de Lis" of France. Its exquisite beauty, resembling somewhat as it does the orchid, has always caused it to be one of the most highly prized flowers grown. The haunting fragrance and delicate tinting of the Iris makes its spring advent a source of the keenest pleasure and its early blooming causes it to be doubly appreciated. They have a rather tall, stately growing habit with flowers large and perhaps best described as refined, elegantly frilled, and having delicate hues. We specialize in the beautiful flowers, and our stock is the finest that can be grown. Iris grown so far north will withstand the extremes of soil and climatic conditions better than less robust stock and will produce larger flowers and more profuse bloomers. In the descriptions (S) signifies standard or erect petals; (F) falls or drooping petals.

HONORABILIS. Splendidly named and indicative of the perfect qualities to be found in this fine Iris. Standards are a rich golden yellow; falls a velvety mahogany brown. Large, fully developed flowers. Each, 35c; 3 for 95c; doz., \$3.15, postpaid.

MARMORA. (S) Sulphur and fawn; (F) crimson-purple, margined lavender. Each, 35c; 3 for 95c; doz., \$3.15, postpaid.

IGNITA. Mauve. A brilliant contrasty Iris of exquisite mauve coloring with immense standards and falls. The grotesque shaped flowers are balanced on spikes in an attractive and imposing manner. Each, 35c; 3 for 95c; doz., \$3.15, postpaid.

Price of the following varieties: Each, 30c; 4 for \$1.00; doz., \$2.75, postpaid.

HARLEQUIN MILANIS. An unusually beautiful white and violet blue. One of the most handsome and attractive.

ORIENTALIS. Intensely brilliant blue flowers, the bud being inclosed in conspicuous crimson spathe valves.

VELVETEEN (S and F). Yellow and plum; a beautiful combination that ranks high with Iris lovers.

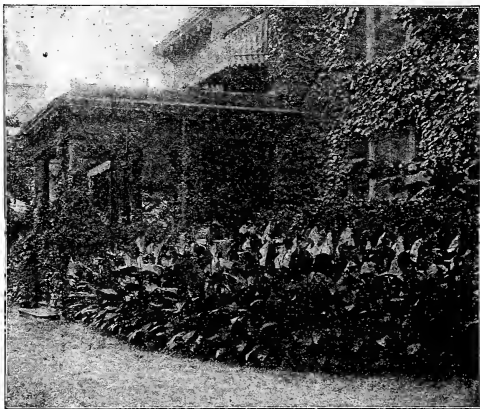

MME. CHEREAU. A giant rising 4½ feet high, with clear white flowers; beautifully fringed and shaded violet at edges; very showy.

MITHRAS. (S) Light yellow; (F) brilliant wine-red, with narrow border of deep yellow.

NIEBELUNGEN. (S) Fawn-yellow; (F) violet-purple, with fawn margin; very handsome.

RHEIN NIXE. (S) Pure white; (F) deep violet-blue, with a white edge. A beauty.

GODFREY CALLA LILY

See Color Illustration on Page 85

The Godfrey Calla is seldom used except for house bloom, but as such it is very popular, its pure, spotless white lending an air of serenity and beauty to the rooms. It is one of the most profuse flowering of all sorts and blooms almost continuously. It has the habit of the very dwarf sorts by flowering when very small and continuing to flower all the while the plant grows larger. Because of its ease of culture and its lovely beauty, you should by all means have one in your home. One of the finest of all the Callas.

Each, 25c; 3 for 60c; large size, each, 50c, postpaid. Extra large size, each, \$1.00, by express.

HARDY LILIES

ELEGANS. Brilliant orange-red; very early; a showy sort. Each, 25c; per 6, \$1.25, postpaid.

TIGER. Single improved. Orange-red, spotted black. Each, 25c; per 6, \$1.25, postpaid.

AURATUM. Gold band lily of Japan. Surely one of the most gorgeous and wonderful of all lilies. Each, 75c; 3 for \$2.00, postpaid.

RUBRUM. White and pink; brilliant coloring; graceful form. Each, 75c; 3 for \$2.00, postpaid.

FANCY CALADIUM

These foliage plants have variegated leaves of beautiful color which are unusually showy and attractive. An excellent plant for window boxes, vases, or pot plants and succeed equally well out of doors, in a somewhat shady location. The leaves are a riot of color with indescribable beauties of design. After being well started, they need liberal watering and adequate drainage. We furnish plants until July, at which time the plants are ready. They make a very beautiful house plant.

Price: Each, 45c; 3 for \$1.20, postpaid.

CALADIUM ESCULENTUM

This plant is often called Elephant Ear on account of the enormous size of the single leaves. Look at the illustration of this tropical plant. Its mammoth leaves frequently measure from 3 to 6 feet in circumference. It is easy to grow and no garden or lawn should be without it, as it is particularly striking when grown either single or in a group on the lawn, with Cannas as center. It is very popular as an indoor or house plant, where room decoration is desired by large, stately, beautiful, attractive foliage. All plants and flower lovers who know and appreciate plants find joy and pleasure in this magnificent plant for the home as well as the garden. (See illustration above.)

Each, 15c; 10 for \$1.40; extra large bulbs, 35c each, postpaid.

SOW SALZER'S SEEDS

I am so delighted with my order that I had to tell you about it and give you credit for the fine plants sent me and at such a reasonable price. I paid \$1.25 for plants of that same size elsewhere.

E. H. Lins, Cologne, Minn.

LILY OF THE VALLEY

One of the daintiest and sweetest of flowers, having scalloped bells, creamy white color, pendant along slender stems. Leaves are broad, and the flowers being very fragrant, they make up beautiful bouquets. A valuable plant for reclaiming shaded, unused ground.

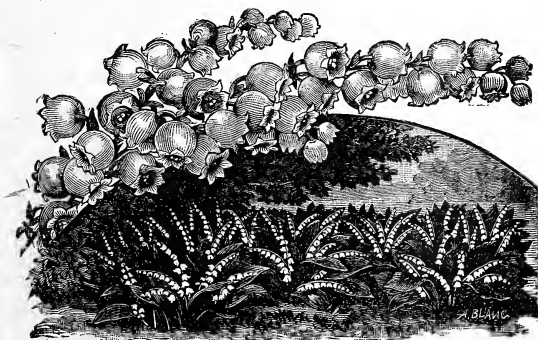

Spreads rapidly, being perfectly hardy, and each succeeding year rewards the grower with a greater abundance of deliciously fragrant, snow-white blossoms. (See illustration.)

Each, 15c; 10 for \$1.00, postpaid. Big clumps, each, \$1.00, by express.

SOW SALZER'S SEEDS

Salzer, you certainly know how to propagate plants. My Calla Lily is the most beautiful I ever saw. Mine bloomed from Christmas to May.

Mrs. S. Klosterman, Irvington, Ill.

Lily of the Valley

PLANT HALF A DOZEN CALADIUMS ALONGSIDE THE HOUSE AND SEE THE WONDERFUL RESULTS

Ponderosa Lemon

PONDEROSA LEMON

It is an ever-bearing variety. On a fair-sized plant one can find a great many of these ponderosa Lemons growing at one time. It is a beautiful sight. The plant blooms, and at the same time has fruit in all stages of development, from the size of a pea up to the ripe fruit. It fruits when quite small and makes a lovely house plant. Everybody that is successful with house plants can grow this lemon. Thrifty young plants. (See illustration.) Each, 25c, postpaid. Second size: Each, 75c, postpaid. Cannot be sent into California.

OTAHEITE ORANGE

This variety of the Orange family is a dwarf, compact grower. As a pot plant this lovely dwarf Orange is most unique. Its beauty and value is its constant bloom and continuous bearing. Blossoms green and ripe fruit on the same plant at the same time. Each, 25c; second size, each, 75c, postpaid. Cannot be sent into California.

THREE GIANT CLIMBERS

NEW GIANT MOON FLOWER

Often growing 50 feet in one season; blooms continuously from June to November, its moon-like giant flowers being of the purest white, blooming only at night or on dull days; gives out a delicious odor similar to the jasmine. Extra strong plants. Each, 25c; 4 for 90c; 12 for \$2.50, postpaid.

COBEA SCANDENS, OR CATHEDRAL BELLS

Three or four plants placed along the side of the house will cover it fully twenty feet wide and rival each other as to which will reach the top of the roof first; it displays a purple bell-shaped blossom glory unknown in any other flower or vine. Each, 25c; 4 for 90c; 12 for \$2.50, postpaid.

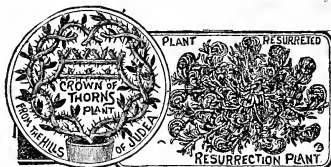

BLUE MEXICAN GLORY

This magnificent blue flowering Glory blossoms in great profusion. It is similar to the Moon Flower in growth, with blossoms 3 or more inches in diameter. Each, 25c; 4 for 90c; 12 for \$2.50, postpaid.

BIBLE PLANTS

CROWN OF THORNS, OR EUPHORBIA

On the wild, rocky hills of Judea, and in the immediate neighborhood of Jerusalem, this emblematic plant is found. It is a peculiar plant, thorny, with a few bright green leaves and an abundance of light rose blossoms of the easiest possible culture and can be trained to assume any shape. It has been sometimes claimed the "Crown of Thorns" worn by our Savior was made from this plant and that the drink given to our Savior before his death came from the juice of this plant. With each season the demand for the Crown of Thorns increases. (See illustration.) Each, 25c, postpaid.

THE RESURRECTION PLANT

Where the pines and cedars of Palestine grow, comes this singular plant. Imagine a bunch of withered looking shoots, brown, stiff and apparently dead; place it in water, and within an hour it is transformed from a withered-looking bunch into a lovely patch of green moss. (See illustration.) Each, 15c; 3 for 40c, postpaid.

CACTUS

Cactus are always hard to propagate in large quantities. For this reason second and third choice should always be mentioned. We will always fill variety ordered, if possible to secure when our own stocks are exhausted.

STAPELIA

A rare beauty and very odd, indeed, bearing beautiful buff yellow colored blossoms, with deep maroon markings, and of wonderful design. (See illustration.) Each, 25c, postpaid.

Stapelia

NIGHT BLOOMING CERES

Glorious beyond description is the Night Blooming Cereus. This gorgeous Cactus usually opens in the evening, attaining its greatest beauty at midnight, blossoms often measure 12 inches in diameter. (See illustration.) Each, 25c, postpaid.

LOBSTER

A wonderfully free bloomer, of drooping, weeping habit; also called Christmas Cactus. Each, 25c, postpaid.

PHYLLOCACTUS

One of the most brilliantly beautiful blossoms among Cactus, is found in this plant. Price, each, 25c, postpaid.

SANSEVERIA

A transcendent beauty; will bear neglect and yet produces attractive foliage and immense spikes of blossoms. Blossoms very freely and in great abundance. (See illustration.) Price: Small plants, 25c each; large plants, 50c each, postpaid.

SALZER'S CACTUS COLLECTION

Our old customers will remember this famous collection which we listed for years. A selection of cactus plants that will give you enjoyment during summer as well as throughout the winter, when their curious growth and magnificent blossoms come into full display. Each cactus in the collection is different.

3 Cacti Beauties, our selection, 50c, postpaid.

5 Cacti Beauties, our selection, 90c, postpaid.

ALAMO OLEANDERS

An old-fashioned plant which remains immensely popular. It is a large, semi-double, pink or white bloomer, which can be grown in almost any soil or situation and kept growing all the year. When necessary should be placed in the cellar and rested. The foliage is dark green, somewhat willow-like, and is in itself neat and pleasing. We know you will be pleased with an Oleander. (See illustration.)

Pink. Each, 35c; 3 for 90c, postpaid.

White. Each, 35c; 3 for 90c, postpaid.

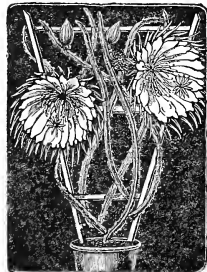

ALAMO OLEANDER

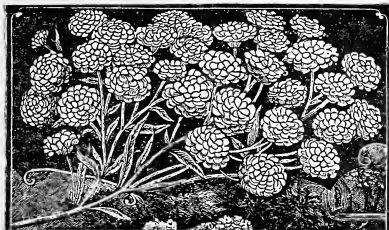

Sanseveria

Glorious beyond description is the Night Blooming Cereus. This gorgeous Cactus usually opens in the evening, attaining its greatest beauty at midnight, blossoms often measure 12 inches in diameter. (See illustration.) Each, 25c, postpaid.

Night Blooming Cereus

Hardy Perennial Plants

Giant Achillea

DIGITALIS MONSTROSA (Foxglove). Stately old garden favorite. One of the finest and hardiest perennials. Fine-spotted flowers of white, purple, lilac and rose color.

GYPSOPHILA PANICULATA (Baby Breath). Graceful branched panicles of pretty little white flowers. Blooms in August and September. Height about two to three feet.

GAILLARDIA. Grandiflora. Very showy, hardy plants, beginning to flower in June, they continue the entire season. The large flowers are of gorgeous coloring. The center is dark red brown, while the petals are marked with rings of brilliant crimson, orange and vermillion.

HOLLYHOCKS. Double. Stately, majestic, hardy plants, favorites in the old-fashioned hardy gardens, their colossal spikes produce a showy effect which cannot be secured with another flowering plant. Colors white, rose, yellow and red. Hollyhocks do not always run true to form and frequently produce many single flowers.

LYCHNIS CHALCEDONICA (Jerusalem Cross). Brilliant scarlet in dense flat heads, fine for borders. Three feet. Flowers from June to September.

MYOSOTIS (Forget-Me-Not). This old, popular favorite should be in every garden. Color blue. Four to nine inches; fine for damp places.

POPPY ORIENTAL. Immense flowers of brilliant, deep scarlet.

DIANTHUS BARBATUS. (Sweet William.) Beautiful scarlet shade, exceedingly attractive.

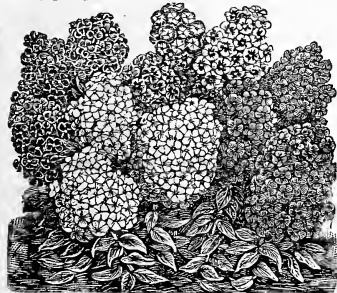

DIANTHUS BARBATUS. (Pink Beauty.) Very attractive.

RUDBECKIA (Golden Glow). A most distinct, large flowering, hardy plant. A magnificent grower, very branching, and each branch bears many great, shining, golden yellow flowers. A plant is literally covered with bloom. Hardy as oak. Spreads rapidly. (See illustration.)

TRITOMA FETTERI (Red Hot Poker). Brilliant scarlet, rimmed with orange, of cone shape fixed to erect of rush-like foliage.

YUCCA (Adams Needle). Stately, conspicuous plant. Evergreen, broad, sword-like foliage and grows into great erect branching stems with showy flowers of a creamy-white color and bell shaped. Blooms third year.

Price of above plants, unless otherwise noted, 20c each; 3 for 55c; dozen, \$2.00, postpaid.

Salzer's Giant Phlox

FOR PERMANENT PLANTING IN BEDS OR BORDERS

Price of the following plants (unless otherwise noted), each, 20c; 3 for 55c; \$2.00 per dozen, postpaid.

The old-fashioned hardy garden, with its beautiful flowers coming forth each year after their long winter's sleep, is the heritage of our fathers and mothers who, before us, loved the beautiful. The joyous labor of planning and planting a section of the garden, or some borders, with perennials, rewards not only us who plant them, but also spreads its cheery fragrance among all who pass by. With a little care, one may have beautiful flowers from early spring until late fall. Our stock is well rooted and not grown, very hardy, may be planted as soon as the ground is workable, or in the autumn, and represents exceptionally fine values.

GIANT ACHILLEA. Its many branches hold their great mass of pure white feverfew-like flowers about a foot above the soil. For cemetery planting, it is the most valuable of all white flowers. It blooms from May until snow flies. (See illustration.)

Yucca

Rudbeckia

AQUILEGIA (Columbine). This handsome Columbine from the Rocky Mountains is a most striking and showy kind with blue, white and all colored flowers.

BELLIS LONGFELLOW (English Daisy). Double pink. An old favorite.

BELLIS. Double white. The old-fashioned daisy.

BLEEDING HEART. It will stand the coldest winters and flourish, and a single plant will bear from 50 to 100 long spikes of blood-red heart-shaped, drooping flowers, hence the name, Bleeding Heart. (See illustration.)

Each, 75c, postpaid.

CAMPANULA (Canterbury Bell). The well-known cup-and-saucer variety. State color wanted, pink, white or blue.

CANTATION. Hardy border type of the Dianthus family. Mixed colors range pink, white and red.

COROPSIS. Flowers are of rich, golden yellow, graceful form; blooms entire summer and autumn.

Daisy Shasta. Pure white flowers with long, twisted petals. Blooms entire season. Very hardy.

DELPHINIUM BELLADONNA. Free and continuous blooming, never being out of flower from the end of June until cut down by hard frost. The clear turquoise-blue of its flowers is not equaled for delicacy by that of any other flower. Two feet.

DELPHINIUM. (Gold Medal Hybrids). Flower spikes 2 feet long, vigorous, free blooming. Beautiful shades of blue, pale lavender to purple. (See color illustration Page 85.)

Bleeding Heart

SALZER'S GIANT PHLOX—

CLIFFWOOD GROWN

Our Giant Phlox are one of the most desirable of the hardy perennial plants. A great favorite of our grandmothers, they remain just as popular today. They can be used to good advantage in a border, planted in front of shrubbery, or in large groups on the lawn, and will thrive in practically any soil or position. From a few roots, many new shoots soon come up, so that within a very short time a nice phlox bed is permanently produced. (See illustration.)

BRIDESMAID. White, with large, rich crimson center.

COLQUILLICOT. Rich, vivid, scarlet-red beauty. Very attractive.

MRS. JENKINS. Pure white, large flowers.

FRANKLIN G. VON LASSBURG. Immense flowers of purest white color.

R. P. STRUTHERS. Rich cherry-red and suffused salmon color.

RICHARD WALLACE. White, with large carmine eye.

RYNSTROOM. A lively shade of rose-pink. Very large flowers. An improvement of the variety Pantheron.

SIR EDWARD LANDSEER. Fine bright crimson. Very effective.

PLANTS: Each, 20c; 3 for 55c; per dozen, \$2.00, the above 3 for \$1.50, postpaid.

PEONIES CLIFFWOOD-GROWN

(See Color Illustration on Page 86)

Peonies are one of the most easily grown of all flowers, and are well adapted for massing in beds or for planting in groups throughout the shrubby border, where their bright showiness makes them very attractive. They are exceptionally hardy, requiring no protection even in severe climates, and increase in beauty each year. Peonies should not be planted too deep, but the roots should be placed so that the crowns are covered with two inches of soil. Our fine Cliffwood Grown Peonies will give you an abundance and wealth of brilliantly hued flowers, very fragrant, which will delight you and which will command everyone's attention.

EDULIS SUPERBA. Large, loose, flat crown, and bright, mauve-pink color, the base of the flower being mixed with narrow lilac. Is a free bloomer, strong, upright, very early, and is unusually fragrant. One of the finest pinks for Memorial Day.

FESTIVA MAXIMA. Has pure white center, prominently flecked crimson, with outer petals sometimes faint lilac-white on first opening. Very large, globular, rose type. An early strain, a vigorous grower, strong and very tall. One of the most popular white varieties. (See illustration.)

FRAGRANS (Double Pink). A fine Peony of medium size, compact, bomb type. Dark pink color, and very fragrant. Is a strong, vigorous grower and medium tall. Late variety and is extensively grown for cut-flowers. (See color illustration on page 86.)

TRIOMPHE DU NORD. A very attractive, bright, purplish-red color with silvery reflex. Very large, compact, bomb type, and very fragrant. A tall and very free bloomer, maturing in midseason. A splendid Peony, good for cutting. (See color illustration on page 86.)

Peony,
Festiva Maxima

PRINCE DE TALINDYKE. A very glossy flower of a beautiful dark purple-crimson color. Is a strong, vigorous and tall grower. A fine late variety, one of the best. (See color illustration on page 86.)

PRICE: Roots with 3 to 4 eyes, each 75c; one each of the above 5 for \$3.50, postpaid. Roots with 5 to 7 eyes, each \$1.25; one each of the above 5 for \$5.90, postpaid. Large undivided clumps, each \$2.75; one each of the above 5 for \$13.00, prepaid.

SALZER'S HARDY NORTHERN GROWN STRAWBERRIES

(See Color Illustration on Page 86)

Of the many varieties of strawberries that are known to the trade, we consider the ones below to be the most profitable to plant. We have tested and tried these out carefully at Cliffwood Farms and we are sure that you will find splendid and unusual values in these varieties. Our fine, hardy stock has been pleasing others for years past and particular buyers who want the finest strawberries, always purchase their plants from us. The varieties listed below all have "Perfect Flowers" and are not termed "pistillate."

Good cultivation is necessary for the best results, a liberal mulching during the summer is beneficial and the plants should never suffer for lack of water. When plants are received dip them in water at once and bury the roots in moist, shady ground until ready to set out.

DR. BURRILL (Early). An exceptionally fine early strain, a marvel of vigor, productiveness, quality, color, and size, seldom found in any one variety. The berries are large, delicious and beautifully formed, of a dark glossy red color, with rich green calyx and yellow seeds, making a combination that gives them an unusually attractive appearance. Fruit is very solid and meaty. The plants have a rich, dark green foliage and a very strong root system, so that it is not easily affected by drought or by leaf diseases. Very productive, blooms over a large season, and a splendid canner and shipper. We strongly recommend this variety.

SENATOR DUNLAP (Second Early). An old and dependable variety and very well adapted to varied soils and climates. This strawberry is of the Warfield type, fruit is good size, regular form, rich, beautiful bright red color and glossy. Flesh is meaty, firm, is a splendid keeper and shipper, and of excellent quality and fine for canning. Ripens next to Dr. Burrill. A wonderful variety for those who haven't time to give it special care because it will produce a good crop under positive neglect.

PRICES, postpaid (no less than 25 sold of any one variety): Per 25, 50c; per 50, 75c; per 100 (25 of each if wanted), \$1.35; per 500, \$1.75; per 1,000 (any number of varieties), \$9.00. Full culture directions sent with each order.

PROGRESSIVE EVERBEARING STRAWBERRIES

They produce a never ending yield of medium large berries, sweet, mild, and beautifully colored, throughout the entire summer and fall, until snow flies. We consider these the best and most profitable of the fall bearing sorts. To obtain the largest size and the best quality of berries in the fall, keep the flowers picked off until about August 1st. The plants are extremely vigorous and hardy, resembling Senator Dunlap in their ability to withstand neglect and adverse conditions. A splendid type for those who have never planted strawberries before. This variety is furnishing the bulk of the fall supply for the market, and we strongly recommend it. Plants set out in spring will bear the following fall, and produce heavily thereafter.

PRICES, postpaid: 25 for 75c; 50 for \$1.25; 100 for \$2.35; 200 for \$4.35; 300 for \$6.35; 500 for \$9.50; 1,000 for \$18.00.

Gladioli

*Cliffwood
Grown*SEE INSIDE
FRONT COVER

This class of summer flowering bulbs make one of the most imposing and most gorgeous of displays. They make a brilliant show of field bloom and supply a generous mass of cut flowers. Gladioli, when cut, develop to a fine perfection in water and last longer than most other cut flowers. Grow best in rich, light soil exposed to plenty of sunlight, and the stately flowers alongside the house or massed in beds, produce a beautifully attractive and brilliant array. Our bulbs are grown on Cliffwood Farms and in ordering Gladioli from us, you obtain rare and choice types, which are superior to the imported bulbs.

MRS. FRANCIS KING

A fine, stately beauty of the most exquisite shade of pure, bright scarlet. Unusually striking and effective. Spikes are large and long, producing blooming flowers over a long period. Stems very strong and tall. Note the low price of this beauty. It is not inferior in quality in any way, but to urge each one of our friends to plant at least some gladioli bulbs this year, we offer this unusual bargain. Order early as Mrs. Francis Kings are short this year throughout the whole country. Each, 10c; doz., \$1.10; 100 for \$8.00, postpaid.

EXTRA CHOICE CLIFFWOOD GLADIOLI

1—**PRIDE OF GOSHEN.** A giant flowered salmon or flesh pink. Petals elegantly waved. Very imposing. Exceptionally tall and vigorous.

2—**RED EMPEROR.** Many Gladioli admirers claim this is the most beautiful of all Gladioli. A pure rich deep scarlet, immense flowers of great substance well placed upon tall spikes.

3—**ANNA EBERHUS.** A beautiful new type of blue and wine colored variety. Very large flower.

4—**GRETCHEN ZANG.** Blooms are of soft pink, blending into fine scarlet on lower petals.

Each, 25c; 3 for 65c; doz. for \$2.40, postpaid.

One each of the above 4 varieties, 90c, postpaid.

CHOICE CLIFFWOOD GLADIOLI

1—**BLACK HAWK.** Very deep red, stained black, large round blossoms. Very handsome.

2—**EMPEROR OF INDIA.** Rich maroon-black.

3—**EVELYN KIRTLAND.** Light rose, darker at edges, shading to shell pink at the center, with brilliant scarlet blotches on lower petals.

4—**CHIEF OF OSHKOSH.** A dark pink, shading into soft pink with white spots in throat. An exhibition variety. One of the newest.

5—**MARY FENNELL.** A beautiful deep lavender. Tall, slender spikes. Lower petals pencilled with primrose-yellow.

6—**KUNDERDI GLORY.** Delicate creamy pink, striped with crimson. The ruffled giant.

7—**MRS. FRANK PENDLETON.** Large size, lovely rose pink, with brilliant deep red blotches in throat.

8—**FAUST.** Deep velvet Harvard crimson with lighter shade on lower petals.

9—**PRINCE OF WALES.** Considered one of the most beautiful. A charming coral pink.

10—**LILY LEHMAN.** Pink to bluish white, splendid flowers, round, the stem just like white lilies.

Priced: Each of above, 10c; per dozen, \$1.50; per 100, \$12.50, postpaid. One each of above, \$1.25, postpaid.

TEN CLIFFWOOD GEMS

1—**AMERICA.** Immense flowers. Flesh pink.

2—**UGUSTA.** A lovely pure white, with blue anthers.

3—**CHICAGO WHITE.** Pure white with lavender markings in throat. Very early.

4—**GLOEY OF HOLLAND.** A pure white-shaded yellow. A grand large flower.

5—**IDA VAN.** A beautiful deep salmon red, rich and brilliant color. Holds London Certificate of Merit.

6—**MRS. W. FRYER.** A wonderful, rich, cherry-red color. Very striking and showy.

7—**ARIZONA.** Beautiful dark pink with maroon markings on lower petals.

8—**1910 ROSE.** Very large flower, pure rose pink of extra fine shade. Narrow white central line on lower petals.

9—**PINK PEARL.** Medium flower and large compact spikes, beautiful rich pink with flushed maroon throat.

10—**PEACE.** The feathered white. Large flowers. Pure white with pale lilac feathering on inside of petals.

Each, 10c; doz., your selection, \$1.00; 100, your selection, for \$7.50, postpaid. One each of above, 90c, postpaid.

SALZER'S SUNRISE GLADIOLI MIXTURE

Comprises a very choice selection of beautiful Gladioli.

Priced: Per doz., 75c; 50 for \$2.75; 100 for \$5.00, postpaid.

SEE INSIDE FRONT COVER FOR GLADIOLI IN NATURAL COLOR

MRS.
FRANCIS
KING

Each, 10c; doz., \$1.10; 100, \$8.00, postpaid.

SALZER'S SPECIAL GLADIOLI OFFER

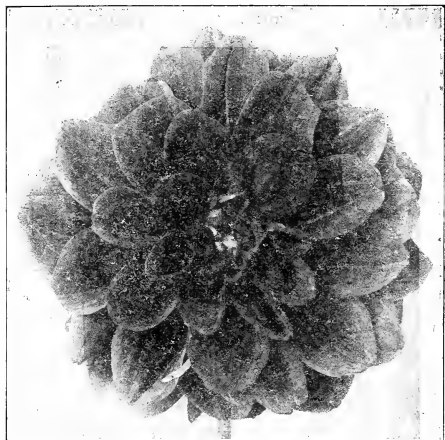

Each year we make liberal plantings of mixed bulbs, and as there is no roguing or extra special attention or expense we are able to produce them in an economical manner and offer them at a much lower price than stocks receiving scientific attention. This fact notwithstanding, this collection comprises a well-balanced array of colors that will be found of the usual large Salzer size and quality.

Doz., 50c; 50 for \$1.95; 100 for \$3.75, postpaid.

NEW GLADIOLI PRIMULINUS HYBRIDS

The original of this beautiful type of flower was introduced from South Africa. The flowers usually are a little smaller than the other gladioli, but are good size, very pretty, on tall, graceful spikes, and are particularly adapted for cutting. Colors run in beautiful shades from tan and light yellow to orange, apricot and crimson. Healthy, vigorous, very showy and attractive.

Priced: Doz., 65c; 50 for \$2.25; 100 for \$4.00, postpaid.

New Pride of Shelby

CACTUS DAHLIAS

This class is of comparatively recent introduction, and is entirely distinct from any other class. The flowers are loosely and artistically formed, and very irregular, resembling the Chrysanthemum. Petals long, twisted and terminating in a point.

COUNTRESS OF LONSDALE. (Hybrid.) Deep salmon red. One of the best. Very free blooming. Should be in every garden.

GENERAL BULLER (Straight). A rich, velvety crimson maroon, tipped white. Most attractive.

KRIEMHILDE. (Hybrid.) The queen of the Cactus Dahlias. Color, flesh (delicate pink), shading to white in the center. (See illustration.)

STANDARD BEARER. Fiery scarlet, extra fine. very free flowering.

STERN (Straight). Bright primrose-yellow. The flowers are large, petals long and pointed.

Any of above sorts, each, 35c; 3 for 95c, postpaid.
Collection of five for \$1.50, postpaid.

PEONY-FLOWERED DAHLIAS

A new type of Dahlia; flowers are semi-double, having two, three or more rows of broad, flat, loosely arranged petals, surrounding a conspicuous, rich, golden yellow center. Petals are often pointed, and sometimes twisted.

BARON G. DE GRANCY. Fragrant Peony-flowered Dahlia. A perfect wonder. The flowers are borne in great profusion upon long, graceful stems. The color is a waxy, almost glistering, pure white. The first "Fragrant White Peony-Flowered Dahlia" in existence.

P. W. JANSEN. Fragrant Peony-flowered Dahlia. A most satisfactory variety. The novel color is rosy salmon daintily overlaid with a beautiful shade of yellow.

QUEEN EMMA. Fragrant Peony-flowered Dahlia. A delightful sort that appears almost artificial. It is a charming shade of hollyhock pink, the inner petals banded with gold. The flowers are sensational.

Price each of above, 35c; 3 Dahlias for 95c, postpaid.

POMPON DAHLIAS

AMBER QUEEN. Rich, clear amber, shaded apricot.
SNOWCLAD. Perfect show type; pure white with a slight lavender pink center.

Price each, 25c; above two, 45c, postpaid.

SPECIAL DAHLIA COLLECTION

Made up of the various Dahlias listed on this page. Because of the hot summer last year, these roots have a somewhat delayed growth, and are a bit smaller, but they will bear perfect flowers. Order early as we know these will go fast. Collection is of our selection.

Collection No. 1—Six Roots, \$1.35, postpaid.

Collection No. 2—Ten Roots, \$1.85, postpaid.

Collection No. 3—Fifteen Roots, \$2.25, postpaid.

DAHLIAS

CLIFFWOOD GROWN

The most beautiful of the autumn flowers! We have been carefully growing and testing the different strains of Dahlias and from the bewildering array of varieties which are known to the trade, we have selected those types which are worthy of every Dahlia fancier's attention. Accustomed to unusual values, our friends will find in these varieties which we have singled out, Dahlias of those high merits and distinctive characteristics that will be a source of pleasure to them. We supply dormant field roots only, which should be planted about six inches deep, laid flat, eyes or sprout up. Dahlias are not particular as to the soil or location, but the best results are obtained on moderately rich soil and exposed to the full sun.

DECORATIVE DAHLIAS

Decorative Dahlias are large, flat and full centered; petals quite irregularly situated, long, broad, flat and nearly straight.

NEW PRIDE OF SHELBY. Rich, deep red, of the Zinnia type, very beautiful. (See illustration.)

BLUE OBAN. Color, lavender with a beautiful tint of blue. Nearest to blue of any Dahlia in existence. Very desirable on account of its peculiar color.

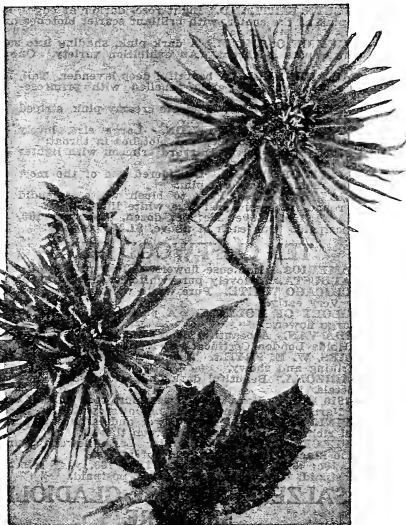

CLIFFORD W. BURTON. A large canary yellow.

PRINCE OF ORANGE. A novel combination of orange and yellow shades.

PRINCESS JULIANA. Splendid New Holland Decorative Dahlia. Holland Dahlia specialists claim this one of the finest white Decorative sorts, also one of the best flowering. Pure waxy white.

Prices of above sorts, each, 35c; any 3 for 95c, postpaid.

Collection of five for \$1.50, postpaid.

Kriemhilde

YOU WILL OBTAIN A GREAT DEAL OF PLEASURE FROM A FEW DAHLIAS IN YOUR YARD

SALZER'S HARDY GARDEN ROSES

STRONG, FIELD GROWN, DORMANT STOCK

1—PAUL NEYRON. The flowers are beautiful; probably one of the largest Roses; color, clear, bright, shining pink. Blooms the first season and all summer.

2—FRAU KARL DRUSCHKI. The Ideal Hardy White Rose. Its flowers, which are very large, are perfect in form and snow-white in color, with shell-shaped petals, forming a beautiful flower. The plant is a strong, vigorous, healthy grower and remarkably free blooming.

3—MAGNA CHARTA. Bright deep pink, very large and fragrant. A grand, hardy, popular garden Rose. rich crimson; of fine shape and exquisite fragrance. Words are inadequate to describe its charms.

4—GEN. JACQUEMINOT. One of the most popular of all Roses of the Hybrid Perpetual class. Color, intense maroon. A very prolific bloomer, flowers are of excellent form and size.

5—PRINCE CAMILLE DE ROHAN. One of the darkest colored Roses; of velvety crimson, changing to very fragrant; especially suitable for cemetery planting.

6—MADAME PLANTIER. Withstands the cold winters of Wisconsin without protection. It has pure white, perfect flowers, fine buds, very fragrant; especially suitable for cemetery planting.

MRS. JOHN LAING. Soft pink of beautiful form; exceedingly fragrant. Very free bloomer. Does exceptionally well anywhere. Strong Field Grown Dormant Stock, 65c each. One each of above 7 Roses for \$4.00, postpaid.

HARDY MOSS ROSES

These beautiful Roses are distinguished by the moss-like covering of their buds. Their lustrous foliage, hardness, vigorous and stocky growth makes them valuable for out-door planting. The flowers are usually very large.

7—PINK MOSS ROSE. Beautiful shade of pink. 8—RED MOSS ROSE. Deep color; fine form. WHITE MOSS ROSE. Pure white, large buds. Strong Field Grown Dormant Stock, 65c each. One each of above 3 for \$1.75, postpaid.

EVERBLOOMING HYBRID TEA ROSES

This class is rapidly taking the foremost rank of Roses for garden culture. They are the result of crossing Tea Roses with Hybrid Perpetuals, are perpetual bloomers all Summer and Fall, appear in the richest and varied colors, and are comparatively hardy, standing the winters as far North as Chicago with only little protection; but here in the North they are best taken up in the fall and kept in the house over winter.

CAROLINE TESTOUT. One of the most popular and valuable bedding varieties; large, full, globular flowers of bright, satiny-rose, with brighter center; very free and fragrant.

AUGUSTA VICTORIA. Pure white, with shadings of primrose yellow; deeper in the center; a distinct and very beautiful variety.

LA FRANCE. The Queen of all Roses. Beautiful, bright, silvery pink with pale lilac shadings, over the entire flower a satiny sheen. Large, full and fine form; one of the sweetest scented roses. Most free blooming.

MADAME COCHET. One of the most popular Roses in England, both in the garden and as a cut flower; it succeeds equally well here, is a strong grower and produces very freely beautiful flowers of salmon cerise, shaded with cream.

LADY HELLINGTON. A beautiful copper shade of apricot-yellow. Very attractive in the bud. Free bloomer, vigorous grower.

CRUSADER. A rich, velvety crimson color, large flowers, beautifully formed. Strong in growth and ideal for outdoor growing.

Strong Field Grown Dormant Stock, 75c each; 3 for \$2.00, postpaid.

THE FAMOUS LOS ANGELES ROSE

See Color Illustration on Page 85

One of the grandest all-around Roses of American origin that has ever been produced. The color is a beautiful flame pink, toned with coral and shaded finely with gold at the base of the petals. Greatly loved for its delicate, haunting fragrance and exquisite beauty. The stems are long and heavy, and the flowers unusually large. Exceptionally hardy, vigorous foliage, and free blooming.

Strong Field Grown Dormant Stock, \$1.00 each, postpaid.

SALZER'S COLUMBIA ROSE

A beautiful, true pink color, one of the most exquisite of the pink Roses, deepening into a warm, glowing tone as it matures. Luxurious foliage and the usual double petalage makes it a splendid garden Rose and an ideal Rose for indoors during winter. Very fragrant, almost thornless; large, perfect flowers, and long stems. (See illustration.)

Field Grown Dormant Stock, 95c each, postpaid.

FULL CULTURAL DIRECTIONS SENT WITH ALL ROSE ORDERS

GRUSS AN TEPLITZ

A hybrid tea rose, dark red, of intense depth and richness of color, shading to a velvety crimson. It is very free blooming (in bloom almost all the time), is very fragrant, and is unusually hardy, succeeding under the most ordinary conditions. Produces flowers continuously from June till frost. The rose for everybody, as it flourishes under positive neglect. (See illustration.)

Strong, Field Grown Dormant stock. Each: \$1.00, postpaid.

PERPETUAL BLOOMERS

Fine, carefully selected Garden Roses, popularly called "Perpetual Bloomers." By this is meant that they generally bloom over a longer period than most other kinds, usually commencing about June and continuing until the snow flies. The following are tried sorts and we recommend them. The best of their kind.

AGRIPPINA. A magnificent Rose, blooming almost continuously; color, intense dark red. A magnificent bud for buttonhole purposes.

HERMOSA. The freest blooming, most glorious pink Rose in cultivation; an ever-bloomer; magnificent in every respect.

BELLA. The sweetest, freest bloomer, of pure snowy white.

LOUIS PHILIP. One of the grandest, freest blooming crimson red Roses known. Somewhat similar to Agrippina.

ISABELLA SPRUNT. No breed so fine, no yellow Rose so free of bloom.

SOFRANO. Grand saffron or coffee colored; exquisite buds; free bloomer.

Mailing size only, each, 25c; 3 for 70c, postpaid. In soil and paper pot, 35c each; 3 for 95c, postpaid.

TUBE ROSES

One of the most beautiful and delightfully fragrant of the summer flowering bulbs. Large, massive spikes of creamy white waxen flowers from July on.

EXCELSIOR. Double Pearl White. Price: Each, 15c; doz. \$1.35, postpaid.

SINGLE. Flowers unusually large and fragrant. Price: Each, 15c; per doz., \$1.35, postpaid.

BABY RAMBLER ROSES

Miniature beautiful roses of dwarf habit, and bloom so freely as to completely hide the entire plant during summer and fall. Splendid for bedding or as edgings for borders. They are descended from the Polyantha Rose.

BABY RAMBLER. This is the original type, daddy of them all. Hardy and in bloom all the time. Flowers in large clusters of bright crimson.

PINK BABY RAMBLER. (Baby Dorothy.) Beautiful bright pink; blooms in clusters like CLIMBING DOROTHY PERKINS. Makes a wonderful effect planted in groups.

Mailing size only, each, 25c; 3 for 70c, postpaid. In soil and paper pot, 35c each; 3 for 95c, postpaid.

RAMANAS OR RUGOSA ROSES

IRONCLAD HEDGE ROSES

A perfectly hardy, valuable type with heavy wood and shrubby formation, in wide use for hedges and hardy borders, or for mixed shrubbery planting. The foliage is remarkably attractive, dark green lustrous color, and is covered with clusters of handsome flowers which vary in size and construction, and which are followed by brilliant red berries. Especially adapted for cold climates.

RUGOSA ALBA. This pure white beauty, with its rich, glossy dark green foliage, becomes literally covered with clusters of single blossoms. Strong, field grown. Each, 75c; 6 for \$4.25; 10 for \$7.00, postpaid.

F. J. GROOTENDORST. This is a Polyantha-Rugosa and entirely new in its class. It has the continuous blooming qualities of the Baby Ramblers, combined with the rugged, bushy growth and shiny, leathery foliage of the Rugosas. The blooms come in clusters, each rich red flower having the petals evenly notched, giving the clusters the appearance somewhat of a bunch of carnations. This and the Rugosa Alba are hardy as oaks.

Strong, field grown, \$1.00 each; 6 for \$5.50; 10 for \$9.00, postpaid.

Teplitz

SALZER'S CLIFFWOOD GROWN RAMBLER ROSES

See Color Illustration on Page 85

You may not have space enough in your garden to give expression to your love for roses, but these hardy, rambling, climbing varieties need only a foothold and will climb and trail over trellises, fences, poles, etc. Until they bloom, they are beautiful as vines and about July when the flowers come forth, their wondrous mass of glorious beauty brings forth exclamations of admiration from all who see them.

Our stock is of the finest obtainable, all hardy and northern grown under exacting conditions at Cliffwood Farms. When the flowers have finished blooming in July a severe pruning is beneficial and will encourage a vigorous growth and an abundance of flowers the following season.

1-DOROTHY PERKINS. A soft shell-pink color, flowering profusely in large clusters, very fragrant and lasting. A hardy, showy type and one of the most popular. Fine, smooth, dark foliage. (See color illustration on Page 85.)

2-CRIMSON RAMBLER. One of the best Roses known today. Hardy as oak; withstands every climate; grows rapidly and blooms all season long. Double deep crimson flowers borne in large clusters. A plant under favorable conditions grows to a great height the first season. (See color illustration on Page 85.)

3-GARDENIA. Bright yellow, cream color when open. Very free, profuse blooming and fragrant. This is the hardy Marechal Niel; double yellow flowering.

Strong field grown, extra heavy, each, 75c; one each of above 3 Roses, \$2.00, postpaid.

YOU CANNOT INVEST MONEY TO BETTER ADVANTAGE THAN IN RUGOSA ROSES

NEW FRENCH HYDRANGEAS

A recent, wonderful acquisition of French introduction which is remarkable for brilliancy of color. Makes excellent house plants. Flowers very large and almost cover the plants.

E. G. HILL. Beautiful shade of pink, trusses of immense size. (See illustration.)

MME. E. MOUILLERE. Large, pure cream white; one of the grandest of all house Hydrangeas.

Price of each, 35c, postpaid; larger plants, 50c to \$1.50, by Express. Add 10c extra, each, if wanted in soil and paper pot, by mail.

HYDRANGEA OTASKA MONSTROSA COMPACTA

One of the finest of the pot-growing Hydrangeas. Produces immense heads of usually pink, but sometimes blue flowers, of great beauty. This variety is seen very much at the Atlantic seashore resorts. When grown indoors, it will be flowered extensively for Easter decorations. Our Cliffwood Grown stock is of the finest obtainable.

Each, 35c, postpaid; larger plants each, 75c to \$3.00, by Express. Add 10c extra, each, if wanted in soil and paper pot, by mail.

Hydrangea

HARDY FLOWERING SHRUBS

CLIFFWOOD
GROWN

HYDRANGEA GRANDIFLORA

It is one of the finest, hardy shrubs in cultivation; flowers are formed in large, white trusses, often 6 to 10 inches in length; remaining in bloom until killed by frost. The flowers turn to rosy pink in fall. Hardy as oak and a profuse bloomer; grows about 6 feet high. The plant is of compact and sturdy habit, and when laden with its great masses of bloom is exceedingly striking and attractive. A universal favorite. Splendid for cemetery.

Each, 40c; 2nd size, 75c; 3rd size, 95c, postpaid.

SPIREA VAN HOUTTEI TRUE BRIDAL WREATH

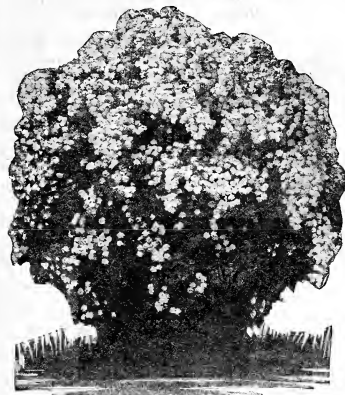

One of the most gorgeous sights of early spring are the long sprays of this beautiful shrub, covered with its effective, striking, white bloom. One of the wonders in this shrub is how such an immense mass of bloom is possible, let alone its habit of flowering simultaneously. Very hardy. (See illustration.)

Each, 35c; larger plants, 50c, postpaid.

SNOWBALL

Perhaps the best known of the hardy flowering shrubs. No better or more satisfactory, free-blooming shrub. Salzer's Cliffwood Grown Snowball becomes literally covered with large, white snowball flowers. The vigorous bushes are shapely, stately and attractive.

Flourish with small encouragement. The mass of white bloom makes a wonderful setting for the green lawn. Extremely hardy. Cliffwood shrubs retain their bloom longer than the same types that

Spirea van Houttei

are grown under less trying conditions. Beautiful for cut flowers and home decoration.

Each, 50c; larger plants, 85c, postpaid.

BUSH HONEYSUCKLES

TARTARICA (Tartarian Honeysuckle). Grows 5 to 6 feet high, and bears flowers in great profusion in late spring, of a beautiful pink color. The fruits are red and are very showy.

Price: Strong, heavy plants, 75c, each; 3 for \$2.00, postpaid.

HYDRANGEA ARBORESCENS

HILLS OF SNOW. This Hydrangea is one of the most beautiful of the hardy flowering shrubs. The plant, which attains a height of 3 to 5 feet, with near the same breadth, produces large trusses of beautifully formed flowers of snowy whiteness, rendering this a plant of exceptional beauty.

The profusion of bloom of this Hydrangea is unusual. There have been counted 100 good flowers on one plant—trusses measuring often 7½ inches in diameter. It is a shrub that begins to bloom early in summer and continues into fall, so that one can call it ever-blooming. (See illustration.)

Each, 50c, postpaid. Large plants: Each, 75c, by Express.

Hills of Snow

FOR A GORGEOUS, SHOWY MASS OF WHITE FLOWERS, PLANT SOME SPIREA VAN HOUTTEI

HARDY FLOWERING SHRUBS

CLIFFWOOD
GROWN

Persian Lilac

PERSIAN LILAC. Bears its enormous trusses often 10 inches long of purple color, strongly fragrant. This is generally considered the most beautiful of the Lilacs. The bushes are shapely and stately. (See illustration.)

PHILADELPHUS. The blossoms are large, pure white, waxy, of delicious orange fragrance, and borne in prodigious profusion; absolutely hardy, prized very much for its beautiful foliage and ornamental appearance. Grows to be about 4 to 6 feet.

BERBERIS THUNBERGH. This is the famous Japanese Barberry so generally used for hedges and shrubbery. Becomes literally covered with bright scarlet berries. Beautiful foliage turns to a delightful brilliant crimson in fall.

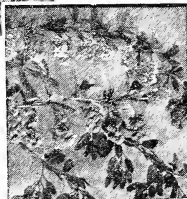

Price of above shrubs: 18-inch to 24-inch size, 45c each; 10 for \$4.00, postpaid. Large size, 24 to 36 inches, each, 70c; 10 for \$6.50 by express. Write for prices on extra large sizes of above.

Ampelopsis Veitchii

Shrubbery is of infinite value in beautifying one's grounds, whether they be large or small. If you should have only a small yard, a little shrubbery will greatly improve it. Whatever difficulties one may have had in the past in planting shrubbery, can be almost entirely eliminated by using our fine, hardy, vigorous, northern grown stock, listed on this and other pages. Combining the best qualities with low prices, they are splendid values.

SNOWBERRY. (*Symphoricarpos Racemosus*.) An extra fine dwarf shrub 3 to 5 ft. tall with small pink flowers and large white berries hanging on the plant late into the winter. A very attractive and striking ornamental shrub that succeeds well in almost any soil, semi-shaded. (See illustration.)

Snowberry

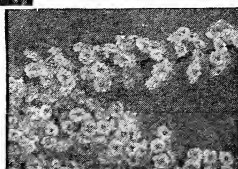

SPIREA ROSEA. Grows about 4 feet high. A strong grower with rich green foliage and dense panicles of bright pink flowers. Blooms from July on and is a gorgeous shrub. Very free blooming and showy. (See illustration.)

SPIREA ANTHONY WATERER. Blooming from July until killed by frost. The blossoms are large and of a bright rose color; perfectly hardy, generally known as the perpetual blooming red spirea. Bushes are round, very symmetrical, with the flowers growing in profusion in clusters around the bush. (See illustration.)

Anthony Waterer

DEUTZIA, PRIDE OF ROCHESTER. Perfectly hardy, large double white flowers, the back of the petals are slightly tinged with rose. Very free bloomer. It has a fine large flower, nicely formed on panicles of good length, producing a profusion of bloom. Unusually robust and hardy. Grows to about 3 or 4 ft.

Spirea Rosea

HARDY OUT-DOOR CLIMBERS

AMPELOPSIS VEITCHII

(BOSTON IVY)

It clings firmly to any wall or tree; needs no support. The leaves at first are of an olive green color, then brown, changing to bright scarlet in autumn. No climber just like it. It's handsome. Try it. (See illustration.) Each, 40c; 6 for \$2.25, postpaid.

AMPELOPSIS ENGLEMANII. One of the most magnificent of all Ampelopsis varieties, perfectly hardy, of luxuriant growth, covering walls and trellises with bright, shiny, overlapping foliage, brilliantly beautiful. Each, 40c; 6 for \$2.25, postpaid.

IVY, ENGLISH. A great revival for this universal favorite has broken out among American people. Everybody seemingly is buying the English Ivy! Each, 30c; large plants, 50c to \$1.00 each, postpaid.

FOR A BEAUTIFUL, HARDY HEDGE OF ROSES, SEE RUGOSAS ON PAGE 94

HARDY OUT-DOOR CLIMBERS

SALZER'S GENUINE CINNAMON VINE

This is one of the finest climbers. Leaves are beautifully heart-shaped and it has dainty flowers of the most exquisite cinnamon perfume. It is easily grown and is perfectly hardy. Also makes charming window plants, indoors or out. In winter they die down, but the roots are not harmed. We furnish tubers only, and they should be planted 8 inches or a foot apart, any time up to July, in rich, mellow soil, covering them about 2 inches. The vines sometimes do not bloom till second year. For house plants, dig up roots early in the fall, and expose in a warm, sunny place several weeks before potting.

Strong Tubers, each, 15c; 3 for 40c. Large Tubers, 25c each; 3 for 65c, postpaid.

CLEMATIS

CLEMATIS JACKMANNII. This clematis with its deep purple giant blossoms is easily one of the best of all Clematis. It frequently begins blooming the same season, and it is nothing unusual to find on a 3-year-old plant 100 or more blossoms at one time. The Jackmanni blooms early and continually. The blossoms are very large, thick in texture, and of rich, deep purple. Two-year-old strong plants, each, 95c; Extra strong plants, each, \$1.25, postpaid.

SNOWFLAKE. Very fine white variety, blooming freely, bearing many blossoms. Two-year-old strong plants, each, 95c; Extra strong plants, each, \$1.25, postpaid.

CLEMATIS PANICULATA

A vine of very rapid growth, quickly covering trellises and arbors with handsome, glossy green foliage. The flowers are of medium size, pure white, borne in sheets and of most delicious and penetrating fragrance. The extreme rapidity of growth, the showy foliage, beautiful and fragrant flowers and hardiness, serve to make this one of the very choicest climbers to grow. Each, 40c; 3 for \$1.10, postpaid.

VINCAS

Great vines for hanging baskets, vases, window boxes, etc. Green—Each, 20c; 2nd size, 35c; large size, 50c. Variegated—Each, 20c; 2nd size, 35c; large size, 50c, postpaid. Seed, pkt., 10c.

HONEYSUCKLES

ROYAL SCARLET. One of the best of all Honeysuckles, climbs rapidly, attaining often a height of twenty feet, and bearing innumerable bright scarlet, fragrant blossoms. Is extremely hardy and free blooming. Price: Each, 35c; 3 for \$1.00, postpaid.

GOLDEN BEAUTY. Bears very long, golden yellow blossoms in great profusion. Price: Each, 35c; 3 for \$1.00, postpaid.

SALZER'S HAPPY HOME PLANT COLLECTION

15 plants, \$1.50, postpaid

To meet the demand of our plant trade we are obliged to grow large stocks of all kinds of plants and bulbs to make sure that we have enough—so after the heavy spring business is about over, in May, we take this stock of choice plants of various kinds and make them into Happy Home Collections, our selections. You will find repeatedly in this Collection plants that are priced in the catalog at 25c to 50c each and higher. This Plant Collection will be sent by mail, postpaid, and all orders are booked and sent in spring at the close of our season, or earlier, as our stock permits. The illustration below shows some of the plants contained in this Collection at the zenith of their growth.

Price, 8 plants, 90c; 15 plants, \$1.50, postpaid

Field Seeds

**All Grains, Grasses and Clovers
Are Sold Bags Extra**

CONDITION OF SALE ON FIELD SEEDS

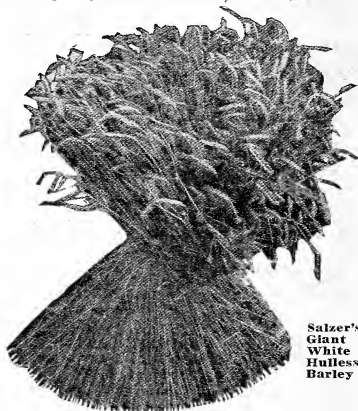

Recognizing that our customers have the opportunity of securing analysis and germination of any and all field seeds, we, John A. Salzer Seed Company, do not give, and our employees are forbidden to give, any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any field seeds and potatoes we send out and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they must at once be returned and money will be refunded. **The prices in this section do not include bags, except where so noted.**

SALZER'S GIANT WHITE HULLESS BARLEY

The demand for our seed barley is increasing each year as its fine qualities are becoming more and more widely known. Barley is very early, in some sections being ready for harvesting the end of June or the first of July; the yield is almost invariably good, being often more per acre than oats; its muscle and bone-producing qualities make it a splendid feed; it is one of the best nurse crops for grasses. Barley culture is similar to that of oats or spring wheat. Fall-plowed ground is preferable to spring plowing. Do the work shallow and harrow the ground thoroughly after seeding. Sow early, using 2 to 2½ bushels per acre for broadcasting.

We consider our Giant White Hulless Barley the best variety to grow. It is not a malting variety, but for feeding purposes is unexcelled for earliness, yield, and quality. Especially valuable in those sections where corn does not mature, as a bushel of White Hulless is equal to a bushel of corn for feed. White Hulless is six-rowed, but in threshing, the kernels shell out (without the hulls) and look like wheat. Yield frequently runs from 50 to 80 bushels per acre. Often grown for hay. The absence of beards makes it safe to feed to all kinds of stock, and it is of great nutritive value. (See illustration.) We ship this variety in cotton bags only.

4275—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; peck, 80c; bu., \$2.45; 2½ bu., \$6.00; 5 bu., \$11.75. Bags extra as noted below.

**Salzer's
Giant
White
Hulless
Barley**

SALZER'S BEARDLESS BARLEY

Salzer's Beardless Barley is one of the earliest varieties grown. It is six rowed and differs from the common sorts by its freedom from the troublesome beards. It is a safe barley feed for live stock.

Salzer's Beardless Barley is a vigorous grower, producing strong, short straw and heavy, well-filled heads, averaging about three inches in length. Being a very early variety, it can be cut and put out of the way before wheat and oats are harvested. It can be grown on most any kind of land. It will produce a good crop on light soils.

Salzer's Beardless Barley originated from a six-rowed Barley, and occasionally plants are found with beards.

It is growing in favor for feeding stock, especially hog feeding, and seems to be destined to fill the place occupied by corn in states farther south, as feeding trials with horses, cattle, sheep and hogs in the different western stations have demonstrated.

It is also very valuable as a nurse crop; does not stool as much as oats, it rarely lodges. (See illustration.)

4276—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; peck, 65c; bu. (48 lbs.), \$1.95; 2½ bu., \$4.75; 5 bu., \$9.25. Bags extra as noted below.

Four bushels of Barley can be packed in a bag.

SALZER'S SILVER KING

Silver King has proven to be one of the heaviest yielding 6-row bearded barley varieties ever grown. Is very early and of vigorous growth; straw is strong and stiff, and very seldom does a field of this barley lodge; ears are very long and well filled with plump and heavy, fine colored grain which is very rich in protein, making it most desirable for feeding purposes. Silver King is the best Barley to sow on heavy, rich soil, but it also thrives on warm, light soil, often outyielding other varieties. Because of its early maturity it is well adapted for the Northern States. Exceptionally heavy yields have been reported of Salzer's Silver King Barley.

4277—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; peck, 55c; bu. (48 lbs.), \$1.65; 2½ bu., \$4.00; 5 bu., \$7.75. Bags extra as noted below.

Bags extra on above: Jute, 1 to 2 bu. size, 25c; 2½ to 4 bu. size, 35c. Cotton, 1 bu. size, 30c; 2½ bu. size, 55c.

2 to 2½ bus. sow one acre

Barley (*Hordeum sativum*)

WISCONSIN PEDIGREE

The heaviest yielding variety of bearded barley grown and is the result of careful breeding at the Wisconsin Experimental Station. Our seed is fine, true-to-type stock and represents an unusual value. Wisconsin Pedigree Barley will out-yield the common varieties 10 to 20 bu. per acre. It grows taller than other 6-row sorts; it ripens uniformly and is noted for its stiff straw and plump kernels; the heads are unusually large and long; it is very attractive, being bright and whiter than most other sorts; it is a barley you can depend upon to produce a big crop. Why not plant a field of barley this year and reduce your acreage of corn which will have to be cared for all during the summer?

4232—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; peck, 50c; bu. (48 lbs.), \$1.35; 2½ bu., \$3.35; 5 bu., \$6.50. Bags extra as below.

ODERBRUCKER (Wis. No. 55)

A heavy yielding, stiff-strawed, bearded, 6-row variety. Oderbrucker is about the same as Mansbury in manner of growth, time of maturing, and general appearance, but has plumper kernels. It is very rich in protein, containing more than many other varieties, and is superior for stiffness of straw and rust resistance to any variety on test at the experimental station.

4281—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; peck, 45c; bu. (48 lbs.), \$1.25; 2½ bu., \$3.10; 5 bu., \$6.00. Bags extra as below.

Buckwheat

JAPANESE BUCKWHEAT

Buckwheat should be sown about the middle of June, sowing ½ to ¾ bushel per acre. Can be sown after a crop of winter wheat or rye; does well on light soils. Avoid any danger of buckwheat smothering as soon as possible.

Our Japanese Buckwheat is a very valuable and popular strain. The fertility of the soil can be retained by sowing it and plowing it under. Equally valuable as a cleaning crop. The large grains are a rich dark color and have a thin hull. Very hardy and productive. It is a cool season crop, and one which may be sown very late in the season and still yield good returns.

About a week earlier than Silver Hull, and on that account can be grown farther North.

4329—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 65c; bu. (50 lbs.), \$1.75; 2½ bu., \$4.30. Bags extra as below.

SILVERHULL BUCKWHEAT

Little later and with smaller grains than the Japanese, but nevertheless equally as productive; millers like it, claiming that there is little waste to it and it makes white and very nutritious flour. Grain is a beautiful light gray color and thin hulled. Exceptionally fine for bees.

4331—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 65c; bu. (50 lbs.), \$1.70; 2½ bu., \$4.20. Bags extra as below.

COMMON BUCKWHEAT

4332—Price, not prepaid, per 100 lbs., \$3.35. Bags extra as below.

Common Flax

In procuring flax seed, be sure you get good, healthy, clean seed. Our clean and new land, at a price which is very reasonable.

4450—Price: Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., \$1.15; bu. (56 lbs.), \$3.50; 2½ bu., \$8.65. Bags extra as below. Flax can only be shipped in cotton bags. See footnote below.

We offer clean and healthy seed only, of the best quality, growed

1 Peck Plants one acre in drills

Fodder Corn

56 lbs. in one bushel!

SALZER'S EARLIEST RIPE FODDER

We consider Salzer's Earliest Ripe Fodder Corn the earliest of all fodder corns; it comes at a time when fodder is always scarce on the farm, during those hot weeks and months when an acre of corn, of rich, nutritious food, is worth lots of money. It ripens in about 70 days.

If you plant this corn early, you will have fine feeding corn by July and August when you can replant same, and have good Fodder Corn in September and October.

This Corn ripens ears earlier than any Fodder Corn we know of and produces usually a sure ear on every stalk. The stalks are generally about six feet high, or more, very leafy and bushy, and contain a large amount of nutritious food. Of course, this is true as prolific as our Salzer's Superior Fodder Corn, but has the advantage over any and every other Fodder Corn by its being upwards of thirty days earlier. You can easily figure out the great profit in having a Fodder Corn so extremely early, coming at a time when pasture is short. South Dakota grown seed.

4382—Lb., 25c, postpaid. Price, not prepaid: Lb., 25c; pk., 80c; ½ bu., \$1.50; bu. (56 lbs.), \$2.45; 2½ bu., \$6.00; 5 bu., \$11.90; 10 bu., \$23.50. Bags extra as below.

SALZER'S MID-SUMMER FODDER

Fodder Corns should be largely planted by every farmer, as it is hard to beat them for large yields of valuable forage under varied soil and climatic conditions. Used for forage, hay, and ensilage, it provides you with a cheap supply of nutritive and healthy food throughout the year for your cattle and live stock. When preserved as ensilage, it can be stored more cheaply in less space than perhaps any other feed; it is always ready to feed; it keeps indefinitely.

Our Mid-Summer Fodder Corn is unexcelled as a fodder or silo crop. It is of great tendency, it silos well, it increases the flow of milk and improves the quality. Invariably produces a heavy yield, with leafy, bushy foliage, and is eaten without any waste. South Dakota grown seed.

4383—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 70c; ½ bu., \$1.20; bu. (56 lbs.), \$2.10; 2½ bu., \$5.20; 5 bu., \$10.25; 10 bu., \$20.00. Bags extra as below.

SALZER'S SUPERIOR FODDER

The growing of corn on a fair proportion permits the keeping of more cattle and so increases your revenue, as well as providing you with plenty of manure, so necessary for the soil. When other crops fail and it is too late to plant anything else, fodder corn can always be grown and will give you a paying crop and fine feed for your stock. Plant our splendid Superior Fodder for late use. It is one of the most popular and satisfactory of all ensilage corn. It grows to a large size; it is very leafy and splendidly adapted for ensilage; it is rich, juicy, sweet, and sugary with a tendency to mature several ears.

4384—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 60c; ½ bu., \$1.00; bu. (56 lbs.), \$1.75; 2½ bu., \$4.30; 5 bu., \$8.50; 10 bu., \$16.75. Bags extra as below.

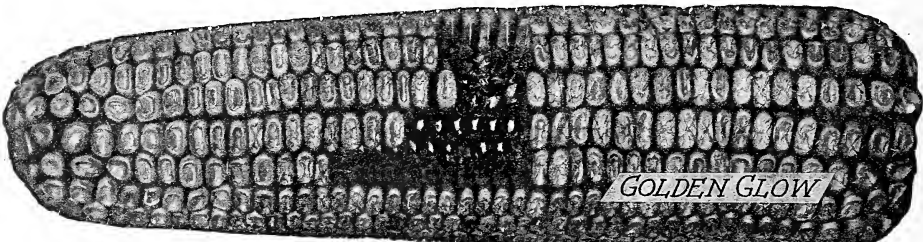

NOTE—We recommend growing Soy Beans for silage as well as Corn. See Page 105 for description of Soy Beans. About two-thirds Corn and one-third Soy Beans will make a perfect ration for your cattle, as the Soy Beans supply the protein the corn lacks. They may be grown in the same row as the Fodder Corn, or separately.

Bags extra on above: Jute, 1 to 2 bu. size, 25c; 2½ to 4 bu. size, 35c. Cotton, 1 bu. size, 30c; 2½ bu. size, 55c.

8 lbs. plant one acre in hills

CORN

(Zea indentata)

For half a century we have made the careful growing and selecting of Seed Corn one of our specialties, and the particular buyer will find splendid values in the following varieties, which are of exceptional quality and reasonably priced. We hand pick all of our corn, with the exception of the Flints, Podder, White Cap, and Northwestern Dent. This assures your getting the best, true to type seed, which will return the heaviest yields of uniform ears and kernels. We urge you to order early, before any of our fine stocks become exhausted.

SALZER'S EXTRA EARLY NORTHWESTERN DENT

It is the earliest and hardiest Dent Corn grown and can be reasonably relied upon to mature every season in the Dakotas, Northern Minnesota, Wisconsin, Montana, Michigan and Manitoba, even when other corn fails. The stalks grow about seven feet high and the ears are borne over three feet above the ground, allowing the use of a corn harvester. The ears are of good size, from seven to ten inches long, have a thin cob and ten to fourteen rows of very fine, large kernels of red color with a yellow cap of slight variation. Very productive. Matures in about 75 to 85 days. Much is planted late when other corn has been destroyed; if planted as late as July it has a good chance to mature in many localities before frost; it is also planted for early feeding, and where the corn is hogged down. Grown for fodder purposes, Northwestern Dent ranks exceptionally high.

4371—MINNESOTA GROWN—Price: Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., \$1.15; ½ bu., \$2.00; bu., \$3.85; 2½ bu., \$9.65; 5 bu., \$19.00; 10 bu., \$37.50. Bags extra as below.

4372—SOUTH DAKOTA GROWN—Price: Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 90c; ½ bu., \$1.60; bu., \$2.90; 2½ bu., \$6.85; 5 bu., \$13.50; 10 bu., \$26.50. Bags extra as below.

IOWA GOLDMINE

This Corn ripened thoroughly in Southern Wisconsin, Kansas, Nebraska, Iowa and Illinois inside of 100 days. It is one of the most generally planted varieties in the corn belt. The ears are about 10 inches long and very symmetrical. The grain is very deep and of beautiful golden yellow color, and the cob is very thin. Iowa Gold Mine is a heavy cropper, and one of the most productive early varieties. Our stock is carefully grown, ear selected, hand picked.

DAKOTA, IOWA AND NEBRASKA GROWN

4417—Hand Picked, lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 90c; ½ bu., \$1.60; bu., \$2.90; 2½ bu., \$6.85; 5 bu., \$13.50; 10 bu., \$26.50. Not Hand Picked, 60c per bu. less. Bags extra as below.

SALZER'S NEW LEAMING

One of the best all around heavy yielding Dent Corns of today. Known everywhere as a heavy yielding yellow Corn. Produced 1.23 bushels on 10 acres. Ears about 10 inches long; 12 to 20 rows, well filled with wedge shaped, reddish-yellow kernels of medium size. We have increased the size of the ear, its earliness and also the percentage of grain by careful breeding. Ripens in about 95 to 100 days. Ear selected, hand picked.

DAKOTA OR IOWA GROWN

4395—Hand Picked, lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 85c; ½ bu., \$1.60; bu., \$2.90; 2½ bu., \$6.85; 5 bu., \$13.50; 10 bu., \$26.50. Not Hand Picked, 60c per bu. less. Bags extra as below.

SALZER'S GOLDEN GLOW

(See illustration above.) A yellow dent variety of considerable prominence, individuality, immense productiveness, fine height, large superb ears, large kernels, small cob and attractive appearance. It is a splendid variety for both light and heavy soils. Has strong constitutional vigor. Matures in about 95 days. Has a record for yielding 164 bushels, 25 pounds, in Oconto County, Wisconsin. Won the sweepstakes at the International Corn Show as the best yellow dent for the Northwest.

A very early variety, maturing as far north as the central part of Wisconsin and the same latitude of Minnesota and South Dakota, although for years we have grown our seed farther north in the central part of Minnesota, northwest of St. Paul. It produces larger ears and is a heavier yielder than Wisconsin No. 8 and only a few days later, ripening in about 95 days.

The ears are of very attractive appearance, quite large, sixteen to eighteen rows, of symmetrical shape, well filled from butt to tip with good sized kernels of golden-yellow color, slightly rough on the outer end and free of flintiness. The stalks are about seven feet high, produce a large amount of foliage, making a splendid fodder and silage corn. Ear selected, hand picked.

WISCONSIN AND MINNESOTA GROWN

4391—Hand Picked, lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., \$1.25; ½ bu., \$2.25; bu., \$4.25; 2½ bu., \$10.60; 5 bu., \$21.00; 10 bu., \$41.50. Not Hand Picked, 60c per bu. less. Bags extra as below.

DAKOTA, IOWA AND NEBRASKA GROWN

4376—Hand Picked, lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 90c; ½ bu., \$1.60; bu., \$2.90; 2½ bu., \$6.85; 5 bu., \$13.50; 10 bu., \$26.50. Not Hand Picked, 60c per bu. less. Bags extra as below.

WISCONSIN No. 8 (Minn. No. 13)

Wisconsin No. 8 has been developed at the Wisconsin Experiment Station from the well-known Minnesota No. 13, which has a great reputation all through Minnesota, being considered one of the earliest and most productive of corns. The ears are of handsome appearance with sixteen to twenty rows of bright, rich yellow, smooth and plump kernels, which set compactly on the cob from butt to tip. The ears average eight inches in length and are frequently borne two on a stalk, which grows about seven feet high. They are very leafy and furnish great quantities of fodder. Wisconsin No. 8 will thoroughly ripen in 90 days and earlier if soil and season are favorable. There is no other yellow dent corn fully as early that is equal to it in productiveness. Our stock is Minnesota, Dakota, Iowa and Nebraska grown. Ear selected, hand picked. The ears resemble the Golden Glow, but are not as large or as long as the Golden Glow.

WISCONSIN AND MINNESOTA GROWN

4406—Hand Picked, lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., \$1.15; ½ bu., \$2.15; bu., \$4.00; 2½ bu., \$9.80; 5 bu., \$19.75; 10 bu., \$39.00. Not Hand Picked, 60c per bu. less. Bags extra as below.

DAKOTA, IOWA AND NEBRASKA GROWN

4410—Hand Picked, lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 90c; ½ bu., \$1.60; bu., \$2.90; 2½ bu., \$7.40; 5 bu., \$14.70; 10 bu., \$29.00. Not Hand Picked, 60c per bu. less. Bags extra as below.

acre in hills

CORN (Zea indentata)

REID'S YELLOW DENT

This is one of the most largely grown yellow varieties throughout the corn belt and one of the best varieties for Iowa, Illinois, Nebraska, Kansas and other states in the same latitude. A splendid variety for farmers who sell corn on the ear, as the ears are uniform in size, type and color. They are covered with eighteen to twenty-four rows of deep grain, no space lost between the rows, and are of light golden-yellow color and about nine to eleven inches long, the cob is very thin. It matures in about 115 days. Our stock is exceptionally choice, grown from selected ears only and is sure to please the most particular. Ear selected. Hand picked.

DAKOTA OR IOWA GROWN

4318—Hand Picked, price: Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., 90c; ½ bu., \$2.00; bu., \$2.75; 2½ bu., \$6.95; 5 bu., \$13.25; 10 bu., \$26.00. Not Hand Picked, 60c per bu. less. Bags extra as below.

MINNESOTA WHITE DENT

The earliest pure white dent corn, maturing in about 90 days, almost as early as Northwestern Dent, adapted for North Dakota, Northern South Dakota, Minnesota and Wisconsin. Yields much larger crops than yellow varieties, equally as early, and can be planted on poor and thin soils and also on cold and wet ground. The ears are of good size, usually eight inches long; the kernels are long and deep, growing very compactly round the cob. The stalks average about six and one-half feet in height, have large and heavy foliage, making an unusually fine fodder. Ear selected. Hand picked.

MINNESOTA GROWN

4394—Hand Picked, lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., 1.17; ½ bu., \$2.25; bu., \$4.00; 2½ bu., \$9.80; 5 bu., \$19.50; 10 bu., \$35.50. Not Hand Picked, 60c per bu. less. Bags extra as below.

SANFORD'S WHITE

Matures in about one hundred days. Very large ears, 12 to 15 inches long, of symmetrical shape and flinty white color. The stalks are tall, leafy and generally produce 2 or 3 ears. Largely grown by dairy farmers for fodder. South Dakota grown.

4355—Lb., 30c, postpaid. Price by freight: Lb., 25c; pk., \$1.00; ½ bu., \$1.75; bu., (\$6 lbs.), \$3.25; 2½ bu., \$8.00; 5 bu., \$15.75; 10 bu., \$31.00. Bags extra as below.

LONGFELLOW YELLOW

Ripens in about 90 to 95 days. The ears are from 10 to 15 inches long. The cob is small, kernels large and broad. The corn is adapted to the Northwest, and has often produced 200 bushels of ears to the acre. Stalks 7½ feet high, ears 8-rowed of glossy yellow color, which set about 3 feet from the ground. South Dakota grown.

4363—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., \$1.00; ½ bu., \$1.75; bu., (\$6 lbs.), \$3.25; 2½ bu., \$8.00; 5 bu., \$15.75; 10 bu., \$31.00. Bags extra as below.

Bags extra on above: Jute, 1 to 2 bu. size, 25c. Cotton, 1 bu. size, 30c; 2½ bu. size, 55c.

Sow about 1½ bu. per acre

Wheat

MARQUIS

It out-yields any other Bald Spring Wheat grown under the same conditions. Farmers who need new strains of Wheat can ill afford not to grow Marquis. This variety holds the World's Championship for the best appearing and best milling wheat. Originally introduced from Canada, where early ripening Wheats are an absolute necessity.

Marquis is a cross between Calcutta, Hard Red and Red Pife, a combination of earliness, yield and high quality. Kernels are beautiful dark red, hard, of large size, attractive shape and color. Heads are exceptionally large, bearded and practically rust proof. Smooth, yellow chaff which hugs the kernels closely thus resisting frost. Does not thresh out in the wind. Straw medium in height and very stiff. One other point, viz—no matter what the growing condition, no matter how miserable the size—Marquis kernels usually retain their plumpness—hence the secret of its high milling value.

4751—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; peck, 75c; bu. (60 lbs.), \$2.45; 2½ bu., \$6.00; 10 bu., \$23.50.

EARLY JAVA OR BEARDED JOHNSON

Its points of merit are many, principally its extreme earliness, being earlier than Marquis. It has a very stiff straw with well-filled, long-bearded heads. The berry is round and plump. It is extremely hardy and of a first-class milling quality. It is a splendid yielder. Sow 1½ bu. per acre.

4744—Price: Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; peck, 80c; bu. (60 lbs.), \$2.40; 2½ bu., \$5.85; 10 bu., \$23.00.

MACARONI OR DURUM

The exclusive advantages of this variety are its great drought resistance and rust proof characteristics. The manufacture of Macaroni and by-products keep it in great demand. Its productiveness makes it one of the most profitable wheats to grow.

Macaroni Wheat has compactly formed, bearded heads; the grain is large, hard and glossy, of yellowish color, often translucent. The grain is very large and does not stool very heavily.

4750—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; peck, 80c; bu. (60 lbs.), \$2.25; 2½ bu., \$5.50; 10 bu., \$21.50.

BLUE STEM AND MARVEL WHEAT

As Marquis has taken the place of these varieties almost entirely, we have decided this year to omit Blue Stem and Marvel Wheats from our Catalog.

SILVER KING (Wisconsin No. 7)

In Wisconsin, where it is adapted to only part of the state, about one-third of all the corn grown is Silver King. It is a corn for the extreme Southern Minnesota, South Dakota, Northern Iowa and Illinois, and the lower one-third portion of Wisconsin, we have no other corn, either yellow or white, equally as early that will produce as sure and as large a crop as Silver King, or a better or more leafy silage corn.

Ears averaging eight to nine inches are always filled out clear to the tips and very uniform in size and type. The corn is pure snow white in color with kernels of good length set compactly in straight rows. The corn is a strong grower, ripens in about 160 days. Ears selected. Hand picked. (See illustration.)

MINNESOTA GROWN

4400—Hand Picked, lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., \$1.25; ½ bu., \$2.25; bu., (\$6 lbs.), \$4.25; 2½ bu., \$10.60; 5 bu., \$21.00; 10 bu., \$41.50. Not Hand Picked, 60c per bu. less. Bags extra as below.

SOUTH DAKOTA GROWN

4414—Hand Picked, lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., 85c; ½ bu., \$1.50; bu., (\$6 lbs.), \$3.00; 2½ bu., \$7.40; 5 bu., \$14.70; 10 bu., \$29.00. Not Hand Picked, 60c per bu. less. Bags extra as below.

SILVERMINE WHITE DENT

More largely grown throughout the corn belt than any other white variety. A very uniform cropper, has produced often over 100 bushels per acre; ripens in about 110 days. Creamy white, cylindrical shaped ears, 9 to 10 inches long with 18 to 20 rows of deep kernels; cob, small and white. Ear selected, hand picked.

Dakota or Iowa Grown

4401—Hand Picked, lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., 90c; ½ bu., \$1.60; bu., (\$6 lbs.), \$3.00; 2½ bu., \$7.40; 5 bu., \$10.60; 10 bu., \$29.00. Not Hand Picked, 60c per bu. less. Bags extra as below.

DAKOTA WHITE

About as early as Gehl, ripens in 60 to 70 days. Very dwarf; small ears. Suitable for early hog feed and for late planting to hog-off in fall. North Dakota grown.

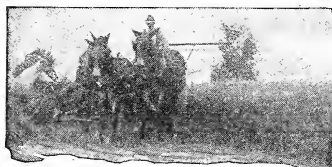

4350—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., \$1.14; ½ bu., \$2.00; bu., (\$6 lbs.), \$3.50; 2½ bu., \$8.00; 5 bu., \$17.00; 10 bu., \$33.50. Bags extra as below.

SOUTH DAKOTA YELLOW

Ears large, bright yellow color, kernels fair size, eight thickly set rows to a cob; very productive, yielding often 160 bushels baskets per acre. Ear is 12 to 15 inches long. The average height of the stalk is 18½ feet, while the ears set about 2 feet from the ground, maturing in about 90 days. South Dakota grown.

4357—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; pk., \$1.00; ½ bu., \$1.75; bu., (\$6 lbs.), \$3.25; 2½ bu., \$8.00; 5 bu., \$15.75; 10 bu., \$31.00. Bags extra as below.

Bags Extra: Cotton, 1 Bu. Bag, 30c;
2½ Bu. Bag, 55c

A Field of White Bonanza Oats

Oats

2 to 3 Bu. Sow One Acre

SALZER'S WHITE BONANZA

Sow Salzer's Tested Seed Oats this year and have better crops than you ever grew before. Our White Bonanza is a late variety, extremely productive, with strong, stiff straw, bearing long heads filled with good-weight grain. It has demonstrated its ability to produce fine crops on sandy land and on the grain producing prairie soils. A dependable oat that ripens in about ninety days, of branching habit and with stiff straw that will not lodge easily. This variety is hardy, having been grown successfully in Canada, in sections about 1,000 miles northwest of La Crosse. "Bonanza" is our own Registered Trade Mark; no one else has the right to use it. (See illustration.)

If your own Oats are badly stained, run out, or light weight, you cannot afford to sow them when you can get Salzer's White Bonanza,—clean, bright, heavy seed oats. Although a trifle higher priced, their exceptional quality represents a splendid value.

4614—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 55c; bu. (32 lbs.), \$1.60; 2½ bu., \$3.75; 5 bu., \$7.00.

WISCONSIN PEDIGREE No. 7

An extremely early, hardy oat, developed by the Wisconsin Experimental Station. The straw is unusually stiff, being perhaps the stiffest of any oat. Like all oats of the Kherson type they are valued for their extremely heavy yields. It is a yellow oat, bright, shiny, thin hulled, very meaty, unusually heavy and very early.

4623—Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; pk., 45c; bu. (32 lbs.), \$1.20; 2½ bu., \$2.90; 5 bu., \$5.50.

WISCONSIN PEDIGREE No. 1

This fine variety originated at the Wisconsin Experimental Station, and is one of the most sought after of all oats.

It stands up better on rich river bottom land where other varieties usually lodge. Its strong, vigorous root system enables it to withstand drought. Its coarse, stiff straw permits it to stand up well on rich manured land. Especially recommended for following cultivated crops.

At the Wisconsin Station farm it yielded as much as 110 bushels per acre or 32 per cent more than the average of 42 other varieties. It is earlier than the Swedish Select, has shorter and stiffer straw, and does not lodge easily. Fine plump kernel. Very bright color.

4620—Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; pk., 40c; bu. (32 lbs.), \$1.25; 2½ bu., \$3.00; 5 bu., \$5.75.

SALZER'S 60 DAY, JULY OR KHERSON

Maturing as it does in July, it admits of very early harvesting.

In North Dakota 60-Day Oat headed the list of varieties on trial. In Canada the Secretary of the Saskatchewan Grain Growers reported he secured 126 bushels per acre.

Salzer's 60-Day is a small, yellowish oat that weighs about 34 pounds to the bushel; it has a very thin hull and is practically all meat. The straw is short, stiff, and does not lodge. These oats are not very attractive looking. Do better in a dry season than any other variety we know of.

4616—Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; pk., 50c; bu. (32 lbs.), \$1.20; 2½ bu., \$2.90; 5 bu., \$5.50.

Bags
Extra
as
Below

IOWAR

This is the best oat ever developed by the Iowa Experimental Station. It is of the Kherson type, but newer than Iowa 103 or Iowa 105. Iowar is of a fine, white color, has wonderfully stiff straw, quite short, and ripens extremely early. Has given heavy yields in the large number of tests made throughout Iowa and Wisconsin and is better suited to Wisconsin conditions than Iowa 103 which has always given splendid results here. The yield is invariably very satisfactory, running 80 bushels and over, per acre. We recommend this variety very highly and having once grown Iowar, you will be delighted with it and will praise it as highly as the next one.

4624—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 50c; bu. (32 lbs.), \$1.15; 2½ bu., \$2.75; 5 bu., \$5.25.

WISCONSIN No. 5

A splendid variety for upland soils and poor land. The kernel is large, plump and of high nutritive value; of medium length, with a hull a trifle thicker than the Swedish. Straw is very strong, does not lodge easily and the panicles are large and always well filled. It is a medium maturing type. Rust resistant and not easily susceptible to smut. Has a strong root system. Withstands extreme drought.

4621—Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; pk., 45c; bu. (32 lbs.), \$1.20; 2½ bu., \$2.90; 5 bu., \$5.50.

SALZER'S SILVERMINE

This variety is reputed for its heavy yields, and is a fine, attractive white oat, growing robust and vigorous and lodges seldom. The heads are borne low on strong, stiff straw which is unusually bright and clean.

The kernels are white, plump, heavy and thin hulled. Endures extremes of dry, wet, hot and cold weather. Immune to a marked degree against the ravages of insects.

4615—Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; pk., 40c; bu. (32 lbs.), \$1.15; 2½ bu., \$2.75; 5 bu., \$5.25.

SALZER'S BIG FOUR

Big Four Oats has wonderfully stiff straw, withstanding severe winds to a marked degree. This Oat, more than most other varieties, withstands bugs, insects, etc., and stands up, growing vigorously, when many other varieties succumb to their ravages. It ripens early—a most desirable feature.

The kernels are a beautiful white, plump and long. Thin hull and very meaty. The straw is bright, clean, erect and highly valuable as forage for stock.

4606—Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; pk., 40c; bu. (32 lbs.), \$1.15; 2½ bu., \$2.75; 5 bu., \$5.25.

SALZER'S WHITE KHERSON (IOWA 103)

A grand oat which has twice carried off sweetstakes at the International Dry Farming Congress. Extremely early; splendid nurse crop; permits early harvesting and late sowing of other crops. Kernels are slender, plump, white, and thin-hulled. Heavy yielder.

4622—Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; pk., 40c; bu. (32 lbs.), \$1.15; 2½ bu., \$2.75; 5 bu., \$5.25.

To above prices, add bags: 1 Bu. Jute, 15c; 2 Bu., 25c; 3 to 5 Bu., 35c; 3 Bu. Cotton, 55c.

Sow 60 to 80
lbs. per acre

Spring Speltz, or Emmer

Bags Extra As
Noted Below

Speltz, also known as Emmer, is adapted to a wide range of soil and climate, it resists extremes of weather, it is of excellent feeding value and it yields much more heavily than Oats or Barley. Speltz is comparatively new in this country, but each season emphasizes its value and sees the production increasing. It is a Russian cereal closely resembling Barley, altho it is a species of Wheat. It is a harder plant than wheat and will give better results on poor soil and in a cold, dry climate, than any other cereal. The straw is shorter and stands up better, it is more drought, rust and smut resistant than wheat, and it is not as easily damaged by rain in wet districts during harvest time.

Let Salzer's Speltz help you cut down your feed bills by giving you heavy yields of the most nutritious feed. It will grow any place on earth where grain can be raised and it grows where wheat, oats and barley would be a failure; it is the most profitable hay and grain food on earth; it ripens early and neither rusts, blights, nor lodges; it is relished by all classes of stock; it is splendid for hay and fattens in the green state; it is a sure crop, hardy and prolific; it outyields wheat or barley and is a better feed; it is good for pasture and is a heavy stooler; after harvesting a heavy crop of grain you have the straw, which makes good winter roughage; if you are caught in a pinch without hay, speltz makes good; it is rich in protein, and all live stock, cattle, hogs, poultry, etc., relish and thrive on it.

Salzer's Speltz or Emmer is the best investment you can make, Mr. Farmer, and once planted on your farm, you will never be without it. Sow on ground prepared as you would for barley, wheat, or oats, either broadcast or drill, at the rate of 60 to 80 lbs. Frost will not damage early planting. Cut the grain when it is a little past the milk stage, when it will make a splendid grain and lots of straw. We ship Speltz in Jute Bags.

4697—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 25 lbs., \$1.25; 50 lbs., \$2.00; 100 lbs., \$3.25; 500 lbs., \$16.00.

SPRING RYE SALZER'S PROLIFIC

Rye produces a crop that can be relied upon regardless of drouth, wet, cool, or excessive heat conditions and many weed-infested farms have been cleared by growing this grain. As a fertilizer it is a wonder; it can be grown on thinner land than other cereals; as a feed for growing pigs, you cannot beat rye. If you have any thin clay points on your farm, there is the place to plant rye. Don't let any land go to waste. Sow it at the same time as Spring Wheat, using about 1½ bu. per acre. Often sown later on as a catch crop, where winter grain has been killed out.

4672—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; pk., 75c; bu. (56 lbs.), \$2.50; 2½ bu., \$5.75. Bags extra: Cotton, 1 Bu. size, 30c; 2½ Bu. size, 55c.

Bags Free SUNFLOWER Bags Free For the Silo

Produces an enormous tonnage of from 20 to 30 tons per acre. Fed to dairy cattle, it is found to be satisfactory in every way. The cows relish it and produce practically as much milk as when fed on the other ensilage. Especially valuable in those sections having dry seasons, and in the high altitudes of the Northwest and Western Canada. The seed is valuable as a poultry and hog feed. Sow any time before the middle of July, in rows far enough apart to permit cultivation. Use 5 lbs. per acre. Cultivate and harvest the same as corn.

4704—Lb., 40c, postpaid. Price, not prepaid: Lb., 35c; 5 lbs., \$1.25; 10 lbs., \$1.90; 25 lbs., \$3.15; 50 lbs., \$5.50; 100 lbs., \$9.50.

Canes

Canes and Broom Corn shipped
in Cotton Bags only.

SALZER'S EARLIEST KAFIR

The canes are wonderfully productive and of great value as a forage, ensilage, or grain crop in dry sections.

Grows five to seven feet high, making a straight, upright growth; it has a strong stem with wide leaves. The stalks contain considerable sweet sap and remain green until the heads are fully matured; for this reason Kafir Corn is preferred as a forage crop. It does well as far North as South Dakota. Matures in about 130 days.

4345—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 10 lbs., 75c; 50 lbs., \$2.50; 100 lbs., \$4.00. Bags extra as below.

FETERITA

It has proven one of the best forage crops, for dry lands, known today. It produces a stalk of medium height and size, bearing ten to twelve leaves of medium size and a large head, well filled with pure white or bluish white seeds. The grain is fully as soft and much whiter than Kafir Corn. Feterita is an excellent drought resister. In some instances it made excellent crops without receiving any rain from the day it was planted, until harvested. It stands erect, branches out from the root and matures about twenty-five days earlier than Kafir Corn.

4340—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; 10 lbs., 90c; 50 lbs., \$2.60; 100 lbs., \$4.35. Bags extra as below.

SHROCK KAFIR-SORGHUM

It is of dwarf growing habit, very stalky and a great stooler. Highly nutritious as a silage. Grows from 3½ to 5 feet high. Very easy to handle in harvesting. One seed often produces 4 or 5 shoots. It never lodges or droops its heads. Sow 10 lbs. per acre.

4338—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; 10 lbs., \$1.00; 50 lbs., \$4.00; 100 lbs., \$7.50. Bags extra as below.

BROOM CORN

Broom Corn for making brooms can be grown where corn grows; requires the same cultivation, but should be planted later. Plant in drills 3 to 3½ feet apart, the plants 2 to 3 inches apart in the rows according to height. Ten lbs. of seed are sown per acre. "Broom Corn and Brooms"—A good book for \$1.20 postpaid.

STANDARD EVERGREEN. Produces fine heads 20 to 25 inches long, of even size and growth and free from crooked ones. Broom makers claim it as one of the best they ever saw. Grows about 10 to 12 feet high. Will not get red, but is strictly a green variety. Used for medium and large sized brooms.

4324—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 10 lbs., 85c; 50 lbs., \$3.50; 100 lbs., \$6.25. Bags extra as below.

DWARF EVERGREEN. A most valuable variety, very early. Average height, 5 feet; brush 18 to 20 inches long and well fibred, used for whisk brooms, the highest priced brush.

4322—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 10 lbs., 95c; 50 lbs., \$3.75; 100 lbs., \$6.75. Bags extra as below.

Bags extra on above: Jute, 25 to 50 lb. size, 25c; 60 to 125 lb. size, 35c. Cotton, 50 lb. size, 30c; 60 to 125 lb. size, 55c.

Sorghum Cane (Holcus)

SALZER'S EARLIEST SWEET AMBER OR SORGHUM

For selling or green feeding it is one of the best that can be used to feed growing animals and also dairy cattle on account of the large flow of excellent milk which it will produce.

Salzer's Earliest Sweet Amber or Sorghum makes a good summer pasture for sheep and hogs. The hay is very palatable and nutritious and is relished by all kinds of stock. Cut when heading out, leave for two or three days on the ground and then put up in shocks of about one load each. Unexcelled as a catch crop.

The Silage made of Salzer's Earliest Sweet Amber or Sorghum is wholesome and nutritious. Cow-Peas and Soy Beans are quite often mixed with cane for the silo. This will greatly increase the feeding value. The seed has about the same nutritive value as corn. Requires 70 to 80 days to mature.

4341—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 10 lbs., 80c; 50 lbs., \$2.50; 100 lbs., \$4.00. Bags extra as noted below.

WISCONSIN GROWN EARLY AMBER

In Wisconsin, Northern Iowa, Minnesota, the Dakotas and other Northwestern States, Cane to ripen must be Northern Grown. Aside from this the making of molasses for sale and home use has reached immense proportions and it has been shown that Northern Grown Amber Seed produces the best molasses cane.

4343—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 10 lbs., \$1.00; 50 lbs., \$3.50; 100 lbs., \$6.00. Bags extra as noted below.

SUMAC SORGHUM CANE

This variety is the most extensively grown type in the southern half of the United States. It is almost as sweet, leafy and a larger yielder than Salzer's Earliest Sweet Amber or Sorghum.

4339—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 10 lbs., 90c; 50 lbs., \$2.75; 100 lbs., \$4.15. Bags extra as noted below.

INOCULATING

Legume Inoculation HUMOGERM

BACTERIA

MAKES

MORE DOLLARS PER ACRE AND THE ACRES WORTH MORE DOLLARS ECONOMICAL AND EASY TO USE

Inoculate your legumes, such as Peas, Beans, Clovers, Alfalfa, Vetch, Alsike, Soy Beans, etc., with this inexpensive, highly-bred, nitrogen gathering bacteria. All agriculturists advise inoculation, even where legumes are at present grown without being inoculated. Humogerm inoculated roots will deposit 150 to 200 lbs. of nitrogen to the acre—equivalent to $\frac{1}{2}$ ton nitrate of soda. In this way you secure fertility for succeeding crops for almost nothing. Humogerm Bacteria builds root nodules, fills them with nitrogen, and after the crop is harvested, they rot and greatly enrich the soil for future crops. For a few cents, you put the wonderful powers of Nature at work enriching your soil, and she enriches it to a marvelous degree. Inoculation is simple and there are full directions on each package. Order by number according to the crop and number of bushels you wish to inoculate. Note our very low prices.

30 to 40 lbs. sow one acre
when used with grain

Sand Vetch (Hairy Vetch)

INOCULATE THIS
SEED WITH
HUMOGERM

Also known as Winter Vetch. For soil improvement, there is hardly any crop that fits in so well under all conditions as Vetch. It is a heavy carrier of root tubercles and these increase in cold weather more than on any other legume. It will do well on poor lands where clover would fail. It needs a good seed bed with plenty of moisture to begin with, but when once established it will stand almost any degree of heat, cold, or drought.

Salzer's Vetch will furnish an early spring forage crop in almost every section of the United States, supplying a very succulent forage from early spring until late fall, and will remain green under the snow all winter and give your stock the first green forage in early spring. It is a heavy yielder and our Sand Vetch will do well on sandy soils. Plant at least an acre to Vetch this year, and you will not regret it. Order early, as it is short this year.

Sow Sand Vetch in Spring or Fall at the rate of 40 pounds Sand Vetches with about $\frac{1}{2}$ bushel of Barley or Oats in Spring and Winter Eye in Fall To seed Vetch with a nurse crop has always given the best results. If wanted alone, sow Vetch at the rate of 40 to 60 pounds per acre broadcast, or less amount in drills 30 inches apart.

4727—Lb., 35c, postpaid. Price, not prepaid: Lb., 30c; 10 lbs., \$2.50; 25 lbs., \$5.50; 50 lbs., \$10.00; 100 lbs., \$18.50. Bags extra as noted below.

SPRING VETCHES OR TARES

Like Alfalfa, the superiority of Vetches for feeding lies in the great amount of protein it contains. As in Alfalfa, its huge soil restoring capacity is one of its greatest values. It is not only highly relished as a fodder and grain crop, but it increases the milk supply of milch cows and produces flesh very rapidly in stock. Rapidly in growth and extreme hardiness render it peculiarly suitable to sections with short seasons. Its immense productivity makes it one of the most economical crops to grow. Spring Vetch is an annual. It should be sown early in spring, at the rate of 60 to 80 lbs. per acre. If sown in connection with oats, use 50 lbs. Spring Vetches to 32 lbs. oats per acre.

4730—Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 10 lbs., \$1.50; 50 lbs., \$5.25; 100 lbs., \$9.25. Bags extra as noted below.

Bags extra on above. Cotton, 50 lb. size, 30c; 60 to 150 lb. size, 55c.

Sow 60 to 70 pounds per acre broadcast, 4 to 6 pounds in rows with corn, 2 to 3 pecks in drills alone

Soy Beans

INOCULATE THIS SEED WITH HUMOGERM

Soy Beans are rapidly becoming regarded as one of the most profitable crops that can be grown, especially in the Corn Belt. Generally speaking, they require about the same temperature as corn. Being legumes, they are wonderful soil improvers; they may be used either as a hay crop, pasture crop, soiling crop, or for the grain. Under favorable conditions Soy Beans will produce 12 tons per acre of fresh fodder, rich in protein and fat, which makes an excellent forage to mix in with fodder corn. Will frequently produce 25 to 40 bushels per acre, of the richest possible foodstuff where grown for seed, and it is claimed that butter is more finely flavored when the cows are fed the ground seed. Very drought resistant and produces an abundance of nutritious feed when pastures are brown and dry.

Soy Beans make a good growth on poor soils, especially if inoculated; succeed on acid soil where clover and alfalfa will not do; will grow as far north and south as corn and cotton; they are a splendid rotation crop, either short or whole season; they are equal point for point to oil meal in feeding value; they build up the soil and are a splendid green manure crop; they may be cut for hay any time after the pods begin to form. Many of our customers grow Soy Beans with their corn, planting them at the same time, as they do not interfere with the cultivation of the corn. This gives them two crops at harvest time or they let the sheep or hogs in to feed on the beans. Sheep or hogs will leave the corn practically undisturbed until the beans are gone. A crop of Soy Beans grown on your land will prove one of the best investments you ever made.

ITO SAN

This is the standard, best known, and most widely grown. Early maturing (in about 140 days), grows 2½ to 3 feet high. The bean is yellow, it is immensely productive and fine to sow with corn for hogging or forage. Makes fine hay. Especially adapted to a northern latitude.

4304—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 15 lbs., \$1.50; 50 lbs., \$4.00; 100 lbs., \$7.00. Bags extra as below.

EARLY BROWN (Ohio 9035)

A Brown bean improved by the Ohio Experimental Station. It is probably the most important of the medium sorts. The plant is tall and leafy, fine for hay. Noted as a seed producer and does not easily shatter. Later, but larger than Ito San.

4305—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 15 lbs., \$1.45; 50 lbs., \$3.75; 100 lbs., \$6.50. Bags extra as below.

MEDIUM YELLOW

Popular throughout the Central States. Is quite early and produces a heavy crop of beans, which makes it desirable.

4302—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 15 lbs., \$1.45; 50 lbs., \$3.75; 100 lbs., \$6.50. Bags extra as below.

MANCHU

Seeds are yellow with a peculiar black seed scar. It is a medium variety, originally from Northern Manchuria, and larger and later than Ito San. The Wisconsin Experimental Station recommends this variety for hay and silage, and as being one of the best to plant with corn for silage. It is very popular.

4309—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 15 lbs., \$1.50; 50 lbs., \$4.00; 100 lbs., \$7.00. Bags extra as below.

BLACK EYEBROW

Seeds are black with brown saddle and black seed scar. It is also from Manchuria and about like Manchu in growth and date of maturing. Specially adapted to northern conditions for both grain and hay. One of the best for planting with corn.

4310—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 15 lbs., \$1.50; 50 lbs., \$4.00; 100 lbs., \$7.00. Bags extra as below.

SALZER'S EARLY BLACK

This variety is very much grown in Wisconsin, particularly in the northern sections, for forage and ensilage. The seed itself is jet black. Dwarf growing habit, hence not so much planted with corn.

4303—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 15 lbs., \$1.75; 50 lbs., \$4.50; 100 lbs., \$8.00. Bags extra as above.

MAMMOTH YELLOW

Popular in the Central States for forage and ensilage purposes. A later maturing variety than medium yellow. Popular in Illinois and Wisconsin for the heavy tonnage for ensilage purposes that can be grown per acre. One of the heaviest producers of fodder.

4305—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 15 lbs., \$1.45; 50 lbs., \$3.75; 100 lbs., \$6.50. Bags as noted below.

SOY BEAN MIXTURE

Produces a scientifically mixed blend of Soy Beans that for genuine merit will please the most exacting.

4308—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 15 lbs., \$1.45; 50 lbs., \$3.75; 100 lbs., \$6.50. Bags extra as below.

ALL PRICES IN THIS CATALOG SUBJECT TO CHANGE

Field and Cow Peas

INOCULATE THIS SEED WITH HUMOGERM

YELLOW CANADA FIELD

A variety of field peas grown throughout the north and northwest, also in Canada, a strain so hardy that they do well on any soil suitable for oats or spring wheat. Plowed under as a fertilizer, they rank next to Red Clover. They can be grown alone for fodder purposes and green manure, but for a dairy feed it is more profitable to mix them with oats, rye or barley, and to cut for hay when the oats are heading out. Hay is of the finest quality, and cattle, horses, and sheep thrive on it. Can be sown with oats at the rate of 2½ bushels of peas and two bushels of oats for a double crop, threshing at one time and separating with a cleaner.

4655—Lb., 25c, postpaid. Not prepaid: Lb., 20c; pk., \$1.50; bu. (60 lbs.), \$4.20; 2½ bu., \$10.35; 5 bu., \$20.50. Bags extra as below.

SALZER'S PROLIFIC COW PEAS

Rank with clovers as one of the best soil builders. Splendid for pasture, soiling and silage—all stock eat it and thrive on it, as Cow Peas have a very high feeding value. Like soy beans, they may be planted with corn, turning in pigs and lambs to eat the peas and then harvest the corn in the usual way. Although grown extensively in the South, they will grow fine in the corn belt and also further North. Sow from 1½ to 2 bu. per acre.

4644—Lb., 20c, postpaid. Not prepaid: Lb., 15c; pk., \$1.50; bu., \$4.60; 100 lbs., \$7.25. Bags extra as below.

4643—New Era. 4642—Clay. 4641—Black. 4640—Whip-poor-will. Prices of New Era, Clay, Black, Whip-poor-will, each variety, not prepaid: Pk., \$1.35; bu. (60 lbs.), \$4.50; 100 lbs., \$6.95. When stock of any sort are exhausted, we will fill with next best variety. Bags extra as below.

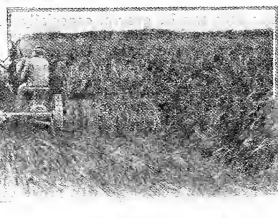

SALZER'S COW PEA MIXTURE

For pasturage, soiling, silage, hay or grain crop many of our most successful dairymen, stockmen and farmers prefer this mixture. 4647—Not prepaid: Pk., \$1.35; bu., \$4.50; 100 lbs., \$6.95. Bags extra as below.

Bags extra on above. Cotton, 1 bu. or 50 lb. size, 30c; 2½ bu. or 60 to 150 lb. size, 55c.

SALZER'S BILLION DOLLAR GRASS

(Panicum Crussgalli)

Salzer's Billion Dollar Grass

For hay, cut when in bloom—rather sooner than later, as it makes better hay without the seed heads than with them. The hay is then healthier and of finer quality; in curing, treat as you would a rich field of clover.

For feeding green—like all rich, luxuriant growing grasses and forage plants, Billion Dollar Grass should be fed in the green state moderately at first. Therefore, you should turn in your cattle and horses at first only after they have fed somewhere else, and thereby gradually accustom them to this.

Prof. Williams, of the United States Department of Agriculture, says: "Already widely grown as a hay crop, it deserves more general use for soiling, as this Grass is of particular value for feeding to dairy cattle, young stock and sheep. Panicum Crussgalli (Billion Dollar Grass) in many sections of the country can be made a supplement for pasture in such a way as to allow a material increase in the number of stock that can be kept on the farm. On account of the large yield and good quality of forage, it is most excellent for silo use, as frequently a good crop can be raised under conditions which would permit the growing of corn for ensilage. Compared with seed and forage, it will run ahead of timothy. The seed contains much fat, extract matter and protein."

Horses, mules, cows, calves, helters, sheep, hogs, poultry, geese, turkeys, etc., all relish, thrive and fatten on Billion Dollar Grass. It is undeniably one of the greatest and most economical farm crops in the world for all classes of farm animals. (See illustration above.) Billion Dollar Grass shipped in Jute Bags.

4462—Radium: Lb., 25c, postpaid. Price, not prepaid: Lb., 20c; 25 lbs., \$1.95; 50 lbs., \$3.50; 100 lbs., \$6.00. Bags extra as below.

4461—Superior: Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; 25 lbs., \$1.75; 50 lbs., \$3.25; 100 lbs., \$5.25. Bags extra as below.

SOW SALZER'S SEEDS

Since we became acquainted with your Billion Dollar Grass we find it the best big hay crop and stock prefer it to anything else. Robert Ballou, Morley, Mich.

I think your Billion Dollar Grass is a wonder. Albert Cowles, Westville, Ill.

Sow about 25 lbs. per acre

Millet

Millet shipped in Cotton Bags only.

SALZER'S EARLIEST RUSSIAN

It is two weeks earlier than German Millet, immensely prolific, has great stooing habits, is very leafy and bushy and full of rich green blades; one kernel has been known to produce upwards of fifty fine, strong stalks, just the size that are in great demand and eagerly eaten by cattle. It is not an uncommon thing to cut three to four tons of hay per acre.

Salzer's Earliest Russian Millet will make a magnificent crop of hay if sown immediately after your oats, or barley, or rye, or wheat is cut, as it will ripen in between 60 and 75 days.

This millet stands the hot dry winds of the Dakotas, the burning prairies of Kansas better than other varieties and flourishes on the heated soils of Western Nebraska and Colorado. The seed is orange red.

4570—Radium: Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; 15 lbs., \$1.00; 50 lbs., \$2.75; 100 lbs., \$5.00. Bags extra as below.

4569—Superior: Price, not prepaid: 15 lbs., 95c; 50 lbs., \$2.60; 100 lbs., \$4.75. Bags extra as below.

EARLY FORTUNE

An extra early variety. It is claimed to be rust-proof and that chinch bugs will not eat the plant. The seed is of a beautiful red color, and is two or three times the size of German Millet. Not a good variety for hay.

This variety heads in from 25 to 35 days. It gives a large yield of seed, which can be fed to cattle, poultry and hogs without injury.

4574—Radium: Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; 15 lbs., \$1.10; 50 lbs., \$3.25; 100 lbs., \$6.00. Bags extra as below.

4573—Superior: Price, not prepaid: 15 lbs., \$1.05; 50 lbs., \$3.00; 100 lbs., \$3.75. Bags extra as below.

JAPANESE

It grows from 4 to 6 feet high, stands up remarkably and yields large crops. When cured it makes good hay and in quality is superior to corn fodder. It is relished by all kinds of stock. It may be sown broadcast at the rate of 20 pounds per acre, but it is better to sow in drills 12 to 18 inches apart, using 15 lbs. to the acre.

4583—Choice: Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; 15 lbs., 83c; 50 lbs., \$2.10; 100 lbs., \$3.75. Bags extra as below.

Bags extra on above: Jute, 25 to 50 lb. size, 25c; 60 to 125 lb. size, 35c. Cotton, 50 lb. size, 30c; 60 to 125 lb. size, 55c.

GERMAN

The German Millet grows very rank, generally three to four feet high, and is one of the best varieties for hay, being sweet, palatable and milk producing. The hay may seem coarse, yet it is very tender if cut at the right time, which is when in full bloom, and cows, horses and other farm stock are all exceedingly fond of it.

4572—Radium: Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; 15 lbs., 90c; 50 lbs., \$2.25; 100 lbs., \$4.00. Bags extra as below.

4577—Superior: Price, not prepaid: 15 lbs., 85c; 50 lbs., \$2.10; 100 lbs., \$3.75. Bags extra as below.

COMMON

Grows usually from 2 1/2 to 3 feet high and makes excellent hay. It is a very early variety with tender stems and leaves. Does especially well on dry and light soils. Its luxuriant growth and quick maturing propensities make it one of the best millets for covering shortages in the hay crop and for smothering weeds.

4566—Radium: Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; 15 lbs., 85c; 50 lbs., \$2.10; 100 lbs., \$3.75. Bags extra as below.

4565—Superior: Price, not prepaid: 15 lbs., 75c; 50 lbs., \$1.95; 100 lbs., \$3.50. Bags extra as below.

SIBERIAN

Extremely hardy; a very heavy yielder, and generally considered a good sort.

4591—Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; 15 lbs., 95c; 50 lbs., \$2.60; 100 lbs., \$4.75. Bags extra as below.

BROOM CORN OR HOG

This Millet does not grow very tall and is, therefore, not much used for hay, but it yields enormous quantities of seed which makes good feed for swine and other stock. It also makes fine feed for poultry and young chicks. It will mature about two months from sowing. It is yellowish white. The heads resemble Broom Corn when growing, hence the name.

4562—Radium: Lb., 20c, postpaid. Price, not prepaid: Lb., 15c; 15 lbs., 85c; 50 lbs., \$2.10; 100 lbs., \$3.75. Bags extra as below.

SALZER'S

Sudan Grass

Haven't you a few acres on your farm upon which you would like some hay that can be raised quickly and easily and that will give you 4 to 8 tons of cured hay per acre? Plant Salzer's Sudan Grass Seed! The drier and hotter the weather, the more will you be surprised at the wonderful yield. Salzer's Sudan Grass is one of the most prolific hay crops ever grown; in the South it gives three crops and in the North, two crops of hay a season. A surprisingly rapid grower, and as a catch crop fully equal to Millet. Sudan grass is used for pasture, ensilage and soiling as well as for hay. It does best on a rich loam soil, but it has been grown successfully on almost every class of soil from a heavy clay to a light sand. It is a sweet, heavy-yielding grass; absolutely drought proof; stock of all kinds eat it greedily, often in preference to Alfalfa; it analyzes over 9 per cent protein. In purchasing Sudan Grass, insist upon Salzer's—Salzer's is free from Johnson Grass, which is hardly distinguishable from Sudan Seed. The original seed was introduced from Khartum, Central Africa, about twelve years ago, and its wide use today is almost phenomenal, indicating the extreme satisfaction it has been giving everywhere.

AS A HAY CROP it ranks exceptionally high, chemical analysis showing it of the same value as Timothy or Johnson Grass. It equals Millets and yields more. Easy to cut with mower and cures readily. Cut just after full bloom. Cut again when high enough. For soiling and silage it is splendid. Mixed with soy beans or cow peas, it makes exceptionally good silage.

CULTURE: Should not be planted until the soil has become warm in spring. It can be sown at any time in summer 70 to 75 days ahead of frost. Sown in rows from 14 to 18 inches apart, it takes 5 pounds per acre; on good soil where there is plenty of moisture it is also sown broadcast or drilled in, and then 15 (some say 20) pounds of seed are required per acre. (See illustration.)

4530—Lb., 30c postpaid. Price, not prepaid: Lb., 25c; 15 lbs., \$2.90; 25 lbs., \$3.25; 50 lbs., \$6.00; 100 lbs., \$11.50. Bags extra as below.

SALZER'S TEOSINTE

A heavy yielding and luxuriant fodder plant containing a considerable amount of sugar. Especially adapted for the South. Georgia reports 38,000 lbs. of green forage per acre, Mississippi 44,000 lbs. The heavy rain falls in the northern tier of states have given it quite an impetus in these states where extremely large crops have been the rule. Quite often a single kernel will produce upwards of 50 stalks. If cut when it reaches 4 to 5 feet in height it makes excellent fodder and will produce a second crop fully as large as the first. If left to grow until September or October, it furnishes excellent material for the silo in much greater amounts than most any other forage crop. Sow in hills 4 to 5 feet apart each way about corn planting time.

4711—Oz., 15c; ¼ lb., 30c; ½ lb., 50c; lb., 85c; 2 lbs. (sufficient for one acre), \$1.65, postpaid. Price, not prepaid: Lb., 70c; 10 lbs., \$6.50; 25 lbs., \$16.25; 50 lbs., \$36.00; 100 lbs., \$55.00. Bags extra as below.

BERMUDA GRASS OR SOUTHERN BLUE GRASS (*Cynodon dactylon*)

This is a perennial grass of creeping habit; very valuable for the southern states, as it withstands drought better than most varieties. It has long, creeping stems which root at the joints and cover the ground with strong matting of fine turf. This has caused it to be sown largely for the purpose of binding drifting sand and for steep embankments subject to wash. It is a splendid pasture grass, furnishing excellent summer pasture when most other grasses are burned out, and the grazing and tramping of stock does not impair it. It is of no value for the northern states north of Virginia. Sow in spring at the rate of 3 to 5 pounds per acre.

4501—Lb., 45c, postpaid. Price, not prepaid: Lb., 40c; 15 lbs., \$5.75; 50 lbs., \$17.75; 100 lbs., \$35.50. Bags Free.

SALZER'S RENOVATOR GRASS MIXTURE

In Salzer's Renovator or Quick Results Grass-Mixture we have something that, we believe, for results and permanency has no superior. It is composed, among others, of such ingredients as Crimson Clover, Italian Rye Grass, Tall Meadow Oat, Kentucky Blue, Orchard Grass, Meadow Fescue, English Rye, Timothy, Brome Grass, Red Top, Dogstail, Alsike, White, Red and other Clovers and Grasses. It is a mixture that has proven itself immensely popular, and we believe that whoever uses it for Meadow or Pasture, either for renovating his pasture or sowing alone, will get big results. For the laying down of a new Pasture or Meadow, sow 20 lbs. per acre. For renovating pastures, sow at the rate of 10 lbs. per acre.

4546—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; 15 lbs., \$2.80; 50 lbs., \$8.50; 100 lbs., \$16.50. Bags Free.

Bags extra: Jute, 25 to 50 lb. size, 25c; 60 to 100 lb. size, 35c. Cotton, 50 lb. size, 30c; 60 to 125 lb. size, 55c.

Salzer's Sudan Grass

SALZER'S PENCILARIA

It should be planted six inches apart in the row and the rows about three and one-half feet apart. Cultivate two or three times if possible, and by that time you will be pleased at its luxuriance. It will average thirty rich, juicy, leafy stalks to the plant, which will be covered with seed heads ten to fifteen inches long. Sow same as early as you would Corn. The usual way of growing it, however, is to mow same when three to six feet high, and it will immediately start again, and can be cut a number of times during the season. Every farmer who keeps cows, horses and hogs should try it if they wish to grow an immense crop of fodder cheaply on a small piece of ground. Sow in drills about five to six lbs., or broadcast, eight lbs. per acre.

4461—Lb., 30c, postpaid. Not prepaid: Lb., 25c; 10 lbs., \$2.00; 50 lbs., \$9.00; 100 lbs., \$16.50. Bags extra as below.

Salzer's Laugh and Grow Fat Hog Pasture Mixture

Introduced by us over fifteen years ago this splendid mixture sprang into instant popularity and it is just as much in demand today as it ever was. Of course there's a reason. Careful and particular buyers, accustomed to quality, insist upon Salzer's Seeds, and nowhere is Salzer Quality better evidenced than in this fine Pasture Mixture.

One of the most vexing questions with every farmer during the summer months is a rapid meat producing hog pasture. In our Laugh and Grow Fat Hog Pasture we have a mixture so balanced to increase flesh that farmers cannot afford to be without it. In other words, if you do not sow this mixture you lose many times more than the purchase price. The hog by nature being a grazing animal must have plenty of pasture, and are stronger and healthier than if fed on grain alone.

The "Laugh and Grow Fat Mixture" contains generally among others the following: Billion Dollar Grass, Turnips, Amber Cane, Cow Peas, Velvet Bean, Soy Beans, Speltz, Field Peas, Rape, Vetches, Oats, Rye, Millet, Timothy, Giant Incarnat Clover, Rye Grass, etc. It is well in ordering this Mixture to tell us whether you want it for early or late planting and the condition of your soil. (Sow 20 to 50 lbs. per acre.) This mixture consists of annual fodder plants, many of which grow abundantly as fast as fed down; it gives per acre 3 or 5 times as much as any other pasturage. Owing to the great variety of plants it is composed of, it is more greedily eaten than other forage, not only by hogs, but also by all other live stock, such as sheep, cows and horses.

4549—Not prepaid: 25 lbs., \$1.35; 50 lbs., \$2.50; 100 lbs. (will do for 3 acres), \$4.50.

SALZER'S PERMANENT MEADOW AND PASTURE MIXTURES

To meet the demands for permanent meadows and pastures that will furnish the greatest amount of forage, and at the same time a crop that will make a continuous growth throughout the season, and to meet the various conditions of climate, soil, etc., we are prepared to blend mixtures that will suit your very own land. Some seeds do better on moist land, others on dry land, some at a high, and others at a low, altitude. We make up special mixtures to fit your need, and if one for a pasture or a meadow is required, write us and let us quote you prices. When writing us, state the kind of soil, whether heavy, medium, light, rich, moist, peaty, marshy, whether overflooded part of year, whether woodland, sandy, etc. Nothing but pure fresh seeds go into these mixtures. You will need about 25 pounds seed per acre.

ITALIAN RYE GRASS

Is extensively used for seeding in pastures where clover and timothy have died out.

The amazing manner in which it thrives under the close cropping of all kinds of stock is remarkable. The Italian Rye Grass is a strong grower, arrives at maturity sooner, has a greater abundance of foliage, which is broader and of a more lively green color, grows considerably taller, is more upright; its spikes are longer and upon the whole, produces more than the English Rye Grass. It should be cut for hay when heading out.

4474—Radium. Lb., 30c, postpaid. Not prepaid: Lb., 25c; 15 lbs., \$2.90; 50 lbs., \$8.25; 100 lbs., \$16.00.

ENGLISH OR PERENNIAL RYE GRASS

One of the best grasses for permanent pastures. It produces nutritious grazing and compact sod. Sow about 25 pounds per acre.

It is found to flourish on all kinds of soil, even growing with thrift on upland situations. On rich and moist soil to which it is best suited, it gives remarkably heavy crops. It grows with rapidity reaching a stage of perfection and producing in its first year a growth of herbage in great abundance.

4479—Radium. Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; 15 lbs., \$3.00; 25 lbs., \$4.75; 50 lbs., \$9.00; 100 lbs., \$17.00.

SALZER'S ORCHARD GRASS (*Dactylis Glomerata*)

An exceptionally valuable grass for pasture or hay land, and on account of its earliness very valuable for a permanent pasture. It furnishes green grass very early in spring and until late in the fall. When closely cropped it grows up quickly and is ready for grazing again in a short time. When grown for hay, more than one crop can be obtained in one season, and when only one crop is cut the aftergrowth is very heavy and gives splendid and rich pasture till late in the fall.

4489—Radium. Lb., 35c, postpaid. Not prepaid: Lb., 30c; 15 lbs., \$4.20; 25 lbs., \$6.50; 50 lbs., \$12.50; 100 lbs., \$24.00.

4498—Superior. Lb., 35c, postpaid. Not prepaid: Lb., 30c; 15 lbs., \$3.90; 25 lbs., \$6.00; 50 lbs., \$12.00; 100 lbs., \$23.00.

(*Festuca pratensis*) MEADOW FESCUE (*English Blue or Randall Grass*)

It is well suited to a wide range of soils, does well on loamy clay and gravelly soils, and thrives on heavy black loam, strong, and low lying soils; in wet places in a pasture, where Timothy, Red Clover and Kentucky Blue Grass fail, Meadow Fescue will keep these places productive. It is not adapted to light, sandy soils.

It lives longer than most other kinds of grasses, and although it produces the first year a good crop of hay or pasture, it does not reach the highest stage of growth until second and third year, and for this reason it is exceptionally well adapted for permanent pastures and meadows. On soils which are too shallow and where the presence of hard pan prohibits the successful culture of Alfalfa, this grass should be sown in place. Matures at the same time as Timothy and Red Top and Alsike Clover and for meadows these varieties are often grown together. Grows 2½ to 3 feet high, roots out well, but never grows in tufts. It blooms in June and July. Sow 20 to 25 pounds per acre.

4484—Radium Brand: Lb., 35c, postpaid. Price, not prepaid: Lb., 30c; 15 lbs., \$3.25; 25 lbs., \$4.90; 50 lbs., \$9.25; 100 lbs., \$17.50.

SHEEP'S FESCUE (*Festuca ovina*)—It has a tufted habit of growth; is short, with upright leaves. It is particularly relished by sheep, hence the name. It prefers light, sandy soil and dry uplands; is not affected by drought.

4516—Lb., 65c, postpaid. Price, not prepaid: Lb., 60c; 10 lbs., \$5.50; 100 lbs., \$49.00.

TALL MEADOW OAT GRASS (FRENCH RYE GRASS)—Can be cut several times and does well if sown alone. Makes good hay, is natural to sandy loams, but thrives best on strong clays. It is a very hardy grass and endures much heat and cold. Possesses the advantages of early, quick and late growth and is fine for pasture.

4520—Radium. Lb., 45c, postpaid. Not prepaid: Lb., 40c; 15 lbs., \$5.25; 25 lbs., \$7.90; 50 lbs., \$15.25; 100 lbs., \$29.00.

JOHNSON GRASS (*Holcus Halcensis*)—Does magnificently in the North. Produces about 5 tons of grass per acre, and this all inside of six months. In the South it is hard to keep it in bounds, and to eradicate it when once established, but it nevertheless makes good hay and can be relied upon to produce a good crop during the hottest and driest seasons. Frost kills it in the North during winter.

4506—Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; 10 lbs., \$2.00; 25 lbs., \$4.25; 50 lbs., \$7.75; 100 lbs., \$14.50.

RED FESCUE (*Festuca rubra*)—Splendid for dry, sandy soil and suitable for lawns. Withstands more shade than most grasses, hence valuable for shady lawns.

4512—Lb., 85c, postpaid. Price, not prepaid: Lb., 80c; 25 lbs., \$16.00; 100 lbs., \$37.50.

CRESTED DOGSTAIL (*Cynosurus cristatus*)—Very valuable for dry lands and sheep pastures, also splendid for lawn.

4503—Lb., 65c, postpaid. Price, not prepaid: Lb., 60c; 10 lbs., \$5.00; 100 lbs., \$45.00.

ROUGH-STALKED MEADOW (*Poa trivialis*)—Valuable for pastures and meadows, particularly on damp soil and sheltered situations, producing a constant supply of nutritious herbage, greatly liked by cattle.

4514—Lb., \$1.00, postpaid. Price, not prepaid: Lb., 95c; 10 lbs., \$9.00; 100 lbs., \$85.00.

BAGS FREE. WEIGHED IN ON ALL SEEDS LISTED ABOVE

SALZER'S NORTHERN GROWN TIMOTHY

Timothy is the king of all grasses in our country! As a hay crop it has long been the standard and it is adapted to a wider range of conditions and is grown over a wider area than other grasses. Roughly speaking, it is grown principally in the upper half of the country; it does not thrive in the hot climate of the South nor in the arid regions of the West. No other variety of tame grass will stand the extremes of climate as well as Timothy, or compare with it in average yields or feeding value. It produces one of the best qualities of hay; it stools out and forms compact stools of broad leaves; it does not produce creeping stems or runners. It luxuriates on clay or moist soil and is unsurpassed on peat, but it is not so well suited for light sandy soils. Height 2 to 4 feet. May be sown in the early fall or in spring. If sown alone, sow 6 to 10 pounds per acre. Don't buy any timothy seed just because it's cheap. It doesn't pay, Mr. Farmer! Salzer Quality means good, pure, clean, fresh northern grown seed and in the end, such seed is many more times less expensive than the cheapest seeds you can buy. Salzer's Timothy means 50 years of integrity back of it and means splendid crops.

4717—Radium: Lb., 30c, postpaid. Not prepaid: Lb., 25c; 15 lbs., \$1.90; 50 lbs., \$5.25; 100 lbs., \$9.90. Bags extra as below.

4716—Superior: Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; 15 lbs., \$1.80; 50 lbs., \$5.00; 100 lbs., \$9.50. Bags extra as below.

(Certified Quack Free)
(*Bromus Inermis*)

SALZER'S BROME GRASS (Bags Free)

This exceptionally valuable grass will bear out every word of praise we give it. Best for permanent pasture. The best of grasses for dry soils. It is a grass for the desert, a grass for the drought-stricken countries, the grass for each and every state of the United States; in fact any and everywhere, and it does well on soil where there is plenty of moisture. Brome Grass is one of our hardiest perennial grasses; no amount of cold will kill it. It withstands the severest drought, and water may stand on it for weeks without injury.

It roots deeply, often 4 to 6 feet and thereby improves greatly the physical condition of the soil; growing on good soils where large yields of cured hay are harvested, and also good returns are obtained on poor, sandy land where timothy is frequently a failure. As a pasture grass it is of special value, staying green and succulent during summer and enduring the close cropping of cattle, horses, sheep and hogs. The chemical analysis shows it extremely rich in flesh producing, milk-increasing ingredients.

4319—Radium: Lb., 30c, postpaid. Price, not prepaid: Lb., 25c; 15 lbs., \$2.50; 25 lbs., \$4.00; 50 lbs., \$7.50; 100 lbs., \$14.50.

(Solid Seed) **RED TOP** (*Agrostis Vulgaris*)

Has frequently been said of Red Top that as a grass it is more useful than any other. As a permanent pasturage it is especially valuable. As a mixture with clover, timothy, brome, or blue grass it flourishes everywhere.

A very hardy native grass, probably the most perennial grass we have. It would answer well to sow Red Top separately on moist lands where old grass has run out or become mossy; on such places it would fill the soil with numerous roots. Does well on moist, undrained soils, liable to occasionally overflow. Red Top accommodates itself to a variety of soils, even to quite dry situations. Attains a height of 2 to 2½ feet. It is of slender growth and rather fine foliage and throws out slender, spreading heads. It is a very nutritious grass and relished by stock.

Salzer's Radium Clear Red Top is free from chaff. Sow Clear Red Top at the rate of 8 to 12 pounds per acre.

4495—Radium: Lb., 40c, postpaid. Not prepaid: Lb., 35c; 15 lbs., \$4.25; 25 lbs., \$6.00; 50 lbs., \$11.00; 100 lbs., \$20.00.

4494—Superior: Lb., 40c, postpaid. Not prepaid: Lb., 35c; 15 lbs., \$4.00; 25 lbs., \$5.75; 50 lbs., \$10.50; 100 lbs., \$19.00.

Bags extra as below

(Bags Free) **SALZER'S KENTUCKY BLUE GRASS** (*Poa pratensis*)

This grass is one of the first to start up in the spring and is still green when the snow flies in the fall. Uninjured by extremes of cold, heat, wet or drought, its hardness and ability to withstand tramping of hoofs have made it particularly valuable everywhere, consequently, it is now very extensively grown. It is easy to start, easy to grow and to establish pastures of the green verdure that will give highly profitable returns. The roots are so thick and stout that the tough sod thus formed makes an almost everlasting sward that permits of very heavy pasturing, year in and year out. Its feeding value is exceptionally high, as it makes one of the best, sweetest and most nutritious pastures, or hay crops that can be grown. For lawns it will produce one of the most beautiful, thick, velvety carpet-like swards imaginable.

4479—Radium: Lb., 45c, postpaid. Not prepaid: Lb., 40c; 15 lbs., \$5.75; 25 lbs., \$8.75; 50 lbs., \$17.00; 100 lbs., \$32.50.

4478—Superior: Lb., 45c, postpaid. Not prepaid: Lb., 40c; 15 lbs., \$5.65; 25 lbs., \$8.50; 50 lbs., \$16.50; 100 lbs., \$31.50.

5 Lbs. Sows One Acre **RAPE** (*Brassica Napus*)

DWARF ESSEX RAPE

One of the most valuable of forage crops and the greatest late season crop that can be grown. May be sown any time from early spring until August and is a success on nearly every soil in the United States and Canada. Pasturing hogs is the cheapest way of producing pork, and for the purpose, Rape is absolutely unexcelled. It thrives splendidly in cool weather. Sixty bushel of oats and 18 ton of rape per acre have been grown, without interfering with the harvesting of the oats, and the rape afterwards producing 18 ton of forage.

Salzer's Dwarf Essex is genuine Holland grown—grown on our own farms in Holland and imported. Quality is the basis. In purchasing rape, you should be governed by the final returns to you, and not by the initial cost. Sow 5 lbs. per acre.

4666—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 10 lbs., \$1.35; 50 lbs., \$5.00; 100 lbs., \$9.00. Bags extra as below.

SALZER'S DWARF VICTORIA

By planting Salzer's Rape Seed, you can secure two crops from the same land; it produces pasture weeks after all other forage plants have been killed by frost; it is better than any other forage for hogs and sheep; it is a succulent, nutritious food for all live stock; sown in corn at the last cultivation it will produce a growth of 15 to 20 inches of the finest forage; it gives you large yields at low costs; it is indispensable to live stock raising.

Salzer's Dwarf Victoria is a fine, bushy Rape, rich and succulent. Genuine Holland grown. The price is a little higher, but its returns in dollars are big.

4667—Lb., 25c, postpaid. Not prepaid: Lb., 20c; 10 lbs., \$1.50; 50 lbs., \$5.50; 100 lbs., \$9.75. Bags extra as below.

Bags extra: 1 bu. or 50 lb. size, 30c; 2½ bu. or 60 lb. size, 55c, on above seeds except where noted.

15 to 20 lbs. sow one acre

Alfalfa (Lucerne)

INOCULATE THIS
SEED WITH
HUMOGERM

SALZER'S NORTHERN GROWN

Alfalfa is the principal leguminous forage crop on all continents of the world. It is the greatest money crop in the United States, making it possible to grow a greater number of hogs, horses, cattle, and sheep than ever before. Alfalfa is a soil-builder and a soil-enricher; the roots often reach a length of 16 feet and more. The root system loosens the soil for the roots of the next crop and brings the phosphorus and potash to the surface of the soil, and the plant absorbs nitrogen from the air and stores it in the ground.

However, success with alfalfa depends somewhat upon the grower. It gives best results on deep, loose, open, friable soils. Drained bottom lands are good, but lands slightly rolling or level and well drained are best—it requires the richest and best drained soil on your farm. It will not grow on acid soil. If your soil is acid, lime it with 1 to 2 tons lime per acre before planting Alfalfa. If a weedy field must be plowed several months before seeding, and several crops of weeds destroyed by harrowing. The seed bed should be worked into a fine state of cultivation and any extra work in this respect will more than repay you by the extra yield, for one of the first considerations is to get rid of the weeds. For best results, inoculate your seed—the cost is nominal and your seed must be pure, clean, and unadulterated. Salzer's Northern Grown Seed is the finest quality and the very best that you can buy. Sow 15 to 20 pounds per acre between May 15th and June 15th, covering $\frac{1}{2}$ inch deep on clay, and 1 $\frac{1}{2}$ inches deep on sandy soil. In some sections it can be planted in April. Sowing with a nurse crop is popular and beardless barley, wheat, and rye are better for the purpose than oats. In using a nurse crop, the Alfalfa and grain should be sown separately and not first mixed. In cutting for hay, the best time is just as the young shoots of the second crop are commencing to start.

Salzer's Northern Grown Alfalfa can be grown in every state in the Union; it will grow three to five crops a year; produces 3 to 7 tons hay per acre; it furnishes more feed per acre than any other forage; in money value it is worth more than clover or timothy; it enriches the soil and the long roots act as a subsoiler. Prepare your seed bed carefully, have sweet, rich, well drained soil, plant the best seed possible, Salzer's, and once grown on your land, you will never again be without Alfalfa. Never sow Alfalfa on low, flat, wet soils.

4213—RADIUM. Price: Lb., 40c, postpaid. Price, not prepaid: Lb., 35c; 15 lbs., \$4.75; 25 lbs., \$7.25; 50 lbs., \$14.00; 100 lbs., \$27.50.
4212—SUPERIOR. Price: Lb., 40c, postpaid. Price, not prepaid: Lb., 35c; 15 lbs., \$4.50; 25 lbs., \$7.00; 50 lbs., \$13.50; 100 lbs., \$26.50.
Bags extra as mentioned below

SALZER'S GRIMM

This variety is considered the hardiest of all the alfalfas, due mainly to its branching or lateral root system. It is grown extensively in Montana and Dakota, where the most extreme conditions of heat, drought, and cold exist. One hundred degrees in summer and 50 degrees below in winter without damaging the Alfalfa! No matter where you live you can grow Salzer's Grimm Alfalfa. Never winter-kills, no re-seeding, always makes a crop, the older it is the better it gets. Our seed is pure, grown in cold Montana and the cold Dakotas. Alfalfa grown there will also grow anywhere else where sown.

4203—Certified Grimm, lb., 60c, postpaid. Price, not prepaid: Lb., 55c; 5 lbs., \$2.85; 10 lbs., \$5.50; 50 lbs., \$25.00; 100 lbs., \$48.50.
Bags extra as mentioned below.

4207—Radium Brand Montana or Dakota Grimm, lb., 55c, postpaid. Price, not prepaid: Lb., 50c; 10 lbs., \$4.50; 50 lbs., \$20.00; 100 lbs., \$38.50. Bags extra as mentioned below.

SALZER'S VARIEGATED ALFALFA

(Canadian Grown)

This seed is of somewhat the same type as Grimm, being more or less variegated, and the crop would pass for that variety. Our trial plots show a very decided healthiness of growth and stand of plants. The seed is strictly high grade, pure, clean, strong, Canadian grown. Harder seed cannot be obtained. Growers preferring Grimm, but hesitating at the price, will make no mistake in securing this variety.

4218—Radium Brand: Lb., 60c, postpaid. Not prepaid: Lb., 55c; 5 lbs., \$2.60; 10 lbs., \$5.00; 50 lbs., \$23.50; 100 lbs., \$45.00.
Bags extra as mentioned below.

DRY LAND

Dry Land Alfalfa Seed has a decided superiority in its ability to withstand the melting rays of the hot sun for months at a time, when many others would wilt and drop.

4210—Price of Radium Montana Dry Land Alfalfa: Lb., 45c, postpaid. Price, not prepaid: Lb., 40c; 15 lbs., \$6.00; 50 lbs., \$16.25; 100 lbs., \$29.50. Bags extra as mentioned below.

GIANT ANNUAL HUBAM CLOVER

ACCOMPLISHES IN ONE YEAR WHAT OTHER CLOVERS DO IN TWO

It has practically all the merits of other clovers with the added advantage of producing its maximum value the first year. Grows from five to ten feet in height one season. Accomplishing in approximately three months what other clovers do in one year. Produces two crops or more season while Alfalfa, Medium or Mammoth Clovers grow but five to fifteen inches the first season. Unexcelled as a hay crop in yield and value. Stands out pre-eminently as a soiling crop. Permits of a shorter rotation than other clovers. Do not let the price of the seed deter you from sowing one or more acres, but bear in mind its enormous growth.

4232—Radium. Lb., 75c, postpaid. Not prepaid: Lb., 70c; 5 lbs., \$2.75; 10 lbs., \$3.00; 25 lbs., \$11.50. Bags extra as mentioned below.

BAGS EXTRA ON ABOVE: COTTON, 1 BU. SIZE, 30c; 2 $\frac{1}{2}$ BU. SIZE, 55c

SALZER'S LISCOM

Liscom Alfalfa was named after G. W. Liscom, who had a ranch on the Tongue River, in Custer County, Montana. He planted this alfalfa there some forty years ago. His first field, which is some 30 acres large, is still standing and is more than forty-three years old. This probably is the oldest field of alfalfa in the state of Montana. Withstands the extremes of temperatures of 40 degrees below zero in winter and 100 degrees above zero in summer. It has yielded big crops of hay every season, and is now still in first-class condition. Our seed is grown in Montana and Dakota.

4208—Radium Liscom: Lb., 50c, postpaid. Price, not prepaid: Lb., 45c; 5 lbs., \$2.10; 15 lbs., \$6.30; 25 lbs., \$10.00; 50 lbs., \$19.00; 100 lbs., \$36.50. Bags extra as mentioned below.

SALZER'S COSSACK

Introduced from the Cold, Dry, Arid Steppes of Russia

Vice-Director N. E. Hansen, of the S. D. Agricultural Experiment Station, says:

"I ask the farmers to believe only what they see with their own eyes. 1. That the Cossack Alfalfa is perfectly hardy. 2. Recovers quickly after cutting. 3. Is remarkable for its abundant leaves, which is the most important part of any Alfalfa plant. 4. Yields abundantly both of hay and seed. 5. Is of wonderfully strong and upright growth. 6. Two to three lbs. sow one acre. The Cossack has made good in severest tests as to hardiness and drought resistance."

Our seed is grown in Dakota and is the seed for arid, upland, high altitudes and drought stricken districts.

4205—Radium Brand: Lb., 80c, postpaid. Price, not prepaid: Lb., 75c; 5 lbs., \$3.50; 10 lbs., \$6.50; 25 lbs., \$15.00; 50 lbs., \$29.00; 100 lbs., \$55.00. Bags extra as mentioned below.

SALZER'S WESTERN

Of strong vitality; very hardy and vigorous, withstanding cold and climatic conditions. It has proven itself perfectly hardy in Wisconsin, Minnesota, Michigan and the Dakotas, yielding in these states from 2 $\frac{1}{2}$ to 6 tons per acre. Our seed was grown in Kansas.

4222—Radium—Price: Lb., 40c, postpaid. Price, not prepaid: Lb., 35c; 15 lbs., \$4.25; 50 lbs., \$13.00; 100 lbs., \$25.50. Bags extra as mentioned below.

Experimental stations are advising against planting clover in the North and selling at cheap prices as they invariably winter-kill.

Clover

INOCULATE THIS SEED WITH HUMOGERM

Clovers are perhaps one of the most widely grown of the legumes. Clover is used as a hay, pasture, and soiling crop and is often used as green manure to plow under, as the nitrogen gathering bacteria on its roots are wonderful soil enrichers for future crops. It is the hay crop of the pioneer. The front range of the American farming in the cut-over land areas of the Northern states, and of the newly cleared lands clover often grows like a weed and yields abundantly. Clover may be grown successfully on many fields where Alfalfa fails. The production of Clover seed, due to winter injury, was relatively light in 1923, especially in Wisconsin, which has caused a somewhat higher price this season. However, in buying clovers, insist upon the best seeds. Salzer's Clover is good, pure, and healthy, and it should be the final results to you, Mr. Farmer, that should influence you in purchasing your seeds, and not the initial cost of them.

SALZER'S MEDIUM RED

Medium Red Clover is one of the most important Clovers for general use. It lives two years or more; grows about two feet high; makes two crops a year, yielding about three tons of cured hay per acre. Clover hay is very nutritious, stock fed on it requiring less grain. For soiling crops it is much used and is very valuable for green manuring, adding humus and nitrogen to the soil and thereby providing rich food for the crops which follow, saving the cost of fertilizers. It is also used as a winter manure. It does well on a great variety of soils and it thrives most luxuriantly on strong, well-drained loams. In the Northern States Red Clover is mostly sown in the spring, as early as possible.

For hay, it is often sown with Orchard and Tall Meadow Grass, as the three ripen at the same time and give a heavier yield and a better quality hay. When sown alone, sow 10 to 12 pounds per acre. The Wisconsin Seed Law requires 95 per cent purity and 90 per cent germination. Red Clover is a winter sown clover; its quality not only meets these requirements, but exceeds them.

4243—Radium. Lb. 40c, postpaid. Not Prepaid: Lb. 35c; 15 lbs., \$4.95; 25 lbs., \$7.75; 50 lbs., \$15.00; 100 lbs., \$29.50. Bags extra as mentioned below.

4242—Superior. Lb. 40c, postpaid. Not Prepaid: Lb. 35c; 15 lbs., \$4.75; 25 lbs., \$7.50; 50 lbs., \$14.75; 100 lbs., \$28.50. Bags extra as mentioned below.

SALZER'S CRIMSON OR GIANT INCARNAT

Valuable for Pasture, Green Forage, Hay and Quickly Restoring Worn-Out Soils. Forms upright branching plants, about 2-3 feet high. It roots very deeply and is a bountiful provider of nitrogen. It grows most luxuriantly on fertile soil, yet it will thrive better on thinner and poorer soil than Red Clover. It produces a good crop of Crimson Clover is equivalent to about 20 tons of stable manure per acre. It is a cheap source of nitrogen and has been used to produce a million thousands of acres of poor land.

In the northern and central states many sow in spring, as it is liable to freeze out in winter; in the southern and eastern states it is sown in fall; 12 lbs. of seed are used per acre. Should be cut in hay or before flowers commence to mature.

4228—Radium. Lb. 40c, postpaid. Not prepaid: Lb. 35c; 15 lbs., \$3.75; 25 lbs., \$5.75; 50 lbs., \$10.50; 100 lbs., \$19.00. Bags extra as mentioned below.

B ALSIKE AND TIMOTHY MIXTURE

B Alsike and Timothy Mixture contains about 50 per cent Alsike and 50 per cent Timothy; our seed is grown in this neighborhood where most of the farmers grow this mixed seed in preference to other grasses and clovers, as the two varieties are adapted for the same kind of soil, mature at the same time and produce a larger crop of hay or seed than either planted alone. If you plan to grow for hay, then the Alsike-Timothy Mixture will give you splendid satisfaction, and is much cheaper than Alsike sown alone.

It makes hay of superior quality, as Alsike and Timothy "grow hand in hand." If you desire to grow for Seed, by all means sow Salzer's Radium Alsike alone, but if you wish it for pasture or hay, use our Alsike-Timothy Mixture.

4225—Lb. 30c, postpaid. Price not prepaid: Lb. 25c; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.00; 100 lbs., \$15.00. Bags extra as mentioned below.

YELLOW SWEET

Is in great demand on account of its earliness, being about two weeks earlier than the white clover. Does not set tall, but makes just as good pasturage as the white. Produces high quality hay.

4253—(Scarified): Lb. 35c, postpaid. Price not prepaid: Lb. 30c; 15 lbs., \$3.50; 25 lbs., \$5.00; 50 lbs., \$11.00; 100 lbs., \$20.50. Bags extra as mentioned below.

SAINFOIN OR ESPARSETTE

Especially valuable for poor land and barren hill-sides, but on good land produces large, fine quantities of nutritious fodder. If wanted for hay, cut just before the flowering period. Splendid pasture for sheep, and soiling food for cattle and horses. Sow 20 to 30 lbs. per acre in spring, covering well, with or without a nurse crop.

4268—Lb. 30c, postpaid. Not Prepaid: Lb. 25c; 15 lbs., \$3.60; 25 lbs., \$5.75; 50 lbs., \$10.50; 100 lbs., \$19.75. Bags extra as mentioned below.

BAGS EXTRA ON ABOVE: COTTON, 1-BUSHEL SIZE, 30c; 2½-BUSHEL SIZE, 55c

SALZER'S MAMMOTH RED

Mammoth Red Clover is quite distinct from Medium, being larger, of coarser and more robust growth, and two to three weeks later. It is also more hardy, stands frost better and is more permanent. On rich, loamy soils it attains an immense growth, yielding much more bulk than medium clover, but makes only one crop, and pasture after that. It grows well on land too poor and on soil too low for Medium Red, and is, therefore, largely used to restore fertility to worn-out soil. It is particularly good for light soils where Medium will not do so well—Salzer's Radium strain frequently growing 4 and 5 feet tall. Mammoth Red Clover shows in every summer season, as it retains its greenness throughout the summer and furnishes a larger amount of forage.

4237—Radium. Lb. 45c, postpaid. Not Prepaid: Lb. 40c; 15 lbs., \$5.70; 25 lbs., \$8.00; 50 lbs., \$16.75; 100 lbs., \$32.00. Bags extra as mentioned below.

4236—Superior. Lb. 45c, postpaid. Not Prepaid: Lb. 40c; 15 lbs., \$5.25; 25 lbs., \$8.50; 50 lbs., \$16.25; 100 lbs., \$31.00. Bags extra as mentioned below.

SALZER'S ALSIKE

Alsike Clover is exceptionally leafy, frequently producing as much hay as Mammoth Red. It is admirably suited to the cool, cold climate of the Northwest. On many soils it produces good crops, on which Red Clover will not grow. Alsike is the most hardy of all clovers. Withstands the severest cold and does not readily winter-kill or heave out of the ground with frost, and readily recedes itself. Grows about two to three feet high. The stems are thinner than those of Red Clover and the leaves are more numerous.

This Clover prefers damp, moist, loamy soil, but it will also grow fairly well on stiff clays. Here in the Northwest it is extensively grown with Timothy. Both varieties are well adapted for this soil and they ripen at the same time. Fine for pasture on low grounds, in fact, the only clover that will not kill out on stiff soil.

Alsike does well if sown with grains in either spring or fall. Should be cut for hay as soon as it is in full bloom and for seed when two-thirds of the heads are ripe. One of the best honey-producing plants that can be grown.

4261—Radium. Lb. 35c, postpaid. Not Prepaid: Lb. 30c; 15 lbs., \$4.25; 25 lbs., \$6.50; 50 lbs., \$11.75; 100 lbs., \$22.00. Bags extra as mentioned below.

4260—Superior. Lb. 35c, postpaid. Not Prepaid: Lb. 30c; 15 lbs., \$4.00; 25 lbs., \$6.25; 50 lbs., \$11.25; 100 lbs., \$21.00. Bags extra as mentioned below.

SALZER'S WHITE SWEET

Sweet Clover is a biennial and grows in all parts of the United States; it possesses wide adaptability in regard to soil and climate than any other clover. It thrives on the poorest sandy soil and on dry hill sides, where no other clover will grow. On alkal soils sweet clover is the only plant that will grow. It makes a yield, with drought, which no other clover will make. It does not heave and frost nor red or alsike clover. Wherever it has grown it has left a rich spot, which is readily taken up by other crops. Always sow a little with all spring sown grain. It ranks as one of the highest fertilizers of the leguminous crops. Like all legumes it gathers nitrogen from the air and enriches the soil. Sweet Clover develops clusters of feebly roots which reach many feet into the ground, and which the New York Experimental Station estimated to weigh 20 tons per acre, and these long, fleshy roots decay when two years old, as soon as the seed matures.

Sweet Clover should be cut the first season when it shows the maximum growth in fall. The second year it is cut before it comes into full bloom. In the Northern States Sweet Clover is generally pastured until about July, and when stock is taken off it will grow rapidly and can soon be cut for hay or for seed. The sowing of seed is done from early spring until late fall. For the sub-soil must be very compact. Sow 15 lbs. per acre, ¼ inch deep.

4253—Radium (scarified): Lb. 35c, postpaid. Not Prepaid: Lb. 30c; 15 lbs., \$3.75; 25 lbs., \$5.75; 50 lbs., \$10.75; 100 lbs., \$20.00. Bags extra as mentioned below.

4254—Superior (scarified): Lb. 35c, postpaid. Not Prepaid: Lb. 30c; 15 lbs., \$3.60; 25 lbs., \$5.50; 50 lbs., \$10.25; 100 lbs., \$19.00. Bags extra as mentioned below.

SALZER'S DWARF WHITE DUTCH

A low, close-growing Clover; round, white heads; very fragrant; best adapted to moist soils, but succeeds also on dry land; excellent as an addition to mixtures for permanent pastures. As a bee plant it is of great value to the apiarist. It is a good fertilizer. Our Dwarf White Dutch Clover will be sufficient to sprinkle upon a lawn 20x50 feet.

4264—Radium. Per oz., 10c; ¼ lb., 30c; 1 lb., 80c, postpaid. Price, not prepaid: Lb., 75c; 5 lbs., \$3.50; 10 lbs., \$6.50.

Salzer's Northern Grown Seed Potatoes

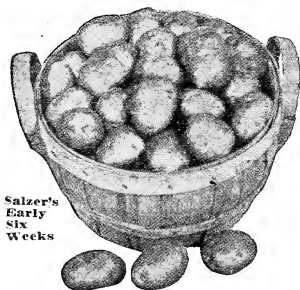

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

Salzer's Seed Potatoes are Northern Grown from selected seed stock, grown on soils that are especially well suited to each variety, producing potatoes that cannot be excelled in vigor, purity and productiveness. On our farms in Northern Minnesota we grow larger and better potatoes for seed than can be grown in other districts where the soil and climate is not so desirable for the purpose. When Salzer's Northern Grown Potatoes are planted only a short distance further south, they frequently yield double the crop of home-grown stock, even of the same variety. We urge you to place your order early. Each year we soon run out of some varieties, and by ordering early you will not be disappointed. The demand for our potatoes is increasing each year, thousands of orders being received from all parts of the country. Salzer Quality is nationally known. When buying potatoes, do not judge prices by the current prices of eating potatoes. Salzer's Seed Stocks have a value and quality distinctly their own and should not be compared with prices of lower grade potatoes.

CUSTOMERS IN THE SOUTH

We begin shipping potatoes to Texas, Alabama and the South about the fore part of January, 1924. There is no potato that does better in these states than Salzer's Early Six Weeks, Salzer's Earliest, Bliss Triumph, Irish Cobbler, Early Ohio and, for late sorts, Green Mountain, Russet Rural, and Burbank.

SALZER'S EARLY SIX WEEKS POTATO

Salzer's
Early
Six
Weeks

Salzer's Extra Early Six Weeks is our leading variety. It is perhaps the most widely known. It has a national record. Is a dependable type. Is the earliest of the large yielders. Has a reputation for reliability. Is a strain of exceptional vigor. Has a pronounced constitutional hardness. Has behind it a record for large yields. Continuous selection, roguing and improving the stock seed has produced a highly developed potato of a most vigorous type, a potato full of life and energy. A strain we consider unexcelled, and one we have always endeavored to make so early, so superior, so true to type, so strong and vigorous that its superiority will manifest itself, in the field, at harvest, on the table and as a keeper.

As the name indicates, under favorable weather, potatoes for table use can be had in six weeks from planting. It is a rapid, strong, robust grower. Grows very upright. Tubers are numerous and compact in the hill. Skin is pink and smooth. The flesh is white and cooks mealy, dry and floury. Round to oblong in shape.

One of the best market varieties; fine for long distance shipping and winter storing. (See illustration.)

Yields ranging from 200 to 300 bushels per acre have been frequently reported of this splendid potato.

Lb., 30c. postpaid. Price, not prepaid: Lb., 25c; ¼ bu., 60c; bu. (40 lbs.), \$1.60; 1 bbl. (12 pks.), \$4.65; 3 bbls., \$13.50; 5 bbls., \$21.75. Bag, 25c; Bbl, 50c extra.

EARLY EUREKA

This is an extra early potato, remarkable for its drought resistance and its ability to mature heavy yields before the hot, dry summer sets in. For an early potato it is noted for its keeping qualities. The white flesh has a delightful flavor and cooks mealy. It is almost round in appearance, similar to the Irish Cobbler, and produces uniform tubers. The skin is smooth and snowy white. Many market gardeners give this potato a stated preference over other early varieties.

The vines are wonderfully vigorous and the tubers lie close together in the hills. On account of the heavy foliage it can withstand heat and drought.

Lb., 30c. postpaid. Price, not prepaid: Lb., 25c; ¼ bu., 45c; bu. (40 lbs.), \$1.45; 1 bbl. (12 pks.), \$4.20; 3 bbls., \$12.15; 5 bbls., \$19.50. Bag, 25c; Bbl, 50c extra.

SALZER'S EARLY ROSE

Early Rose, the popular extra early potato of our father's day, is today still one of the foremost extra early potatoes and in prominence keeps pace with the times.

Carefully bred, closely rogued, rigidly cultivated, painstakingly developed, it is a vastly improved type from what our forebears knew.

It is hardly possible to grow a more dependable type than Early Rose, as its eating, keeping and yielding qualities are all one fondly wishes for.

Although somewhat reddish in appearance, the flesh is as bright as snowy white. In shape it is oblong. Fine for baking. (See illustration.)

Lb., 30c. postpaid. Price, not prepaid: Lb., 25c; ¼ bu., 50c; bu. (40 lbs.), \$1.50; 1 bbl. (12 pks.), \$4.35; 3 bbls., \$12.60; 5 bbls., \$20.25. Bag, 25c; Bbl, 50c extra.

SOW SALZER'S SEEDS

We received several prices from your potatoes. We are immensely pleased with your seed.
Mrs. E. Hartman, Harrisburg, Pa.

We just can't seem to get over the wonderful yield of fine potatoes from your Six Weeks seed.
Mrs. Harry Moorman, Brookville, Indiana.

Your Six Weeks potatoes cannot be beat for this section.
A. M. Pershall, Lakeside, Wash.

Salzer's Early Rose Much Reduced in Size

A WORD ABOUT CERTIFIED POTATOES

Potato "Certification" is an undertaking by the state to assure that the "Seed so Certified" has been grown under conditions and reached such a state of perfection as to be as near perfect in Varietal Purity (98%), Constitutional Vigor (95%), Uniformity of Size (95%), and Freedom from Disease as is possible to profitably grow and sell at a slight margin above other seed stocks. (The above per cents are the minimums, our stocks range higher.) We only issue a "Certificate" that the stock is certified. The stock is Minnesota grown.

This year we only list the following varieties of Certified Seed Potatoes: Early Ohio, Triumphs and Cobblers.

ONE TO THREE BUSHELS OF POTATOES CAN BE PACKED IN A 25c BAG

SALZER'S PEDIGREE STRAIN RED RIVER EXTRA EARLY OHIO

This splendid strain is grown at very heavy expense, but it's worth it. It is the result of many years' close, careful selection to improve the shape, develop the size, increase the yield, the strain and eliminate the deep eyes.

Into these potatoes we have bred vitality, quality, and yield, with a resultant profit to you.

The sprouts are very strong; the vines grow erect and the potatoes are very compact in the hill. Has a very smooth skin. Flesh is pure white. Unusually mealy and cooks dry and floury. Well rounded symmetrical shape and uniform size.

We recommend them for seed to such farmers who want high-class, finely selected, thoroughly bred seed potatoes; potatoes standing ready to return to the grower a large crop of fine, early, merchantable tubers—tubers of class and quality.

Lb. 30c, postpaid. Price, not prepaid: Lb. 25c; ¼ bu. 60c; bu. (60 lbs.), \$1.50; 1 bbl. (12 pks.), \$4.35; 3 bbls., \$12.60; 5 bbls., \$24.00. Bag, 25c; Bbl., 50c extra.

CERTIFIED RED RIVER EARLY OHIOS

It was the parent seed of this stock that won first prize at the Minnesota Potato Show, Duluth, Minn., and Council Bluffs, Iowa, Horticultural Show.

Lb. 30c, postpaid. Price, not prepaid: Lb. 25c; ¼ bu. 65c; bu. (60 lbs.), \$2.00; 1 bbl. (12 pks.), \$5.85; 3 bbls., \$17.10; 5 bbls., \$27.75. Bag, 25c; Bbl., 50c extra.

SALZER'S EAGLE VALLEY EARLY OHIOS

Grown in the Great Eagle Valley potato district in Minnesota.

Lb. 25c, postpaid. Price, not prepaid: Lb. 20c; ¼ bu. 50c; bu. (60 lbs.), \$1.45; 1 bbl. (12 pks.), \$4.20; 3 bbls., \$12.15; 5 bbls., \$19.50. Bag, 25c; Bbl., 50c extra.

SALZER'S EARLIEST

This potato is to be prized more for its extreme earliness than for its fine looks. It is of roundish shape, medium size and has proved immensely popular as a yielder, keeper and for its table quality. Very smooth. Medium and uniform in size. Shallow eyes. Skin pinkish. Flesh smooth white.

Lb. 35c, postpaid. Price, not prepaid: Lb. 30c; ¼ bu. 65c; bu. (60 lbs.), \$1.85; 1 bbl. (12 pks.), \$5.40; 3 bbls., \$15.75; 5 bbls., \$25.50. Bag, 25c; Bbl., 50c extra.

EAGLE VALLEY GREEN MOUNTAIN

This is a very reliable late variety. It is increasing in popularity wherever known and, in fact, in many sections it has now superseded most other main crop varieties. It thrives in all potato soils and in most all localities, yielding big crops of large, smooth, white skinned tubers of oblong to roundish form, somewhat flattened. On good soils the potatoes are all of good size, almost entirely free of small tubers. The surface is often netted, of bright appearance. Eyes are few and well distributed. The flesh is white, solid, fine grained, cooks white, dry and mealy. It has a very fine flavor. It seems to be almost entirely free of diseases, scabs, etc. Rain or shine, drouth or wet, it seems always to deliver the potatoes in the fall. The vines are large spreading, bright green, and grow very vigorously.

Lb. 25c, postpaid. Price, not prepaid: Lb. 20c; ¼ bu. 45c; bu. (60 lbs.), \$1.30; 1 bbl. (12 pks.), \$3.75; 3 bbls., \$10.80; 5 bbls., \$17.25. Bag, 25c; Bbl., 50c extra.

BURBANK

The Burbank is a creation of that California wizard who has produced such wonderful results in the crossing of vegetables. But of all the things Mr. Burbank has ever done, nothing has been of greater benefit to the world than the Burbank potato. This potato—by years of selecting and care in growing—selecting for uniformity in yield, uniformity in ripening and richness in flavor, the Burbank is today, we believe, one of the finest high quality late potatoes. Nothing excels it; when it comes to yields, it is superb. A splendid late variety. Very similar in shape to the Early Rose.

Lb. 25c, postpaid. Price, not prepaid: Lb. 20c; ¼ bu. 45c; bu. (60 lbs.), \$1.35; 1 bbl. (12 pks.), \$3.90; 3 bbls., \$11.25; 5 bbls., \$18.00. Bag, 25c; Bbl., 50c extra.

ONE TO THREE BUSHELS OF POTATOES CAN BE PACKED IN A 25c BAG

SALZER'S EAGLE VALLEY BLISS TRIUMPHS

We consider Eagle Valley Triumphs the best strain of Triumphs money can buy. Clean, fresh, plump, vigorous, fully matured stock that has strong, robust seed life.

It measures up to every requirement and has every favorable point requisite to a first class and high bred strain. It has a handsome reddish jacket. Tubers are round and of medium size. Remarkable for its uniformity. Eyes very shallow. Cooks to a dry, pearly whiteness. Has a splendid flavor. It is a potato that we can, with pride, recommend for the fastidious taste. It is as productive as any first early potato we know of.

Lb. 30c, postpaid. Price, not prepaid: Lb. 25c; ¼ bu. 60c; bu. (60 lbs.), \$1.75; 1 bbl. (12 pks.), \$5.10; 3 bbls., \$14.85; 5 bbls., \$24.00. Bag, 25c; Bbl., 50c extra.

CERTIFIED RED RIVER BLISS TRIUMPHS

Lb. 35c, postpaid. Price, not prepaid: Lb. 30c; ¼ bu. 75c; bu. (60 lbs.), \$2.15; 1 bbl. (12 pks.), \$6.30; 3 bbls., \$18.75; 5 bbls., \$31.25. Bag, 25c; Bbl., 50c extra.

SALZER'S EAGLE VALLEY IRISH COBBLERS

Eagle Valley, Minnesota, is famous for the beautiful, clean skinned potatoes it produces; its favorable soil condition is not easily found elsewhere. These fine Irish Cobblers have a clear and smooth skin; flesh is pure white, of excellent quality and always cooks mealy. A splendid early variety, maturing in about seven weeks, with tubers uniformly smooth, round, plump, and eyes strong and well developed. Cobblers do well anywhere. The vines make short, upright growth, so that the hills may be only a short distance apart. Is noted for producing few, if any, small potatoes, so that you can market the whole crop.

Lb. 25c, postpaid. Price, not prepaid: Lb. 20c; ¼ bu. 60c; bu. (60 lbs.), \$1.50; 1 bbl. (12 pks.), \$4.35; 3 bbls., \$12.60; 5 bbls., \$20.25. Bag, 25c; Bbl., 50c extra.

SCHROEDER'S CERTIFIED RED RIVER IRISH COBBLERS

Lb. 30c, postpaid. Price, not prepaid: Lb. 25c; ¼ bu. 65c; bu. (60 lbs.), \$1.95; 1 bbl. (12 pks.), \$5.70; 3 bbls., \$16.65; 5 bbls., \$27.00. Bag, 25c; Bbl., 50c extra.

SALZER'S PRIZETAKER

We think it is the finest of the reddish skinned Potatoes. It has a tremendously large demand all over the United States; if same is planted once it will seldom be omitted from the farm—owing to its superb quality and big yield. It has a magnificent, nice, large, smooth tubers with a reddish skin and white flesh, very rich and delightful flavor, splendid either for cooking, baking or slicing; indeed, it is one of the very best late all-around Potatoes known.

Lb. 25c, postpaid. Price, not prepaid: Lb. 20c; ¼ bu. 50c; bu. (60 lbs.), \$1.30; 1 bbl. (12 pks.), \$3.75; 3 bbls., \$10.80; 5 bbls., \$17.25. Bag, 25c; Bbl., 50c extra.

SALZER'S RUSSET RURAL

One of the best known, most popular late varieties of white potatoes. It is a big cropper and of fine, attractive appearance. Stands up well under adverse climate and soil conditions. Skin is of a fairly pronounced russet color.

Lb. 25c, postpaid. Price, not prepaid: Lb. 20c; ¼ bu. 45c; bu. (60 lbs.), \$1.25; 1 bbl. (12 pks.), \$3.60; 3 bbls., \$10.35; 5 bbls., \$16.50. Bag, 25c; Bbl., 50c extra.

FAMOUS EAGLE VALLEY RURAL

Thrives under varied soil and weather conditions. Its shallow eyes are few and far between. Flesh white and mealy and figuratively is scab proof and disease resistant. The skin is unusually attractive, noticeably so, almost white, and very finely netted; in fact, almost russet in appearance. We wish our customers would get acquainted with this meritorious heavy yielding late potato. Especially adapted for the northern section where it is very popular on account of its keeping qualities.

Lb. 25c, postpaid. Price, not prepaid: Lb. 20c; ¼ bu. 45c; bu. (60 lbs.), \$1.30; 1 bbl. (12 pks.), \$3.75; 3 bbls., \$10.80; 5 bbls., \$17.25. Bag, 25c; Bbl., 50c extra.

ONE TO THREE BUSHELS OF POTATOES CAN BE PACKED IN A 25c BAG

Salzer's Improved Constellation Garden Tools

PRICES ON THIS PAGE ARE F. O. B. LA CROSSE UNLESS OTHERWISE NOTED

Salzer's Improved Constellation —10 tools in one— Complete

\$15.95

Salzer's Improved Constellation Complete is a combination outfit which may be used as a hill or drill seeder, double or single wheel cultivator, plow, or hoe, as conditions require. It has all the equipment to serve you from the initial seeding to the final cultivation. Readily converted from one use to another; the change from seeder to cultivator being made by removing two red-headed bolts. One standard frame is used throughout. As a seeder, this machine opens the furrow, drops the seed, closes the furrow, packs the earth, and marks the next row—all in one operation. Seed regulator is carefully made of brass, and perfectly controls the seed flow. Sows all seeds from beans down to the finest garden seeds, in continuous drills, or hills 4, 6, 8, 10, 12 or 24 inches apart. Is adjustable to permit planting at any depth up to two inches. All of the parts are made of the best materials, carefully fitted, and attractively finished. We stand solidly behind every tool we furnish, and we guarantee them to give you satisfaction and to be just as represented. Full directions are packed with every tool.

The exceptionally low price of this high grade machine complete, makes it an unusually splendid value, one which we believe cannot be duplicated elsewhere.

1—**SALZER'S IMPROVED CONSTELLATION COMPLETE**, as illustrated above. Shipping weight, 60 lbs. Price, not prepaid, \$15.95. either in continuous drills, or in hills spaced from 4 to 24 inches apart. Can be made into a complete machine by adding the cultivating equipment. Shipping weight, 50 lbs. Price, not prepaid, \$13.10.

2—**SALZER'S IMPROVED CONSTELLATION HILL AND DRILL SEEDER**. Will sow all seeds from beans down to finest garden seeds, either in continuous drills, or in hills spaced from 4 to 24 inches apart. Can be made into a complete machine by adding the cultivating equipment. Shipping weight, 50 lbs. Price, not prepaid, \$13.10.

3—**SALZER'S IMPROVED CONSTELLATION DOUBLE WHEEL CULTIVATOR**. May be used as a double wheel hoe, plow or cultivator astride the row during early cultivation, and as a single wheel cultivator between the rows later. Adding seeder parts will make the complete machine. Shipping weight, 35 pounds. Price, not prepaid, \$8.45.

4—**SALZER'S IMPROVED CONSTELLATION DOUBLE WHEEL HOE**. For those who want a machine with the hoed only. By adding necessary parts later on, you can have the complete machine. Shipping weight, 30 pounds. Price, not prepaid, \$8.15.

5—**SALZER'S IMPROVED CONSTELLATION SINGLE WHEEL CULTIVATOR**. For the small gardener. Can be used as a hoe, plow, or cultivator, working between the rows. Shipping weight, 35 pounds. Price, not prepaid, \$8.45.

6—**SALZER'S IMPROVED CONSTELLATION SINGLE WHEEL HOE**. Hoes are the most necessary tools in garden cultivation. This single wheel tool is very popular with the small gardener. Shipping weight, 27 pounds. Price, not prepaid, \$7.15.

7—**NOTES**: With each order for vegetable seeds only amounting to \$7.50 or more, we will make you special prices on the above as follows, not prepaid: No. 1, \$15.35; No. 2, \$12.50; No. 3, \$9.35; No. 4, \$7.55; No. 5, \$7.85; No. 6, \$6.55.

PLANET JR. GARDEN TOOLS

These fine garden tools are so well known that they require no description. Circular will be sent upon request.

No. 25—**PLANET JR. COMBINED HILL AND DRILL SEEDER, DOUBLE AND SINGLE WHEEL HOE, CULTIVATOR AND PLOW**. Shipping weight, 61 pounds. Price, not prepaid, \$26.00.

No. 26—**PLANET JR. SEEDER ONLY**. Shipping weight, 40 pounds. Price, not prepaid, \$17.00.

No. 12—**PLANET JR. DOUBLE WHEEL HOE**. Shipping weight, 33 pounds. Price, not prepaid, \$13.00.

No. 17—**PLANET JR. SINGLE WHEEL HOE**. Shipping weight, 24 pounds. Price, not prepaid, \$9.00.

CAHOUN HAND SEEDER

5250—Is in a class decidedly its own. Sows all kinds of Grain and Grass Seeds, and at a common walking gait, sows from 4 to 8 acres per hour, throwing Wheat, Rye and Barley 30 feet; Hemp, 25 feet; Oats, 23 feet; and Timothy, 18 feet. The bag and hopper will hold about 22 quarts. Weight, packed, 14 lbs. Price, \$4.00.

LA CROSSE HAND SEEDER

5252—This Seeder will pay for itself in sowing five acres twice over. It was brought forward to meet the demand for a cheap, perfect Hand Seeder. Its great advantage is that it sows the ground three times in going over once, leaving no possible chance of skipping. From 10 to 60 acres can be sown in a day, according to the kind of seed used. It sows Grasses, Clovers, Grain and Ferns, throwing clover 15, timothy 10, millet and flax 18, and wheat 25 feet. Full directions accompany each machine. Weight, packed, 9 lbs. Price, \$3.25.

IMPROVED CYCLONE SEEDER

5251—The Cyclone Seeder is exactly like the La Crosse Seeder, except it turns with a crank. Sows all kinds of grain, grass and clover seed perfectly; also fertilizers, ashes, etc. The machine is supplied with a distributing wheel which scatters the seed evenly. The flow of the seed is uniform and the distribution even. Has a heavy duck hopper, holding 1/2 bushel; sows 5 acres per hour. Directions with each machine. Weight, 7 pounds. Price, \$2.00.

ACME CORN PLANTER

One of the best, handiest and quickest hand corn planters today.

Plant to any depth, and as rapid as you desire. Weight, 1 pounds.

4928—Price, each, \$1.25.

4929—With Pumpkin Seed Attachment, \$1.45.

4930—With Fertilizer Attachment, \$2.50.

LA CROSSE CORN SHELLER

With a little practice anybody can shell a bushel of corn in about 3 1/2 minutes. It is a machine we have never known to get out of order. Common sense is used. We know no one who sheller at twice the price that we would rather offer than the La Crosse. Considering the capacity, the price and durability of this sheller, no farmer who has occasion to use shelled corn can be without one. It is an indispensable farm tool, if time and money are a consideration. Weight, 10 lbs.

4941—Each, \$1.60.

4942—With Butting and Tipping Attachment. Weight, 1 pound.

25c extra.

4943—Pop Corn Attachment. Weight, 1 pound, 15c extra.

THE ACME POTATO PLANTER

5228—Anybody having from 1 to 30 acres of potatoes to plant will find the Acme will do the work better, cheaper and quicker than any other machine made.

The erect position, the carrying of the seed on the shoulder, its ease of operation, relieves the farm work of much of its disagreeableness. "Almost as easy as walking," is the remark of many who have used it. The weight of the planter is only 2 1/2 pounds. Weight, 4 lbs., packed. Price, \$1.45.

THE PEEBLESS POTATO PLANTER

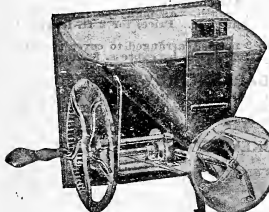

5227—It is a tubular planter, and works on the same principle as the Acme Planter. Some people prefer same on account of not having to drop the Potato so far as in the other Planter. It is a good tool, simple, strong, durable and easy to operate. Weight, 5 lbs. Price, \$1.75.

MODEL HAND CRIST MILLS

We handle three sizes of these Mills. They are made of strong and durable metal and will grind all kinds of grain. Will make fine graham flour and meal for table use, crack kernels of corn for small chicks, grind hominy, make split peas, cracked wheat, grind rock salt, dry bones and shells for poultry. They are easily adjusted to grind fine or coarse.

No.	Weight.	Capacity per Hr.	Price
5009	20 lbs.	1 1/2	\$2.95
5093	35 lbs.	1 to 2 bu.	4.95
5094	60 lbs.	1 1/2 to 3 bu.	6.75

SALZER'S IMPROVED CONSTELLATION GARDEN TOOLS ARE AN UNUSUAL BARGAIN

Acme

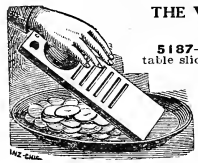

Peebles

Acme

Prices Are F. O. B. La Crosse, Wis., Unless Otherwise Noted, and Subject to Market Changes

THE VEGETABLE SLICER AND CABBAGE CUTTER

5187—Every housewife needs a vegetable slicer, hence recommend this cutter. It is strongly constructed and with ordinary care should last a lifetime. It is used for slicing cabbage, apples, carrots, cucumbers, radishes, etc. Five slices are cut with every stroke of the hand. Price, 65c, 3 for \$1.70, postpaid.

SALZER'S CONTINUOUS SPRAYER

5321—The most practical Continuous Sprayer made. All working parts are of brass—two nozzle tips, one straight and one upshoot. The siphon tube and ball check valve are removable for cleaning, repairing, etc.
Pump—1½ inches diameter, 14 inches long.
Tank—4 inches diameter, 4½ inches long. Holds 1 quart. Length over all 18 inches. Weight, 1½ lbs. Price by express, 85c.

SALZER'S MISTY SPRAYER

5329—The best selling quart size sprayer. Made of good material and carefully tested. The pump passing through the top of the can makes it very strong. By using this construction the air nozzle and spray tube are always in line.
Pump—1½ inches diameter, 14 inches long.
Tank—4 inches diameter, 4½ inches long. Lock sealed, no solder. Capacity one full quart. Length over all 21 inches. Weight, 1½ lbs. Price, 55c each by express.

LENOX IMPROVED SPRAYER

For Indoor Plants

5307—Spraying under the leaves kills the insects, removes the dust and keeps them healthy. Buy one and keep your plants clean. Weight, ¾ lb. Price, 70c. Extra bulbs, 35c each, postpaid.

SULPHUR TOBACCO SOAP

Make Tobacco soap suds and spray. Your plants will surprise you. Makes house plants bloom. Let your wife use this. Price of 3 oz., 15c; 8 oz. cake, 25c, postpaid.

SALZER'S POWDER GUN

5236—This Dust Sprayer is used throughout the entire United States for dusting Paris Green and all insecticides in their dry state. It has hardwood head block and handles, basswood sides, fine grade of leather for the bellows. By unscrewing the funnel the powder is put directly inside of Powder Gun and is kept constantly agitated by the action of the bellows, insuring a uniform discharge with each operation. Weight, 1½ lbs. Price, by express, \$1.75.

RUBBER BULB SPRINKLER

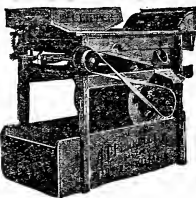

5309—For house use this is a very convenient, most sensible, easiest and handiest sprayer you can get. So simple it cannot possibly get out of order. It is used for watering plants, etc. When once used you will wonder how you got along without it. Indispensable for sprinkling plants, washing, etc. Each, \$1.50, postpaid.

LAWN MOWER SHARPENER COMPOUND

5699—Order a 50-cent can of Clover Mower Sharpening Compound, and sharpen your mower every time you use it. When applied to the cutting edges of a mower it will grind them and make a perfect job of it. Any boy, girl, man or woman can sharpen a mower with this Compound. Instructions with each can. Price, each, 55c, postpaid.

A La Crosse Lawn Six Weeks After Sowing Salzer's Radium Lawn Grass

SALZER'S RADIUM LAWN GRASS SEED

Keep your home beautiful and attractive. It is the greatest of all of our American institutions. There is nothing that will set off your home to better advantage, or cause you as much satisfaction, as a beautiful, velvety, well kept lawn. Your lawn need not necessarily be large, but however large it be, it can and should beautify your dwelling and make your home more enjoyable.

For a successful lawn, your soil should be rich, and carefully pulverized, smoothed and leveled. If your soil requires it, fertilize it with well rotted manure, or other fertilizer. Then plant vigorous, dependable lawn grass seed early enough to allow the grass to become well established before being subjected to cold weather, or to the direct rays of the hot summer sun. In spring, sow as early as possible and before a rain, and in fall, sow before the autumn rains.

Sowing Salzer's Quality Grass Seeds is a much more satisfactory way of securing a nice lawn than by using sod. Too much care cannot be bestowed upon the selection of your seed. Salzer's Grass Seeds are without exception the best that can be obtained. Hardy, northern grown, vigorous, pure, low-growing and tenacious, they cannot be excelled and being very reasonably priced, they are a real bargain. Our Radium Lawn Grass Seed is composed of varieties of grasses of unusual hardness, that have withstood extreme drought, rigorous winters, and varied soil conditions, and it invariably produces a thick, luxurious, rich green growth under the most trying conditions. Prices of high grade lawn seed must not be compared with inferior seed. The best is the cheapest in the end. Sow about 1 pound to 300 square feet; about 8 lbs. to a 50-foot lot. For renovating old lawns, about one-half as much. One pound is about 1½ quarts.

4526—RADIUM: ½ lb., 30c; 1 lb., 50c, postpaid. Not prepaid: Lb., 45c; 5 lbs., \$2.20; 25 lbs., \$9.90; 100 lbs., \$38.50.

4525—SUPERIOR: Lb., 45c, postpaid. Not prepaid: Lb., 40c; 5 lbs., \$2.00; 25 lbs., \$9.50; 100 lbs., \$37.00.

If 5 lbs. or more of any seeds are desired by mail, add postage as per zone rates page 3 to the express price.

SALZER'S SPECIAL LAWN GRASS MIXTURE

If for any reason you have been unable to get a good lawn, you should be able to obtain one by letting us give it our individual attention and making a special mixture to suit your needs. While for almost all general purposes, our grasses are unusually successful, yet extreme conditions require special care. Write us whether you have a new or old lawn, whether it is shady or sunny, level or sloping, heavy or light rainfall, mild or severe winters, whether fertilized, etc., and kind of soil. Send us a sample of your soil, if you wish. We can then send you a mixture which should give you fine results and enable you to get a good lawn.

4529—Lb., 70c; 5 lbs., \$3.15, postpaid. Not prepaid: Lb., 65c; 5 lbs., \$3.00; 10 lbs., \$5.85.

SALZER'S GOLF GRASS SEED

Athletic or sporting grounds require special grasses to withstand harsh and continuous foot wear. This seed is composed of the best fibrous, deep rooting, spreading, intermingling fine leaved, low growing grasses known for this purpose, which will produce a firm, smooth, elastic sward.

4528—Lb., 65c, postpaid. Price, not prepaid: Lb., 60c; 5 lbs., \$2.90; 10 lbs., \$5.60; 100 lbs., \$55.00.

SALZER'S SHADY PLACE GRASS SEED

We have carefully prepared this combination of grasses for sowing in shady parts of your lawn, or under large trees, etc., where the ordinary grasses will not give the best results. It will practically overcome any difficulties you may have had with shaded spots.

4527—Lb., 60c, postpaid. Price, not prepaid: Lb., 55c; 5 lbs., \$2.55; 10 lbs., \$4.85.

DWARF WHITE DUTCH CLOVER FOR LAWNS

While we do not put White Clover in our Lawn Grass Seed, we have many requests for it and recommend one ounce to each pound of lawn seed.

4249—Radium, per oz., 10c; ¼ lb., 30c; 1 lb., 80c, postpaid. Not prepaid: Lb., 75c; 5 lbs., \$3.50; 10 lbs., \$6.50.

SALZER'S LAWN FERTILIZER

5600—Odorless Lawn Fertilizer. Promotes a vigorous, healthy growth, gives the grass a rich, dark appearance. More effective than any other manure. Apply before or when seed is planted. 5 lbs., 35c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.75; 100 lbs., \$2.95; 125 lbs., \$3.25, not prepaid.

5508—Bone Meal Fertilizer. Valuable enricher of the soil. Rich in phosphate. Apply about 25 lbs. per 1,000 square feet, either as a top dressing or working in when seed is planted. 5 lbs., 50c; 10 lbs., \$1.00; 25 lbs., \$1.65; 50 lbs., \$2.60; 100 lbs., \$4.50, not prepaid.

5560—Ferd Ammonium Sulfate. Highly concentrated. Use 2 to 3 pounds (not more) per 1,000 square feet, applying on dry grass, and then sprinkling, to wash it into the soil. The increased growth will astonish you. For new lawns, work into soil when seeding. Do not apply on wet grass or wet foliage, or burning will result. Do not apply during a hot, dry spell of weather. Lb., 25c; 5 lbs., 65c, postpaid. Not prepaid: Lb., 20c; 3 lbs., 55c; 5 lbs., 80c; 10 lbs., \$1.25; 25 lbs., \$2.25; 50 lbs., \$3.50.

PLANT SALZER'S LAWN GRASS SEEDS AND HAVE THE FINEST LAWN IN YOUR NEIGHBORHOOD
